#### *Air Mails.*

10. A regular weekly air mail service operates between Karachi and London, and air mails from Ceylon are despatched by this route to the United Kingdom, Continent of Europe, Egypt, Palestine, Iraq, and Persia; the gain in time by the use of the air service to these countries over ordinary means of transport is 7 days in the case of correspondence addressed to the United Kingdom and 3 to 5 days in regard to other countries. Air mails are sent to the United States, Australia, and Dutch East Indies by the

regular weekly mail steamers to the ports of call of these countries for despatch onwards by their internal air routes; the gain in time obtained by the use of these air routes varies from 3 to 7 days. Air mail correspondence to countries in South America can also be forwarded by the regular weekly despatches to Marseilles and secure an earlier delivery up to 12 to 13 days at destination. A fortnightly air despatch is made to Kenya, Uganda, and Tanganyika by the Karachi-Mwanza air route; this despatch provides with the ordinary fortnightly mail a weekly despatch to these countries.

CYPRUS.

*Situation and Topography.*

The Island of Cyprus is situated in the eastern-most basin of the Mediterranean Sea, with Asia Minor to the north and Syria to the east, at distances of 60 and 41 miles respectively. It lies between 34° 33' and 35° 41' N. latitude, and between 32° 20' and 34° 35' E. longitude. Famagusta, with a harbour able to accommodate vessels up to 23 ft. draught, is 295 miles from Egypt, while the port of Larnaca on the southern coast is 258 miles from Port Said, and 1,117 miles from Valletta in Malta.

Its area is 3,584 square miles, equal to Kent, Sussex, and Middlesex combined. It is the third largest island in the Mediterranean, being only exceeded in size by Sicily and Sardinia. Its greatest length from west-south-west to east-north-east, between Cape Drepano and Cape St. Andrea, is about 140 miles, and its greatest breadth from north to south is about 60 miles.

The main topographical features of the island are the northern and southern mountain chains, and the great plain of the Mesaoria extending between them across the island from the Bay of Morphou to that of Famagusta. The northern range, called the Carpas Mountains, and, towards their western extremity, the Kyrenia Mountains, forms a continuous chain near the northern shore from Cape St. Andrea to Cape Kormakiti, a distance of about 100 miles. The southern range, which is the more extensive and lofty of the two, occupies the western and south-western portions of the island, and trending thence eastwards along the south coast, terminates in the isolated peak called Santa Croce (or Stavrovouni), about 12 miles west of Larnaca. The highest summit of this range is Mount Troödos, 6,406 feet above the sea level, and on its south-eastern slopes are the summer quarters of the garrison, of the Governor, and some of the principal officials.

The rivers of Cyprus are nearly all mountain torrents, dry in summer. None are navigable. The principal are the Pedias and the Idalia.

*History and Archaeology.*

The history of Cyprus is too long and eventful to be related here except in the briefest outline. Excavations have shewn that in the second millennium B.C. the island must have been an important centre of Aegean civilization, having intercourse both with Assyria and with Egypt, and at a very early date important Greek and Phœnician colonies were established in it. In the 8th century B.C. it passed under the rule of Egypt, but in 525 B.C. it joined Cambyses in his war against the Egyptians and so was absorbed in the Persian Empire. The whole island, with the exception of the Phœnician town of Amathos, took part in the Ionic revolt in 502 B.C., but the Persians recovered possession in about a year and at the battle of Salamis the fleet of Xerxes included 150 Cypriot ships. At the end of the 6th century the famous Evagoras of Salamis established his supremacy over the whole island and raised it for a brief period to a position of practical independence, but after his death it again came under the control of Persia. After the battle of the Issus, Cyprus hastened to join Alexander the Great and sent 120 ships to assist him in the siege of Tyre. At the division of Alexander's Empire, the possession of Cyprus was disputed by Syria and Egypt, but it eventually passed to the latter. In 58 B.C. it became a Roman province and was for a time joined to Cilicia, during which period it was administered by Cicero. Presented by Antonius to Cleopatra, it reverted to Rome on her death, and remained a Roman province until the division of the Empire,

when it was assigned to the Eastern Emperor. Its proximity to Syria exposed it to the assaults of the Saracens, and it changed hands more than once between the 7th and 10th centuries A.D. It was finally recovered for Byzantium by Nicephorus Phocas in 965, and remained attached to the Eastern Empire until 1184. In that year its Governor, Isaac Comnenus, revolted and declared himself Emperor of Cyprus. Isaac maintained his independence until 1191, when Cyprus was conquered by Richard I. of England in revenge for the ill-treatment of the crews of some English ships which had been wrecked on the island. Richard sold the island first to the Order of the Temple and later, when the Templars found the task of government beyond their powers, to Guy de Lusignan, King of Jerusalem. Cyprus was ruled by the Lusignan dynasty from 1192 until 1489, but during that period the Genoese Republic exercised a suzerainty over part of the kingdom, from 1373 until 1464, by holding possessions of the principal port of Famagusta. From 1489 until 1571 Cyprus belonged to the Republic of Venice. In the latter year the Turks conquered the island, and retained possession of it until its cession to England in 1878 for administrative purposes. On the outbreak of war with Turkey in 1914 the island was annexed to the British Crown by Order in Council of the 5th of November, 1914. By Article 20 of the Treaty of Peace with Turkey signed at Lausanne on 24th July, 1923 Turkey recognised the annexation.

On the 1st of May, 1925, by Letters Patent passed under the Great Seal of the United Kingdom, the island was formally elevated to the status of a Colony and the High Commissioner assumed the title of Governor.

#### *Historical Monuments and Museums.*

Bronze Age, Phœnician, Hellenic, and Roman antiquities have been found in immense quantities all over Cyprus from time immemorial, and scientific explorations on a large scale were conducted during the latter part of the last century, and even still an occasional treasure trove of importance may be found. But it is more the ambition of the present administration of antiquities to place the numerous classic sites and monuments in a condition rendering them accessible and of greater interest to the visitor than has hitherto been attempted. Paphos, Salamis, Idalion, and many other places demand attention in order to preserve their ancient character, now threatened by the island becoming once more a centre of revived life and activity. Salamis possesses the remains of probably the largest entrepot (Forum) ever built by the Romans, foreshadowing perhaps the famous "Emporium of the East" as Famagusta was called in the middle ages. A Roman temple of the largest size at Nea-Paphos lies in ruins which have never been explored (vide Hogarth's "Devia Cypria," 1899).

The Museum Nicosia, built as a memorial to Queen Victoria and much added to in recent years, contains a very magnificent collection of Cypriot pottery, stone carving, gold and metal works of art. Separate smaller collections of the medieval architectural fragments, which are always coming to light, have been formed as *Musées Lapidaires* in the principal towns.

The superb Gothic cathedrals and churches of Nicosia and Famagusta, in their curious Eastern surroundings, attract numerous visitors. These buildings, of the finest type of French medieval art, are singularly well preserved where they have been converted into mosques; in other cases they are interesting ruins.

The Venetian and Genoese Republics left few traces of their rule in the island beyond the imposing fortifications of the seaports of Famagusta, Kyrenia, and Limassol, all of which are scheduled as Ancient Monuments.

The number of Ancient Monuments in Cyprus now protected by the Antiquities Law of 1905 amounts to 58.

#### *Climate.*

The mean temperature, as recorded in the screen at Nicosia, for the last fifteen years is 66·4° Fahr.; mean maximum, 77·9°; mean minimum, 54·8°. Highest shade temperature during that time 110°; lowest 26°. Average rainfall for last ten years, 20·88 inches. The year 1930 had a rainfall of 24·14 inches. Figures for rainfall refer to the whole island. The rainy and cool season is from October to March. The climate is varied, hot and dry in the plains in summer, damp on the sea-shore; the climate on the hills inland is bracing and healthy. In winter the temperature rarely falls below freezing point. Malarial fevers are prevalent during the hot months, and, if the winter is mild, they occur throughout the year. Sanitary improvements and plantations of trees have, however, had a beneficial effect.

#### *Population.*

The population, excluding the military, in 1901 was 237,022; in 1911, 274,108; in 1921, 310,715; and in 1931, 347,433.

The Moslems, who are all Ottoman Turks, form about 18·44 per cent. of the population, the rest being nearly all Christians of the Independent Cypriote Church.

The Cypriote Church is a branch of and in communion with the Orthodox Eastern Church, but is "autocephalous" (i.e., The Archbishop of Cyprus is not subordinate to any Patriarch). This position of independence it has retained undisputed since the 5th century when the Emperor Zeno finally decided against the claims of the Patriarch of Antioch to exercise authority over it.

Christianity was originally introduced into the island by St. Paul and St. Barnabas, the latter of whom, a Cypriote Jew by birth, was martyred at Salamis.

#### *Towns.*

The chief towns are Nicosia, the capital, 23,806 inhabitants; Larnaca, 11,889; Limassol, 15,351. The two latter are open roadsteads. At Famagusta, on the east, works are now in progress as a result of which the harbour and quay space will be considerably enlarged. The inner harbour is dredged over an area of 900 feet by 600 feet, to 24 feet at low water (ordinary spring tides), with a channel of approach 250 feet wide and 26 feet deep. The curtain wall, south of Othello's Tower, has been pierced with three arches, giving access from the town to the new quay. The quay is faced with a concrete wall 900 feet long in 24 feet of water. Further accommodation for sailing vessels and local craft has been provided in a basin 450 feet long, 200 feet wide, and 15 feet deep at low water. At present the town is little more than a collection of ruins encircled by fortifications, and it has 2,104 inhabitants, nearly all Moslems, but it is now being rebuilt and opened out. Varosia, a suburb of Famagusta, has a population of 6,333, nearly all Christians. The four towns already mentioned are the capitals of four of the six

administrative provinces into which the island is divided—the other two capitals being Ktama, 4,518, the modern capital of Paphos, on the south-west, and Kyrenia, 2,078, where a small harbour has been constructed, in the district of the same name on the north coast, which has some trade with the opposite coast of Karamania. A harbour for small coasting vessels exists at Paphos, the site of the ancient capital of that district. This had become silted up and almost useless, but it has recently been dredged sufficiently to enable small sailing vessels to enter and lie in safety.

### *Industry, Trade and Customs.*

Cyprus was in ancient times famous for its copper mines, and an American syndicate is now operating on a considerable scale in the Evryghou Valley and at Cefka with a crushing plant at Morphou Bay, where steamers call and load the ore. Gypsum is exported in the form of plaster-of-paris from Larnaca and Limassol, where machinery has been set up for grinding it; from these ports it is sent monthly to Egypt, smaller quantities going to Turkey and Syria. Asbestos is found on Mount Troödos, and it is mined by the Cyprus and General Asbestos Company, Limited, capital £750,000. The Company has established also at Amiantos an asbestos brick and tile making plant, and a subsidiary Company a large steam bakery. Terra Umbra is burnt in large quantities in Larnaca and exported to Italy, the United Kingdom, Germany, and the United States of America, in both a raw and burnt condition. Chrome is being mined by two companies. A factory for the preparation of sumach has since some years been established at Limassol. The development of the silk industry received great assistance from the establishment of a Silk Filature at Yerokkipos, in Paphos, which owing to adverse conditions in the silk trade has now been obliged temporarily to close down.

The main industry of the island is agriculture, the products chiefly consisting of cereals, caroubs, wine, spirits and vinegar, tobacco and cigarettes, linseed, flax, aniseed, cumin seed, sumach, silk, silk cocoons, wool, straw, hides and skins, cotton, cotton seed, cheese, potatoes, onions, raisins, grapes, oranges, lemons, mandarines, pomegranates, peaches, apricots, cherries, plums, almonds, and hazel nuts; cattle, mules, donkeys, sheep, poultry and eggs are also exported.

Agriculture is dependent largely on irrigation, the water for which is obtained mainly from wells in the dry season and by flooding from streams during the rainy season. There are two streams which have their source in hill ranges which are tapped by drives into the hills, one at Lapidithos and the other at Kythrea. Agriculture has been greatly retarded by the deficient rainfall and the lack of water for irrigation. Boring trials have, however, revealed the presence of artesian water and irrigation schemes were contemplated, which it was hoped would contribute to the development of agriculture generally and to fruit production in particular. These schemes have had to be deferred for the present owing to the world crisis and the need for economy.

Considerable attention has been given in the last year or two to tobacco, and the Government has provided itinerant Tobacco Experts to afford instruction to the peasant growers. These efforts are bearing results, and considerable improvement has been effected in the preparation of tobacco for the market. Special efforts are also

being made in London to facilitate the marketing of tobacco and cigarettes in the United Kingdom. Similar efforts are being made in regard to flax, the cultivation of which is extending.

Cyprus wine, which has been famous from early times, has lately received a good deal of attention. It was formerly a domestic industry, and the wines produced consequently lacked uniformity in character and quality. Modern methods of manufacture have now been introduced and good light table wines are now on the market, owing mainly to the efforts of the Cyprus Wines and Spirits Co., Ltd., who have established modern wineries at Perapedhi, Mallia and Limassol. An effort is also being made to market Cyprus wines in the United Kingdom, and a Law has been enacted to prohibit the export to British Possessions of wines not coming up to the standards required. This, it is hoped, will secure recognition of the good wines produced in Cyprus and prevent the export of inferior wines, prejudicial to the marketing of the best Cyprus wines.

The improvement of agriculture is fostered by the Government by means of Nursery Gardens in suitable centres for the distribution of seeds and plants, by experimental and demonstration plots in village centres or along roadsides, by School Gardens, by itinerant agricultural experts, agricultural shows, etc. A Citrus Experiment Station and an Experimental Vineyard have already been established, the former at Famagusta and the latter at Saitta.

The Agricultural Department has an Agricultural College where courses of agricultural instruction are given to the students. Young Cypriots are sent from time to time to England for special training as agriculturists, horticulturists, entomologists, mycologists, etc.

Considerable attention is given by the Government to cattle breeding. Cyprus is famous for its donkeys and mules. The Government maintains a stock farm at Athalassa and stud stables throughout the Island. Good breeds of cattle, horses, sheep, and goats are imported for the improvement of the local breeds. Good breeds of poultry are maintained by the Government for distribution. The export of poultry and eggs is increasing, and there is considerable room for expansion.

The establishment of a weekly mail service with Egypt has led to an increased production of crops, particularly fruit and vegetables. Egypt is in fact the principal market for Cyprus produce; over a fifth of its exports go to Egypt, including a considerable export of oxen, sheep, and mules. The heavy tariff now imposed by the Egyptian Government on fruits has adversely affected the fruit export trade to Egypt during the last year or two.

In past years much injury was done to the crops by locusts, but the work of locust destruction was vigorously prosecuted for many years with great success, chiefly on what is known as the "screen and pit" system. Screens topped with American cloth, over which the locusts cannot pass, were stretched across the country in front of the armies of young locusts on the march. The locusts were then gradually forced into pits dug at intervals transversely to the screens, from which, as the pits were topped with a zinc lining, they could not emerge. This system, as the locusts became more scattered, was discarded in favour of a system of collecting locust eggs and purchasing live locusts. Both the purchase and the spraying systems have been employed in recent years. The

spraying system has latterly been replaced by the use of poisoned bran bait.

The forests of the island, which had been largely destroyed in the past, are recovering under the protection now afforded. Natural re-afforestation is very slow, partly in consequence of the depredations of goats, of which Cyprus, in proportion to its area, contains a large number, and partly in consequence of the forest fires that occur through the summer months.

Sponge fishing is carried on along the coast by boats from the Greek Islands. Sponge fishers are issued a licence at a nominal fee and the Government takes a duty in kind of 20 % in the case of harpoon boats and 25 % in the case of machine boats of the catch.

Sea fishing is comparatively neglected by the local fishermen, who only use trammel nets and long line, but Italian and Greek trawlers work most of the year and fish is becoming more plentiful in the market than heretofore.

The chief imports are cotton and woollen goods, tobacco, groceries, rice, leather, petroleum, timber, fertilisers, sugar, soap, copper and iron; the exports are chiefly cereals, cotton, carobs, silk cocoons, linseed, aniseed, raisins, fruit and vegetables, cheese, sumac, wool, wines and spirits, vinegar, flax, sesame, asbestos, gypsum, iron pyrites, chrome and terra umbra.

The Customs import duties, which are non-preferential, are mostly on a specific basis. The ad valorem duties vary from 15 to 30 per cent.

#### *Currency and Banking.*

Under an Order in Council, which came into operation on the 1st January, 1901, the following coins are legal tender currency:—Gold, the sovereign. Silver, 18, 9, 4½, 3 piastre pieces, limit of tender 540 piastres (nine equal to one shilling). Bronze, 1 piastre, half piastre, quarter piastre, limit of tender, 27 piastres (40 paras=1 piastre). By proclamation of 28th April, 1928, a new silver 45-piastre piece is current and legal tender in the colony as from that date. Currency Notes were issued from time to time from September, 1914, as a war measure. Notes of the following denominations are in circulation:—£5, £1. By an Order-in-Council of 1st November, 1928 the Treasurer as "Commissioner" of Currency was authorised to issue Currency Notes of the Government; such Notes are to be legal tender, and provision was made for the conversion of the Notes into sterling and vice versa, and for the establishment of a Note Security Fund.

The Ottoman Bank has branches at Nicosia, Larnaca, Limassol, Famagusta and Paphos, also at Troödos during summer season.

The Bank of Athens has branches at Limassol and Nicosia, with Correspondents at Larnaca, Famagusta and Paphos.

The Ionian Bank has a branch at Nicosia, agencies at Larnaca, Limassol, Famagusta and Paphos, and Correspondents at Kyrenia and Morphou.

The Bank of Cyprus, has its Head Office at Nicosia, agencies at Larnaca, Limassol, Famagusta, Paphos, Kyrenia and Morphou.

The Agricultural Bank of Cyprus, Limited, which operates under a Government Guarantee, was established in 1925, with Head Offices at Nicosia. It lends money to farmers through the medium of Co-operative Credit Societies or direct to individuals.

Other banks operating in Cyprus are Bank of Larnaca, Limited and Emnet Bank, Limited with Head Offices at Larnaca; Peoples Bank, Limassol, Limited, with Head Office at Limassol; Famagusta Bank, Limited, with Head Office at Famagusta; Popular Bank of Paphos, Limited, and Melissa Bank, Limited, with Head Offices at Paphos.

The Turkish weights and measures are in use. The oke=28lbs. avoirdupois; and the donum=about ½ acre. A law relating to weights and measures was passed in 1890.

#### *Means of Communication.*

The Government Railway from Famagusta Harbour to Nicosia (37 miles) came into use in August, 1906, was extended to Morphou (24 miles), in 1907, and to Eryrehou, in the direction of Troödos (15 miles), in 1915.

There is no navigable waterway in the island. Roads between all important places are maintained, and many villages are now connected with them by cart roads. There are motor car services between Nicosia, Larnaca, Limassol, Famagusta, Paphos, and Kyrenia, the chief towns of each district. The Famagusta harbour was completed in June, 1906. An extension of the pier at Larnaca, with a solid sheltering arm at the sea end, giving protection to small boats and lighters in all weathers, was completed in 1909. With the assistance of the Imperial Treasury this harbour is now being enlarged. The ancient harbour at Paphos has recently been dredged to a sufficient depth to admit of its use by the small coasting craft that trade between Egypt, Syria, Asia Minor and Cyprus, and the area available for such craft increased in the Kyrenia Harbour. Proposals for the improvement of the harbours at Larnaca and Kyrenia are under consideration. There are no Government telegraphs, other than those along the railway, but the Eastern Telegraph Company, Limited, maintain cables between Egypt and Cyprus and Palestine and Cyprus, and land lines connecting the six principal towns of the Island and the Troödos Government Quarters. Arrangements are being made for connecting all the principal towns by telephone. A weekly Mail Service is maintained between Egypt, Cyprus, Syria and Cilicia by subsidized steamers of the Khedivial SS. Co. Steamers of the Lloyd Triestino Company, of Trieste, call fortnightly from Egypt via Palestine, Syria and Mersina en route for Greece and Italy, and another line of the same Company fortnightly from Italy and Greece en route for Mersina, Syria, Palestine, Egypt, Greece and Italy. There is also a Lloyd Triestino Express service from Italy calling weekly

at Cyprus en route for Palestine and Syria on the outward voyage, and making calls weekly at Palestine and Cyprus on the homeward voyage. Steamers of the Messageries Maritimes call fortnightly from France via Italy, Greece and Turkey en route for Syria, Palestine, Egypt and France. Steamers of the Sittmar Line call fortnightly from Italy via Egypt, Palestine and Syria en route for Turkey, Greece, Italy and France. Mails for Arabia, North-West India, Iraq and Persia are forwarded weekly to Beyrout for onward transmission by the Desert Route (Service Trans-desertique Syro-Iraquien Damas-Baghdad); and mails destined for countries served by the England-India Air Mail service are despatched weekly to Egypt by the ordinary route for onward transmission by air.

The rates of postage are as follows:—

The Parcels Post is established between Cyprus and the United Kingdom and the principal Colonies and foreign countries, as well as within the Colony.

Money Orders and British Postal Orders are also issued and paid in the Colony. "Cash on Delivery" parcels for delivery within the Colony are accepted and delivered at the principal post offices. A reciprocal service of "Cash on Delivery" of parcels has been established between Cyprus and the United Kingdom, Egypt and the Sudan.

#### *Education: (a) Elementary.*

A general system of grants in aid of elementary schools was established in 1882, and further regulated by various laws up to 1929, when Government assumed the chief responsibility for elementary education. Teachers' salaries, gratuities and other grants are paid by Government, but the provision and maintenance of schools is met from local taxation.

For purposes of appointment and discipline teachers are under Government control.

There is a Board of Education for each religious community (i.e. Greek-Christian, about  $\frac{2}{3}$  of the population, Moslem, about  $\frac{1}{3}$ , and small communities of Armenians, Maronites, Latin Catholics and Jews), which has control of books and curriculum and decides appeals concerning the local education taxes.

The following are the latest statistics of schools and enrolments:—

*Greek Christian.*—701 schools, 23,400 boys, 16,015 girls, annual expenditure 97,874l.

*Moslem.*—268 schools, 5,303 boys, 3,531 girls, annual expenditure 26,043l.

*Other communities.*—21 schools, 596 boys, 741 girls, annual expenditure 3,365l.

#### *(b) Secondary.*

There is a Moslem Lycée for boys and intermediate school for girls in Nicosia, administered by a Governing Body constituted by law, and supported by Government and Evcaf grants and by fees.

There are 15 Greek-Christian secondary schools for boys,—5 Gymnasiums in the towns and a commercial lyceum at Larnaca, managed by local committees constituted by law; a Priests' Seminary at Larnaca, under the control of the Holy Synod of Cyprus; and 7 high schools in the larger villages; all these are supported mainly by fees and grants from municipal or Church funds; also one commercial school with private endowments.

There are 5 Greek-Christian secondary schools for girls.

There are 3 important private secondary schools open to all denominations—the English School, Nicosia, for boys, run on the lines of an English grammar school; and the 2 American Academies (for boys and girls at Larnaca, for girls at Nicosia) managed by the Reformed Presbyterian Mission.

The total enrolment in secondary schools is about 3,500.

The 2 Moslem and 3 of the Greek-Christian secondary schools provide training for elementary school teachers, for which they receive grants-in-aid.

The Secondary schools are open to Government inspection of the teaching of English, for which they receive grants-in-aid.

#### *British Occupation.*

On the 4th June, 1878, a Convention was signed at Constantinople between the representatives of Her Britannic Majesty and the Sultan of Turkey, by which England engaged to join the Sultan in defending his Asiatic possessions against Russia in certain contingencies, and the Sultan, "in order to enable England to make necessary provision for executing her engagements," consented "to assign the Island of Cyprus, to be occupied and administered by England." On the 1st of July an Annex to this Convention was signed at Constantinople, in explanation of the conditions of the occupation.

On the 14th of August, 1878, a supplementary agreement was signed, giving to Her Britannic Majesty for the term of the occupation full powers for making laws and conventions for the government of the island in Her Majesty's name, and for the regulation of its commercial and consular relations and affairs, free from the Porte's control.

The island was annexed to and became part of His Majesty's dominions by an Order in Council of the 5th of November, 1914.

#### *Government.*

Up to the 12th November, 1931, the Government was regulated by Letters Patent bearing date 10th March, 1925, providing for the administration of the Colony by a Governor aided by an Executive and a Legislative Council. The Legislature consisted of the Governor, nine official Members and fifteen elected Members, three chosen by the Mohammedan and twelve by the

non-Mohammedan voters. After the disturbances which occurred in the autumn of 1931 in various parts of the island those clauses of the Letters Patent, dated 10th March, 1925, which dealt with the constitution of the Legislative Council were revoked by Letters Patent dated the 12th November, 1931, power to legislate being vested in the Governor.

The island, for administrative purposes, is divided into six districts namely—Nicosia, Larnaca, Limassol, Famagusta, Kyrenia, and Paphos. In each the Government is represented by a Commissioner.

For judicial purposes it is divided into three judicial districts, namely the administrative districts of (1) Nicosia and Kyrenia, of (2) Famagusta and Larnaca, and of (3) Limassol and Paphos.

The Courts established by the Cyprus Courts of Justice Order, 1882 (as amended) and superseding those in existence at the time of the occupation, were reconstituted by an Order in Council which came into force on 1st October, 1927, and provides for:—

(1) A Supreme Court, consisting of five judges, two of whom are Christian and Moslem Cypriots respectively, and having power to hear criminal and civil appeals from the decisions of all other courts, including divisional courts of the Supreme Court.

(2) Three Divisional Courts consisting of one or two judges of the Supreme Court, as may be directed by the Chief Justice, and exercising the original jurisdiction conferred upon the Supreme Court to hear and determine (a) defended actions over £300 and (b) election petitions.

(3) Three District Courts, the personnel of each consisting of a President and four Cypriot Judges, two Christians and two Moslems, but when functioning constituted by the President and one or two Judges of differing religions, and having appellate civil jurisdiction in appeals from Assistant District Judges and original civil jurisdiction in all actions except those within the exclusive jurisdiction of a Mussulman Religious Tribunal or triable by a Divisional Court, as stated in 2(a) supra. In bankruptcy, petitions for winding up companies, probate and in actions in respect of injury to property their jurisdiction is unlimited.

(4) Assistant District Judges' Courts of which there are at present nine. The Courts are held by an Assistant District Judge, and the President and the District Judges have also jurisdiction. These Courts have civil jurisdiction up to 25*l*. and exceptionally, up to 50*l*.

(5) Three Assize Courts having unlimited criminal jurisdiction and consisting of three or five judges, as may be directed by the Chief Justice, these being in the former case a non-Cypriot Judge of the Supreme Court and either two Judges or the President and one Judge of the District Court, and in the latter two non-Cypriot Judges of the Supreme Court and the President and two Judges of the District Court.

(6) (I) Magisterial Courts, consisting of the President and one or two District Judges of differing religions, having summary jurisdiction in cases involving up to three years' imprisonment or 100*l*. fine or both, and with or without an order for compensation not exceeding 100*l*.

(II) Magisterial Courts, consisting of the President sitting alone or of two District Judges of differing religions sitting together, having summary jurisdiction up to twelve months'

imprisonment or 50*l*. fine or both, and with or without an order for compensation not exceeding 50*l*.

(III) Magisterial Courts, consisting of a District Judge sitting alone, and having summary jurisdiction up to three months' imprisonment or 10*l*. fine or both, and with or without an order for compensation not exceeding 10*l*.

(IV) Magisterial Courts, consisting of an Assistant District Judge, and having summary jurisdiction up to one month's imprisonment or 5*l*. fine or both, and with or without an order for compensation not exceeding 2*l*.

(7) Three Mussulman Religious Tribunals, consisting of a Sheri Judge, and having jurisdiction restricted to marriage, divorce, maintenance in relation thereto, inheritance and succession, wills and their registration, and the registration of vakfihs, and concerning persons of the Mussulman faith only.

There is also a Sheri Tribunal of Appeal, consisting of the Moslem Judge of the Supreme Court as ex-officio President and any two Moslem District Judges nominated by the Chief Justice, and having jurisdiction to hear appeals from the decisions of Mussulman Religious Tribunals.

The above statements apply to jurisdiction over both Cypriots and non-Cypriots, the distinction created by the Order in Council of 1882 having been abolished by that of 1927.

There is a police force of 25 officers and 827 men, consisting of Christians and Moslems, including 3 officers and 80 men detailed for duty in the prisons.

#### Finances.

The principal sources of revenue in Cyprus are:—  
1. Verghi Kimat, a tax of 2 per 1,000 on the capital value of lands, houses, and other immovable property.

2. Sheep, goat, and pig tax.

3. An excise on tobacco.

4. Stamps, court fees, royalties, licences, &c., &c.

5. Salt monopoly.

6. Import duties.

7. Shipping and Wharfage dues.

All exemptions formerly enjoyed by foreigners have been abolished.

Grants in aid have been received from the British Government annually since 1897. From 1911-12 the grant was fixed at 50,000*l*. a year, and since 1928, it has been increased to the fixed rate of 92,800*l*. a year. A contribution of 10,000*l*. a year has from the latter date, been made by the Colony towards the cost of Imperial Defence.

## FALKLAND ISLANDS.

*Situation and Area.*

The Falkland Islands ("Les Iles Malouines" of the French, "Islas Malvinas" of the Spaniards) are situated in the South Atlantic Ocean, between 51° and 53° S. lat., and between 57° and 62° W. long., about 480 miles N. E. of Cape Horn, and about 1,000 miles due south of Monte Video. They consist of East Falkland Island and West Falkland Island, which, with the adjacent islands, have an estimated area of 2,580 square miles and 2,038 square miles respectively.

There are two groups of dependencies (i) South Georgia with South Orkney and South Sandwich, the boundaries being the 50th parallel of south latitude and the 20th and 50th meridians of west longitude (ii) South Shetland and Graham Land bounded by the parallel of latitude 53° S., and the meridians of longitude 50° and 80° W. The territory of both the dependencies extends to the South Pole.

This area contains about 3,100,000 square miles or 14% of the entire surface of the globe, and one-fifth approximately of the total area of the British Empire. Much of it is ice-bound, but there are more than a million square miles of sea readily accessible for whaling, fishing and sealing.

The island of South Georgia lies about 800 miles to the east of the Falkland Islands, South Orkney and South Sandwich being about 450 miles to the south-west and south-east respectively of South Georgia. The northern point of South Shetland is about 500 miles to the south of the Falklands.

*History.*

The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. In 1764 they were taken possession of by France and Bougainville planted a small colony of Acadians at Port Louis in East Falkland. Bougainville was bought out by Spain, ever jealous of interference by other nations in the southern seas, in 1766.

In the following year Captain Byron took possession of West Falkland, and left a small garrison at Port Egmont on Saunders Island, whence it was driven out by the Spaniards in 1770; this action on the part of Spain brought that country and Britain to the verge of war. The Spaniards restored the island in 1771, but it was abandoned in 1774 and no further formal occupation was made until 1820, when the Republic of Buenos Aires established a settlement which was destroyed by the Americans in 1831.

In 1833 occupation of the islands was resumed by the British Government for the protection of the whale fishery. Until 1842, they were under the charge of the Naval officers engaged in making Admiralty surveys. In 1842, a Civil Administration was formed, the headquarters being at Port Louis until the following year when they were removed to Stanley, then known as Port William.

The colony received regular grants in aid from 1841 until 1880 and for a mail service until 1884-5, since which year the colony has been self supporting.

South Georgia and the South Sandwich group were discovered in 1775 by Captain James Cook, who took possession of them for Britain. South Shetland was discovered and taken possession of by Captain William Smith in 1819, and South Orkney by Captain G. Powell in 1821.

The dependencies were visited only by exploring expeditions, sealers, and whalers until the rise of the modern whaling industry in those regions.

*General Description*

## (a) Falkland Islands.

The Falkland Islands have a very deeply indented coast line and many good natural harbours. The surface is hilly, attaining its maximum elevation of 2,315 feet in Mount Adam, West Falkland.

The entire country is covered with wild moorland interrupted by outcrops of rock and the peculiar collections of angular boulders named "stone runs."

There is no cultivation except in the immediate vicinity of the settlements and shepherds' houses where vegetables and in a few places hay is grown. The soil is chiefly peat but considerable areas of sand also occur.

Communication is maintained by sea and horses, but there are no roads beyond the immediate vicinity of Stanley, the traveller being guided by natural landmarks. A commencement has been recently made to indicate recognized tracks with direction posts. Trees are completely absent.

The only town is Stanley in East Falkland, with a population of about 1,200. The houses are mostly iron and wood, built as they are required for occupation. It is difficult to rent a house but there are several boarding houses affording fair accommodation. Stanley is a port of register and had, on the 31st December, 1930, 34 vessels aggregating 39,603 tons.

The cost of mutton is 3d. per lb., of beef 5d., fowls' eggs when procurable cost 2½d. to 3d. each, while penguin eggs in spring are sold at a price varying from 4s. to 8s. 6d. per hundred. Milk is priced at 1s. per quart. Most foodstuffs have to be imported.

*Climate and Health.*

In the Falklands the temperature is uniformly low, ranging from 40° to 65° in summer and from 30° to 50° in winter, with an annual mean of 42°.

The annual rainfall seldom exceeds 25 inches, and although snow falls frequently it does not as a rule lie long. In summer the atmosphere is very dry and evaporation rapid.

The climate is rendered trying to people from the United Kingdom on account of the continuous cold and lack of sun and the constant high winds as well as the few opportunities afforded for outdoor exercise. The conditions of living are generally comparable with those obtaining in small towns in the north of Scotland, except that by natural situation the Colony is very isolated and its resources and horizons very limited. A difficulty is experienced in providing any variety of diet and in particular fresh meat other than mutton, and fresh fruit and vegetables are at most times difficult to obtain. The birth rate in 1930 was 22·73 per 1,000 and the death rate 8·42.

## (b) Dependencies.

The island of South Georgia is a mass of high mountains which are covered with deep snow where they are not too precipitous, while the valleys between are filled with glaciers which in many cases descend to the sea. There is a coastal fringe free from snow in summer and more or less clothed with vegetation, including tussock "grass." Land whaling stations have been established in five of the numerous bays.

The remaining dependencies are even more inhospitable, being nearly completely covered

\* The construction of the first road beyond the town boundary was commenced in 1929.

with snow and ice and almost entirely destitute of plant life. All the dependencies have a rigorous climate of Antarctic character.

A land whaling station is operated during the summer months at Deception Island in the South Shetland group.

Another station has been built in the South Orkneys but has not been in actual operation in recent years.

#### *Industries, Trade and Customs.*

The inhabitants of the Falkland Islands are almost entirely occupied in sheep farming, the whole acreage of the colony being divided into large sheep runs. Wool is the principal product but tallow and hides are also exported. There were in 1930 606,882 sheep, 9,445 cattle and 3,545 horses in the islands.

Seal oil is also produced for export by a company formed in 1928.

The whaling field of the dependencies, in which whaling by modern methods was first carried on in 1904, has become more productive than all those in the rest of the world combined; a small quantity of seal oil is also produced.

An expedition for research, mainly into whaling, for which the ships "Discovery II." and "William Scoresby" have been acquired, has been operating in the southern seas.

In the case of the Colony proper, the export trade was almost exclusively with the United Kingdom; in the case of the Dependencies no exact figures are available, but the whale and seal oil exported went principally to Scandinavia, Holland and Germany, although the consumption in the United Kingdom was not inconsiderable.

In the case of the Colony proper, 82 % of the imports came from the United Kingdom, 7 % from Uruguay and 5 % from Chile; in the case of the Dependencies no exact figures are available, but the bulk of the coal imported was from the United Kingdom; machinery, equipment and provisions for the whaling expeditions being brought mainly from Norway.

The Customs duties are all specific and non-preferential. Import duties are levied on wines, spirits, beer and matches, and export duties on wool, guano, whale oil and seal oil.

#### *Education.*

There are two schools in Stanley. A Government school is maintained from public funds, which, whilst being elementary in character, makes provision for attendance at a Continuation Class for a two years' course of further education. There is also a Convent School managed by Roman Catholic Sisters; this school, however, is not subject to Government control, and receives no subsidy.

The Government contributes two-thirds of the cost of the board and lodging of children from the country districts attending school in Stanley.

Four travelling teachers are provided by the Government and three by the Falkland Islands Company. These teachers travel from Settlement to Settlement devoting a certain amount of time to each. The number of children receiving education in the Colony in 1930 was 331.

#### *Currency and Banking.*

The legal tender currency is British sterling, and local 5s., 1s., and 10s. notes. There are no private banks in the Colony. On 1st April, 1888, a Government Savings Bank was established, in which, on 30th September, 1930, the deposits were 142,189/., belonging to 993 depositors.

#### *The Falkland Islands Company, Limited.*

This company was formed in 1851 to take over from Mr. Lafone, of Monte Video, the district in the East Falkland, now called Lafonia; this district abounded with wild cattle, said to be the descendants of the stock introduced by the Acadian settlers, the capture of which was the company's original object. This, however, was not found profitable, and the company have of late years been engaged in sheep farming on an extensive scale, in shipping, and in the importation of goods.

The company maintains a doctor and a school at Darwin, and contributes to the provision of a salary for a clergyman of the Church of England.

#### *Means of Communication.*

The vessels of the Pacific Steam Navigation Company call at Stanley on their voyage round South America on an average six times a year in either direction. In order to supplement this service and with a view to ensuring mail communication with the United Kingdom at intervals of not more than a month the Government has recently made arrangements for local vessels to make voyages as required to and from Monte Video, where the mails are transhipped to Europe. Few passenger steamers call at Stanley but passages can, as a rule, be obtained either by cargo vessels direct to England or via Monte Video, whence the voyage can be continued by passenger liner. Inter-insular communication, at approximately monthly intervals, is maintained by the coasting steamer belonging to the Falkland Islands Company, Limited, and by special sailings arranged by the Government. Communication with the Dependencies is maintained by the Tonsberg Whaling Company, under contract with the Government.

The rates of postage are as follows:—

#### *Letters.*

To the United Kingdom, British Possessions, Egypt, and to places within the Colony: 1d. per oz. or fraction of an oz.

To other countries: 2½d. per oz. and 1½d. for every additional oz. or fraction of an oz.

Two wireless stations for external traffic are maintained by the Government, one at Stanley and one at Cumberland Bay, Grytviiken, in the Dependency of South Georgia. A smaller station at Fox Bay on the West Falkland is maintained also by the Government for inter-insular communication. The traffic is transmitted and received principally through Bergen and Monte Video. Telegraphic charges are 1s. a word to the United Kingdom *via* Bergen, and 1s. 1d. a word to Monte Video. The installation of direct communication on short-wave with the United Kingdom is at present under consideration. The principal farm stations on East Falkland Island are connected by telephone with the Stanley exchange and those on West Falkland Island with the Government headquarters at Fox Bay.

*Constitution.*

The Government is administered by a Governor, aided by an Executive Council composed of three official members and one unofficial member, and a Legislative Council composed of four official and two unofficial members. The unofficial members of the Legislative Council are appointed by Warrant under the Royal Sign Manual and Signet for a term not exceeding five years.

FIJI.

*Situation and Area.*

The Colony of Fiji comprises all islands, rocks,  
and reefs lying between latitude 15° and 22° S. and  
between longitude 177° W. and 175° E. It is distant  
from Sydney about 1,700 miles, and from Auckland  
1,100 miles. The Tongan or Friendly Islands lie  
180 miles to the south-east, and Samoa 500 miles  
to the north-east. The French colony of New  
Caledonia lies to the westward about 700 miles.  
The number of islands has been variously stated  
at from 200 to 250; but this includes mere  
uninhabited rocks and islets.

The dependency of Rotumah consists of all  
islands, rocks, reefs between 12° and 15° S., and  
between 175° and 180° E.

The principal inhabited islands are Viti Levu,  
4,053 square miles, Vanua Levu, 2,130 square miles,  
Taviuni, 217 square miles, Kadavu, 124 square miles,  
Koro, 58 square miles, Gau, 45 square miles, and  
Ovalau, 43 square miles. The total area of the  
Colony (including Rotumah, 14 square miles) is  
7,083 square miles (nearly equal to Wales).

*Physical Features.*

The more important islands are hilly and moun-  
tainous, rising more or less abruptly from the shore  
to a height of from 4,000 to 4,300 feet. The  
hills are generally of a grand and picturesque  
outline, being composed for the most part of old  
volcanic lavas. Upon the south-eastern or wind-  
ward sides the islands are covered with dense

forests. The lowerlands are more lightly timbered, and apparently have all been under cultivation at a not distant period when the native population was much larger. On these flats the soil is almost everywhere deep, easily worked, and especially rich in humic acid. The northern and north-western sides of the larger island, or leeward sides, are characterised by a comparative absence of forest lands; and here hills or plains are covered with long reeds or grass, and dotted with clumps of *Casuarina* and *Pandanus*.

Copper ore is found in many places, but does not appear to be of sufficiently high grade to justify working. There are also traces of gold, silver (chloride), tin, antimony, manganese, and other metals.

The country is well watered. Frequent rains keep alive the sources of the thousands of small affluents feeding the main rivers. Of these rivers the Rewa stands first. It is navigable for boats, punts, or flat-bottomed steamers, for 40 or 50 miles from its mouth. Several large streams fall into it, the sources of which lie in the high mountains of the interior 3,000 or 4,000 feet above the level of the sea. Besides these, the Sigatoka, the Nadi, and Ba rivers, with many others, drain the principal watersheds of Viti Levu. In Vanua Levu the rivers are not so large, though they are nearly as numerous. The Dreketi river being first in size is navigable for craft of considerable size for a distance of 15 miles from its mouth. Almost every valley in the group has its stream or brook, from which the native occupants irrigate their plantations of "dalo" (*Calocasia esculenta*).

Fiji is as rich in harbours and roadsteads as it is in rivers. Each island is surrounded by a barrier reef, and, with few exceptions, is accessible through passages usually found opposite to the most considerable valley or river. Between this river and the shore ships lie safely at anchor, protected by an indestructible natural breakwater.

#### Rotumah.

The Island of Rotumah, situated in 12° 30' S. lat., 177° 10' E. long., was discovered by the *Pandora*, in 1793, when searching for the mutineers of the *Bounty*. Lying to the north-west from two to four miles from the shore, are three small islets, Hattana, Hofua and Waya. Of these only the last named is inhabited, and it contains but one small village. In 1879 the three principal Rotumah chiefs offered the islands to Great Britain, and they were annexed 13th May, 1881. The population was found at the census of 1921 to number 2,402, of whom two-thirds are Methodists, and the remainder Roman Catholics. The principal island is seven miles long by three miles broad, and contains about 9,000 acres. The staple export is copra.

The natives differ entirely from Fijians in language and in polity. A resident European commissioner is, under the governor, the chief executive and judicial authority. The commissioner's court, except in capital cases, takes the place of the supreme court of Fiji. There are two native stipendiary magistrates, who have jurisdiction in minor cases. The island is divided into seven districts, over each of which a chief, appointed by the Governor, rules. The framing of local laws is entrusted to the Rotumah Regulation Board (consisting of the resident commissioner and any number of natives, not exceeding ten). Their enactments are subject to the approval of the legislative council of Fiji.

#### Population.

The aboriginal population of Fiji belongs to the darker of the two great Polynesian families, but, living on the confines of the fairer race, its blood has received considerable admixture. It was estimated in 1859 at 200,000; in 1868 at 170,000; and in 1871 at 140,000. By the epidemic of measles which occurred in 1875 it was reduced by more than one-fourth. The population of the Colony, as ascertained at the census of 1921 is shown in the following table:—

	Males.	Females	Total.
Europeans ...	2,297	1,581	3,878
Half-Castes ...	1,454	1,327	2,781

The births among the native population in 1930 totalled 3,358, and the deaths 2,860. The birth rate was 36·43, and the death rate 31·24 per mil.

The Methodist and Roman Catholic missions gave the following as the number of their adherents at the end of the year 1929:—

Methodist ...	80,991
Roman Catholic ...	13,561
<b>Total ...</b>	<b>94,552</b>

#### History.

The islands were discovered by Tasman in 1643, and visited by Captain Cook in 1769. Captain Bligh, on his memorable voyage in the launch of the *Bounty*, sighted part of the group in 1789, and was chased by a canoe from the island of Waya, in the Yasawa group. Missionaries settled in Fiji in 1835, and, after a time, met with great success.

In 1859 Thakombau, the most powerful chief of Fiji, offered the sovereignty of the islands to Great Britain. The offer was declined by the Duke of Newcastle in 1862. About that time the demand for cotton, owing to the American civil war, led to an influx of Europeans into Fiji for the purpose of cotton cultivation. In June, 1871, certain Englishmen set up a Fijian Government, with the principal chief, Thakombau, as king. A constitution was agreed upon, and a Parliament elected. The Parliament and the Government before long drifted into mutual hostility, and the Ministry latterly governed without the aid of the Parliament.

The question of annexing Fiji had been agitated both in Australia and England since 1869 on many grounds, and in August, 1873, the Earl of Kimberley commissioned Commodore Goodenough, commanding the squadron on the station, and Mr. E. L. Layard, Her Majesty's Consul in Fiji, to

investigate and report on the matter. These Commissioners, on the 21st of March, 1874, reported an offer of the cession of the sovereignty of the islands from the chiefs, with the assent of the Europeans, but on certain terms which were not acceptable, and Sir Hercules Robinson, the Governor of New South Wales, was despatched to Fiji in September, 1874, to negotiate. This mission was completely successful, and the sovereignty of the islands was ceded to Her Majesty by Thakombau, the Chief of Bau, Maafu, who was Chief of the so-called Lau Confederacy, which included not only the Lau Islands, but Taviuni and the greater part of Vanua Levu, and the other principal chiefs, in a deed of cession dated the 10th day of October, 1874. A charter was shortly afterwards issued by Her Majesty, erecting the islands into a separate Colony, and providing for their government.

Levuka, in the island of Ovalau, was at first selected as the European capital, but during the year 1882 the seat of government was transferred to Suva, on the south coast of the island of Viti Levu, with a fine harbour. The white population of Suva numbered 1,434 at the census of 1921.

#### *Climate.*

The climate of Fiji is cool for the tropics, and the country is remarkably free from zymotic and endemic diseases. Malarial fevers have never been met with.

The highest temperature at Suva in 1930 was 92 degrees on January 14th and March 10th, and the lowest 58 degrees on September 7th. The total rainfall was 102.92 inches. The average annual rainfall is 117.41 inches. There is a great variety of temperature and climate to be found in the group. The rainfall extends over the whole year, but May to October is usually the driest period. Between November and April, the wet season, hurricanes and cyclonic storms occasionally occur, December to March being the months of greatest frequency.

#### *Constitution.*

The constitution is regulated by Letters Patent of 9th February, 1929. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Colonial Treasurer, the Secretary for Native Affairs, the Secretary for Indian Affairs, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and not more than thirteen nominated members, six European elected members, three native members, and three Indian elected members. The natives retain a large share of self-government. Their system of village and district councils has been recognised and improved, and supplemented by a triennial meeting of the high chiefs and representatives from each province, presided over by the Governor. There is a Native Regulation Board, constituted under "The Native Affairs Ordinance, 1876," which has power to make regulations with regard to the marriage and divorce of natives, succession to property, the jurisdiction and powers of native courts and magistrates in matters of civil and criminal procedure, and also in regard to other matters having reference to the good government and well-being of the native population. All such regulations have to receive the sanction of the Legislative Council.

#### *Shipping.*

Suva and Levuka are ports of Registry, and had, on 31st December, 1930, 5 steam, 76 sailing, and 15 motor vessels registered of a total net tonnage of steam, 1,017 tons, sail 1,549 tons, and motor 289 tons.

During the year sea going certificates were issued by the Fiji Marine Board to 96 vessels, of a total tonnage of 2,855 tons, of which, 50 were owned by Europeans (tonnage 2,251), 26 by Natives (tonnage 357), 13 by Chinese (tonnage 157), and 7 by Indians (tonnage 90).

The number of merchant vessels entered at the three ports of entry in the Colony during 1930 is, steam 182, of 744,807 tons, and 9 sailing, of 948 tons; of these vessels, 130 were British.

#### *Local Government.*

A municipality was established in 1877 in Levuka, and in 1882 one was established in Suva, on the transfer of the seat of government. These boards are at present regulated by the Municipal Institutions Ordinance, 1909. The governing body in each town is elected by the ratepayers. Rates are collected on land and house property.

The revenue and expenditure in 1930 were :

	Revenue. £	Expenditure. £
Suva municipal council... ..	47,265	55,100
Levuka municipal council... ..	3,841	3,843
Total... ..	£51,106	£58,943

#### *Education.*

The Public Education Ordinance of 1890, was superseded by the Education Ordinance of 1916, which was slightly amended in 1926. The present Education Ordinance of 1929 with its amendment in 1929 now annuls the previous Ordinance.

The chief features of the present Ordinance are the transference of the Rating Sections to the draft of a separate proposed rating ordinance; the more complete and effective registration of schools and teachers; the better definition of conditions of grants in aid; the revision of the powers of the Board of Education as newly constituted in 1926, and the general outline of certain desired features of the elementary school curriculum and the management of schools.

Under the Ordinance the only School Districts at present constituted are those of Suva and Levuka for Europeans.

The public school for Europeans in Suva has been replaced by two Grammar Schools, one for boys and one for girls; and the Levuka Public School is now under Government control. Each of these schools has a hostel attached. The average roll number during 1930 at the Boys Grammar School, Suva, was 137; at the Girls Grammar School, Suva (where boys under 8 are taken), 217. The average roll in 1930 for the Levuka Public School was 154 (boys and girls). The Government also controls 2 other schools for European pupils at Rarawai and Tailevu, with a roll of 38 and 7 respectively in 1930.

The Queen Victoria Memorial School at Nasinu, near Suva, is intended to provide for the higher education of natives, and is maintained from public revenue. The number of boys on the roll during 1930 was 81.

Schools for the primary education of Fijians may be conducted by the Methodist, Roman Catholic, Anglican, and Seventh Day Adventist Missions, by the Provincial Councils, by any other properly constituted authority or by the Government. Six Provincial schools have been established by the Government at Lau, Tavuni, Lodonu, Kadavu, Nadi, and Sawani, in charge of European Headmasters.

At the end of 1930 there were 213 Government and assisted schools, 153 for Fijians, 41 for Indians, 6 receiving both Fijians and Indians, 11 for Europeans and half-castes, 1 for Chinese and 1 for Melanesians. They have 15,223 pupils, of whom 10,998 were Fijians, including 37 Melanesians, 3,319 were Indians, 825 were Europeans and half-castes, and 81 Chinese.

There were in addition 155 recognised schools for Fijians, 18 for Indians, 1 for Europeans. In these schools, 6,000 Fijians, 584 Indians, and 120 Europeans were enrolled.

308 teachers were registered at the end of 1930, of whom 73 were Fijians, 76 Indians, and 232 Europeans.

468 teachers were recognised, of whom 409 were Fijians and 59 Indians.

The estimated expenditure on Education for 1931 is 48,529*l*.

#### *Currency and Banking.*

The legal tender currency is British sterling. Under Ordinance I, of 1907, a Government Savings Bank was opened in 1908. At the end of 1930, there were 9,977 depositors and 170,172*l*. in deposits. Arrangements were made in 1914 for the issue of Government Currency Notes. At the end of 1930, the circulation of Government Currency Notes was 436,983*l*.

The Bank of New South Wales has branches at Suva, Levuka, and Lautoka, and the Bank of New Zealand at the two former places.

#### *Industries, Trade, and Customs.*

The trade and commerce of the Colony depends for its existence on three staple industries, viz., (1) the cultivation, manufacture, and export of sugar; and (2) of copra (the dried kernel of the cocoanut); and (3) the growth and export of fruit, principally bananas.

The principal exports at the date of the annexation of the Colony were copra, cotton (Sea Island), and maize, but the export of maize was soon displaced by that of sugar. Cotton continued to be the third export in point of value until the year 1882, after which it gradually subsided until the year 1888, when only 3½ tons were exported. The cotton industry is again receiving attention and 127,077 lbs. of cotton and 99 tons of cotton seed were exported in 1930. Owing to the Commonwealth Government having imposed a prohibitive duty on imported bananas, the entire fruit trade of Fiji has been diverted to the New Zealand market.

The export of fruit consists almost entirely of bananas, pineapples and citrous fruits.

In 1930, exports of sugar, fruit, and copra were:—Sugar, 90,979 tons, value 853,833*l*.; Bananas, 169,044 bunches, value 57,178*l*.; Fresh Pines, 7,633 cases, value 2,296*l*.; Copra, 23,882 tons, value 369,524*l*.

The other principal exports in 1930 consisted of:—Biscuits, 338,892 lbs., 8,456*l*.; Beech-de-mer, 2,672 cwt., 13,886*l*.; Butter, 903 cwt., 6,496*l*.; Cocoanuts, 298,886 nuts, 895*l*.; Fish (cured),

14,803 lbs., 435*l*.; Canned Pines, 306,913 lbs., 6,593*l*.; Gum, 2,875 cwt., 4,025*l*.; Hides, 5,856 hides, 4,216*l*.; Molasses, 12,337 tons, 12,337*l*.; Rubber, 6,397 lbs., 209*l*.; Shell Trocas, 193 tons, 11,209*l*.; Vegetables, 8,568 cwt., 5,459*l*.

Considerable quantities of rice are grown and a Government rice mill has been established.

Dairying is an established industry.

Many parts of the Colony seem admirably adapted for cattle and sheep raising.

A biscuit factory and an oil mill have been established in Suva.

The Customs Tariff is mainly on an *ad valorem* duty basis, with the exception of a few articles including spirits, tobacco, machinery, timber, meats, wines, petroleum products on which there is a specific rate of duty.

Goods the produce or manufacture of the British Empire are admitted at British Preferential rate of duty, but certain goods the product or manufacture of certain scheduled countries are admitted at a slightly lower rate.

The scheduled countries at present are United Kingdom, Canada, Hongkong, and New Zealand.

The total trade of the Colony in 1930 was 2,703,710*l*.

The percentage of trade with the United Kingdom, other parts of the British Empire, and the principal foreign countries was in 1930 as follows:—

United Kingdom .. ..	30·76 %
Other British Possessions ..	50·97 %
France .. ..	1·78 %
Spain .. ..	1·46 %
United States of America ..	10·62 %

#### *Means of Communication.*

There is a direct quarterly cargo service with the United Kingdom by the New Zealand Shipping Company's Line of steamers.

There is regular steam communication with Australia and New Zealand, a monthly service with Canada, and a three weekly service with U.S.A. Inter-island communication is maintained by regular steamer or cutter services.

Postage to the United Kingdom, India, the Australian States, New Zealand, and British Colonies is 2*d*. for 1 oz., 1*d*. for every additional oz. To other countries in the Postal Union 3*d*. for 1 oz., every succeeding oz. 1½*d*.

Internal postal rates: letters, 2*d*. for 1 oz., 1*d*. for every additional oz.; newspapers, for every 4 oz., ½*d*. A Parcels Post with the United Kingdom was established in June, 1890. The rate of postage is 3 lbs. 8*d*., 7 lbs. 6*d*., 1½*d*., and 11 lbs. 8*d*. There is also a parcels post with the Australian States, New Zealand, Canada, India, Ceylon and the United States of America. The rates of postage are as follows:—

*Australia and New Zealand—*

1 lb., 8*d*.; every additional lb. up to 11 lbs., 6*d*.

*Canada—*

1 lb., 6*d*.; " " " " " 6*d*.

*India and Ceylon—*

3 lbs. 2*s*. 5*d*.; 7 lbs. 4*s*. 7*d*.; 11 lbs. 7*s*. 1*d*.

*United States of America—*

1 lb., 6*d*.; every additional lb. up to 11 lbs. 6*d*.

The Colony entered the Postal Union on 1st September, 1891.

The Imperial Postal Order system has been adopted by this Colony.

Letters from England sent *via* San Francisco or Vancouver, reach Fiji in about 28 days.

There is a Government telephone line from Nanukuloa to Tavua, a distance of 40 miles. There is a telegraph line between Suva and Levuka, a distance of 54 miles. A system of wireless telegraphy has been established in the Colony, and there are now stations at Suva and Lautoka in the island of Viti Levu, at Labasa and Savusavu in the island of Vanua Levu, at Waiyevo, Taviuni. Telephone Exchanges have been established at Suva, Levuka, Nausori, Davuilevu, Navua, Taviuni and Savu Savu.

There is no railway in the Colony. The Colonial Sugar Refining Co. own various tram lines connecting their estates, and these tramlines are in certain cases open to public use. A few good roads have been constructed on the larger islands, and more are in process of construction. Suva is connected by cable with Southport (Queensland) and Auckland, *via* Norfolk Island, and with Vancouver, *via* Fanning Island.

## THE GAMBIA.

### *Situation and Area.*

The Gambia is a great river of Western Africa, falling into the Atlantic Ocean by a large estuary measuring in some parts nearly 27 miles across, but contracting to 10 miles between Bird Island bank and Cape St. Mary, and to little more than two between Barra Point and the town of Bathurst on St. Mary's Island. There are 26 feet of water at the entrance of the river at low tide, and ocean-going steamers drawing no more than 13 feet can at present proceed without trouble to MacCarthy Island. There is no bar to the Gambia River. The seat of Government is Bathurst, 13° 27' N. lat., 16° 34' W. long., situated on St. Mary's Island, a sandbank about three and a half miles long and a mile and a quarter broad, separated from the mainland by a narrow channel called Oyster Creek. A large portion of the island is a swamp, the level of which is in many parts below that of the river.

The Colony on the river Gambia consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, the territories of Brefet and Bajana, and MacCarthy Island, situated between the Falls of Barraconda and Bathurst, and 158 miles distant from the latter. This island forms the line of demarcation between those portions of the river known as the Upper and Lower River. The total area of the Colony proper is about 69 square miles (equal to Jersey and Guernsey). The Protectorate extends on both banks of the river for 250 miles from its mouth. But by an ordinance No. 7 of 1902 (repealed and replaced by Ordinance No. 30 of 1913) all parts of the Colony, except the Island of St. Mary's, were placed under the Protectorate system of administration. The Island of St. Mary's has an area of about 2,500 acres, the greater part of which is swampy, and a population of 14,370. The territory administered as Protectorate is 4,069 sq. miles, and has an estimated population of 185,150. A survey of the boundaries dividing the Gambia from Senegal was completed by the Anglo-French Boundary Commission in 1906.

### *History.*

The Gambia was discovered by the early Portuguese navigators, but they made no settlement.

In 1588 a patent was granted by Queen Elizabeth to some merchants in London and Exeter to trade with the Gambia. This Company did not prosper. Its voyages were not slave trading ventures but were made for legitimate commerce.

In 1618 King James I. of England granted a charter to Sir Robert Rich and other London merchants. Their enterprise was entitled "The Company of Adventurers of London trading in Africa," and Fort James was built by them on a small island 17 miles above the island of Banjola (now St. Mary's).

About the year 1631 another British chartered company was formed, King Charles I. having granted a charter to Sir B. Young, Sir R. Digby and others. This venture was responsible for supplying British settlements in the West Indies with slaves for working on the estates.

In 1662 King Charles II. granted a charter to a third company, known as the "Royal Adventurers of England trading in Africa." A few years later this company exhausted its capital and surrendered its charter. In 1672 a fourth company was incorporated under the name of the "Royal African Company," and it was not until 1762, after having in its early days reached the highest point of commercial prosperity which had been touched by England in Africa, that it was superseded by the "Company of Merchants." The right of trade was abandoned to England by France under the treaty of Versailles, 1763, which guaranteed to the English their possession of Fort James and of the River Gambia, with the exception of a French factory established at Albreda on the north bank of the river. The same treaty gave the Senegal river to the French, with the exception of an exclusive right to trade with the Arabs at Portendic for gum, which was retained by England. The year 1807 saw the abolition of the slave trade, and though the "Company of Merchants" lingered on with an annual subsidy, the general commerce between Great Britain and Gambia fell off till 1816, in which year a new settlement was formed on the island of Banjola by the English merchants, who resided at Gorée and in Senegal until those places were given up to the French by the Treaty of Paris (1814). The island was re-named "St. Mary's," and the town which was laid out took its name from Lord Bathurst Secretary of State at that time. The streets to be inhabited first were named after Lord Wellington and his generals at Waterloo.

The settlement was subject to the Government of Sierra Leone, and was annexed to it by Act of Parliament in 1821. From 1816 to 1822 a Military Commandant, aided by a Board of Merchants, called the "Settlement court," administered the government. From 1822 to 1829 the Commandant governed alone.

In December, 1829, the Secretary of State appointed Lieut.-Colonel Alex. Findlay, R.A.C. Corps, as Lieutenant-Governor (the first) "of the settlement of Bathurst and its dependencies in the Gambia." The laws of Sierra Leone remained in force, but the Lieutenant-Governor was not accountable to the officer administering the government there.

The Gambia, in the year 1843, was created an independent Colony, with a Governor and Executive and Legislative Councils for the administration of its affairs. Captain H. P. Seagram, R.N., was the first Governor of the Colony.

By the charter of 19th February, 1866, it became a portion of the Government of the West African Settlements, and continued to be so under the charter of the 19th December, 1874, until it was made a separate Government in 1888.

MacCarthy Island was purchased in 1823, and named after Maj.-General Sir Charles MacCarthy, K.C.B., Governor-in-Chief of the British West African possessions; the ceded mile was granted by the King of Barra in 1826; and British Kombo was granted by the King of Kombo in various sessions in 1840, 1850, and 1855.

In 1897 the countries of Foni and Jarra, on the south bank of the river, came under British protection.

Foreign Kombo was annexed by the British Government and is now divided into North, South and Central Kombo.

The Protectorate system of administration has been established since 1894, and extended from time to time by agreement with the different chiefs concerned, until Ordinance No. 7 of 1902 was passed, providing fully for the Government of the whole Protectorate, which is divided into four Provinces and again into Districts. There is a Travelling Commissioner in charge of each Province, and each District is under a Head Chief, with a native tribunal specially appointed by the Governor.

The Provinces are as follows:—North Bank Province, with the districts of Lower Niumi, Upper Niumi, Jokadu, Lower Baddibu, Central Baddibu and Upper Baddibu. MacCarthy Island Province, with the districts of Sami, Niani, Nianija, Upper Saloum, Lower Saloum, MacCarthy Island, Fulladu Central, Fulladu West, Eastern Niamina, Western Niamina and Niamina Dankunku. Upper River Province, with the districts of Fulladu East, Kantora Wuli and Sandu. South Bank Province, with the districts of Central Jarra, Eastern Jarra, Western Jarra, Eastern Kiang and Central Kiang, Kombo St. Mary, Kombo North, Kombo South, Kombo Central, Kombo East, Foni West Brefet, Foni West Bintang, Foni Karanai, Foni East Kansala, Foni East Bondali, Foni East Jarrol and Kiang West.

#### *Inhabitants of the Gambia.*

The inhabitants are mostly of the negro race, the chief tribes being the Jollofs, Mandingos, Sarahulis, Fullas and Jolas. The country of the Jollofs is on the North Bank or Senegal side of the river, and they form a large portion of the community in the town of Bathurst.

The Mandingos are the most numerous people on this portion of the African coast, and derive their name from Manding, a town some 700 miles inland and towards the boundary of the Colony of Sierra Leone. They are mostly Mohammedans.

The Jolas come from Foni, between the southern limit of Kombo and on the north bank of the Casamance River. Their country runs in a north easterly direction towards the south bank of the Gambia River as far as the mouth of the Vintang Creek. They are pagans and a wild uncivilised tribe.

The Sarahulis are the most recent arrivals in the Gambia having migrated from the interior of Senegal. They are chiefly found in the eastern portion of the Upper River where they have established fairly large villages. They are all Mohammedans.

The Fullas (not the pure race, the nomads of West Africa) are good farmers and herdsmen. Their features are somewhat of the Asiatic type and their skins of a lighter colour than negroes. The capital of the Fulla country is Timbo in

Futta Jallon, and is situated in north latitude 10° 38' and west longitude 11° 10'.

### *Industry, Trade and Customs.*

There are no mines in the Colony, but in several places in the Protectorate iron ore is to be found in large quantities, although not worth exportation.

A small quantity of cotton is grown, but only for local consumption, and it is made into narrow strips of rough coloured cloth, common to all West Africa. The strips average 27 yards in length and 9 inches in width.

Pottery is made in the Upper River Province. A considerable amount of excellent leather is produced from goat skins. It is however not exported but utilised by the people in making bags, slippers, sandals, scabbards, saddles and horse trappings, and the skilful manner in which coloured grasses, silk cotton, etc., are laced through the decorative portion of the leather work is common to most of Mohammedan West Africa. Each town or village usually has a "Koranki" man, or leather worker.

There is an abundance of fish in the lower reaches of the Gambia River, and large quantities are dried and taken each season into the Protectorate for sale. Quantities of oysters are obtained in the creek, and are cooked by the people for food, the shells being made into native lime.

The ground nut is the staple article of cultivation, the people devoting their whole attention to this product, growing, in comparison, but small quantities of rice and corn for their own consumption.

A considerable trade is done with the French settlements and the adjoining coast districts in cotton goods, tobacco, rice, and hardware.

The principal imports are cotton goods, rice, kola nuts.

The principal exports in 1930 were:—

	Quantity.	Value.
Ground nuts ...	74,761 tons	£867,634
Hides ...	9,247 No.	2,462
Palm kernels ...	606 tons	6,583
Wax ...	12,092 lbs.	466

The following table shows the percentages of imports and exports by countries:—

Percentage of Imports and Exports, 1930 (exclusive of specie)		Imports. Exports	
United Kingdom ...	...	34.39	19.35
Other parts of British Empire	...	11.11	01.96
France ...	...	29.75	39.95
Germany ...	...	03.68	17.82
Holland ...	...	01.76	16.17
Other Countries ...	...	12.44	04.75
U.S.A. ...	...	06.87	—
		100	100

The Customs duties on imports are mainly on a 10 % *ad valorem* basis (15 % on cotton goods). Specific duties are levied on alcoholic liquors, tobacco, oils, rice, kola nuts, matches and lumber. An export duty of 10s. a ton is levied on ground nuts. The duties are non-preferential.

Bathurst is a port of registry, and had, on its Register on 31st December, 1930, 147 vessels of 3,464 tons gross aggregate tonnage.

### *Relations with the Interior.*

Since the delimitation of the boundary of the Protectorate by the Anglo-French Commissioners

in 1891, steps have been taken to bring the inhabitants of the Protectorate gradually into closer relationship with the Government of the Colony. An Order in Council, issued on the 23rd of November, 1893, provided for the establishment of Her Majesty's jurisdiction within the Protectorate, and since then Ordinances have been passed providing for the establishment of magistrates and also native courts.

Travelling Commissioners regularly, during the eight months of dry weather, travel through the Protectorate on both banks of the river for 250 miles, and in Kombo and Foni. A "yard" or "hut" tax, which averages about 4s. per annum for a family, is imposed in the Protectorate.

### *Currency and Banking.*

The currency is British West African silver alloy and nickel-bronze coins and British West African currency notes for 20s. and 10s. French 5 franc pieces were demonetised at the beginning of 1922. There is one Bank in Bathurst; the Bank of British West Africa.

A Government savings bank was established in 1886, and had on 31st December, 1930, 1,6984. deposited by 645 persons.

### *Land.*

Land in the Protectorate can be obtained from the Chief of a district for purposes of farming with the sanction of the Governor. Small lots suitable for trading stations may be rented for 3s. per annum and upwards. Freehold interests in Crown lands in the Colony are not disposed of except in special circumstances. No leases are issued in the first instance of lands either in the Colony or Protectorate for a longer period than twenty-one years.

### *Education.*

The Christian schools, which are wholly in the hands of the several denominations, receive grants-in-aid. Of ordinary elementary schools in Bathurst, there are one Anglican, two Wesleyan and two Roman Catholic, with 1,658 scholars in all. Education is not compulsory, and fees are charged. There are two Wesleyan High schools and two Roman Catholic Secondary Schools, two for boys and two for girls, all under European control. There is also a Mohammedan school with 334 pupils, at which the ordinary rudiments of an English and Arabic education are taught, the upkeep of the premises and the payment of the teachers being borne by the Government, the native Mohammedan community contributing a small fixed annual sum. At MacCarthy Island there is an elementary Wesleyan school with 54 pupils, and a Government Mohammedan school, started in January, 1927, with 136 pupils on the roll. A total Government grant in aid of 2,4494. was made to the elementary schools, and of 5004. to the secondary schools, during 1929.

### *Means of Communication.*

Communication between the Colony and Europe is effected by the steamers of the African Steamship Co. (Messrs. Elder Dempster & Co.), which nominally run fortnightly between Liverpool and Bathurst, and those of the Woermann Linie A.G. Hamburg, which call at Bathurst monthly both homeward and outward. Steamers of the Messageries Maritimes sail to and from Bordeaux and Dakar fortnightly, and Dakar being only 90 miles from Bathurst, passengers often join these steamers there, and get to Europe in eight days.

Internal communication is comparatively easy for West Africa. The Government maintains a service of river steamers which run weekly during the trading season and fortnightly at other times of the year.

Telegraph cables place Bathurst in communication with Europe and West Africa.

The Wireless Station erected by the Admiralty at Cape St. Mary in 1915, was closed down in 1921. A wireless service is in operation between Bathurst and the river towns of Georgetown, Kontaur and Basse. Communication is maintained with ships at sea, using a wave length of 600 metres. A central battery telephone system is employed in the town of Bathurst, and in direct connection with Cape St. Mary.

There are no railways or metalled roads, save one, from Bathurst to Cape St. Mary,  $7\frac{1}{2}$  miles across the Oyster Creek Bridge, which connects the island of St. Mary with the mainland of British Kombo. Horses will live, and the river forms an unrivalled highway for 300 miles. The roads in the Protectorate are kept clear, and light traps or bicycles could pass along in those districts which are free from swamps, and motor vehicles are used extensively by traders in the Protectorate during the dry season.

Motor cars are in use in and around Bathurst.

The rules of the Postal Union have been adopted by the Colony and its Protectorate.

The following are the rates of postage:—

#### Letters.

Internal— $1\frac{1}{2}$ d. per oz.

Empire and U.S.A.— $1\frac{1}{2}$ d. for each oz. or fraction thereof.

Other Countries—3d. for the first oz., and  $1\frac{1}{2}$ d. for each succeeding oz. or fraction thereof.

#### Parcels Post.

If posted locally for delivery within the Colony, 6d. for first 2 lbs., 4d. for each additional lb.

Parcels from abroad redirected to an Inland Office, 6d. for first 2 lbs., 4d. for each additional lb.

If addressed to the United Kingdom or British West African Colonies:—

Not over 3 lbs. to U.K. 2s. 3d.; W.A.C. 2/.

Over 3 lbs., but not over 7 lbs. to U.K. 3s. 6d.; W.A. Colonies 3/-.

Over 7 lbs., but not over 11 lbs., to U.K. 4s. 9d.; W.A. Colonies 4/-.

Over 11 lbs., but not over 22 lbs., to U.K. 6s. 9d.; W.A. Colonies 7s.

There is no direct parcel post scheme at present with foreign countries. All parcels are forwarded through the medium of the General Post Office, London, a small additional charge being made for onward transmission.

A weekly letter air mail service operates with Europe via London, Paris, Toulouse, Dakar and thence by sea to Bathurst, and *vice versa*, as opportunity occurs.

#### Climate.

The climate of the Gambia during the dry season from the end of November to the middle of May is pleasant and generally healthy. But during the wet season—June to October—the conditions are much the same as elsewhere on the West Coast of Africa, though the change from excessive dryness to the damp atmosphere so prevalent in

the Gulf of Guinea probably makes them more felt. In the interior from March to June it is very hot.

The lowest reading of the thermometer in the shade during 1930 at Bathurst was 50°, the highest recorded temperature being 99° in March.

The rainfall during the year 1930 in Bathurst was 47·86 inches. The rainfall varies considerably; the average is 47 inches.

## GIBRALTAR.

*Situation and Area.*

Gibraltar is a narrow peninsula running southwards from the south-west coast of Spain, in N. lat. 36° 6' 30", and W. long. 5° 21' 12". It consists of a long high mountain called "The Rock," and a very flat sandy plain to the north of it, raised only a few feet above the level of the sea, and called the North Front. Its greatest elevation is 1,396 feet, its length 2½ miles, and its greatest breadth ¾ of a mile. Its area is 1¼ square miles.

*History.*

The rock of Gibraltar, the Mons Calpe of the ancients, remained under the dominion of the Moors until the 15th century, when it was incorporated with the Spanish kingdom of Granada. It was captured by the British forces under Sir George Rooke, 24th July, 1704, and was ceded by the Treaty of Utrecht in 1713. The Treaty of Utrecht was renewed by Article 2 of Treaty of Versailles, 1783. It was successfully defended by Gen. Eliot (afterwards Lord Heathfield) in the great siege of 1779-83.

*General Description.*

The promontory forms one side of a bay, called the Bay of Gibraltar, which is about 4 or 5 miles across, and affords good anchorage for the shipping passing through the Straits. The eastern and northern faces of the Rock are an inaccessible precipice rising abruptly from the sea and the sandy plain known as the North Front, which lies between Gibraltar and the Spanish town of La Línea: from the northern end the Rock runs along southward like a knife edge to the ancient site of O'Hara's Tower, from which it slopes gradually till it terminates in a perpendicular cliff about 100 feet

high at the water's edge at Europa; these cliffs are continued along the western face to the New Mole, beyond which the fortress is protected by artificial ramparts. Behind these latter lies the larger portion of the town, covering an area of only ¾ by ¼ mile. It is one of the most thickly inhabited places in the world, but it is not unhealthy. Between this part of the town and the southern portion is a picturesque public garden, called the Alameda. The civil population in the southern part of the town is confined to the east and south-east of the South Mole, the remainder of the southern portion of the Rock being entirely taken up with barracks, hospitals, &c., for the Military and the Navy.

Gibraltar is a very popular tourist centre for those wishing to tour Southern Spain, and Morocco. It is extensively used as a port of call and coaling station by shipping, and it is also an entrepôt of the trade between England and the Arabian states of Northern Africa, for which it has many advantages, having been ever since its occupation by the British a free port, or practically so.

The naval harbour is on the West side of the Rock. It is formed by three separate Moles known as the "North," "Detached" and "South" Moles. The North Mole runs westward from Devil's Tongue for about 2,900 feet, and then southward, giving a total length of over a mile. The South Mole projects into the sea for a distance of 3,660 feet in a north-westerly direction. The Detached Mole, 2,717 feet long, is so situated between these two Moles as to form a breakwater and leave two means of entrance and exit. The harbour contains a water area of 440 acres. There are three large graving docks for naval purposes, and a small dock which is available for merchant vessels of light draught.

The old wharf at Waterport has been extended and improved by the addition of a new mole, which has been provided with sheds for transit cargo, electrical cranes and other equipment to facilitate the handling of cargo.

About 300 persons are employed in tobacco manufactories, and about 1,200 in the coal depôts. It is a port of registry, having, on 31st December, 1930, 43 vessels, of together 8,564 tons (gross). No statistics of imports or exports are taken.

The revenue is derived from port dues, the rent of the Crown estate in the town, duties upon wine, spirits, beer, tobacco, motor spirit, perfumery and licence duties and fees.

The Government is administered under Letters Patent of the 12th September, 1922, by a Governor, aided by an Executive Council composed of 4 official and 3 unofficial members. The power of legislation is vested in the Governor, who is also the General commanding the garrison. The management of the drainage, water supply, &c., is in the hands of the City Council. Their receipts for 1930 were 117,389*l.*, their expenditure 118,391*l.*, and their debt, on the 31st of Dec., 1930, 166,160*l.*

There are branches of Barclays Bank (Dominion, Colonial and Overseas), the Credit Foncier d'Algerie et de Tunisie, and several private bankers.

A Government savings bank was founded in 1882, and had on 31st Dec., 1930, 79,823*l.* deposited by 2,996 depositors. Since the 1st Oct., 1898, the legal tender currency has been that of the United Kingdom, and the public accounts are now kept in it, but Spanish money is still freely current. The change from Spanish currency, which had previously been the legal tender, was effected under the provisions of the Orders in

Council of the 9th of August, 1898. Under the Currency Note Ordinance, 1927, the currency includes notes issued by the Government of Gibraltar. These notes are of the value of 5l., 1l. and 10s.

There is daily postal communication with England by way of Spain and France. Rates of postage: Letters, 1½d. per oz.; newspapers, ½d. The internal postage rate is 1d. per oz. There is direct telegraphic communication with Spain, and by cables to England, Tangier, Malta, Lisbon, and Cadiz.

Education is compulsory since 1917. There are thirteen elementary schools, subsidised by Government, and several private schools, the number of scholars in average attendance being 2,350 for the school year ending 31st March, 1931. The Government-aided schools are for the most part managed by boards of the different denominations.

## THE GOLD COAST.

### THE GOLD COAST COLONY.

**Situation and Native Tribes.**

The Gold Coast Colony, with Ashanti, the Protected Northern Territories, and Togoland under British Mandate, is situated on the Gulf of Guinea, between 3° 7' W. long. and 1° 14' E. long., and is bounded on the west by the French colony of the Ivory Coast, on the east by Togoland under French Mandate, on the north by the French Colony of the Upper Volta, and on the south by the sea.

The area of the Colony is 23,937 square miles, of Ashanti, 24,379, of the Northern Territories, 30,486, and of Togoland under British Mandate, 13,041.

The Colony is inhabited by a large number of tribes, whose customs and forms of government are of a more or less similar character. Each tribe has its own head chief and every town or village of the tribe a chief or headman.

The head chiefs and chiefs form the council of the tribe, and assist in dealing with matters affecting its general welfare. The succession to the chiefs' stools is for the most part in the female line, the heir to the stool being selected from among the sons of the occupant's sisters, his brothers and the male off-spring of his aunts on the father's side.

The principal sea coast states are the following:—Nzima, Ahanta, Sekondi, Komenda, Edina, Oguana, Winneba, Assin Gomoa, Ga, Adangme, Awuna and Agbosome.

In the interior of the Colony the principal states are:—Aowin, upper and lower Wasaw, Sefwi, upper and lower Denkira, Tufel, Assen, Esikuma, Ajumako, Birim Akim Abuaakwa and Birim Kwahu, Akim Kotoku, Akwapim, eastern and western Krobo, Akwamu, Krepi, Shai and Ningo.

A number of different languages and dialects are spoken, the principal being, Twi, Fanti, Ewe and Ga; but the use of English is widespread.

For the purposes of administration the Colony is divided into three provinces, each presided over by a Provincial Commissioner. These Provinces are further divided into districts, presided over by District Commissioners. Most of these Officers perform judicial duties as magistrates in addition to being in administrative charge of their districts. The districts are as follows:—

1. Western province:—Districts—Axim, Ankobra, Tarkwa, Sekondi-Dixcove, Sefwi and Aowin.
2. Central province:—Districts—Cape Coast, Saltpond, Winneba, Western Akim.
3. Eastern province:—Districts—Acora, New Juaben, Akwapim, Volta River, Keta-Ada, Birim Akim-Abura, and Birim Kwahu, Ho (Togoland).

**History.**

It is said that as early as the reign of Edward I. (1272-1307) English navigators made voyages to the Gold Coast, and that a hundred years later French adventurers reached the coast, who, about 1364, built several lodges or forts, one being at Elmina, parts of which are supposed to have been subsequently incorporated in the present castle there. No definite evidence however exists to support these claims, although it is quite possible they are both correct; indeed, the natives until quite recently used to point out a hill near

Takoradi as the site of a French fort built there many years ago. For our earliest knowledge of the Gold Coast we are indebted to the Portuguese navigators of the later years of the 14th and first part of the 15th centuries. They had been slowly extending their voyages down the West Coast of Africa, and it is recorded that in 1471 Juan de Santerem and Pedro d'Escobar traded for gold in the neighbourhood of Elmina or Chama. They made the first European settlement eleven years later, when an expedition under Diego d'Azumbuja built and garrisoned the fort San Jorge da Mina (Elmina), the materials for which he brought with him from Portugal. Several other settlements were founded, and the country was claimed for the King of Portugal by virtue of a Papal Bull granted in 1480, which gave to Portugal all the islands already discovered and all future discoveries in Guinea. This Bull was confirmed by Pope Sixtus IV. a few years after the foundation of Elmina. The Portuguese remained in undisputed possession for over fifty years until British merchant adventurers commenced trading on the coast, the earliest voyages of which records remain being those of Thomas Windham and Antonio Anes Pinteado, in 1553, John Lok, in 1554, and William Towson, in 1555, 1556 and 1558. The British made no settlements at this time and their trade soon lapsed altogether until the early years of the 17th century. The Dutch, however, who made their first appearance on the coast in 1595, rapidly became serious rivals of the Portuguese and practically terminated their occupation by capturing Elmina in 1637, and Fort St. Anthony at Axim in 1642. After the activities of the Elizabethan sailors and merchant companies had come to an end, the English connection with the Gold Coast was revived by the efforts of a series of merchant companies, the first of which, called the "Company of Adventurers of London trading into Africa" was founded in 1618, but did not enjoy a successful career. Another company was formed in 1631, which established the first British fort on the coast at Kormantin, and lodges at several other places. This company was engaged in the slave trade, as were also the other European nations. Its charter was renewed in 1651, but in 1662 a new company was incorporated as the "Company of Royal Adventurers of England trading to Africa." Settlements were formed at Anomabu, Accra, and at Cabo Corso (Cape Coast), at which place the castle was built about this time by the English, although the Portuguese probably had a lodge there earlier. Three other European nations succeeded in acquiring territories on the Gold Coast, viz. :—The Swedes, the Brandenburgers, and the Danes. The first-mentioned built the fort of Christiansborg, near Accra about 1645, but were driven out by the Danes in 1657, and retired from the Coast. The Brandenburgers established "Fort Great Fredericksburg" at Princes River in 1683, and "Fort Dorothea" at Akwida in 1685, but their enterprise does not seem to have been prosecuted with much vigour, and was finally abandoned in 1720, their possessions falling into the hands of the Dutch. The Danes, however, after first selling the Fort at Christiansborg to the Portuguese, and re-buying it three years later, rapidly improved their position, building forts at several stations to the East of Accra, as far as Ada and Keta, and exercising a kind of Protectorate over Akwapim, and the Volta River district.

The third English Company was not successful. The Dutch traders spared no efforts to get rid of

their rivals, and in consequence of their aggression, an expedition was sent by Charles II. in 1664, under the command of Captain Holmes, which recaptured Cape Coast, taken the previous year by the Dutch, and all the other Dutch forts, with the exception of Elmina and possibly Axim. In the following year, however, the Dutch Commander de Ruyter recaptured all the lost Dutch forts, with the exception of Cape Coast; and the treaty of Breda, 1667, left affairs in the Gold Coast in this condition. The fourth English Company was incorporated in the year 1672 under the name of the "Royal African Company of England." Under its influence English interests steadily advanced, and forts were established at Dixcove, Sekondi, Komenda, Anomabu, Tantankweri, Winneba, Accra. The abolition of the exclusive privileges which the Royal African Company enjoyed, led to its decline and eventual dissolution in 1752. By the Acts of Parliament 23 George II., c. 31, and 25 George II., c. 40, a fifth trading Corporation, called the "African Company of Merchants" was formed, the membership of which was open to all British traders on payment of a fee of 40/-, compensation being paid for its charter and property to the Royal African Company. An annual subsidy was granted by Parliament to the newly-formed Company, until 1821, when by the Act 1 & 2 George IV., c. 28, the Company was dissolved and its possessions vested in the Crown, and placed under the Government of the West African Settlement, the seat of government being at Sierra Leone.

In 1824, the Governor of Sierra Leone, Sir Charles Macarthy, on visiting Cape Coast Castle, found the neighbouring country of the Fantis in possession of the Ashantis. He formed the resolution of inciting the Fantis against their oppressors, and led an army of them, with a few disciplined soldiers, against the Ashantis at Insamankow, where, on the 24th of January, 1824, he was killed, and his force totally routed.

The war which ensued was ended by the victory of the English at Dodowa, near Accra, in 1826. Peace was formally concluded by a tripartite Treaty in 1831, between the English, the Fantis, and the Ashantis.

In the meantime, Her Majesty's Government had inclined to the policy of retiring from the coast altogether, and after the peace they actually transferred the government of the forts to the local and London merchants interested, who secured as their Governor Mr. George Maclean, a man of marked energy and capacity. This gentleman, with a force of no more than 100 men at command, and with a Government subsidy of only 4,000*l.* a year, contrived to extend and maintain the influence of his Government over the whole tract of country now known as the Gold Coast. In 1843, it having been suspected that the Merchant Government connived at the slave trade, the forts were resumed by the Crown, and a Lieutenant-Governor was appointed. Mr. Maclean was continued in the direction of native affairs, under the title of Judicial Assessor to the Native Chiefs, which post he held until his death in 1847.

Hitherto the forts of the various nations were intermixed with each other, and there was no defined limit as to where the influence of one or the other began or ended. The imposition of Customs duties was rendered difficult, if not impossible, by the existence of the free ports of a rival nation within a stone's throw, as it were, of the duty ports. On the 24th of January, 1850, by Letters

Patent, the Settlements on the Gold Coast ceased to be dependencies of Sierra Leone, and in the same year, by the purchase of the forts and protectorate of the Danes, the Coast line from Christiansborg to Keta and the districts of Shai, eastern and western Krobo, Akwapim, Akwamu, and Krepi, were acquired by England. By a Commission dated the 19th February, 1866, the Gold Coast Settlements were reunited to the Colony of Sierra Leone under one Governor-in-Chief. In 1867, a convention was made with the Dutch by which the portion of the Coast lying to the west of the Sweet River, which flows into the sea between Cape Coast and Elmina, was allotted to Holland, England taking all the territory to the east of the river, and a customs union between the two nations was established. The Dutch, however, found many difficulties in the way of their occupation of the forts and possessions received from the English in exchange for those of their own lying to the East of the boundary line. The native tribes refused to recognise their authority, and the prospect before them was that of a long series of petty wars with no reasonable hope of profit to be gained in the future. The result was the convention made between England and Holland in 1871, by which the Dutch transferred all their forts and possessions on the Coast to the English, and Great Britain obtained at last the sole sovereignty and control of the territory from Half-Ashie to Aflao. The forts were transferred on the 6th of April, 1872.

At the conclusion of peace with the King of Ashanti in 1874, measures were taken for placing the Government of the Gold Coast upon a better footing. A new charter was issued dated the 24th of July, 1874, separating Her Majesty's Settlements of the Gold Coast (which was defined as comprising all places, settlements and territories which might at any time belong to H.M. in Western Africa between the 5th degree of west longitude and the 2nd degree of east longitude) and Lagos from those of Sierra Leone and creating them into one Colony under the style of the Gold Coast Colony under a Governor in Chief, with an Administrator at Lagos. There was one Executive Council and one Nominated Legislative Council for the two Settlements and one Supreme Court. On 6th of August, 1874, an Order in Council was made conferring on the new Legislative Council of the Gold Coast Colony power to enact Ordinances to give effect to all such powers and jurisdiction as Her Majesty might, at any time before or after the passing of the said Order in Council have acquired in the territories on the West Coast of Africa near or adjacent to the Gold Coast Colony. These territories, known as the Protected Territories or British Protectorate, were eventually annexed to the Colony in 1901. The Charter of 1874 was superseded by Letters Patent dated the 23rd of January, 1883, and the 13th of January, 1886, respectively. By the latter instrument the Gold Coast Colony was separated from Lagos and formed into a distinct Colony comprising all places, settlements and territories belonging to Her Majesty on the Gold Coast in Western Africa between the fifth degree of west longitude and the second degree of east longitude.

By an Order in Council passed on the 28th of September, 1901, and called the Gold Coast Order in Council, 1901, the Protected Territories were annexed to His Majesty's dominions and declared to be part and parcel of His Majesty's Gold Coast Colony. The limits of these territories, especially in relation to the Colony, had been inconveniently vague, and the Order in Council recited that it was expedient that the boundaries of the Gold Coast Colony should be further defined, and that all such portions of the

territories on the West Coast of Africa with the limits defined in the Order which had not already been included within His Majesty's dominions should be annexed to and should henceforth form part of the Gold Coast Colony. On the 22nd of October, 1906, a further Order in Council was passed called the Gold Coast Boundaries Order in Council whereby the limits of the Gold Coast Colony were closely defined. These are the present limits of the Colony.

#### *Constitution.*

The constitutional instrument providing for the Government of the Colony are the Letters Patent and Royal Instructions dated the 23rd of May, 1926, which creates the office of Governor and Commander-in-Chief and constitutes an Executive Council consisting of such persons as shall be directed by Instructions under the Royal Sign Manual and Signet, and a Legislative Council constituted in such manner and consisting of the Governor and such persons as are directed by the Order in Council of the 8th of April, 1925, and known as the Gold Coast Colony (Legislative Council) Order in Council, 1925. Royal Instructions were also passed on the 23rd May, 1925, directing that the Executive Council should consist of the Colonial Secretary, the Attorney-General, the Treasurer, the Director of Medical and Sanitary Services, and the Secretary of Native Affairs (these to be styled ex-officio Members) and such other persons as were at the date of the coming into operation of the aforesaid Letters Patent Members of the Council or as may be appointed under the Royal Sign Manual and Signet or as the Governor may appoint in pursuance of Instructions through a Secretary of State. The Legislative Council for the first time contains an elective element and consists of the Governor as President together with fifteen Official Members and fourteen Unofficial Members. The Official Members are the five senior Members of the Executive Council, the Comptroller of Customs, the Director of Public Works, the General Manager of the Railway, the Commissioners of the Eastern, Central and Western Provinces, as ex-officio Members, and such other officials not exceeding two at any one time as the Governor may appoint. The Unofficial Members are six Provincial Members, namely three for the Eastern Province, two for the Central Province, and one for the Western Province; three Municipal Members, namely: one each for the towns of Accra, Cape Coast and Sekondi respectively; one European Mercantile Member, one European Mining Member and three Europeans nominated by the Governor. The Provincial Members are Head Chiefs elected by the Provincial Councils of the said Provinces; the Municipal Members are elected by the electorate of the said towns; the Mercantile Member is elected by the Chambers of Commerce; and the Mining Member is elected by the Chamber of Mines.

#### *Municipal Government.*

The Town Councils Ordinance has been extended to the towns of Accra, Sekondi and Cape Coast. The town of Kumasi in Ashanti is under the control of a statutory corporation styled the Kumasi Public Health Board.

#### *Law and Justice.*

The Law of the Colony is the Common law, the doctrines of equity, and the statutes of general application in force in England, on the 24th July, 1874, modified by a large number of Local Ordinances passed since that date. The Criminal Law was codified in 1892, and the civil and criminal procedure are regulated by the Supreme Court and Criminal Procedure Ordinances both originally passed in 1876.

Justice is administered by the Supreme Court, which is presided over by the Chief Justice and five Puisne Judges. Divisional Courts of the Supreme Court are held in different parts of the colony. There are also a large number of inferior Courts with limited criminal and civil jurisdiction, some of which are presided over by Police Magistrates and the remainder by Commissioners. The Supreme Court has an original civil and criminal jurisdiction, and also decides appeals from the inferior courts. The Chief Justice, and the Judges in their respective provinces have also powers of revision of the decisions of the Magistrates and Commissioners in criminal cases. Appeals from the Divisional Courts and from the Courts of the Provincial Commissioners in land cases lie to the recently established West African Court of Appeal.

Native customary law is administered in all the Courts, in so far as it is not incompatible with any ordinance, or rule, regulation, order, proclamation, or bye-law made under any ordinance for the time being in force in the Colony, and not repugnant to natural justice, equity and good conscience.

Native Tribunals, presided over by Paramount or Divisional Chiefs, are established throughout the Colony, with criminal and civil jurisdiction in cases where the parties are subject thereto. Such jurisdiction has been much increased by recent legislation, and certain judicial powers have also been conferred upon State Councils and Provincial Councils.

There is an appeal from the Tribunal of a Divisional Chief to that of a Paramount Chief, and from a Paramount Chief's Tribunal to the District Commissioner's Court; but, where a title to land is in dispute, the appeal lies from the Paramount Chief's Tribunal to the Provincial Commissioner's Court.

#### *Prisons.*

There are four convict and 24 local prisons.

The convict prisons are at Accra, Sekondi, Kumasi and Tamale.

The following industries are carried on successfully:—carpentry, cabinet-making, tailoring, mat and basket making, boot and shoe making, weaving, farming, string and rope making, brick-making.

The Mark System, whereby the remission of one quarter of a sentence can be earned by hard work and good conduct, is applied to all persons sentenced to two years or more.

A Boys' Industrial Home under the control of the Salvation Army has been established at Ada.

#### *Climate.*

The climate although hot and damp, is cooler than that of most tropical countries situated in similar latitudes. The most adverse feature relative to the residence of Europeans is the very high relative humidity which only falls below 80° in the dry districts of the north and east and during the Harmattan. The average mean temperature is from 77°—81°, being greatest in the north and east and lowest in the forest area. Extremes of shade temperature have been 110° in Tamale and 49° at Kumasi.

The rainfall varies with the configuration of the country, being greatest in the south-western corner around Axim and least in the far north and coastal belt. There is the double wet season common to Tropical Africa corresponding to the double passage of the sun, the major rains in the south being in May and June and the lesser rains in September and October. In the Northern Territories intensity of the rains is reversed and in the extreme north the passages of the sun are so near to one another in date that there is only one wet season.

The most pronounced season is the Harmattan characterised by a dry north-east wind which blows

from the Sahara carrying clouds of red dust during the period of cessation of the south-west monsoon. This occurs at the period when the sun is passing southwards to the spring solstice during January and February, and the feature is the terrific desiccation of the atmosphere. A drop of 63% of relative humidity has been experienced in 24 hours with a result that papers and books curl up and the skin appears parched and dry. The daily range of temperature is more than doubled and the period is very trying to Europeans. The maximum shade temperatures for 1930 were:—At Accra, 88.3° F.; Sekondi, 86.4° F.; Kumasi, 81.1° F.; and Tamale 93.8° F. The rainfall was 28.30, 42.68, 50.78 and 47.42 inches respectively.

#### *Mail and Steamship Services.*

The African Steamship Company and the British and African Steamship Navigation Company Limited are under contract with the Postmaster-General for conveyance of His Majesty's mails between Liverpool and the West and South-West coasts of Africa.

Regular sailings are maintained between Liverpool and West African ports for mails, passengers and cargo. There are also regular sailings from London.

A mail steamer of these companies leaves Liverpool for Calabar and Port Harcourt alternately once a fortnight, calling at Takoradi, Accra and Lagos, the usual length of voyage being 18 to 19 days.

Cargo steamers are despatched from Liverpool once every three weeks, calling at the principal Gold Coast ports. Length of voyage varies from 20 to 25 days.

Cargo steamers are despatched monthly, or as inducement offers, from New York, calling at the principal Gold Coast ports outwards and homewards. Length of voyage varies from 30 to 35 days.

Cargo steamers are despatched from Hamburg fortnightly, calling at Rotterdam, Antwerp and London for the principal Gold Coast ports. Length of voyage varies from 20 to 30 days.

Cargo steamers are despatched monthly, or as inducement offers, from Canada, calling at Sierra Leone outwards and frequently at Gold Coast ports homewards. Length of voyage, about 25 days.

Elder Dempster & Company, Limited, act as managers for these two companies, and the Agents in the Gold Coast are the West African Lighterage and Transport Company, Limited.

Mail steamers of Chargeurs Reunis Line, sailing from Bordeaux, call at Accra and Takoradi, on the homeward voyage for passengers and cargo once a month. Cargo steamers sail at regular intervals outwards and homewards. Local Agents:—F. and A. Swanzy, Lighterage Department. Branch of the United Africa Company, Limited.

Passenger and cargo steamers of Compagnie Francaise de Navigation a Vapeur (Cyp. Fabre), and Compagnie Marseillaise de Navigation a Vapeur (Cie Fraissinet), sailing from Marseilles call frequently outwards and homewards at Gold Coast ports. Local Agents:—F. and A. Swanzy, Lighterage Department, Branch of the United Africa Company, Limited.

Cargo steamers, with passenger accommodation, of the Barber Line (American West African Line) are despatched every three weeks from New York and monthly from the Gulf of Mexico, calling at the principal Gold Coast ports. These sailings are augmented during the Colony's cacao season to relieve congestion of cacao destined for America. The voyage from New York is now reduced to 28 days. Calls are also made at all ports to Loanda, including the Belgian Congo.

Cargo steamers of the United Africa Company, Limited, with limited accommodation for passengers,

are despatched from Liverpool and the Continent. There are about four sailings per month, and steamers call outwards at all Gold Coast ports, and call homewards as inducement offers. Local Agents:—F. and A. Swanzy, Lighterage Department, Branch of the United Africa Company, Limited.

Cargo steamers of the Societe Navale de L'Ouest sail monthly from Hamburg, Antwerp, Havre and Bordeaux and call at the principal Gold Coast ports. Homewards they call at continental ports as inducement offers. Local Agents:—Anglo-Guinea Produce Company, Limited, per F. and A. Swanzy, Lighterage Department, Branch of the United Africa Company, Limited.

Cargo steamers of the Navigazione Libera Triestina Line sailing from Venice, Trieste, Naples, Genoa, Marseilles and Barcelona call at the principal Gold Coast ports once every month. Local Agents:—Messrs. Anglo-Guinea Produce Company, Limited, per F. and A. Swanzy, Lighterage Department, Branch of the United Africa Company, Limited.

Mail and Passenger steamers of the German-African Lines (Woermann-Linie A.G., Deutsche Ost-Afrika Linie, Hamburg Amerika Linie (Afrika Dienst) and Hamburg Bremer (Afrika Linie) managed by the Woermann-Linie A.G. of Hamburg, sail from Hamburg to West African ports via Rotterdam, Boulogne s.M. and Southampton at about monthly intervals, calling at Freetown, Monrovia, Takoradi, Accra, Lagos, Port Harcourt, Victoria, Tiko, Duala and Fernando Po.

Two to three Mail and Passenger Steamers to South and East Africa are despatched every month from Hamburg, running either via the Canary Islands and Capetown, or via the Mediterranean and Suez, but these steamers do not always call at Gold Coast ports.

Cargo steamers of the above Lines are despatched from Hamburg via Rotterdam, Antwerp and Havre five times in each month at regular intervals to African ports. Representative for the Gold Coast:—Woermann-Linie, Resident Agent, Accra.

The Holland West-Afrika Lijn N.V., Amsterdam, maintain mail, passenger and freight services from Hamburg, Amsterdam and Bordeaux to the West African ports by four sailings monthly.

The mail and passenger steamers are despatched monthly from Hamburg via Amsterdam, Bordeaux (through tickets from Dover), reaching Takoradi in 13 days from Bordeaux. After Accra they proceed down the coast as far as Togo, Dahomey, Nigeria, Fernando Po and the Cameroons.

Homewards they call at Accra and Takoradi and reach Europe via Freetown, and Conakry within 14 days.

Cargo steamers of this Line are despatched three times a month from Hamburg, Amsterdam and Bordeaux. Several of these boats have limited passenger accommodation. The length of voyage varies from 17 to 27 days.

All these steamers call at Le Havre homewards and passengers for the United Kingdom are transhipped to Southampton without additional charge.

Local Agents:—Holland West-Afrika Lijn N.V., P.O. Box 269, Accra.

#### Harbours.

The Gold Coast was for many years at a great disadvantage in that it possessed no deep-water harbour. Jetties protected by breakwaters were built at Sekondi and Accra, for the use of surf boats and lighters.

Sekondi has been replaced by a deep-water harbour a few miles to the westward at Takoradi which was opened to shipping in 1928. The Harbour is 220 acres in extent and provides moorings for six ocean-

going ships whilst four can be berthed alongside the main wharf, which contains a large manganese-loading transporter.

#### Internal Communications.

Railway communication consists of a main line running from Sekondi to Kumasi thence to Accra, a distance of 362 miles, with branches, Takoradi Junction to Takoradi (7 miles), Inshaban Junction to Inshaban (4 miles), Tarkwa to Prestea (18 miles) and Huni Valley to Kade (99 miles). The Main Line and Branches are 3' 6" gauge. There is a branch line Accra to Weshiang (Accra Water Works) 10 miles in length, which is 2' 6" gauge.

The railway gross earnings for the year 1930-31 were 979,235*l.*, and the working expenditure, including provision for renewals and pensions, was 630,787*l.* The total number of miles open for traffic on the 31st March, 1931, was 500, and the capital cost 9,305,607*l.*

The mileage of motor roads maintained by the Public Works Department is 1,857½ miles, as follows:—

	Tarmet Miles.	Gravel Miles.	Total Miles.
Accra and Eastern Province .. ..	137	330½	467½
Central Province .. ..	126½	293½	419½
Western Province .. ..	6	358½	364½
Ashanti .. ..	158	171	329
Northern Territories .. ..	—	276½	276½
	427½	1,430½	1,857½

The mileage of metalled and tarred roads now amounts to 427½ miles. In addition to the 1,857½ miles of motor roads which are under the control of the Public Works Department, there are some 3,900 miles of motorable roads which have been constructed and are maintained by the Chiefs. These roads are all motorable during the dry season and have opened up the country in all directions to motor traffic, and ferries have been installed and bridges built whenever necessary.

The principal waterway is the Volta River, which rises in the Kong Mountains and flows into the sea at Ada, after a course of 200 miles. It is navigable for light draught launches as far as Akuse, and, with the exception of the Krachi rapids, can be used for canoe traffic during certain seasons of the year as far as Yeji. The Ankobra River is navigable for many months of the year by surf-boats and light draught launches for a distance of 50 miles. The Tano, connected with Half Assini, by the main lagoon, and by a tramway, three miles in length, is navigable for light draught launches and canoes as far as Tanso, a distance of about 60 miles.

Rapids at Sutri prevent this river being further utilised.

The old canoe ferry over the Volta at Senkye has been replaced by a stern wheel ferry capable of taking the largest cars and lorries.

The Government maintains a Motor Transport Service, which operates in centres where vehicles provided by private enterprise are unobtainable or more costly than a Government-owned fleet. The headquarters is at Accra, with branches at Kumasi and Tamale. The department also handles Government cargo and officials' baggage and stores arriving by sea and arranges the coastwise shipping of Government personnel and stores between ports within the Colony.

In addition to their departmental duties, the officers of the Transport Department assist in carrying out the provisions of the Motor Traffic Ordinance by acting as Testing and Certifying Officers.

*Medical Facilities.*

Medical Officers are stationed at all the principal centres of the Colony, Ashanti and the Northern Territories. The majority of these officers travel in their districts and give treatment in village dispensaries.

There are 7 European Hospitals in the Gold Coast: 5 in the Colony, 1 in Ashanti and 1 in the Northern Territories.

There are also 33 African Hospitals: 21 in the Colony, 5 in the Northern Territories, 5 in Ashanti and 2 in Togoland under British Mandate.

There are in addition three Motor Travelling Dispensaries which do valuable work in the outlying districts.

The Gold Coast Hospital was opened at Accra in October, 1923, and does excellent and steady work and continues to grow in popularity with the native community. It contains over 200 beds and 18 cots which are nearly always occupied.

In the year 1930-31 it dealt with over 14,000 out, and 3,000 in-patients, and 650 major operations were performed. At the African Hospital, Kumasi, 20,000 out, and 2,000 in-patients were treated during the same period.

An up-to-date Maternity Hospital in charge of a Woman Medical Officer, and now containing 29 beds and 15 cots was opened in 1928 at Korle Bu in the immediate vicinity of the Gold Coast Hospital and is highly appreciated. The training of Midwives is carried on here.

In addition to the above there is a Laboratory Services Branch consisting of a central Medical Research Institute situated at Accra close to the Gold Coast Hospital with branches in important towns, and a Mobile Laboratory equipped for emergency or localized research. Valuable work in Research, Clinical pathology, etc., is carried on by this Branch.

*Sanitation.*

The Health Branch of the Medical Department is controlled by a Deputy Director of Health Service who is responsible to the Director of Medical and Sanitary Services. Medical Officers of Health are stationed in the most important towns in the Colony, Ashanti and the Northern Territories. All Medical Officers are charged with public health duties in their respective districts and in the more populous areas are assisted by European Superintending Sanitary Inspectors.

An increasingly important activity of the Health Branch is village sanitation, which in several areas, particularly in Ashanti, has gone ahead rapidly of recent years. The people are shown how to lay-out their villages on open lines and are instructed how to erect houses of a much improved type, and attention is paid to the improvement of village water supplies.

Birth and death registration is in force in 30 recognised registration areas, but is not generally applied. A birth-rate of 30.5 and a crude death-rate of 20.4 were returned for the year 1930. The infant mortality rate is somewhat high the figure for Accra for the year 1930 being 112.

Maternity and Infant Welfare Centres in charge of Women Medical Officers have been established at Accra, Koforidua, Kumasi, Sekondi and Cape Coast. Medical inspection of school children is systematically carried out.

*Posts and Telegraphs.*

The mails exchanged fortnightly between the Gold Coast and other British Colonies on the West Coast and the United Kingdom are carried by the steamers of the British and African Steam Navigation Company and of the African Steamship Company. Mails are exchanged over and with Togoland under French

Mandate and with the French Ivory Coast: and direct mails from Hamburg are received fortnightly.

There are 73 Post Offices and 201 Postal Agencies, the distribution being effected principally by rail and motor. When this is impossible a runner service is employed. The rate for letters (1 oz.) within the Empire is 1½d., to the United States of America 1½d., elsewhere 3d.

There are 4,111 miles of Telegraph Line Wire serving all the principal centres. The rate is 1/- for 12 words, and 1d. per word in excess of 12.

There are 7,398 miles of double wire line and underground cable circuits in use which link up 119 Exchanges and Call Offices throughout the country.

All passenger and cargo boats entering Takoradi Harbour are connected to the mainland telephone service and telegraph and phonogram system.

There are about 2,111 telephones including those in Government Offices in operation, and extensions to the system are in progress.

Parcel Post despatches are exchanged direct with the United Kingdom and with other British Colonies in West Africa, and the United States of America. Parcels for other countries are forwarded through the United Kingdom. The C.O.D. service from the United Kingdom is extensive.

British Imperial Postal Orders are issued and paid, and an inland and foreign Money Order system is in operation.

A coastal radio-telegraph station at Takoradi transmits radio-telegrams at 9d. per word.

The Eastern Telegraph Company transmits messages by cable to any part of the world from Accra.

*Education.*

Education in the Gold Coast has hitherto largely been, and is now to a still greater extent, aided and controlled by Government, and all schools are open to inspection by officers of the Education Department. From the 1st January, 1927, a new Education Ordinance came into operation, the more important of its provisions having as their aim the compulsory registration of all teachers and the awarding of definite incrementally graded salaries according to the qualifications possessed by Africans engaged in teaching.

Other objects are to raise the quality of instruction in the schools, by the payment of grant according to the efficiency of the teachers in them, and the protection of children against "instruction" by well-meaning but ignorant persons under conditions which seriously militate against health and right progress.

Apart from a large number of non-aided primary schools, there are twenty-four Government schools and 314 Assisted schools in the Colony, Ashanti, and the Northern Territories. The latest figures show that these Government and Assisted Primary Schools have an enrolment of 41,924 pupils, of whom 9,693 are girls. The largest of the Missions working in these territories is the Presbyterian Church with 111 Assisted Schools followed next in order of size by the Ewe Presbyterian Church with 69 Assisted Schools.

In addition to the Government Primary Schools there are the Accra Government Technical School and four Junior Trade Schools in different parts of the country. They are all boarding schools established by Government for the purpose of giving instruction in the more common building and engineering trades with simple literary and technological training.

There are also training schools controlled by the departments concerned, e.g., Posts and Telegraphs, Agriculture and Forestry, and Surveys, where pupils

are boarded and trained, being paid a salary while undergoing instruction.

Teachers intended for Government service and certain others receive free board and instruction in the Training Department of the Prince of Wales' College, Achimota.

Teachers are also trained at Wesley College, Kumasi, the Presbyterian Training College at Akropong, Akwapim, the Roman Catholic Training Colleges at Amisano, near Elmina, and at Bia in Togoland under British Mandate.

The training of female teachers by Missions, under conditions of grant similar to those applying to male students at the Mission Colleges, has commenced.

There are two residential Secondary Schools at Cape Coast, both of which are Government aided, one being under the Wesleyan Mission and the other under the English Church Mission Local Authority.

The Roman Catholic, English Church, Wesleyan, and Presbyterian Missions each have residential Girls' Schools in which literary and domestic training is given.

Educational policy in the Northern Territories has, since the 1st April, 1926, been controlled by a different ordinance from that of the Colony proper, in order that the special needs and difficulties arising with a people who are only just beginning to come much into contact with other peoples of the Gold Coast, may receive due and proper consideration.

The Prince of Wales' College, Achimota, near Accra, which was opened in January, 1927, is intended ultimately to provide a complete course of instruction for boys and girls from the Kindergarten stage up to the standard of the London Intermediate Examination. While keeping local conditions in view, it is a boarding school open to pupils of all nationalities and religions. It is intended that the usual primary and secondary school subjects should be taught, with arts and science, and there will be agricultural, engineering, manual and domestic training. The College also trains teachers for Government and Assisted Schools. All teaching in the College is based on a vernacular foundation and in the lowest classes instruction is given in four African languages.

The College which was granted a separate Constitution on the 1st April, 1930, is now administered by a Council consisting partly of elected and partly of nominated members. The Gold Coast Government makes an annual grant to the College.

#### *Currency and Banking.*

Prior to 1912 and 1913 the currency consisted chiefly of British gold (comparatively rare), silver and copper. In 1912, subsidiary nickel-bronze coins (1d., ½d. and ¼d. pieces) were introduced, and in 1913 a special silver currency common to all the British West African Colonies of the same weight and fineness as the corresponding British coins. The coins issued are 2s., 1s., 6d. and 3d. pieces. Owing to the great increase in the demand for currency and the difficulties in obtaining adequate supplies, it was found necessary in 1915 to make British Treasury Notes legal tender, and in 1916 special West African Currency Notes were introduced. 20s. and 10s. Notes are the only values now in circulation, 5s., 2s. and 1s. Notes having been withdrawn. In 1920, owing to the rapid disappearance of silver coins, an alloy coinage was introduced of the same denominations as the silver coins and silver has now practically been withdrawn from circulation. The special West Africa silver and alloy currency and the West African Currency Notes are under the management of the West African Currency Board and are secured by sterling securities held by the Board. Current British gold and silver coins, British 20s. and 10s. Treasury

Notes, West Africa Currency silver and alloy coins, West African Currency Notes, and West Africa nickel-bronze coins are all legal tender.

The Bank of British West Africa, Limited, opened at Accra on the 1st January, 1897, and now has branches at all the principal business centres in the Colony.

The Colonial Bank (now Barclay's Bank (Dominion, Colonial and Overseas) Ltd.) began business at Accra in 1917, and branches have now been opened at other centres. Both Banks have a savings department. In 1888, a Government Savings Bank was established which is now under Post Office management. On 31st December, 1930, the amount to the credit of depositors was 89,115*l*.

Accounts are kept in sterling.

#### *Population.*

The first attempt to take a census was made in 1891, which, however, covered the Colony only. Since then a census has been made at ten-year intervals, viz.:—1901, 1911, 1921 and 1931. Except in 1901, the whole of Ashanti and the Northern Territories have been included. In a country such as the Gold Coast, imperfect communications and lack of education make the holding of a complete census a matter of great difficulty and even now the figures cannot be considered absolutely accurate.

The approximate African population on Census day, 1931, was as follows:—

The Colony	.. ..	1,545,140
Ashanti	.. ..	582,866
Northern Territories	.. ..	717,283
Togoland (under British Mandate)	.. ..	275,925
		<hr/>
		3,121,214

The total number of Non-Africans was returned as 3,182 of whom 104 were "maritime", leaving 3,078 resident in the Colony and its Dependencies. Of these the majority were of British origin. The African Population of some of the chief towns was as follows:—

Accra	.. ..	59,895
Kumasi	.. ..	36,200
Cape Coast	.. ..	17,685
Keta	.. ..	6,392
Sekondi	.. ..	16,742
Teshi	.. ..	5,715
Winneba	.. ..	10,990
Saltpond	.. ..	6,396
Nsawam	.. ..	8,822
Asamankese	.. ..	5,900
Koforidua	.. ..	19,634

#### *Industries, Trade and Customs.*

The chief products of the Colony are cocoa, gold diamonds and manganese. Palm oil, palm kernels, lumber, kola and copra are also shipped.

The cultivation of cacao was started in Akwapim in 1879, and exports in 1891 realised 4*l*. Coffee at that time fetched a fair price, and it was not until 1898, when the price for the latter article fell so low as to make its cultivation at any distance from the coast unremunerative, that attention was paid to cacao. Since that year the cacao industry has made rapid strides. In 1900 the value exported was 27,280*l*., in 1918, 1,796,985*l*., and in 1920, 190,056,296*l*. In 1921, although the value fell considerably to 4,764,067*l*., the quantity of cacao exported exceeded the 1920 export by 8,422 tons. In 1928, 225,007 tons, valued at 11,229,512*l*., in 1929, 238,068 tons, valued at 9,704,493*l*., and in 1930, 190,580 tons, valued at 6,970,355*l*. were exported respectively. There is a tax of ½ of a penny per lb. on cacao exported.

*Medical Facilities.*

Medical Officers are stationed at all the principal centres of the Colony, Ashanti and the Northern Territories. The majority of these officers travel in their districts and give treatment in village dispensaries.

In 1921, although the value fell considerably to 4,764,067*l*., the quantity of cacao exported exceeded the 1920 export by 8,422 tons. In 1928, 225,007 tons, valued at 11,229,512*l*., in 1929, 238,068 tons, valued at 9,704,493*l*., and in 1930, 190,680 tons, valued at 8,970,385*l*. were exported respectively. There is a tax of ½ of a penny per lb. on cacao exported.

Gold has been exported from the Gold Coast more or less continuously since the discovery of the country by Europeans in the fifteenth century. Up to 1874, however, the industry was almost entirely in the hands of the natives. The first company for gold mining in West Africa was founded in 1874, but did little beyond exploration. A second company, formed in 1879, engaged in mining operations in the neighbourhood of Tarkwa, and from that year the progress of mining enterprise is indicated by the rapid increase in the exports of gold bars, the result of European operations, as compared with those of gold dust, the produce of native mining. In 1899 there was a very remarkable development of the mining industry, which, though checked for a while by the disturbances in Ashanti, received a fresh impetus from the passing of the Concessions Ordinance in 1900, the progress of the railway, and general improvement in means of transport.

Gold is widely diffused throughout the Colony, Ashanti, and some parts of the Northern Territories, in quartz and alluvial deposits, while in Waasaw there is good conglomerate or banket formation which is now reported to extend to the Birrim District in the Eastern Province. The rivers are said to be rich in alluvial deposits. From the year 1903 (the first in which reliable statistics of production were kept) to 1921, the gold produced in the colony and Ashanti amounted to 5,062,267 fine ozs., valued at 21,504,750*l*. The highest annual production was in 1914, viz.:—410,656 fine ozs., valued at 1,744,498*l*. In 1928 the value of gold and gold dust exported was 684,815*l*. Extensive deposits of Bauxite exist, the most important being situated near Mpraeso in the Kwahu district where a large quantity of high grade ore has been located. In the Eastern Province near Kibi diamonds have been found, and the alluvial is being worked. The diamond exports in 1925 were 77,313 carats, valued at 98,760*l*; in 1928, 698,826 carats, valued at 584,279*l*. In 1929, 860,536 carats, valued at 584,613*l*, and in 1930, 861,119 carats, valued at 568,994*l*. Small diamonds have also been found in other localities.

Manganese Ore exists in large quantities close to the railway line about 35 miles from the port of Takoradi. Shipments of the Ore reached 338,657 tons in 1925, 419,224 tons valued at 748,286*l*. In 1929 and 417,490 tons, valued at 823,396*l*. in 1930.

Modern facilities at the port of Takoradi for shipping large quantities of manganese ore were completed early in 1930.

The trade in products of the oil-palm has suffered severely in the last quarter of a century from the competition of cacao, and except in certain localities, notably the Volta River District, the farming of this kind of produce is neglected.

Native manufactures are insignificant. Cloths are woven in many parts of the country, for the most part of English spun yarn, but in the northern districts occasionally of thread manufactured from the indigenous cotton plant. Narrow strips of four to six inches are woven on a rough hand loom, and stitched together to make clothes of various sizes. Gold and brass are worked by native smiths; canoes are made on the coast rivers; pottery for domestic purposes is made by hand, and wood-carving is done chiefly in Ashanti and Kwahu. Salt is roughly prepared from the lagoons between Accra and Keta and sent up country to the markets of the Northern Territories. Fishing is extensively carried on along the coast, and large quantities of sun-dried

fish are sent to the villages and markets of the interior.

Quantities and Values of the following Exports for 1930 were:—

	Quantity.	Value.
Cacao .. ..	190,580 tons	£6,970,385
Gold (raw) .. ..	272,089 Ozs.	1,055,634

Kola Nuts .. ..	8,441,318 Lbs.	138,322
Palm Kernels .. ..	5,470 Tons	69,018

The first in value of the imports in 1930 was cotton piece goods, followed by provisions—all kinds, machinery, motor spirit, silk goods (including artificial silk), motor cars, manufactured tobacco, cigarettes, spirits (potable), hardware, corrugated iron sheets, malt liquors, soap, illuminating oil, apparel, cement, bags and sacks, tyres for motor vehicles, coal and sugar.

The Customs Tariff is non-preferential. There is a 15% *ad valorem* import duty on textiles, hardware and various other classes of goods and specific duties on alcoholic liquors, tobacco, timber and a number of other articles.

### ASHANTI.

Ashanti is inhabited by a large number of confederated tribes, the principal of which are the Bekwais, Adansis, Kokofus, Nkwantas, Kumasis, Agunas, Mampons, Nutas, Kumawus, Bompatas, Juabins and Ejias. Each tribe has its own Head Chief, but from time immemorial the King of Kumasi was recognised as the King paramount of the Confederation.

In 1873 the King of Ashanti invaded the British Protectorate with a large army, and reached Elmina, where he was entirely defeated by the British forces under Colonel (afterwards Sir) Francis Festing. Later in the year Captain (afterwards Sir) John Glover was sent to the eastern districts of the Protectorate to organise the tribes in that quarter, for a flank movement against the Ashanti territory. At the same time Sir Garnet, (afterwards Viscount) Wolseley was despatched to the Gold Coast, with British and West Indian troops, native levies, and some seamen and marines, to operate against the Ashantis, starting from Cape Coast. On the 31st of January, 1874, he came into general engagement with the enemy at Amoafu, where he drove them from their position after desperate resistance. The next four days were employed continuously in fighting, until, on the evening of the 4th of February, the British force entered Kumasi. The King had fled to the bush. A few days later Sir John Glover also reached Kumasi. On the 13th, messengers sent by the King concluded a peace with Sir Garnet Wolseley at Fomana, which was afterwards signed with a pencil cross by King Kofi. By the Treaty of Fomana, the King of Ashanti renounced all claims on the Protectorate, promised to protect traders, to abandon human sacrifices, and to pay an indemnity of 50,000 ozs. of gold.

In 1884 Prempeh, who was then King of Kumasi, and had successfully fought against the Nkoranzas, who had revolted against his rule, threatened to attack the Atebusus. This attack was averted by the despatch of a force under Sir Francis Scott, and an ultimatum was then sent to Prempeh warning him not to enter British territory, and suggesting that he should acquiesce in the establishment of a Residency at Kumasi. No definite reply to this suggestion could be obtained, and a military expedition accordingly proceeded to Kumasi, to compel compliance with the demands of Her Majesty's Government. The expedition, under the command of Sir Francis Scott, entered Kumasi without resistance, January, 1886. Prempeh made submission, but, failing to comply with the terms dictated, was brought to the coast as a political prisoner and lodged in Elmina Castle, whence he was eventually deported to the Seychelles. A Resident was at the same time installed at Kumasi, and thus commenced an entirely new departure in the relations of the Gold Coast Colony with Ashanti.

In 1900 the Governor visited Kumasi, and was there besieged by the Ashantis, the town being closely invested. Provisions ran short, and a part of the garrison, with the Governor, cut their way out; the rest were relieved by Colonel (afterwards Sir J.) Willcocks, commanding the Ashanti Field

Force, on 15th July, after severe fighting. The Ashantis were subsequently thoroughly routed at Abuoenu.

An Order of the King in Council, dated September 26th, 1901, defined the boundaries of Ashanti, annexed it to His Majesty's Dominions, and provided for its administration under the Governor of the Gold Coast. Ashanti is under a Chief Commissioner, with Commissioners of Provinces and Districts under him. By a subsequent Order in Council of the 22nd of October, 1906, the boundaries between the Colony and Ashanti, and between Ashanti and the Northern Territories, were re-adjusted and defined, with due regard to tribal lands and natural features.

Ashanti is now divided into two provinces, the Eastern with headquarters at Kumasi and the Western with headquarters at Sunyani. Each of these is subdivided into districts under a District Commissioner who exercises limited jurisdiction; as does also a Police Magistrate in the town of Kumasi.

In 1919 a Circuit Judge was appointed for Ashanti. This officer relieves the Chief Commissioner of practically all judicial work except civil cases and matters in which native customary law is applicable.

The peaceful relations which, under the auspices of the Gold Coast Government, have existed for many years now between the Ashantis and the neighbouring tribes have been signified by not infrequent petitions emanating from the Gold Coast Colony as well as from Ashanti for the return from exile of Prempeh, the former Chief of Kumasi. The confidence felt by the Government of the Gold Coast in the loyalty of the Ashanti people led to the granting of this request in 1924, and to approval being given in 1926 of his election by his people as Omanehene or Head Chief of the Kumasi tribe.

Prempeh died on the 12th May, 1931 and was succeeded by his nephew Osei Agyiman Prempeh II as Omanehene of Kumasi on the 7th July, 1931.

### THE NORTHERN TERRITORIES.

In 1897 the territories to the north of Ashanti were constituted a separate district with the title of "The Northern Territories," and placed in charge of a Commissioner, and a grant-in-aid of the expenditure in the Northern Territories was voted by Parliament.

Major H. P. Northcott was appointed Commissioner and Commandant of these territories, with the rank of Lieutenant-Colonel. The negotiations between the British and French Governments for the settlement of territorial questions in West Africa, which had been suspended in 1896, were resumed in October, 1897; and on 14th June, 1898, after a period of considerable tension in consequence of the proximity of the British and French forces in the disputed territories, a Convention was signed at Paris with a proviso that it should be ratified within six (subsequently extended to twelve) months. By this Convention the boundary between the Gold Coast and the French Colony of the Ivory Coast, which had only been settled in 1889, as far as the 9th parallel of north latitude, was continued northwards along the course of the Black Volta River to the 11th parallel, and it was then drawn along the 11th parallel with a deflection to the north in the neighbourhood of Mamprusi, until it met the Franco-German boundary of 1897.

The effect of the Anglo-French Convention of 14th June, 1898, was to leave Bona, Lobi, and Moshi to France, while Dagati, Wa, Mamprusi, and the southern portion of Grunshi were included in the British sphere.

On 14th November, 1899, an agreement was concluded with Germany for the partition of the "neutral zone." This partition assigned Salaga to Great Britain, and Yendi to Germany, and to the north of the zone gave Mamprusi to the former and Chakoei to the latter.

Survey operations were undertaken by Anglo-French and Anglo-German Commissions during 1901-2, for the delimitation of those portions of the boundaries which had not yet been settled.

By the demarcation on the ground of the Anglo-German boundary between the Trans-Volta District and the adjoining Colony of Togo; of the Anglo-German boundary north of the 9th parallel of north latitude; and of the Anglo-French boundary along the 11th parallel of north latitude, all the frontiers of the Colony, Ashanti and the Northern Territories have now been exactly defined.

Provision was made for the administration of the Northern Territories under the Gold Coast Government by an Order of the King in Council of 26th September, 1901, and by an Administrative Ordinance of January 1st, 1902, the Northern Territories were placed under a Chief Commissioner, and divided into the White Volta, Black Volta, Kintampo and Gonja Districts with headquarters at Gambaga, Wa, Kintampo and Salaga.

By orders of 1927, the country was re-divided as follows:—

Northern Province, consisting of the districts of Navrongo; Kussasi (Protectorate Section of), Southern Mamprusi (Protectorate Section of), Lawra-Tumu, Wa and Zuarungu.

Southern Province, consisting of Western Dagomba, Eastern Gonja (Protectorate Section of), and Western Gonja.

The Districts are presided over by Commissioners, who are responsible to the Chief Commissioner and have Courts of Justice, with appeal to the Chief Commissioner at Tamale.

By Order in Council, of the 22nd of October, 1906, the boundaries between the Northern Territories and Ashanti were re-adjusted and defined.

An important step was taken with regard to the Government of this Protectorate by replacing, with effect from the 1st of January, 1907, the former semi-military administration by a staff of Civil District and Assistant District Commissioners, and by establishing new stations. Simultaneously, the 2nd Battalion of the Gold Coast Regiment was disbanded and a force of armed constabulary substituted therefor. In 1929, the Northern Territories Constabulary was disbanded and their duties taken over by the Gold Coast Police.

In 1920 the Circuit Judge, Ashanti, was appointed to exercise in the Northern Territories powers similar to those which he exercises in Ashanti.

#### TOGOLAND UNDER BRITISH MANDATE.

The former German protectorate of Togoland is situated on the Gulf of Guinea, bounded on the east by Dahomey and on the west by the Gold Coast and its Protectorates. The actual coast-line lies between 1° 45' and 1° 14' W. longitude, the frontiers, however, especially on the west, opening

out considerably. The total area is about 36,500 square miles.

Until 1884-85 the majority of the tribes along the littoral and its immediate hinterland, also those adjoining the Northern Territories of the Gold Coast regarded themselves as being under the suzerainty of Great Britain, but by agreements made with the French on the 24th December, 1885, and with the British on the 14th and 28th July, 1886, when provisional frontiers were fixed, German influence was formally recognized by those Powers. Subsequent agreements dated the 23rd July, 1897, and the 14th November, 1899, between Germany and the Governments of France and Great Britain respectively defined the northern frontiers of Togoland.

Immediately upon the outbreak of war between Great Britain and Germany Togoland was invaded by the Gold Coast forces. On the 6th August, 1914, Captain E. B. Barker entered the capital, Lome, under a flag of truce and on the following day that town and the hinterland for a distance of 120 kilometers from the sea were surrendered. On the 8th August Anecho (Petit Popo) was occupied by the French. Operations on a larger scale commenced on the 11th August when Temporary Lieutenant-Colonel F. C. Bryant landed at Lome. After engagements at Agbelufoe and Chra River on the 16th and 24th August respectively the enemy retired on the great wireless station at Kamina, which they destroyed. On the 26th August the Acting-Governor surrendered the Colony unconditionally.

*Pour parlers* then took place between Sir Hugh Clifford, governor of the Gold Coast, and M. Noufflard, governor of Dahomey, as the result of which an agreement, subsequently ratified by the governments concerned was drawn up. Under this agreement Togoland was provisionally divided into British and French spheres. To the British were allotted the western administrative areas of Lome and Lomeland, Misahohe, Kete-Krachi and Yendi, and to the French Anecho, Atakpame, Sokode and Sansanne Mangu.

By proclamation dated the 30th September, 1914, civil courts were established under the presidency of political officers seconded from the Gold Coast, appeal lying from the district courts to that of a senior political officer. In the absence of a local criminal code, that of the Gold Coast was introduced as a basis of procedure.

In June, 1915, the office of senior political officer was merged in that of the senior military commander, without prejudice, however, to the civil nature of the court concerned.

Boundary adjustments with the French took place in 1920 in accordance with an agreement signed by Lord Milner and M. Simon on 10th July, 1919. Lome and the whole of the coast were given over to the French, and the British received additional territory in the interior. The area of the British sphere is 13,041 square miles.

In October, 1921, the Council of the League of Nations approved in principle the arrangements made between the British and French Governments for the division of Togoland in accordance with the agreement of 10th July, 1919, and the application to the territories of the Mandate system; and on 20th July, 1922, after a delay due to negotiations between the United States Government and the Mandatory Powers, the Council confirmed the mandates and defined their terms.\*

\* For text of the British mandate, see Cmd. 1794.

Togoland under British Mandate is now administered under the provisions of the British Sphere of Togoland Order in Council, 1923, which was issued on the 11th of October, 1923.

Under this instrument, the British Sphere is divided into the Northern Section and the Southern Section. The Northern Section is administered as if it formed part of the Northern Territories of the Gold Coast, and the Southern Section is administered as if it formed part of the Eastern Province of the Gold Coast Colony. The Chief Commissioner's Court of the Northern Territories of the Gold Coast exercises jurisdiction in the Northern Section; and the Supreme Court of the Gold Coast Colony exercises the jurisdiction in the Southern Section.

Subject to the terms of the Mandate, the law for the time being in force in the Northern Territories of the Gold Coast is the law in force in the Northern Section, and the law for the time being in force in the Gold Coast Colony is the law in force in the Southern Section. The Governor of the Gold Coast Colony is empowered to enact Ordinances with respect to the British Sphere as a whole, or with respect to either Section thereof separately. Togoland under British Mandate is not distinguished from the Gold Coast in the statistical returns, but it is beyond question that the revenue which it brings to the Gold Coast is inconsiderable compared with the money expended upon it. It contains no part of the old German railway system, which retains most of the export and import trade of the Southern and richest Section. The towns of Ho and Kpandua are joined to the Gold Coast road system by a road which meets the Volta River at Senchi where there is a power ferry. There is also a direct road from Yendi to Tamale, but the Gold Coast cannot offer prices sufficiently attractive to induce the people to abandon their accustomed market centres on the Lome Railway.

**HONG KONG.****Situation and Area.**

Hong Kong is one of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, and lies about 40 miles east of Macao, 91 miles south of Canton, between 22° 9' and 22° 17' N. lat., and 114° 5' and 114° 18' E. long. The island is an irregular ridge, stretching nearly east and west; its broken and abrupt peaks rising to the height of nearly 2,000 feet above the sea level. Its length is about 11 miles, its breadth from 2 to 5 miles, its area about 32 square miles. It is separated from the mainland of China by a narrow strait, known as the Lyemun Pass, which does not exceed half a mile in width. The opposite peninsula of Kowloon (23 square miles) was ceded to Great Britain by a

Treaty entered into by Lord Elgin in 1860 with the Government of China, and now forms part of the Colony; which also includes Stonecutter's, Green, Apichau, Middle, Round, and other islets.

In 1898 an agreement was concluded with the Chinese Government for the extension of Hong Kong territory by an area adjacent to British Kowloon, in the province of Kwang-tung, including Mifs Bay and Deep Bay, this area to be leased for 99 years; a stipulation was included that within the walled city of Kowloon (which lies outside of British Kowloon) the Chinese officials then stationed there should continue to exercise jurisdiction except so far as might be inconsistent with the military requirements for the defence of Hong Kong, but that within the remainder of the newly-leased territory Great Britain should have sole jurisdiction. In 1899 the Chinese officials ceased to exercise jurisdiction within Kowloon City, which thereafter, by Her late Majesty's Order in Council, was incorporated in the leased territory and became subject to British rule. The area of the mainland and islands leased is about 359 square miles. A careful survey of the territory was completed in 1904. This New Territory is divided into two main districts—the Northern and the Southern—and is in charge of two District Officers, who perform the duties of land officers and magistrates, and are authorized to hold small debts courts. The District Officer of the Northern district has his headquarters at Tai Pó on an arm of Mifs Bay; the headquarters of the Southern district are in Victoria.

**General Description.**

The waterways of the Colony form one of the most magnificent harbours in the world, having an area of ten square miles. The granite hills which surround it rise between 2,000 and 3,000 feet high, the whole offering a *coup d'œil* which blends the wild scenery of Scotland with the classic beauty of Italy. The city of Victoria extends for four miles at the base of the hills which protect the south side of the harbour. Being built on the slope of the hills facing the sea, the general aspect of the town is perhaps more striking and picturesque from the water than that of any other city in the east, whilst many of the streets are shaded with well-grown and handsome trees. Some large and handsome buildings stand on the Praya West Reclamation, which was completed in 1903.

The Praya East Reclamation providing areas totalling 2,249,000 sq. ft. for new building sites was completed towards the end of 1929. Development on the reclaimed area is making rapid progress.

The Reclamation (9,589,000 sq. ft.) of Kowloon Bay is nearing completion and the necessary works to convert this area for use as an air port are now in progress.

The construction of the Tai Kok Tsui (1,868,500 sq. ft.) and the Shamshuipo (2,842,000 sq. ft.) Reclamation has been completed.

**Climate.**

Though situated within the tropics Hong Kong enjoys a cool winter, the mean temperature falling from 32° in August to 59° in February. Temperatures of less than 40° and of greater than 90° occur occasionally.

The mean annual rainfall is 85 inches, of which 67 inches occurs from May to September.

The relative humidity is very high in the spring, frequently reaching 98%. In the winter it occasionally falls as low as 20%.

The prevalent wind is from E.N.E. in the winter with a mean velocity of 13 m.p.h. in March, when the north-east monsoon is at its height. During the summer months the wind is very variable, both in direction and velocity. In some years a south-west monsoon is fairly persistent, in others intermittent and short-lived.

Typhoons occur occasionally from June to October, the average number being 1.5 a year. Very occasionally they occur before or after this period.

The climate of Victoria is similar in its broad features to that of Kowloon and the New Territories, but at the higher levels, from 1,400 to 1,800 feet above sea level, the temperature is on the average about 3° lower than at the Observatory, Kowloon, in the winter, and 8° lower in the summer. The humidity is usually greater than in Kowloon and approaches saturation for several days at a time during March and April when mist is very prevalent. In summer the city of Victoria, and the rising terraces behind it, derive little or no benefit from the south-west monsoon, being sheltered by steep hills from south-east to south-west. In winter it is exposed to the north-east monsoon, which occasionally blows along the harbour through Lyeemun Pass with considerable violence. On the other hand the south-west side of the Island is protected from the north-east monsoon in winter and enjoys the benefit of the south-west monsoon in summer.

#### History.

The Colony, then a desolate island sparsely inhabited by fishermen, was ceded to Great Britain in January, 1841; the cession was confirmed by the Treaty of Nankin in August, 1842; and the charter bears date 5th April, 1843. The additions subsequently obtained on the mainland have been noted above.

Hong Kong did not become of much commercial importance until the discovery of gold in Australia in 1851 and the consequent Chinese emigration. Its trade has gradually increased with the opening up of China to foreign trade.

Large local banking, dock, steamboat, and insurance companies were established between 1865 and 1872, and the trade was greatly increased by the opening of the Suez Canal.

The city is the depôt for an incessant flow of Chinese emigration and immigration, the number in 1929 being: emigrants, 227,523; immigrants, 185,390, excluding to and from China ports.

#### Population.

1929—Non-Chinese ...	18,150
Chinese ...	1,125,360

#### Industry, Trade, and Customs.

Hong Kong is a free port except for an Import Tariff on all intoxicating liquors, on spirituous liquors containing more than ten per cent. of pure alcohol by weight, on tobacco, and on light oils (including motor spirit). There is no Export Tariff.

The position of the island has made it a distributing centre for trade in many kinds of goods. Amongst the principal commodities handled are coal, cotton, and cotton goods, hides,

iron and steel, matches, nuts, oils, rice, sugar, silk, sandalwood, tea, tin, wolframite, etc.

Ship-building is a large and growing industry, and there are also factories of very considerable importance engaged in the manufacture of cigars and cigarettes, rope, cement, and the refining of sugar.

Native industries such as the manufacture of vermilion, sauces, bamboo-ware, building of native craft, etc., are of large and increasing dimensions.

The natural products of Hong Kong are few and unimportant. There is little land suitable for tillage, and nothing is grown but a little rice and some vegetables near the outlying villages. There are large granite quarries both on the island and in Kowloon. A dairy farm supplies fresh meat, poultry, eggs, and milk. The fishing in the waters of the Colony is good and is a source of livelihood to a vast number of Chinese.

The New Territories have extensive cultivable land, on which are grown sugar, rice, vegetables, lychees, pineapples, etc. The cultivation is entirely in the hands of the Chinese villagers and it is doubtful whether European enterprise would be successful.

#### Shipping.

The total tonnage entering and clearing during the year 1930 amounted to 42,190,612 tons, a decrease of 4,995,569 tons compared with 1929.

There were 24,744 arrivals of 20,264,647 tons and 24,865 departures of 20,247,003 tons.

Of British ocean-going tonnage 5,689,205 tons entered, and 5,668,400 tons cleared.

Of British river steamers 3,732,866 tons entered, and 3,736,624 tons cleared.

Of foreign ocean-going tonnage 9,009,669 tons entered, and 8,983,533 tons cleared.

Of foreign river steamers 441,236 tons entered, and 443,623 tons cleared.

Of steamships under 60 tons trading to ports outside the Colony, 101,928 tons entered, and 102,261 tons cleared.

Of junks in foreign trade 1,289,693 tons entered, and 1,312,572 tons cleared.

Of steamships under 60 tons plying within the waters of the Colony 402,532 tons entered and 402,499 tons cleared.

Of junks in local trade 438,389 tons entered, and 435,542 tons cleared.

#### Docks.

Hong Kong is well provided with dock accommodation. The Hong Kong and Whampoa Dock Company has three dry docks, the larger one being re-constructed, and two slips at their Kowloon establishment, one dry dock at Mong Kok Tsui on the western side of the Kowloon Peninsula, and two at Aberdeen on the south side of the island. The Taikeo Dockyard and Engineering Company has one large dock and three slipways situated at Quarry Bay, just inside the Lyeemun Pass.

The Admiralty has built a large dock in the Naval Dockyard in the middle of the City of Victoria. Besides these, there are several building slips and repairing shops owned by Europeans and Chinese in various parts of the Colony.

#### Wharves.

The Hong Kong and Kowloon Wharf & Godown Co., situated on the mainland, has five wharves

and can accommodate vessels of 550 ft. in length. No. 1 and No. 5 Wharves are capable of accommodating vessels up to 660 feet.

Alf. Holt & Co. have two wharves at the East Point of the Kowloon Peninsula and have accommodation for large vessels.

At North Point on the Hong Kong side of the Harbour, the Ching Siong Land Investment Co. has built about 1,700 feet of quay walling providing a depth of 30 feet of water alongside at L. W. E. S. T.

In addition, there are many wharves privately owned by shipping firms, situated in the Central district.

#### Government Harbour Moorings.

There are at present laid down in the Harbour for the use of vessels frequenting the Port forty-eight (48) complete sets of Government Harbour Moorings, classed as follows:—

A Class. Moorings for vessels of 450 feet to 600 feet in length O.A. ...	19

#### Currency and Banking.

The currency of Hong Kong consists of the following coins (*vide* Order in Council, 2nd Feb., 1896):—

1. The silver dollar of Mexico.
2. British dollar.
3. The Hong Kong dollar, half-dollar, and 20-cent, 10-cent, and 5-cent pieces, issued from the Hong Kong Mint (1866-68).
4. Half-dollars, 20-, 10-, and 5-cent pieces, imported from England, and coined at the Royal Mint and Birmingham Mint.
5. Copper coins representing one-hundredth part of the dollar (called one cent), and one-thousandth part of the dollar (mill or cash), imported from England.

There were issued from the Hong Kong Mint 2,108,064 dollars and 58,587 half-dollars; and 20-, 10-, and 5-cent pieces to the nominal value of \$402,671. There were obtained from England, and there were in circulation on 31st Dec., 1929, subsidiary coins (which now include half dollars) to the nominal value of \$17,914,370.

The coins issued from the Hong Kong Mint are never met with in the Colony now.

The principal Banks are the Hong Kong and Shanghai Banking Corporation Ltd., the Chartered Bank of India, Australia and China, the Mercantile Bank of India, the P. & O. Banking Corporation, Ltd., the National City Bank of New York, the Yokohama Specie Bank, the Bank of Taiwan, the Netherlands-India Commercial Bank, the Netherlands Trading Society, the Banque de l'Indo-Chine, the Crédit-Foncier d'Extrême Orient. The first named bank conducts a Savings Bank. There are also a large number of Chinese banks.

The Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Mercantile Bank of India are authorised to issue notes in the Colony, the total circulation amounting to \$127,469,371 at the close of 1930.

Local weights and measures are the following: tael = 1½ oz.; 1 picul = 133½ lbs. (avoirdupois); catties = 1 imperial gallon.

#### Revenue.

Revenue is derived from duties on intoxicating liquor, which in 1931 were expected to realize \$2,300,000, tobacco \$3,100,000, stamp revenue \$3,383,360. A considerable sum is also derived from the Opium monopoly, municipal rates for police, lighting, water, etc. (the rates according to the districts varying from 15 to 17 per cent. on the annual value of property) land revenue, stamp duties, and other fees. It was expected that land sales would realise \$2,300,000.

The total revenue for 1931 is estimated at \$31,204,368.

There is a Public Debt of 1,485,733½. and \$4,927,000. The amount at credit of the Sinking Fund are £719,664 and £75,749.

#### Means of Communication.

Hong Kong is extremely well situated as regards telegraphic communication in all directions with all parts of the world. The Eastern Extension Telegraph Company (British) by means of three cables to Singapore, one direct and one each *vid* Labuan and Cape St. James respectively, provide good connections with Europe *vid* India, with Australasia, and with the other British Colonies and possessions. By their cable to Manila connection is made with the direct American cable, thence to San Francisco. Two cables to Shanghai, belonging respectively to the Eastern Extension and to the Great Northern (Danish) Companies, *vid* Foochow and Amoy respectively, give a good connection with Shanghai, North China, Japan, and Russia; and the system of the Great Northern Telegraph Company gives a good service to Europe, *vid* Asiatic Russia.

Commercial wireless telegraphic services are maintained with ships at sea, Canton, Swatow, Shanghai, and North China via Shanghai, points in Kwangtung and Kwangsi Provinces, Yunnanfu, Macau, French Indo-China (direct to Saigon and Hanoi), Kwongchow, North Borneo, Siam, Dutch East Indies, and via Dutch East Indies to Europe and American Continents, Manila and via Manila to Europe and American Continents. All services are operated and controlled from the Government Radio Office situated in the central district of Victoria. The transmitters are grouped at Cape D'Agular Station, position lat. 22° 12'38"-61" N.: long. 114° 15'18"-94" E.; Victoria Peak Station, position lat. 22° 16'38"-56" N.: long. 114° 08'31"-95" E., is now used for broadcasting only. Call signals:—V P S for ship services, Z B W for broadcasting, and the series Z C E to Z C K for commercial services. The main receiving station is situated at the Royal Observatory, Kowloon, from which station received signals are passed by tone lines to the Radio Office.

In addition, meteorological and time signal services are carried on, the Police Department

has its own communication system, and the Waglan and Gap Rock Lighthouses have installations for emergency communication.

A broadcasting service for the transmission of news items, speeches, music, etc., is maintained by a transmitter installed at Victoria Peak which is controlled from an up-to-date studio and control room situated on the first floor of the General Post Office Building. The broadcast wave length is 350 metres and the call signal Z B W.

Hong Kong possesses unrivalled steam communication. The P. & O. S. N. Co., M. M. Cie, Holt's Line, City Line, and N.Y.K. maintain a regular service with the United Kingdom and Europe. The Holt's line, O. S. K., N. Y. K., and Dollar Line maintain a regular service between Hong Kong and the United States of America. The Canadian Pacific S.S. Limited maintain a regular service with Vancouver, B.C.

The E. & A. Australian Oriental Line, and N. Y. K. and O. S. K. keep up a frequent service to Australian ports. In addition to these main lines of steamers, there are other lines which call at Hong Kong from various ports, such as the Shire, Glen, and Bank lines, and Lloyd Trestino.

Regular steam communication between Java and Hong Kong has been established by the Java-China-Japan Line. Between the ports on the east coast of China, Formosa, and Hong Kong the steamers of the Douglas S. S. Co. ply regularly twice a week, and those of the Osaka Shosen Kaisha weekly, and there is constant steam communication with Hoihow, Manila, Saigon, Haiphong, Tourane, Bangkok, Borneo, etc. With Shanghai, Tientsin, and the ports of Japan there is frequent communication by steamers of the Indo-China S. N. Co., China Navigation, and other lines, in addition to the English, French and American mail steamers. With Calcutta there are services by the Indo-China S. N. Co., O.S.K., N.Y.K., and the British India Line, about once a fortnight by each line. Between Hong Kong, Macao, and Canton there is a daily steam service, and numerous steamers as far as Wuchow on the West River.

A cable tramway connects the city with the higher levels. An electric tramway from Shaukwan to Kennedy Town, along the whole extent of the city, was completed and opened in July, 1904. The island possesses roads available for vehicular traffic both in the town and outside from which unrivalled views can be obtained, especially from the wind-swept roads in the hill districts. There is also a fine motor road round the island.

There are excellent motor roads in Kowloon and the New Territory—the road to Fanling via Castle Peak and back via Taiipo being a panorama of views over a route of several miles.

The usual means of transport is by motor, ricksha, chair, or boat. A railway was completed in 1910 from Kowloon to the Chinese frontier, where it joins the line from Canton. Telephonic communication is available to all parts of the Colony.

Direct Money Orders are exchanged with Great Britain, China, Canada, United States of America, Union of South Africa, India, Ceylon, the Australian Commonwealth, the Dominion of New Zealand, Straits Settlements, Federated Malay States, State of North Borneo, Sarawak, Siam, Macao, Japan, French Indo-China, Netherland Indies, and the Philippine Islands. British Postal Orders are issued and paid in Hong Kong. Telegraphic Money Orders are exchanged with the United Kingdom only.

### Education.

Since 1913 the schools in the Colony, with few exceptions, have been placed by Ordinance under the supervision and control of the Education Department. The total number of pupils is about 62,300, of whom, roughly speaking, one-third are in schools in which English is the medium of instruction, and two-thirds are in Vernacular Schools. There are five schools exclusively for children of British parentage, with an average attendance of 370. Queen's and King's Colleges are the principal schools for Chinese, with an average attendance of 504 and 863 respectively. Including the above, the average attendance at Government schools is 4,122. Most of the non-Government English schools are assisted by grants, which amounted in 1930 to \$161,004. Many of the vernacular schools are assisted by subsidies and grants, amounting in 1930 to \$109,120.

A technical institute supplies instruction in commercial and technical subjects. The enrolment in 1930 was 798.

The University of Hong Kong, incorporated under the local University Ordinance, 1911, and opened in 1912, is a residential University for students of both sexes, the object of which is declared by that Ordinance to be "the promotion of Arts, Science and Learning, the provision of higher education, the conferring of degrees, the development and formation of the character of students of all races, nationalities and creeds, and the maintenance of good understanding with the neighbouring country of China."

Instruction is provided in the three Faculties of Medicine, Engineering, and Arts. The standard aimed at is that of University degrees in Great Britain, and the Medical degrees of the University are recognized by the General Medical Council for registration in Great Britain.

The land, buildings, and equipment of the University are of an original value of not less than \$1,750,000, while the endowment fund exceeds \$3,000,000, of which \$750,000 represents a grant from the Rockefeller Foundation for the establishment of full-time chairs in Surgery, Medicine, and Obstetrics and Gynaecology. The Colonial Government has contributed land to the approximate value of \$175,000, together with capital sums amounting to \$1,700,000, and provides an annual grant of \$350,000.

The course is one of 4 years in Engineering and Arts, and of 6 years in Medicine. The annual entry is now about 60. Students are of all nationalities, but the great majority are Chinese drawn from all parts of China and the Far East.

### Constitution.

The Government is administered under Letters Patent of 14th February, 1917, by a Governor, aided by an Executive Council, composed of six official and three unofficial members, besides the Governor. The Legislative Council is presided

over by the Governor, and is composed of seven official and six unofficial members, three of whom are nominated by the Crown on the recommendation of the Governor (two being usually Chinese), one is nominated by the Justices of the Peace from their body, and one by the Chamber of Commerce. The unofficial members of the Executive and Legislative Councils, appointed after receipt of the Additional Instructions passed under the Royal Sign Manual and Signet and dated 10th January, 1922, vacate their seats after five and four years respectively from date of appointment. The "Colonial Courts of Admiralty Act, 1890," regulates the jurisdiction of the Supreme Court in Admiralty cases. The English Common Law forms the basis of the legal system, modified by Colonial Ordinances, of which a revised edition to 1923 has been issued. The law as to civil procedure was codified by Ordinance No. 3 of 1901.

**\*JAMAICA.***Situation and Area.*

Jamaica is an island in the Caribbean Sea, to the southward of the eastern extremity of the Island of Cuba, within N. lat. 17° 42' 20" and 18° 32' 30", and W. long. 76° 11' 55" and 78° 23' 35". It is the largest of the British West Indies, being 144 miles in length, and 50 in extreme breadth, and containing about 4,450½ square miles, about half the size of Wales. The island is very mountainous, the main ridge running east and west, with numerous subsidiary ridges, some parallel to the main ridge, others spreading out in a N.W. and S.E. direction from it, terminating in the famous Blue Mountains in the east, the highest peak being 7,388 ft. high. There are numerous rivers and streams, with a rapid fall for the most part, and not navigable. The largest are the Black River in the south-west, and the Rio Grande in the north-east. Kingston, the capital, with a population of 62,707 in 1921, is situated on the south coast of the Island, and has

a fine harbour. In St. Ann's Parish, in the middle part of the island, on the north of the main ridge, is the Roaring River, so called on account of its many picturesque waterfalls.

The Cayman Islands, lying between 19° 16' and 19° 45' N. lat., and 79° 83' and 81° 30' W. long, and the Turks and Caicos Islands, are dependencies of Jamaica,† as are also Pedro and Morant Cays (two guano islands in 17° N. lat.).

It is estimated that Jamaica contains 2,848,160 acres, from which may be deducted 80,000 acres as useless for agriculture, consisting chiefly of swamps, rocks, and inaccessible lands, leaving 2,768,160 acres available for cultivation. Of this 832,300 acres are returned as under cultivation in 1930-31.

### History.

The island was discovered by Columbus on the 3rd May, 1494. He called it St. Jago, after the patron saint of Spain, but the new name was soon dropped in favour of the native one of Jamaica (*Xaymaca*—well watered). The first settlement on it was effected on the shores of St. Ann's Bay, by Requevil in 1509, under the direction of Diego, the son of Columbus, the Governor of Hispaniola. It was raided by Sir Anthony Shirley in 1596-7, and by Colonel Jackson in 1643, but it remained in the possession of the Spaniards for 161 years, when it was attacked by a force, sent by Cromwell, under Admiral Penn and General Venables against Hispaniola, and capitulated, after a trifling resistance, on the 11th May, 1655. Until the Restoration, Jamaica remained under military jurisdiction, but in 1660 a regular civil government was established by Charles II., who appointed General Edward Doyley Governor-in-Chief, with an Elective Council. In 1670 peace was made with Spain, and the title of England to Jamaica was recognised by the Treaty of Madrid. The colony grew fast, stimulated by the wealth brought into it by the buccaneers, who made Port Royal their headquarters and storehouse. Part of this town was engulfed in the great earthquake of 1692. Kingston which then consisted of a few sheds, soon rose into a place of importance. During the 18th century the island suffered from hurricanes, earthquakes, numerous slave insurrections, as well as wars with the

maroons, or mountaineers, the descendants of African slaves. These consisted primarily of the slaves the Spaniards left, who inhabited mainly the east of the island, among the Blue Mountains, but before long runaway slaves from English masters took refuge in the mountains of the centre of the island and were only subjugated in 1738, when both classes of maroons were settled in five reserves under their own leaders, and henceforth gave little trouble except for a partial rising in 1796, which was soon suppressed, the prisoners taken being sent to Sierra Leone. When the Slave Trade was abolished, in 1807, there were 323,827 slaves in Jamaica. During the last eight years of the trade, 86,821 slaves were imported. On the abolition of slavery in 1833, Jamaica received 6,161,927*l.* of the 20,000,000*l.* granted by the Imperial Government as compensation to the slave-owners. A rebellion among the coloured population in 1865 was suppressed by Governor Eyre with unnecessary violence, and he was recalled. In January, 1907, Kingston was devastated by a terrible earthquake, which caused great loss of life and immense destruction of property. A Mansion House Fund was opened, and contributions poured in from all parts of the Empire for the relief of distress. A free grant of 150,000*l.* was voted by Parliament, and a loan of 800,000*l.*, chiefly in aid of re-building, was authorised from the Home Exchequer.

### Climate and Inhabitants.

There is great variety of climate; the mean temperature of Kingston is 78°*F.*, rising to 87°*F.* in the day time, and falling to 71°*F.* in the early morning. As the temperature falls about 1° for every 300 feet of ascent, it is possible, in a few hours, to reach, in the central range of mountains, a cool and delightful climate. From Kingston, the capital, a change of 10° or 15° lower in temperature can be attained by a ride of one hour by motor car.

The rainy seasons occur generally over the whole island in May and June and again in September, October and November; but besides these heavy and periodical rainfalls, the ground is refreshed by occasional showers; and in the N.E. portion of the island there is usually a rainy season at the end of the year, and light rains generally during the month of August. The mean annual rainfall varies throughout the island from about 34 inches to as much as 187 inches at Fellowship and 223 inches at Moore Town, both on the northern slope of the Blue Mountain Range. And the 50-year average is 76 inches.

Regions of the Island are visited by storms of hurricane force about 14 times in a century and disastrous earthquakes occurred in 1692 and 1907.

Under two per cent. of the inhabitants are white; the remainder are chiefly of African descent, somewhat over three-fourths being pure negroes. There are about 18,000 East Indians and about 3,700 Chinese (in 1921). English is universally spoken.

### Constitution.

The original Constitution, granted by Charles II. in 1662, which, after existing for nearly 200 years, was surrendered in 1866, was a representative one, consisting of a Governor, a nominated Council, and an elected Assembly which on its first meeting in 1664, consisted of 30 members but which fluctuated in numbers from time to time. The depression caused by the abolition of slavery led to a grave constitutional crisis, the Assembly

† See account below.

refusing to vote supplies, and endeavouring to enforce sweeping reductions in establishments, without compensation to the displaced officers. Lord Melbourne's Government, in 1839, actually introduced a Bill into Parliament for the suspension of the constitution, but was defeated, and it was not till 1864 that, by a change in the constitution of the Council, harmony was temporarily restored. A separate Privy Council was set up and an Executive Committee was established. The latter was to act as a sort of Cabinet, especially as regards financial matters.

After the suppression of the rebellion in 1865, Governor Eyre, at the meeting of the Legislature, urged the unsuitability of the then existing form of Government to meet the circumstances of the community, and the necessity of making some sweeping change, by which a strong Government might be created. The Legislature responded by abrogating all the existing machinery of legislation, and left it to Her Majesty's Government to substitute any other form of Government which might be better suited to the altered circumstances of the Colony.

Accordingly a Legislative Council was, by Orders in Council of the 11th June, 1866, and 11th November, 1869, established, consisting of such numbers of official and unofficial members as Her Majesty might think fit. The numbers of each were six until 1878, when they were enlarged to eight, and a ninth was added in 1881.

By Order in Council dated 19th May, 1884, and Amending Order of 3rd October, 1896, the constitution was fixed in the following manner:—

The Council to consist of the Governor (with only a casting vote) and five *ex-officio* members, viz.: the Senior Military Officer, the Colonial Secretary, Attorney-General, Director of Public Works and Collector-General, and such other persons, not exceeding ten in number, as Her Majesty may from time to time appoint, or as the Governor may from time to time provisionally appoint, and fourteen persons to be elected as therein provided. The Council shall be dissolved at the end of five years from the last preceding general election, if it shall not have been previously dissolved.

There is also a Privy Council, with the usual powers and functions of an executive council. It consists of the Lieutenant-Governor, if any, the Senior Military Officer in command, the Colonial Secretary, and Attorney-General and such other persons as may be named by the King, or provisionally appointed by the Governor subject to the approval of His Majesty, but the number of members is not to exceed eight. The Governor is to preside at each meeting, and the Governor and two members form a quorum.

A special feature of this constitution is that nine elected members can carry any financial measure, while the unanimous vote of the whole fourteen elected members on other matters cannot be overridden by the other votes unless the governor declares that such a decision is of paramount importance in the public interest.

#### *Administration.*

The Colonial revenue is derived mainly from import duties, an excise duty on rum, and stamp and licence duties. A tax of 1s. (in Kingston 8d.) on every £10 of the gross value of property is levied.

There is a Supreme Court of Judicature together with Resident Magistrate Courts and Petty Sessions of Justices of the Peace throughout the

island. The Resident Magistrates, besides holding courts of their own, preside in the courts of Petty Sessions.

An "Island medical service," under the control of a superintending medical officer, was established in 1870. The several medical practitioners, who receive a retaining fee or salary from the Government, are designated "district medical officers." They are located throughout the island, and for the fixed salary paid by Government they have to attend sick paupers, parochial hospitals and alms-houses, the constabulary officers and men, and prisons.

The parish is the unit of local government, and each parish has its own parochial institutions, viz., poorhouses, &c., &c., managed by the Parochial Board of the parish, the members of which are elected by the persons entitled to vote for the election of members of the Legislative Council. The administration of poor relief by the Parochial Boards is controlled by a Board of Supervision.

There is a Corporation of the amalgamated parishes of Kingston and St. Andrew with a Mayor, Council and Corporate officers.

In the 13 other parishes there are elective Parochial Boards under Laws 13 of 1900 and 17 of 1901, with jurisdiction over roads, markets, sanitation, poor relief, water-works, and pounds. The chief towns are Kingston (population, in 1921, 62,707), Port Royal (population 1,004), Spanish Town (population 8,694), Port Antonio (population 6,272), Montego Bay (population 6,580), Falmouth (population 2,136), Port Maria (population 2,481), and Savanna la Mar (population 3,442).

The total revenue of all the local bodies in 1930-31 was 449,594*l.*; their expenditure 432,090*l.* Their debt at the end of the year was 1,033,479*l.*

#### *Currency and Banking.*

Accounts are kept in sterling, British silver coins of and above the denomination of 6d. are legal tender to any extent; coins below the denomination of 6d. are legal tender to the extent of 40s. in any one payment.

The coin in circulation is mostly British silver and bronze and Jamaica nickel pence, half-pence and farthings, but American half and quarter dollars circulate freely at the rate of 2s. and 1s. respectively.

Total estimated coin 200,000*l.* Barclays Bank (Dominion, Colonial and Overseas) Ltd., the Bank of Nova Scotia, the Royal Bank of Canada and the Canadian Bank of Commerce are the only private banking establishments in the Colony. Barclays Bank has one branch and 9 sub-branches; it had an average weekly note circulation in 1930 of 120,115*l.* The Bank of Nova Scotia has 11 branches and 1 sub-branch, and had an average note circulation in 1930 of 126,851*l.* The Royal Bank of Canada has two branches and had an average note circulation in 1930 of 37,106*l.* The Canadian Bank of Commerce has a branch in Kingston, and had an average note circulation in 1930 of 11,163*l.* Approximately 200,000*l.* of British currency notes formerly in circulation have been withdrawn and replaced by Bank of England Notes, in denominations of 10s. and 5*l.*

Under Law 27 of 1904, local Currency Notes, which are made legal tender under section 5, have been issued to the extent of 212,500*l.* in denominations of 2s. 6d., 5s. and 10s.; 2s. 6d. notes, 31,250*l.*; 5s. notes, 106,250*l.*; 10s. notes, 75,000*l.* Estimated amount of local currency notes in

circulation on 31st March, 1931, was 76,292. 15s. The 2s. 6d. notes have been recalled and nearly all have been withdrawn from circulation.

Government savings banks were instituted in all the principal towns in 1871, the rate of interest allowed being at first 4 per cent., but this was reduced in 1881 to 3 per cent., and in 1897 to 2½ per cent. In 1917 the rate of interest was again increased to 3 per cent. There are 103 branches now operating. The total deposits on 31st December, 1930, was 640,327l.

#### Co-Operative Loan Banks.

There are now 56 Loan Banks on the Register of Industrial and Provident Societies. Of these, 36 have obtained loans from the Agricultural Loan Societies Board appointed under Law 6 of 1912, "A Law for the encouragement of Agricultural Loan Societies." In 1930, Law 15 of 1930, was passed giving the Board more extensive powers of control.

The following is a summary of these transactions to 31st December, 1930:—

Loans made under Law 6 of 1912,	52,316l.	9s. 0d.
" " " Hurricane or Special Loan Laws	80,489l.	12s. 4d.
	128,581l.	1s. 4d.

Of this amount, 117,612l. 18s. 0d. has been repaid, leaving 15,193l. 3s. 4d. outstanding.

The 49 Banks from which returns were obtained also collected to 31st December, 1929, the sum of over 44,944l. share capital. These figures may be taken as an indication that the work of the Loan Banks has been successfully carried on and that they are likely to prove a permanent benefit to Small Holders and Peasant Proprietors. Some of these Banks have extended their sphere of usefulness by taking advantage of the Land Settlement Scheme, whereby Government moneys are lent for the purchase of properties for the purpose of re-sale in lots to small settlers. 59,641l. 3s. 11d. has been loaned to nine Banks, under this head, and 40,713l. 12s. 3d. repaid. Land settlement is now being operated by the Surveyor General.

#### Education.

Elementary education is provided for from public funds and, during recent years, 137 Government (undenominational) elementary schools have been established. The number of recognised elementary schools is 655, with 173,787 scholars in average attendance, and the grant-in-aid for 1930-31 was £149,512; no fees are charged. The Government maintains a system of inspection, and provides a training college for women teachers which is mainly supported from public funds, besides largely assisting the Mico undenominational training college for men, and two denominational colleges for women teachers. By a law passed in 1892 a Board of Education was constituted. The District School Boards manage the Government schools, some of which are held in Government buildings, others in rented buildings.

The Government maintains a Technical Continuation and Commercial School in Kingston and awards scholarships for trade instruction and apprenticeship. Two Continuation Schools for Girls are aided from public funds.

Provision was made in 1892 for the opening of Government secondary schools where required; there are nineteen secondary schools receiving aid from

public funds under regulations for grants in aid. Secondary education is provided for in general by endowed schools, under local governing bodies controlled by the Jamaica Schools Commission, and a number of private schools. There are three scholarships (one for girls) tenable at English universities or elsewhere within the British Empire and one scholarship tenable at the Imperial College of Tropical Agriculture, Trinidad. One Rhodes Scholarship is annually awarded in Jamaica. The following examinations are held:—London University, Cambridge Locals, Oxford and Cambridge Joint Board, Associated Board of the Royal Academy of Music and the Royal College of Music, Royal Drawing Society.

In the Institute of Jamaica (in Kingston) is a Public Library with 30,000 books, of which 7,500 form a West India Reference Library; a Natural History Museum, with a small collection of live animals; and a Jamaica History Gallery with 450 portraits and 150 engravings of scenery.

#### Industry.

Fruit is the largest export, 24,596,585 stems of bananas of a value of £2,309,741 being exported in 1930, in which year citrus fruits (grape fruits and oranges) valued at £67,151 were also exported. Other exports were as under:—

The acreage under banana cultivation in 1930-31 was 81,848, under sugar cane, 44,847, under coffee 6,668, under cocoa 2,927, under coconuts 40,271, under ginger 117, under tobacco 19. There are 1,500 acres of Government cinchona plantations. The cultivation of cotton has practically been abandoned.

There is regular and frequent communication between Europe and Jamaica via the United States. Messrs. Elder's and Fyffe's and the Jamaica Dried-Fruit Line furnish frequent and regular services for passengers and freight. The voyage takes 13 to 14 days. The Leyland Line steamers (West India and Pacific Branch) leave Liverpool on the 10th of each month, their average passage being 21 days. There is also frequent steam communication between the United States and Jamaica. The Canadian National Steamships also furnish regular services to Canada and the other West Indian Islands.

Telegraphic communication with Europe is complete. The two cables from Cuba touch at Jamaica, from which they branch away via St. Thomas to Demerara, and in the opposite direction to the Isthmus of Panama. On 31st January, 1898, the Direct West India Cable Company established communication between Jamaica and Halifax via Bermuda and Turks Island.

Telegraph lines connect all the principal towns, and there are 169 telegraph and telephone stations. The total mileage open is 1,792, 1,082 miles along roads, 172 miles P.O. lines on railway, and 231 along railway lines. The receipts in 1930 were 20,331l.

The railway extends from Kingston to Montego Bay, in the parish of St. James, a distance of 112 miles 60 chains, and to Port Antonio, in the parish of Portland, in the other direction, by a branch line from Spanish Town of 63 miles; and to Ewarton, by a branch line from Bog Walk, on the Port Antonio branch, of 8 miles 40 chains, and by a branch line from May Pen to Frankfield, 23 miles; also from Linstead to New Works, 2 miles 40 chains. The total length of line open is 210 miles. The railway was purchased by an American syndicate, who, under agreement, extended it to Port Antonio on the north-east and to Montego Bay on the north-west, but the company having failed the Government resumed possession of the line on 18th August, 1900. The total railway debt charge for 1930-31, providing for interest and repayment, is 183,529l. The receipts in 1930-31 were more than the expenditure by 93,227l., leaving a deficiency of 90,302l. There is also a line of telegraph and telephone along the railway from Kingston to Montego Bay, 112½ miles; Spanish Town to Ewarton, 17½ miles; from Bog Walk to Port Antonio, 54½ miles; from May Pen to Frankfield, 23 miles; and from Linstead to New Works, 2½ miles.

The island is intersected by an extensive system of tar-treated and metalled roads, suitable for motoring, the highest one passes over a gap at an elevation of a little over 4,000 feet. Owing to the configuration of the island there are many bridges and culverts and sharp turns; the maximum grades are

generally 1 in 15. There are 2,322 miles of main roads, and about 4,345 miles of parochial roads.

A coastal service is run by the United Fruit Co., the Royal Mail Co. and the Webster Co. with motor vessels and sailing vessels whenever cargo is available.

The United Fruit Co., the Royal Mail Co., Jamaica Fruit and Shipping Co., the Jamaica Direct Line, Atlantic Fruit Co. and Leyland Line maintain a weekly steamship service and also call at outports when necessary.

Kingston, Montego Bay, Falmouth and St. Ann's Bay are ports of registry. During the year ended 31st December, 1928, no ships were built.

## CAYMAN ISLANDS.

The Cayman Islands (a dependency of Jamaica) with an area of 104½ square miles and a population (in 1921) of 5,233, consist of three islands, Grand Cayman (85 square miles), Little Cayman (9 square miles), and Cayman Brac (10½ square miles), lying between 79° 33' and 81° 30' W. longitude, and 19° 16', and 19° 45' N. latitude. They were discovered by Columbus, on his return voyage from Porto Bello to Hispaniola, but were never occupied by the Spaniards. The English took possession of them soon after the conquest of Jamaica, and they were mainly colonised from that island.

Grand Cayman is distant about 178 miles from the nearest point of Jamaica. It is 17 miles in length, and varies from 4 to 7 miles in breadth. The coasts are for the most part rock-bound, protected by coral reefs and enclosing some fair-sized harbours. One on the north side of the island, called the Great Sound, measures over six miles across.

The principal industry of the inhabitants is catching turtle. These turtle are brought to the island and placed in "kraals," to recover and fatten before being sent to their next stage, Key West, United States. Over 2,000 turtles a year are thus disposed of at an average price of 2l. each.

The Island of Grand Cayman is in some parts fruitful, and the usual tropical products are grown, but a considerable acreage is traversed by honey-combed limestone, and unfit for cultivation. Mahogany, cedar and other valuable timber and some dye-woods are found in quantities. Phosphate deposits of some value exist, and were worked, but have lately been neglected.

There are two towns, Georgetown and Bodden-town, and several villages. The population of Grand Cayman numbered 3,945 at the census of 1921.

The smaller Cayman Islands, viz., Little Cayman and Cayman Brac, are about 70 miles distant from Grand Cayman; they are almost entirely given up to the growth of coconuts. Their inhabitants numbered at the last reckoning 95 and 1,213 persons respectively.

The proportion of white inhabitants in the Cayman Islands is much larger than in most parts of the West Indies.

Fine schooners of native woods are constructed at these islands for sale and for local use, the people being first-rate ship-wrights.

The Legislative Assembly of the Cayman Islands consists of the Justices of the Peace and elected Vestrymen, and the laws passed by this body are subject to the assent of the Governor of Jamaica before becoming operative.

The government of the Dependency is administered by a Commissioner.

## TURKS AND CAICOS ISLANDS.

### *Situation and Area.*

The Turks and Caicos Islands lie between 21° and 22° N. lat., and 71° and 72° 37' W. long. Their area is about 166 square miles. The most important island, Grand Turk, is 6½ miles long and 1½ miles broad. According to the census of 1921 Grand Turk contains 1,568 inhabitants, being one-third of the total population which in 1921 was 5,612. The inhabitants are of mixed European and African extraction. The majority of the people are connected with the Bermudas, from which these islands were first settled. They all speak English. Cockburn Harbour in S. Caicos, immediately opposite Grand Turk, is the principal settlement in the Caicos group.

### *History.*

These Islands were discovered in 1512 by Ponce de Leon, but the group remained uninhabited till the end of the 17th century, when it began to be annually visited by salt rakers from Bermuda. These were expelled by the Spaniards in 1710, but soon returned, and for some 40 years continued this industry with more or less frequent interruption by attacks from the Spaniards. It was not, however, till 1799 that, for the purposes of government, they were included in the Colony of the Bahamas, to which group they geographically belong. In 1848 they were made independent of the Bahamas. In 1873 they were annexed to Jamaica and still remain one of its dependencies.

Two hurricanes passed over these Islands in 1928, on July 24th and September 16th respectively, and did great damage. The second one was the most disastrous, as regards damage to property, in the history of the Dependency.

Another hurricane passed over these Islands on September 14th, 1928, which did considerable damage and caused the loss of 17 lives.

### *Industries, Trade and Customs.*

Salt raking is the only industry of any importance, the average quantity annually gathered being about 1,600,000 bushels, equal to 56,000 tons. 1,163,152 bushels were exported in 1930 valued at 22,275L. Sponges are found on the Caicos Bank, and there is a sponge-curing establishment at Cockburn Harbour, South Caicos. The export of sponge in 1930, 26,964 lbs., was valued at 2,269L. 1,187,900 dried conchs (shell fish), valued at 1,188L. Cotton and Cotton Seed valued at 17L., were shipped in 1930.

Practically the whole of the food and household necessities are imported. Grand Turk is a port of registry, and had, on the 31st Dec., 1930, 48 vessels registered, of a total tonnage of 1,004 tons. Salt Cay and Cockburn Harbour are ports of entry, possessing good anchorage.

The bulk of the imports (25,843L. in 1930 out of a total of 34,165L.) are from the U.S. of America.

The exports are chiefly to Canada and the United States.

An ad valorem customs duty of 10% is levied on most imports and specific duties on alcoholic liquors, tobacco, flour and a few other articles.

### *Climate.*

The climate is equable and healthy, and rarely unpleasantly hot, owing to the constant sea breezes, but there is a scarcity of fresh provisions and good water, owing to the low lying barren nature of the soil.

The mean temperature (day) is 78°, the extreme range being from 60° to 93°. The rainfall at Grand Turk during 1930 amounted to 27·77 inches, the average rainfall during the five years 1926-1930 was 29·26 inches.

### *Means of Communication.*

There is a mail, passenger, and freight service between New York and Grand Turk about twice a month by steamers of the Royal Netherlands West India Mail, and also between Jamaica and Turks Islands once a month by sailing vessel.

The Elders and Fyffes Line make occasional calls on their way to Jamaica when passengers offer and on such occasions take mails to Jamaica.

The rate of letter postage is 2d. per ounce to all British Possessions; 2½d. to the U.S.A., and to all other countries 3d. per ounce.

There are no railways in these Islands.

Internal mails are carried between the several islands by small sailing-craft engaged in local trade.

Mails to and from England and other parts of the world are dispatched and received via New York.

Grand Turk is an important cable junction, there being cables to Jamaica, to Barbados and to Bermuda.

The Government radio-telegraph system provides service between Grand Turk, Cockburn Harbour, and Salt Cay, and with ships at sea within short range.

There is a public telephone service at Grand Turk.

### *Education.*

There are ten elementary schools supported by Government, with 848 pupils enrolled in 1930 and an average attendance of 711. The schools are entirely unsectarian and free.

There is a Government Secondary School at Grand Turk.

Cambridge Local Examinations are held annually at Grand Turk.

### *Currency and Banking.*

The coins in circulation, all of them being legal tender under Bahama Acts, 2 Vict. cap. 4, and 8 Vict. cap. 49, also Jamaica Law 10 of 1880, consist of British sterling, United States gold and silver, and Jamaica nickel tokens. There is no limit to the legal tender of silver. There is a local Government paper currency of five shillings, ten shillings and one pound notes. Commercial accounts are usually kept in dollars, and Government accounts in sterling. A Government savings bank was established on 1st Jan., 1890, and had, on 31st Dec., 1930, 894 depositors, with 14,798L. deposits.

### *Constitution.*

By Jamaica Law No. 6 of 1926 which came into operation on the 1st day of August 1926, the

## JAMAICA: TURKS AND CAICOS ISLANDS.

Legislature consists of a Legislative Board comprising the Commissioner, who by virtue of his office is President, and seven other persons, three of whom are holders of offices under the Crown, appointed by the Governor of Jamaica. Taxation and expenditure and all local matters, are regulated by this board. Laws passed by the Legislative Council of Jamaica which are in express terms made applicable to Turks Islands take effect there. The subjects of currency, bills of exchange, patents, and the custody of prisoners and lunatics have been so dealt with.

## KENYA COLONY AND PROTECTORATE.

### *Extent and Administration.*

The territories comprised under the name of "Kenya Colony and Protectorate," previously known as the East Africa Protectorate, include the whole of the East African coast line from Umba River to Dick's Head, and territories in the interior bounded in part by international convention lines. The eastern boundary was defined along the Juba and north-east by an agreement with Italy (1891), and on the north by an agreement with Abyssinia in 1908, but upon the cession of Jubaland to Italy in 1925, a Commission was appointed to adjust the eastern and north-eastern boundaries. On the west, the Colony adjoins the Uganda Protectorate, and on the south the mandated Tanganyika Territory. The British East Africa Protectorate was proclaimed on November 19th, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew in 1893.

The Kenya Protectorate consists of the mainland dominions of the Sultan of Zanzibar—viz., a strip extending 10 miles inland along the coast from the Tanganyika mandated Territory frontier to Kipini and the islands of the Lamu Archipelago. In respect of these territories Kenya pays a rent of 10,000*l.* per annum to the Sultan of Zanzibar.

The original concession was made to a company, subsequently called the Imperial British East Africa Company, but the territory was transferred in 1895 to His Majesty's Government, and the whole Protectorate was placed under the control of a Commissioner and Commander-in-Chief. It was transferred in 1905, from the authority of the Foreign Office to that of the Colonial Office. By an Order in Council dated 9th November, 1906, the Protectorate was placed under a Governor and Commander-in-Chief, and the Order in Council of 22nd October, 1906, constituted Executive and Legislative Councils. The frontiers were defined by agreements with Germany (1890 and 1893) and Italy (1891), but the latter has now been varied by the cession of Jubaland to Italy under the Treaty with the Italian Government dated 24th July, 1924. All Foreign Consular Jurisdiction was, during the year 1908, transferred to the British Court.

By the "Kenya Annexation Order in Council, 1920," the territories outside the mainland dominions of the Sultan of Zanzibar were recognised as a Colony. This Order in Council came into operation on the 23rd July, 1920, and the Sultan's mainland dominions are now styled the Protectorate of Kenya, whilst the remaining territory is known as the Colony of Kenya. The area of the Protectorate and Colony of Kenya is about 224,960 square miles.

The Colony and Protectorate is divided into nine Provinces.

1. *The Nyanza Province*, comprising the districts of North Kavirondo, South Kavirondo, Central Kavirondo, Kericho, and Kiumu-Londiani.

2. *The Nzoia Province* comprising the districts of Nandi, Usin Gishu, Elgeyo, Marakwet, and Trans Nzoia.

3. *The Turkana Province*: comprising the districts of North and South Turkana and West Suk.

4. *The Rift Valley Province* comprising the districts of Nakuru, Ravine, Baringo, Naivasha, and Laikipia.

5. *The Masai Province* comprising the districts of Narok and Kajiado.

6. *The Kikuyu Province* comprising the districts of Nairobi, Kyambu, Fort Hall, South Nyeri, North Nyeri, Embu, and Meru.

7. *The Ukamba Province* comprising the districts of Machakos, Kitui, and Teita.

8. *The Coast Province* comprising the districts of Digo, Mombasa, Kilifi, Tana River, and Lamu.

9. *The Northern Frontier Province* comprising the districts of Isiolo, Marsabit, Moyale, Wajir, and Telemugger.

The Capital of the Colony is Nairobi, which is also the largest centre in the Colony. A Municipality has been established here in respect of a population estimated as under:—

1930.				
Europeans	..	..	..	5,195
Asiatics	..	..	..	15,556
Natives	..	..	..	26,761
Total	..	..	..	47,512

Mombasa is the principal port; the inhabitants number about 43,250, of whom about 1,150 are Europeans. Mombasa is an island of about seven square miles in area and has two harbours, Mombasa harbour on the eastern side and Kilindini harbour to the south-west. There is a lighthouse and signal station at the entrance to the port. A Municipality was established at Mombasa in 1928.

### *Population.*

The total population is estimated at 3,024,911. A census of the non-native population taken in March, 1931, showed a population as follows:—

Europeans	..	..	16,842
Indians	..	..	39,594
Arabs	..	..	12,162
Goans	..	..	3,959
Other non-natives	..	..	1,331
			73,888

Africans (estimated) .. .. 2,951,023

Total .. .. 3,024,911

On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes, such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Suk, the Turkana, the Masai, the Somalis, and the Gallas.

The prevailing religious beliefs are Pagan, but on the coast Mohammedanism has made some progress. There are in the Colony and Protectorate many Christian mission stations, representing thirteen different societies—British, French, Italian, Swedish and American, two of them being Roman Catholic. At these stations are schools for elementary instruction and handicrafts.

### *Constitution.*

Under the Royal Instructions dated the 11th September, 1920, as amended by Additional Instructions dated the 7th July, 1928, the Executive Council of the Colony consists of the Colonial Secretary, Attorney-General, Treasurer, Chief Native Commissioner, Commissioner for Local Government, Lands and Settlement, Director of Medical and Sanitary Services, the Director of Agriculture, and Director of Education (*ex officio* members), such other persons holding office in the public service of the Colony as the Governor may appoint (official members), and such persons (if any) not holding such office as the Governor may appoint (unofficial members), with the Governor as President. It is further

provided that the Legislative Council of the Colony shall consist of the Governor as President, eleven *ex officio* members, not more than nine nominated official members, eleven European elected members, five Indian elected members, one Arab elected member, and one nominated unofficial member to represent the interests of the African community. Under royal instructions dated the 28th March, 1927, it was provided that if at any time the number of Indian elected members is less than five the vacancy or vacancies so arising might be filled by the appointment of nominated Indian unofficial members. The *ex officio* members are to be the *ex officio* members of the Executive Council, with the General Manager of the Kenya and Uganda Railways and Harbours, Director of Public Works, and Commissioner of Customs.

By the "Kenya Protectorate Order in Council, 1920," it was provided that the Governor of the Colony should be Governor of the Protectorate, that the Executive Council of the Colony should be deemed to be the Executive Council of the Protectorate, and that it should be lawful for the Legislative Council of the Colony to legislate for the Protectorate. The Supreme Court is situated at Nairobi, and sessions are also held at Mombasa, Nakuru, Eldoret, Kisumu, and various other places. In all cases to which natives are parties local ideas and customs are considered. The legal status of slavery has been abolished throughout the Colony and Protectorate.

By local ordinance in January, 1924, provision was made for the election of the Indian and Arab members. The Indian franchise (like the European franchise) is adult (over 21) suffrage and the whole Colony and Protectorate forms one five-member constituency. The Arab franchise is adult (over 21) male suffrage subject to ability to write Arabic or Swahili in Arabic characters. Here too the whole country forms one constituency.

By the enactment in 1924 of the Native Authority Amendment Ordinance a considerable measure of local self-government was conferred on the various Native Councils in Kenya in regard to the social welfare of the tribes and the management of communal matters such as land, forests, veterinary services, etc., as well as the local control of health, education, agriculture, trade and labour recruitment. Ordinances passed in 1928 aim at the extension of local government in municipalities and settled areas.

#### Climate.

For purposes of rainfall Kenya may be divided into three parts:—

(1) Northern Desert area where there is usually less than 20 inches a year.

(2) The coastal strip and the Nyanza and Kikuyu Provinces where there may be from 40 to 80 inches a year, and

(3) The remainder of Kenya where rainfall is from 20 to 40 inches a year. On the Coast there is usually a single rainy season from April to November, but up-country there are generally "long" rains from April to June, and "short" rains from October to December. The Coastal regions have a tropical climate though nights are cool except during the hottest months from December to April. In the Highlands the climate is invigorating with cool breezes; at Nairobi the mean maximum shade temperature in 1930 was 70.5° F., and the mean minimum 54.3° F. The rainfall at Nairobi was 61.80 inches.

#### Currency and Banks.

The currency originally consisted of the Indian rupee as the standard coin, with smaller local coins

and notes of higher denominations, all expressed in terms of the rupee; the British sovereign was also legal tender at Re. 15. The exchange value of the rupee, after being maintained for many years by the Government of India at 1s. 4d., began to rise in 1917 and early in 1920 reached 2s. 9d. It was then decided to fix the rate in the East Africa Protectorate, the Uganda Protectorate, and the Tanganyika Territory at 2s. sterling to the rupee, and to issue a new currency in local rupee coin and notes, but subsequently it was decided that the new coinage should be expressed in terms of florins, instead of rupees, the 50 cent piece being alternatively termed a shilling. Some rupee notes were introduced but no rupee coins. Later the shilling was made the standard coin instead of the florin, and arrangements were made to withdraw from circulation the Indian rupee, which was demonetised from July, 1921. The nickel-bronze coins (1, 5 and 10 cents of a rupee) have been withdrawn from circulation, and new copper-bronze coins (1, 5 and 10 cents of a shilling) have been introduced.

The old Local Board of Currency Commissioners has been abolished, and the Currency of the Colony and Protectorate is now in the hands of the East Africa Currency Board in London, represented locally by the Treasurer.

*The National Bank of India Ltd.* (Head Office:—28, Bishopsgate Street, London) are bankers to the Government of Kenya, with branches in the Colony and Protectorate of Kenya at Mombasa, Nairobi, Nakuru, Eldoret, and Kisumu, and at Kampala, Entebbe, and Jinja in the Uganda Protectorate.

*The Standard Bank of South Africa Ltd.* (Head Office:—10, Clement's Lane, Lombard Street, London) have branches at Mombasa, Nairobi, Eldoret, Nakuru, Kisumu, Nyeri, Nanyuki, Kitale in the Colony and Protectorate of Kenya, and at Kampala and Jinja in the Uganda Protectorate.

*Barclays Bank (Dominion, Colonial and Overseas)* with which is amalgamated *The National Bank of South Africa Ltd.*, has branches at Mombasa, Nairobi, Nakuru, Kitale and Eldoret, and at Kampala and Jinja in the Uganda Protectorate.

#### Land and Products.

As the pursuit of agriculture is possible from sea level to altitudes of 9,000 feet or more, and the range of temperature is comparatively wide, tropical, sub-tropical, and temperate crops are grown.

The main producing areas are at an elevation of 3,000 feet and over, and with certain exceptions, such as hides and skins, the production of Europeans now exceeds that of the native population.

In the highlands coffee, maize, sisal, and wheat are the principal crops, and exports of these commodities are increasing steadily. The acreages under sugarcane, tea, and wattle are extending, and the output of beans, potatoes, groundnuts and other crops and fruits of minor importance is being increased.

Extensive pasture grounds exist throughout the highlands and maintain considerable herds of grade and native stock. The export of hides and skins is considerable, and the dairy industry under European supervision is in a thriving condition, and producing increased supplies of butter for export.

In the Coastal section below 3,000 feet, maize, coconuts, sisal, cotton, sugarcane, and miscellaneous native grains and oil seeds are grown.

The forest products of the Coast are mangrove poles and bark, timber, ebony, and gum copal. The highland forests contain large quantities of pencil Cedar and several other good timbers such as Podocarpus, Olive, and East African Camphor, also large areas of bamboo suitable for the manufacture of high quality paper pulp.

The mineral resources of the Colony are not yet well ascertained, but iron is known to occur abundantly in most districts; good quality mica has been discovered in the Suk district; mica diatomite and graphite are found in Ukamba; limestone is worked near Kajiado, Kitui, Makindu and Lake Victoria; opals are common in the Rift Valley; a large deposit of carbonate of soda has been found in the south part of Ukamba and a gypsum deposit has been discovered near Simba; gold prospecting activities exist south of Kisii. Recent concessions include prospecting rights and grants of agricultural and grazing land.

The total area of land alienated as at December 31st, 1930, was 6,894,080 acres, of which 6,377,899 acres were leasehold. In addition, there are 364,160 acres of Township and Government Reserves. Sale of leases of land by public auction has been resumed.

#### Trade and Customs.

Since 1917, Kenya and Uganda have been one administrative unit for purposes of Customs.

In 1923, a uniform Tariff for Kenya and Uganda, operating also in Tanganyika Territory, was adopted, and free trade between Kenya, Uganda, and Tanganyika Territory in goods, the growth produce or manufacture of each of the territories was established. In August, 1927, unrestricted trading was extended to imported goods passing between the territories, single payment of duty only being chargeable, and the Customs Revenue involved being credited to the consuming territory by inter-departmental entry.

In April, 1930, a uniform modernised Tariff was enacted in the three territories simultaneously.

Certain specially protected commodities (wheat flour, sugar, timber, etc.) are subject to a "suspended duty"; i.e., each Government has the right to vary the rate charged in its own territory up to the amount specified in the Tariff. At the same time each Government has undertaken not to remove any of the "suspended duties" without prior consultation with the other Governments concerned.

On 16th June, 1931, the Consumption Tax previously leviable on Wines and Spirits cleared for consumption in Kenya was incorporated in the common Tariff and certain increases in the rates of duty chargeable on vehicles and parts (including tyres and tubes) were imposed in the three territories.

The import tariff as it now stands admits free of duty goods essential to the agricultural, industrial, educational, and scientific development of the territories, and has been designed as far as possible to protect imports essential to the opening up and development of the country and to foster local production of agricultural and other commodities in which Kenya, Uganda, and Tanganyika Territory, taken as an economic unit, are, or can be made self-supporting.

For Kenya and Uganda, the value of Trade Imports (excluding imports on Government Account, railway material and goods in transit and transhipment) and of exports (domestic and foreign) and the net amount of Customs receipts from all sources and the tonnage entered at Kenya Ports, were as follows:—

Years.	Trade Imports.	Total Exports.	Customs Receipts.	Tonnage entered. Net Tonnage.
	£	£	£	Tonnage.
1926	7,680,577	7,844,681	1,150,593	1,444,320
1927	7,851,611	6,952,718	1,176,077	1,703,896
1928	8,747,777	8,764,671	1,345,170	1,814,731

#### Communications.

The Union Castle Line and the British India Steam Navigation Co. maintain a monthly service of passenger steamers from and to London. The Union Castle vessels run either via the Cape or Suez.

The Messageries Maritimes from Marseilles to Madagascar call fortnightly at Mombasa, home-wards and outwards.

The Compagnia Italiana Transatlantica have two lines calling monthly; one steamer running as far as Zanzibar, and back to Genoa, and the other as far as Durban, and also back to Genoa, calling at the principal ports *en route*, including those of Italian Somaliland.

The Navigazione Libera Triestina Line also maintains a north and south service with Italian ports.

The Clan Ellerman Harrison Line maintains a three-weekly service of fast cargo steamers from Liverpool; also a service from the U.S.A. and Canada.

The Holland Afrika Line maintains a fortnightly service from London and continental ports to South and East Africa calling at this Port.

The Deutsche Ost Afrika Line maintains a three-weekly passenger and cargo service between Mombasa, Continental ports and Southampton.

The Osaka Shosen Kaisha Line and the Nippon Yusen Kaisha, connect monthly with Japan.

A fortnightly Mail Service to Bombay and Durban is maintained by the British India Steam Navigation Company's passenger and cargo steamers.

The Compagnie Maritime Belge maintain a monthly cargo service.

A bi-monthly passenger service is maintained with Batavia via southern ports by the Royal Packet Company of Holland.

Communication between the coastal ports of the Protectorate is maintained by steamers belonging to the B.I.S.N. Co., Messrs. Cowasjee Dinshaw Bros., and the Compagnia Italiana Transatlantica.

The Kenya and Uganda Railway was formerly worked as a State Railway of Kenya Colony, but in 1921 it was decided that from 1st April this line together with all branch lines and steamer services both in Kenya and Uganda should be controlled by a Central Railway Council, consisting of a chairman and one official and one unofficial member from each Colony (Kenya and Uganda), and that railway surpluses should not be available for general colonial revenue purposes.

On the 3rd February, 1926, the Kenya and Uganda (Transport) Order-in-Council, 1925, came into force, by which was established the office of High Commissioner for Transport for the Colony and Protectorate of Kenya and the Protectorate of Uganda. It provided that this office should be held by the Officer administering the Government of Kenya, and that he should have the control of the transport services owned, controlled, or managed, by the Governments of either of the two Territories, including railways, ports, wharves and steamships; the services were to be known as the Kenya and Uganda Railway. The Order-in-Council further provided for the constitution of a Kenya and Uganda Railway Advisory Council to consist of not more than two official and two unofficial members representing Kenya, and not more than two official and two unofficial members representing Uganda, each territory's representatives, official and unofficial, to be appointed by the respective Governors; and it directed that a Railway and Harbour Fund should be formed, into which was to be paid all revenue derived from the administration of the services, and from which all disbursements were to be made.

The length of the line, which is metre gauge, including branches open to traffic at the end of August, 1931 is 1,616 miles, excluding loops and industrial sidings.

The Railway Marine consists of the Lake Victoria, Lake Kioga, Lake Albert, and River Nile flotillas. Their respective strengths are as follows:—

Lake Victoria,	5 Steamers, total displacement 5346 Tons
	4 Tugs, and 1 Launch.
	35 Lighters, total capacity 3830 Tons
Lake Kioga,	3 Sternwheel Steamers
	1 Launch
Lake Albert	18 Lighters, total capacity 1900 Tons
and River Nile	4 Steamers and 4 Lighters.

The following figures include all services both in Kenya and Uganda:—

Total Expenditure on Capital Account at the end of 1930 ..	20,802,105 <i>l</i> .
Revenue for 1930 .. ..	2,214,229 <i>l</i> .
Ordinary Working Expenditure excluding Loan and Redemption Charges, for 1930 .. ..	1,441,285 <i>l</i> .
No. of Passengers carried .. ..	1,106,106.
Goods carried (Revenue earning) Tons .. ..	1,006,041.
Total Steamer Mileages (all three services) .. ..	198,841.

In 1927 the title of the Kenya and Uganda Railway was changed to that of Kenya and Uganda Railways and Harbours, and the Administration assumed control of the working of the Port of Mombasa and coastal ports.

The old harbour at Mombasa is now almost entirely used by dhows. Kilindini Harbour has been the scene of intensive development during the last eight years, and some 3½ million pounds sterling have been expended there. There is now, in addition to the former lighterage quay, a deep-water quay having a length of approximately 3,000 feet. This quay can accommodate six ships alongside of the normal type using the port. The quay is served by 25 electric level-luffing cranes and there are five transit sheds, three of which are double storey. The total number of quay, shed and stacking ground cranes are 81 up to date. A jetty at which bulk oil ships discharge to tanks ashore has just been brought into use. A Harbour Advisory Board advises the High Commissioner for Transport on Port Matters.

Kilindini Harbour, at the Port of Mombasa is the finest land-locked and sheltered harbour on the East coast of Africa; it possesses an ample water supply.

The principal river flowing into the Indian Ocean is the Tana, which is navigable for about 400 miles by small shallow draft steamers. The bar at Kipini is an obstacle to navigation from the sea.

The Port of Kilifi consists of a land-locked Harbour, 30 miles North-East of Mombasa. It offers good anchorage for small vessels, and opens out into the Bandari Ya Wali, a bay about one-and-half miles wide, with shallow anchorage.

There is a District Commissioner in residence at Kilifi.

The Port of Malindi is an open Harbour, 60 miles North East of Mombasa. Ships of any size can anchor off Malindi, but the anchorage is very exposed to the Monsoons. Cotton, Sim sim, and Copra are exported.

A District Officer resides at Malindi.

About three miles North of Malindi is the mouth of the Sabaki River. This river, which has recently been bridged about a mile from its mouth, passes through a country of great fertility, but is shallow and only navigable by canoes.

The Port of Lamu lies between Lamu and Manda Islands, 140 miles North-East of Mombasa. The town of Lamu, the most important Coast town North of Mombasa, is situated on Lamu Island. There is a good anchorage for vessels of moderate draught, but the bar carries only 15 feet at low water. The exports are cocoa-nuts, copra, rope, mat bags, and some cattle. There is a District Commissioner in residence at Lamu.

#### Posts and Telegraphs.

The Post Office of the Colony (exclusive of Uganda, which is worked by the Kenya Post Office) received and despatched during 1933, 14,701,800 letters, packets, etc., and 505,991 telegrams.

The Telegraph and Telephone system has 12,480 miles of wire (exclusive of Uganda). The lines connect Mombasa with Lamu and Witu (184 miles), Mombasa with Gazi and Tanganyika Border (61 miles), Mombasa with Nairobi (332 miles), Voi with Kahe (92 miles), Konza with Lake Magadi (91 miles), Konza with Machakos (22 miles), Nairobi with Nyeri, Nanyuki, Meru and Isiolo (269 miles), Nairobi with Nakuru (123 miles), Kijabe with Narok (61 miles), Gilgil with Rumuruti (79 miles), Nakuru with Kisumu (137 miles), Kisumu to Uganda Border (89 miles), Lumbwa with Kericho and Chemagel (51 miles), Muhoroni with Songhor (10 miles), Kibigori with Eldoret (49 miles), Nakuru with Eldama Ravine and Eldoret (128 miles), Rongai with Lake Solai (27 miles), Eldoret with Kitale, Endebess and Kiminini (74 miles), Eldoret with Moiben (28 miles), Eldoret to Uganda Border (97 miles). Lines follow all Railway lines including branch lines. Communication between Mombasa and ships at sea, Italian Somaliland, and with Zanzibar (for Government traffic only) is maintained by means of radio-telegraphy. A cable connects Mombasa with Zanzibar. A short-wave wireless station, owned and maintained, under licence from Government, by the British East African Broadcasting Company Limited, is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain.

Telegraph communication exists with Uganda and Tanganyika Territory. The Kenya telegraph system is also linked up via the Tanganyika Territory, Nyassaland and Rhodesian systems with the South African service. Communication with the Belgian Congo is maintained through Uganda with which the Belgian Congo system is linked up.

Telephone Exchanges are worked at Nairobi, Mombasa, Nakuru, Eldoret, Kisumu, Kitale, Kiambu, Koru, Ruiru, Kabete, Meru, Molo, Nyeri, Thika, Kericho, Kikuyu, Limuru, Njoro, Sotik, Soy, and Turbo. There is telephone communication between Mombasa and Tanganyika Territory.

2,403 telephones were in use in Kenya at the end of 1930.

#### Civil Aviation.

Civil aviation has shown rapid development in the Colony. Aerodromes have been established and are maintained by Government as Customs Aerodromes at Mombasa, Nairobi, and Kisumu.

Kisumu has also been developed as an air port. Other aerodromes are maintained by Government at Nakuru, Naivasha, Voi, and Makindu.

During the year 1930 negotiations were concluded between the Air Ministry and Messrs. Imperial Airways Limited for the establishment of an Air Service for the transport of passengers, mails and freights between Alexandria or Cairo to Cape Town. The section from Cairo via Kisumu to Mwanza was opened in March, 1931, and provides a regular weekly service between this country and England.

Operations of the southern section of the service to Cape Town was expected to begin early in 1932.

#### East Africa Governors' Conference.

In pursuance of a recommendation of the Parliamentary Commission which visited E. Africa in 1924, a first Conference of Governors of the British East African Dependencies was held in Nairobi in January and February, 1926, for the discussion of matters of mutual concern. It was then decided that a permanent Secretariat for the Conference should be established at Nairobi and conferences held as and when necessary. The cost of the Secretariat is contributed in varying proportions by the East African Governments and by the Kenya and Uganda Railway Administration. The Secretary of the

Conference is Colonel C. W. G. Waiker, D.S.O., who is also Secretary to the High Commissioner for Transport, Kenya and Uganda. Salary 1,500*l*.

## \*THE LEEWARD ISLANDS.

### *Situation and Area.*

The Colony of the Leeward Islands, with a total area of 708 square miles, consists of a number of islands belonging partly to the chain of the Lesser Antilles and partly (the Virgin Islands Group) to the eastern extremity of the Greater Antilles. The islands of Antigua, Barbuda, St. Christopher (St. Kitts), Nevis and Montserrat form a fairly compact group between the 61st and 63rd degree of west longitude and around the 17th degree of north latitude; but Dominica lies about 100 miles to the south, separated by the French island of Guadeloupe from the rest of the Colony, while Anguilla, Sombrero, and still more the Virgins group (Tortola, Virgin Gorda, Anegada, etc.), lie apart to the north and north-west.

St. Kitts, Nevis, Montserrat and Dominica form part of the volcanic chain of the Lesser Antilles, whilst Antigua and Barbuda form part of the eastern sedimentary series of the same chain.

Politically the Colony is divided into five Presidencies:—Antigua (with Barbuda), St. Christopher and Nevis (with Anguilla), Dominica, Montserrat and the Virgin Islands. These have been united and separated at various times in their history, and were finally federated in 1871 by Imperial Act 34 and 35 Vict., cap. 107. Sombrero was added to the Colony by Order in Council under the Colonial Boundaries Act on the 10th August, 1904, being attached to the Virgin Islands Presidency.

### *History.*

The islands were discovered by Columbus on his second voyage, in 1493, and became British during the 17th century. Particulars of their subsequent history will be found in the separate articles, but it may here be mentioned, that with the exception of Dominica, they have been from the first associated politically as well as geographically. They were all colonised from St. Kitts as centre, all included in the Carlisle grant, and possessed a common Legislature as far back as the reign of William and Mary. The General Legislature met for the last time in 1798, when it passed a highly humane slave amelioration Act, which was allowed; a Catholic Emancipation Act, and an Act repealing the duty on exports of 44 per cent. for the benefit of the English exchequer—both which were disallowed. An attempt was made by Sir William Colebrook in 1837 to revive the General Legislature, and though the attempt was regarded unfavourably in some quarters, and the Legislature never actually met, yet the right to revive it was clear, and there is no doubt that the Act of 1871, the passing of which was largely due to the energy and activity of Sir Benjamin Pine, is no more than a revival of the ancient constitution of the islands. The Presidencies of St. Kitts and Nevis, with Anguilla and their respective dependencies, were united into one Presidency by the Federal Act No. 2 of 1882.

### *Climate.*

The climate of the islands varies, but is usually dry (except in Dominica) and fairly healthy. Antigua is subject to drought, and has an average rainfall of about 45 inches; St. Kitts, Nevis and

Montserrat have average rainfalls of from 50 to 60 inches; the rainfall of Dominica averages about 120 inches. The mean temperature is about 80°, with but a slight range. The Virgin Islands are cooler. The hot season is from May to October; the rainy season from August to January.

### *Constitution.*

By "The Leeward Islands Act, 1871," one Executive and one Legislative Council, under one Governor, were constituted for the six (now five) presidencies. The Legislative Council now consists of ten official and ten elected members. Three elected members are chosen by the unofficial members of the Legislative Council of Antigua, two by those of the Legislative Council of Dominica, three by those of the Legislative Council of St. Kitts and Nevis, and one by those of the Legislative Council of Montserrat. They must be and continue members of their respective island councils. As there is no Legislative Council in the Virgin Islands, one member is appointed by the Governor to represent that Presidency. The official members are the Governor, the Colonial Secretary, the Attorney-General, the Federal Treasurer, the Administrators of St. Kitts-Nevis, and Dominica, and the Commissioners of Montserrat and the Virgin Islands, and such other person holding office under the Government of the Colony of the Leeward Islands as the Governor with the approval of the Secretary of State may appoint.

The Legislative Council has concurrent legislative powers with the local legislatures on certain subjects specified in the Act, such as matters of property, mercantile and criminal law, the law relating to status, the maintenance of a general police force and a common convict establishment, quarantine, postal and telegraph affairs, currency, audit, weights and measures, education and the care of lunatics, all matters relating to immigration, copyright and patents, and its own constitution and procedure. Any island legislature is, in addition, competent to declare other matters to be within the competency of the general legislature. Any island enactment on such subjects is void if repugnant to an enactment of the general legislature, or may at any time be repealed or altered by one.

The Council meets at least once a year, at a place notified by proclamation, and no Council lasts more than three years. The session usually lasts for about one week.

The expenses of the federal establishments are voted by the Council, and apportioned among the Presidencies.

The Council has power to alter its constitution by an ordinary Act, to be reserved for the King's pleasure, and the King has power, by Order in Council, at any time to include any other West Indian Island in the federation, upon joint addresses from the Legislative Body of such island, and from the Council, on such terms and conditions in each case as are in the addresses expressed. This power has not actually been exercised, and the inclusion in the Colony of Sombrero, which had no legislative body, was effected as above mentioned under a different Act.

### *Currency and Banking.*

The usual currency is British silver, a few British and United States gold coins being occasionally met with. Barclays Bank (Dominion, Colonial and Overseas) Ltd. and the Royal

### Means of Communication.

The following Steamship Lines serve the Colony :—

Canadian National Steamships from Canada and Bermuda call fortnightly at the chief ports in the Colony proceeding to Windward Islands, Barbados, Trinidad and British Guiana.

Furness-Bermuda Line (Br.), Ocean Dominion Line (U.S.) and Western Ocean Line (U.S.) about once every two weeks from New York and St. Thomas call at St. Kitts, Antigua and Dominica, proceeding to French West Indies, Windward Is., Barbados, Trinidad, etc.

A passenger steamer from London (Harrison Line) proceeds direct to Antigua every two months. Normally, passengers travelling between England and the Leeward Islands travel direct between England and Barbados by the Elders & Fyffes Line, or Harrison Line, or the Royal Dutch West India Line, etc., and between Barbados and the Leeward Islands by Canadian National Steamships or by the Furness Bermuda Line.

Passengers may also travel to or from England via New York or Canada by the Lines mentioned, but in practice, the route via Barbados is usually adopted for passenger traffic for Europe.

An Air Mail service operated by Pan American Airways calls weekly at Antigua from Miami (U.S.A.) via Cuba, Haiti, Santo Domingo Porto Rico and St. Thomas, proceeding to St. Lucia, Trinidad, Georgetown (Br. Guiana) and Paramaribo (Dutch Guiana) and returns, also weekly, in the opposite direction.

### Posts and Telegraphs.

Mails with Great Britain are exchanged via New York, and occasionally via Barbados, and direct with Canada, the United States and the British West Indies.

Mails are also exchanged by Air with the places served by the Pan American Airways, and with Great Britain via Miami, U.S.A.

There are 49 Post Offices in the Colony and the rates of postage are as follows :—

*Inland.*—Letters, 1d. for the first 2 oz., ½d. per additional 2 oz.; Post cards, ½d.

*British Empire, Egypt and Tangier.*—Letters, 1½d. for the first oz., 1d. per additional oz.; Post cards, 1d.

*Other places.*—Letters, 2½d. for the first oz., 1½d. per additional oz.; Post cards, 1d.

*All places.*—Printed matter, ½d. per 2 oz.; "small packets," 6d. up to 8 oz.; 1½d. per additional oz.

Telephone Systems are maintained by the Government in Antigua, St. Kitts, Nevis, Dominica, and Montserrat.

### Parcel Post.

Parcel post despatches are exchanged with Great Britain *via* Barbados, Canada and New York and direct with Canada, the United States and British West Indies, Bermuda, Br. Guiana, Guadeloupe and Dependencies and the Dutch West Indies, and *via* London or New York to other countries.

British Imperial Postal Orders are issued and paid in the Colony and Money Orders are exchanged direct with Great Britain, Canada, the United States and British West Indian Colonies.

Telegraph communication is maintained by means of Wireless operated by Imperial and International Communications, Ltd., there being stations at Antigua, Dominica and St. Kitts, all of which communicate with one another and with Barbados for telegrams to the United Kingdom, Canada, North America, etc. There is also a wireless station in Montserrat maintained by the Colonial Government but operated by the Company.

The principal tariffs are :—

To England	2/4d. per word.
To Eastern Canada	1/6d. " "
To Western Canada	1/8½d. " "

There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

There are cable stations at Antigua, Dominica and St. Kitts.

The most important towns are St. John (Antigua), 6,997; Basseterre (St. Kitts), 7,736; and Roseau (Dominica), 6,803.

### Education.

The system of elementary education is denominational in Montserrat and the Virgin Islands, the various denominations being Anglicans, Wesleyans and Roman Catholics. In the other Presidencies elementary education is provided by the Government. On 31st March, 1931, there were 110 aided and Government schools in the Colony. The clergy of the various denominations are granted facilities for giving religious instruction during school hours to the children of their respective churches. During the financial year 1930-31 the Government grants to all the elementary schools in the Colony amounted to 18,725/.

ANTIGUA.

Antigua is situated in W. long. 61° 45', and N. lat. 17° 6'. It is about 54 miles in circumference, and its area is 108 square miles, about half the size of Middlesex.

The islands of Barbuda (population 902) and Redonda are dependencies of Antigua. They have a total area of 62½ square miles. Barbuda lies about 25 miles due north of the main island, with an area of 62 miles, is very flat, with a large lagoon on the west side, separated from the sea by a spit of sand. It was long owned by the Codrington family. It produces some salt and phosphates of lime, and is well adapted for cattle grazing and horse rearing. Cotton is being grown with favourable results. Deer were introduced by the Codringtons. The island has communication with Antigua by a sailing-boat service. Redonda, lying between Montserrat and Nevis, 25 miles S.W. of Antigua, in 26° 6' N. lat., 61° 35' W. long., 1 mile by ½ mile, 1,000 feet high, is valuable for its phosphate of alumina mines, discovered in 1865, formerly worked by the Redonda Phosphate Company under license and subject to an annual rental of 50*l.*

Antigua was discovered by Columbus in 1493, who named it after a church in Seville, called Santa Maria La Antigua. It was first inhabited by a few English from St. Kitts in 1632. In 1663 Charles II. made a formal grant of the island to Lord Willoughby, who sent out a large number of colonists. After an interval of French occupation, it was declared a British possession by the Treaty of Breda, 1666. There are no rivers, and few springs in the island, and consequently it is exposed to frequent droughts. The island is in the main low-lying and has no forests. Rainfall:—

On the 22nd March, 1898, the Legislative Council, which was previously partly elected and partly nominated by the Governor, passed an Act abrogating itself and substituting the Crown Colony system. The new Council consists of sixteen members, eight official and eight non-official, all nominated by the Governor under Royal Letters Patent. The Governor presides. By Ordinance No. 7 of 1910, the duration of the Council is limited to three years.

The chief products are sugar and cotton. In 1930 11,435 acres were under sugar-cane or cotton, 1,400 under provisions, and 46,000 were uncultivated.

St. John, the chief town, has a population of 6,997, and is a port of registry, having on 31st December, 1930, 23 sailing vessels registered, with a total tonnage of 401.

ST. CHRISTOPHER AND NEVIS.

This Presidency consists of the Islands of St. Christopher (St. Kitts), Nevis and Anguilla. These were united to form one Presidency by the Federal Act No. 2 of 1882.

The total population on 31st December, 1930, was estimated at 35,789, as compared with 38,214 at the census of 1921. The total area is about 152 square miles.

*Constitution and Government.*

In 1625 Mr. (afterwards Sir Thomas) Warner landed in St. Christopher, bearing a Royal Commission to the Earl of Carlisle, by which the islands of St. Christopher (or Merwar's Hope), Nevis, Barbados and Montserrat were taken under royal protection, and given over to his custody as the King's Lieutenant.

In 1671 St. Christopher, Nevis, Montserrat, Antigua, Barbuda, Anguilla "and all other the Leeward Islands" were separated from Barbados and created the "Leeward Caribbee Islands Government," and Sir Charles Wheler was appointed "Captain-General" of the same. The chief seat of government was then at Nevis, but afterwards transferred to Antigua, and the government of each island, in the absence of the Captain-General, was administered by a Lieutenant-Governor, or, when none such was appointed, by the President of the Council.

In 1689 Colonel Christopher Codrington was appointed Governor-in-Chief, and his Commission, granted by William III., and dated 20th October, 1689, authorised him to call assemblies of freeholders and planters within any of the islands "jointly and severally to make laws for the public peace, welfare and good government of the said islands," thus providing for separate and federal legislatures. The Legislature in St. Christopher and in Nevis, as in the other islands of the government, consisted of two houses, a nominated Council and an elected Assembly, and had secured to it its own peculiar laws and local jurisdiction.

By Letters Patent, dated 26th April, 1816, the Commission originally granted to Sir William Stapleton was revoked, and the Leeward Caribbee Islands formed into two distinct governments, the first comprising Antigua, Montserrat and Barbuda, and the other St. Christopher, Nevis, Anguilla and the Virgin Islands.

By Letters Patent, dated 23rd November, 1832, the General Government was restored, Dominica being for the first time included, and a Governor and Commander-in-Chief, with two Lieutenant-Governors for St. Christopher, Nevis and Anguilla, and for Dominica respectively, were appointed, each island possessing a Legislative Council and House of Assembly, which continued, under the supervision of the Governor-in-Chief, to legislate for local interests.

In 1866 measures were introduced in each island to alter the constitution, and the two houses then existing were replaced by a single Legislative Assembly, consisting of *ex-officio* members, nominees of the Crown, and representatives of the people elected under a limited franchise.

In 1878 the single chamber constitution was repealed in St. Kitts and in Nevis, and the Crown Colony form of government adopted in its stead, and in 1882 these two islands, with Anguilla, were united into one Presidency.

The office of Lieutenant-Governor, which existed until 1870, has been abolished, and the Presidency, in the absence thereof of the Governor, is under the immediate supervision of an Administrator.

There is one Executive Council for the Presidency, consisting of the Governor, the Administrator, certain *ex-officio* members, and such other persons as His Majesty may from time to time appoint. The Legislative Council consists of seven official and seven nominated unofficial members, besides the Governor and the Administrator. Of the unofficial members not more than six shall be from among the people of St. Kitts and Anguilla, and one at least from among the people of Nevis. The Governor, or, in his absence, the Administrator, or, in the absence of both of them, a member of the Council appointed in writing, presides, and the President of the Council enjoys an original and a casting vote. The Council meets at the town of Basseterre in St. Kitts.

*Industry, Trade and Customs.*

Sugar is the principal crop in St. Kitts (150,937 tons of cane in 1930 crop, from 6,883 acres, 18,680 tons of sugar manufactured). It is grown in the Basseterre Valley and on the lower slopes round the island (the northern side showing the best average yield), and the cane is crushed and sugar produced at a central factory a mile from Basseterre. A light railway for haulage of canes encircles the island. The sugar industry is at present suffering severe depression.

The only other important crop in St. Kitts is cotton, the lint produced in 1930 being 397,763 lbs. on 2,000 acres. Successful efforts are being made to encourage the growing of tomatoes and other vegetables for export to Canada.

Cotton and coconuts are the chief products exported from Nevis, but the latter crop has suffered severely from the effects of the 1928 hurricane.

Vegetables and cattle, chiefly for export to St. Kitts and for local consumption, are also produced in Nevis.

Salt is the chief product of Anguilla, and is also produced from ponds at the south eastern part of St. Kitts, the combined quantity in 1930 being 1,492 tons.

Anguilla also produced, in 1930, 26,505 lbs. cotton.

There are no manufacturing industries (other than the manufacture of sugar) in the Presidency.

The Customs import tariff is mainly on an *ad valorem* basis. A preferential reduction varying in amount, but in most cases equal to one third of the general rate, is accorded to British products. The percentages of trade is as follows:—

#### Education.

There are four secondary schools:—a Government grammar school for boys in St. Kitts, a girls' high school in St. Kitts and a mixed school in Nevis, both state-aided, and a school by the Roman Catholic Sisters.

There are 31 Government primary schools (16 in St. Kitts, including 4 in Basseterre, 10 in Nevis and 5 in Anguilla) and also a Roman Catholic school and a few small private schools.

#### St. Kitts.

The island lies in latitude 17° 18' N., and longitude 62° 48' W. The area of the main body of it presents a long oval, from the south-eastern end of which runs a narrow neck, gradually expanding into a small knob of land, within which are the salt ponds.

The total length of the island is about 23 miles. The total area is 68 square miles.

The central part of the main body consists of a range of lofty rugged mountains, which traverses it from south-east to north-west, attaining its greatest height at Mount Misery, which is about 3,711 feet above the sea. A branch of this range encloses the spacious and fertile valley or plain, on the seaboard of which lies Basseterre, the principal town, with a population of about 8,000. Near the town of Sandy Point is Brimstone Hill, strongly fortified and fiercely besieged during the French wars. It is quite isolated, and about 750 feet in height.

The circle of land formed by the skirts and lower slopes of the mountain-range of the main body of the island, and the valley of Basseterre, constitute nearly the whole of the arable and cultivated portion of the island. The higher slopes of the mountains are covered with short grass, affording excellent pasturage, while their summits are crowned with dense wood. The island is of volcanic formation, and the soil, save in the mountains (where it is clayey) is peculiarly light and porous, sandy yet fertile.

The climate, for a tropical one, is decidedly healthy. The highest temperature in the shade is about 88°, the lowest 66°, and the mean average about 76°.

The average rainfall in St. Kitts for the year 1930 was 45·98 inches.

St. Christopher or St. Kitts, the Carib name of which was Liamuiga, "The Fertile Isle," was the first settled of the British West Indies, the settlement having been founded by Mr. Thomas Warner and other settlers, who landed on the 28th January, 1623, at the present village of Old Road. Later, French settlements were formed at the two ends of the island. The whole island was finally assigned to England under the Treaty of Versailles in 1763.

#### Nevis.

The island of Nevis is situated in 17° 40' N. lat., and 62° 33' W. long. It was discovered in 1498 by

Columbus, and was colonised by the English from St. Kitts in 1628. Charlestown, the principal town, has a population of about 1,100. The population of Nevis largely consists of peasant proprietors.

The island, which is divided into five parishes, is nearly of a circular form; its area is about 50 square miles, or about 32,000 acres, of which about 15,000 acres are fit for cultivation; its greatest elevation 3,596 feet above the sea.

The soil is very different from that of St. Kitts, being of stiff clay, encumbered everywhere with volcanic boulders.

There are hot mineral springs adjoining the Bath House Hotel near Charlestown. These springs have valuable medicinal properties.

The climate is very similar to that of St. Kitts, from which place it is separated by a strait of about two miles in breadth at its narrowest part, which, however, lies out of the direct course for boats plying between the two islands. The distance between Basseterre (St. Kitts) and Charlestown (Nevis) is about twelve miles.

#### Anguilla.

Anguilla is situated in 18° 12' N. lat., and 63° 5' W. long., about 60 miles N.W. of St. Kitts, and is sixteen miles in length, and varies in breadth from three to one and a half miles, containing an area of thirty-five square miles. The "Dogs" and neighbouring islands are dependencies of Anguilla.

Unlike the mountainous volcanic islands of St. Kitts and Nevis, Anguilla consists of Oligocene limestone and clay and its highest point is 213 ft. above sea level.

The inhabitants are peasant proprietors under the jurisdiction of a medical officer who is also magistrate.

The island is healthy, but suffers from want of an adequate water supply.

Besides sheep and goats the chief product is salt. Sea Island cotton is cultivated.

#### DOMINICA.

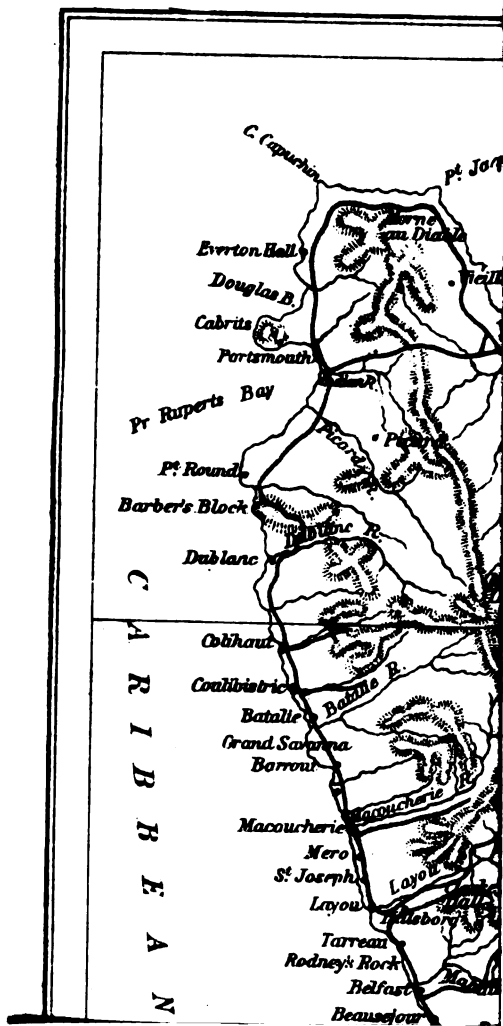

Dominica is situated between 15° 10' and 158 40' N. lat., and 618 14' and 61° 30' W. long.; 29 miles long and 16 broad. It lies between the French Islands of Guadeloupe and Martinique, being distant from each about thirty miles, and has an area of 304½ square miles.

The island is very mountainous and picturesque, rising at Imray's View, the culminating point of Morne Diablotin to 4,747 feet. It was discovered by Christopher Columbus on Sunday (hence its name), the 3rd of November, 1493, in the course of his second voyage. It was included in the grant made of sundry islands in the Caribbean Sea to the Earl of Carlisle, by a patent, dated 2nd June, 1627; but several attempts to bring the place under subjection to the English proved abortive. By the treaty signed at Aix-la-Chapelle, in 1748, it was stipulated between the English and French that Dominica and some other islands should remain neutral, and that the original proprietors, the Caribs, should be left in possession. During the time that Dominica was thus professedly regarded by the English and by the French as a "neutral" island, many French planters and adventurers settled on it and established plantations.

Dominica was captured by the English in 1756, and by the ninth article of the peace of Paris, in 1763, was assigned to Great Britain. Commissioners were sent out for the purpose of surveying and selling lands capable of cultivation, which yielded to the British Crown the sum of 312,092*l.* 11*s.* 1*d.* sterling. The French settlers were generously secured in their possessions, on condition of taking the oath of allegiance and paying a small quit rent. Dominica at this time formed a unit of a General Government, which comprised Grenada and the Grenadines, St. Vincent, and Tobago.

In 1771, the island was constituted a separate Government, under the administration of Sir Wm. Young, Bart. On the 21st June, 1775, a Royal Proclamation was issued, establishing a House of Representatives, fixing a new qualification for candidates and electors, and regulating proceedings at elections.

In 1778, the French, attracted by the fertility of the place, and invited over from Martinique by some of their countrymen, prepared a military and naval expedition against the island, under the Marquis de Bouillé, Governor of Martinique, and became masters of it on the 7th of September.

by some of their countrymen, prepared a military and naval expedition against the island, under the Marquis de Bouillé, Governor of Martinique, and became masters of it on the 7th of September.

after an obstinate resistance. Marquis Duchilleau, a cruel and tyrannical officer, was appointed Governor. Trade failed, and great distress followed.

In 1783 the island was again restored to the English, and Sir John Ord, Bart., was appointed Governor.

In 1795 another invasion of the island was attempted by Victor Hugues, the French Republican leader, who had previously forced the British troops to evacuate Guadeloupe. The brave and well-directed resistance of the inhabitants, under the command of Governor Hamilton, forced part of the enemy to fly, and the rest to surrender.

In 1805, now referred to in the island for marking the time of events, by the name of *La Grange* (the name of the invading General), the French again landed at each flank of Roseau. The regular troops and the militia fought gallantly, but unfortunately Roseau, the capital, was set on fire accidentally, and was obliged to capitulate, paying the enemy 12,000*l.* to quit; whilst the Governor, Sir George Prevost, and the troops (regular and militia) proceeded across the island to the superior position of Prince Rupert, near the town of Portsmouth.

In 1833 the island was, with Antigua and the other Leeward Islands, formed into a General Government, under a Governor-in-Chief, resident at Antigua.

Riots occurred in 1893, in the district of *La Plaine* on the Windward Coast of the island, in connection with the collection of taxes. The police and a party of marines and blue jackets, landed from H.M.S. *Mohawk*, were stoned, and compelled to fire on the rioters, with fatal results. An inquiry into the administration was ordered by the Secretary of State, and entrusted to Sir R. Hamilton, formerly Governor of Tasmania, who visited the island, and made a report (*vide* H. L. 280, 1893, and C-7447, 1894).

Dominica, in common with other West Indian islands, was visited in 1897 by the Royal Commission appointed to inquire into the condition of the West Indian colonies; and an important outcome of their recommendations was the grant, in 1898, of 15,000*l.* by the Imperial Parliament for road construction in the Island.

Considerable areas in the island are at present uncultivated. Much of this was at one time under coffee, but "blight" and the marauding of the Maroons led to the abandonment of many estates, while the depreciation of sugar still further reduced the area of cultivation. The soil is good and the climate healthy. Limes and cocoa flourish throughout the coastal zone. The former, however, are being rapidly wiped out by root disease, but this critical situation is being combated by planting limes budded on resistant stocks on a considerable scale. The higher slopes in the centre of the island are well adapted to the cultivation of coffee, nutmegs, spices and such tropical fruits that require humid conditions.

There are many thermal, chalybeate, sulphur, and other medicinal springs in the island, which is volcanic, and on the Grand Soufrière Hills there is a geyser or boiling lake at an elevation of 2,300 feet.

An eruption in the great crater took place on 4th January, 1880, volcanic ash covering the roofs of the houses in Roseau to a depth of two or three inches.

The island abounds in rivers, with fish in some, and there is a plentiful supply of water power.

Lime-juice, cocoa, coconuts, copra, and fruit (including green limes, grapefruit and oranges) are the chief products; sugar, formerly the staple industry, has now ceased to be made. A considerable trade is carried on also in spices, oils, and timber, 1930: cocoa, 6,826*l.*; essential oils, 51,012*l.*; vanilla, 2,112*l.*; limes and lime juice (limes, 26,191*l.*, Con. lime juice, 5,729*l.*, R. lime juice, 9,800*l.*), 41,720*l.*; coconuts, 404*l.*

The rainfall in Roseau for 1930 was 72.79 inches; the average for the whole island was 106 inches; the mean temperature 78 Fahr. (Roseau).

The chief town is Roseau, with a population of 6,803 according to the census of April, 1921: it is a port of registry, and had registered on 31st December, 1929, 10 vessels, of a total tonnage of 197 tons. The other town is Portsmouth, to the north-west of the island, in Prince Rupert's Bay. There is a branch of Barclays Bank (Dominions, Colonial and Overseas) at Roseau, and one of the Royal Bank of Canada, established in April, 1915.

There is a Government telephone system of 542 miles, with 7 exchanges, and a Government electric light service for the town of Roseau.

The Local Government is administered by an Administrator, aided by an Executive Council of 8 members. In July, 1898, the Legislative Assembly, which was previously partly elected and partly nominated, passed an Act abrogating itself, and substituting the Crown Colony system. A Legislative council was created, consisting of twelve members, six officials and six non-officials, all nominated by the Governor under Royal Letters Patent. Ordinance No. 21 of 1924, provides for the election of four of the unofficial members of the council. The Administrator presides in the absence of the Governor from the Presidency.

A considerable number of the inhabitants speak a French *patois*, but the use of English is becoming general.

A remnant of the original Carib inhabitants of the island is still in existence (*vide* Cd. 1298, 1902).

According to the Census of 1921 there are about 420 Caribs in the Island, of whom about 141 are estimated as of pure blood.

#### MONTSEERRAT.

This Island, discovered by Columbus in 1493, was named by him after a famous mountain in Spain, where is situated the monastery in which Ignatius Loyola conceived the project of founding the Society of Jesus.

It is situated 27 miles from Antigua in 16°45' N. lat., and 61° W. long., and is about 11 miles in length, and 17 in the broadest part. Its total area is 32½ square miles. It is of volcanic formation and very rugged and mountainous. The hills are covered with forest, the highest elevation being Chance's Mtn. (3,000 feet) in the southern part of the island. Plymouth, the chief town, with a population of 1,730, is on an open roadstead on the south-west coast. It is a port of registry, and had, on 31st December, 1927, 4 sailing vessels, total tonnage 134 tons net.

Montserrat was colonised by the Irish in 1632; the French took it in 1664, and levied heavy imposts on the inhabitants; it was restored to England in 1668. It capitulated to the French in 1782, but was restored to the English in 1783.

Montserrat possessed a Legislative Council and Assembly as early as 1668. In 1861, these were replaced by a single Chamber of eight elected and four nominated members.

By an Act of the Legislative Assembly, dated 24th Dec., 1866, and confirmed by Order in Council 26th Feb., 1867, this Chamber was replaced by a Legislative Council of not more than six nominated members. By Act No. 2, of 1902, which rescinded these Acts, the number of members was limited to four. Ordinance No. 4 of

1909 repealed No. 2 of 1902 and limited the tenure of office of the members of the Council to three years. Ordinance No. 2 of 1911 amended No. 4 of 1909 and increased the number of members to six. Ordinance No. 18 of 1922 amended No. 4 of 1909 and increased the number to eight. Unofficial representation on the General Legislative Council of the L.I. has now been provided for.

The cultivation of sugar, once the staple industry of the island, has declined, and onions and cotton are now the principal products. The lime cultivation, which was considerably extended recently, has suffered a severe set back by the hurricane of 12th-13th September, 1928, but is being rehabilitated.

The cultivation of Sea Island cotton, which was once grown during the American Civil War, was re-introduced in 1901, and, where the lands are suitable, has superseded the sugar industry.

There is a small industry in producing tomatoes for supply in winter to Canada. In the 1930 season 17,000 crates were shipped having a gross value of 3,500/.

Among the other exports may be mentioned a drug known as "papain," essential oils, lime juice, cotton-seed oil, cattle and green vegetables.

There are eight Anglican schools with 1,592 scholars, three Wesleyan with 813, one Roman Catholic with 303, and one undenominational with 251 scholars.

The roads of the island have of late years been much improved, and drained by masonry culverts and surface drains; and every year progress is made in these respects.

On 7th August, 1899, the island was devastated by a hurricane; and again on 28th August, 1924, and 12th September, 1928.

There is telephonic communication throughout the island; a Wireless Station was erected in 1925.

The island is considered to be one of the most healthy of the Antilles. Death-rate 1930, 19·8 per 1,000. Birth-rate 1930, 40 per 1,000.

The rainfall in 1930 averaged 37·12 inches at 12 stations; and the mean temperature was 74° minimum and 84°·6 maximum.

## VIRGIN ISLANDS.

The Virgin Islands were discovered by Columbus in 1493; they consist of a cluster of islands to eastward of and adjacent to Porto Rico; the largest in the group belonging to Great Britain is Tortola, which is situated in 18° 27' N. lat., and 64° 39' W. long. These islands, so far as they are British, became so in 1666.

The British islands (about 32 in number) include Tortola, Virgin Gorda, Anegada, Joist van Dykes, Peter Island, Salt Island, and all others not in the possession of the United States of America. The total area of the British colony is about 58 square miles. A lighthouse is maintained by the Board of Trade on Sombrero, which was first included in the Colony in 1904.

The Americans possess St. Thomas, St. John, and St. Croix.

A civil government and courts of justice were established in the Virgin Islands in 1773.

In April, 1867, an Ordinance was passed to amend the Constitution of the Virgin Islands. It was enacted that a Legislative Council should be constituted, to consist of the Colonial Secretary and the Colonial Treasurer, and not more than three unofficial members, to be nominated by the Administrator of the Government. This Ordinance was repealed May 1st, 1902, since when the Governor of the Leeward Islands ordains the laws. There is also an Executive Council.

The chief town is Road Town, Tortola, population (1921) 437, which is a port of registry, having, on 31st December, 1929, 6 vessels, registered total tonnage, 58.

Road Town, which is well built and clean, is provided with well stocked shops and stores. There is a small modern Hospital with a European Matron in charge.

The cultivation of sea island cotton, once the principal industry of the Virgin Islands, has been abandoned in consequence of the destruction wrought by the Pink Boll Worm. A tobacco industry has been started, and cigars are manufactured for export. Attempts are being made to establish other industries. The land is admirably adapted for the growth of coconuts, sugar-cane, tobacco, sisal, etc.

A small quantity of sugar is made for local consumption, also rum.

The percentage of trade with the United Kingdom and other parts of the British Empire and the principal Foreign countries is 25%, 5% and 70% respectively. Under the Customs Tariff the preferential rate charged on imports from Empire countries is in general two-thirds of the general rate.

A large area of land in the Virgin Islands is well adapted to coconut cultivation, and the existing trees are quite free from any serious insect or fungoid pests.

The peasants own and cultivate most of the land in small plots for subsistence. They also raise cattle, and catch fish. They take their produce in small boats to St. Thomas, and this constant sailing among the reefs and currents which surround the Virgin Islands, makes them the finest seamen in the West Indies. They are a hardy, intelligent race, remarkably distinct from the inhabitants of the neighbouring islands. Their trade and intercourse is with the Virgin Islands of the U.S., and to a smaller extent with Hayti and San Domingo.

The currency consists almost entirely of foreign money, which circulates at the following rates of exchange: Danish money at 25 francs to 1*l.*, American money at \$5 to 1*l.*

The climate is more healthy than that of the other West Indies, and the heat not so great. The average annual rainfall at Road Town is about 54 inches.

The birth and death rates per 1,000 in 1930 were 39·8 and 12·5 respectively.

Large quantities of fibrous plants (agaves and bromelias) grow wild everywhere in Tortola.

The mail communication is weekly by Government motor launch to St. Thomas. Mails are also despatched to St. Thomas nearly every day, letters for Europe being usually sent *via* Porto Rico and New York weekly.

## MALTA.

### *Situation and Area.*

The Maltese Islands form a group in the Mediterranean Sea, about 58 miles from the nearest point of Sicily, 80 miles from Syracuse, and 142 from Reggio, and about 180 from the nearest point of the mainland of Africa. The length of Malta is about 17 miles, by 9 miles in breadth; its area is 94,870 square miles; that of Gozo, 25,899 square miles, and that of Comino about one square mile. Filfla and Cominotto are mere islets. The whole group is about half the area of the Isle of Man.

### *History.*

The Maltese Islands were inhabited as early as the beginning of the Mousterian cultural period, about 40,000 B.C., by Neanderthal man, of whom remains were discovered in a cave to the south-east of Malta. Traces of paleolithic civilization are not wanting in the islands, and evidence of a neolithic civilization, in the shape of cave dwellings, stone circles, menhirs and dolmens, is found all over the islands. The Phoenicians probably took possession of Malta as soon as they made themselves masters of the Mediterranean Sea. Phoenician remains are few, but there are numerous rock-out graves of Phoenician type.

At the beginning of the Punic wars the islands were held by Carthage. In the course of the first Punic war they changed hands more than once, but at its conclusion they were still in the possession of the Carthaginians. In 218 B.C., they passed finally to Rome. Under the Romans Malta appears to have enjoyed great prosperity. Diodorus Siculus speaks of the excellence of its harbours, the wealth of its inhabitants, and its many skilful artificers, and refers to its fertility, and Cicero, in the Verrine orations, speaks of it as abounding in riches and famous for its textile manufactures. Inscriptions show that it enjoyed municipal rights in the time of Hadrian, and an interesting fact in its recorded history is that it was the scene of St. Paul's shipwreck (Acts xviii.). On the final division of the Empire in 395 A.D., Malta fell to the share of the Byzantine Emperor, and for the next four centuries its history is almost a blank. In the 9th century it was three times invaded by the Arabs, who finally conquered it in 870, the Byzantine garrison being massacred in an insurrection of the inhabitants.

In 1090, Count Roger the Norman, with a handful of men, subjected the islands to Sicily. The Sicilian domination lasted for four hundred years, Norman, Angevin, Aragonese and Castilian ruling in turn. During this time, Malta had Sicilian governors and laws, but there is no record of any extensive Sicilian immigration, and the persistence of the old Semitic names in the parish registers, instituted at this period, stands as further evidence that no great ethnographic changes occurred.

The connexion with Sicily was broken in 1530, when the Emperor Charles V gave Malta to the Knights of St. John of Jerusalem, who had been driven from Rhodes by the Turks, and who held Malta until 1798. The loyalty of the Maltese to their new sovereigns, who for the first time were resident in the island, was put to a severe test on several occasions, the most notable being the great siege of 1565, when the Order of St. John, under Grand Master Jean de la Valette, resisted the attacks of the land and sea forces of Solymán the Magnificent. It was after this great feat of

arms that the city of Valletta was built, strong enough to defy the Turkish attacks threatened yearly by the Sultan.

Napoleon Bonaparte invested the island on his way to Egypt, having prepared the ground by intrigue and revolutionary propaganda, and, on the 12th July, 1798, Ferdinand de Hompesch, the last Grand Master in Malta, capitulated without any resistance, and the Order was dispersed.

The French installed themselves in the islands, but their interference with Maltese laws and customs brought about a sharp reaction, and the Maltese drove the French troops within the fortified towns and, with the help of the British fleet, held them closely blockaded for two years, after which the French, reduced to extremities, surrendered to the British.

In 1800 the government was placed in the hands of Great Britain. The Treaty of Amiens provided that the islands should be restored to the Knights, but this was prevented by the re-commencement of the war, and they were finally annexed to the British Crown by the Treaty of Paris in 1814.

#### *Climate.*

The climate of Malta is equable and very healthy in winter. In July the heat at the sea level approaches that experienced in sub-tropical countries. The nights, however, are pleasant and cool, except during the prevalence of the sirocco wind. The mean maximum temperature during the three coldest months (December, January, February) is 65°5' Fahr., and the mean minimum 44°6'; but during the four hottest months (June, July, August, and September) the mean maximum is 89°6' Fahr., and the mean minimum 65°5'. The mean temperature is 64°5', and the mean annual rainfall is 21·5 inches. There is no river or rivulet in the island, the water drainage becoming absorbed in the porous sandstone beds and finding its way through underground channels and aqueducts.

#### *Industry.*

The island is highly cultivated. Besides products for home consumption, early potatoes, onions, eumin seed and oranges are exported. A large number of the inhabitants are employed in connection with the trade of Valletta as a coaling station and an *entrepôt* and port of call. It is a port of registry, having, on 31st December, 1930, 36 vessels, 6,000 gross tonnage.

#### *Chief Towns.*

The chief town and capital is Valletta, having, with its suburbs of Floriana, Sliema, and St. Julian's, a population which, in April, 1931, when a census was last taken, was 51,898. The "Three Cities" (Senglea, Cospicua, and Vittoriosa) have a population of 27,149. Citta Vecchia, the old capital, is in the interior of the island, and, with its suburbs, had a population of 10,032. The chief town of Gozo is Victoria (formerly called Rabat), with a population of about 5,351.

#### *Inhabitants and Language.*

The Maltese language, which is generally spoken, is of Semitic origin, and is akin to Arabic. The educated and commercial classes also speak English, and some Italian. The Maltese are remarkably thrifty, and industrious. They are excellent seamen and mechanics; large numbers of them are to be found in Algeria, Gibraltar, the Regency of Tunis, Egypt, Canada, Australia, and the United States.

#### *Currency and Banking.*

The legal tender currency is, under Order in Council of September 24th, 1886, and Ordinance I of 1929, exclusively British. There are two local banks (Banco di Malta and Anglo-Maltese Bank), and branches of Barclays Bank (Dominion, Colonial and Overseas), the Banco di Roma, and the Crédit Foncier d'Algérie et de Tunisie. There is also Scicluna's Bank which is a private bank. The amount of British Treasury currency notes and Bank of England notes in circulation on 31st March, 1931, was roughly estimated at 650,000*l*. The Government savings bank was established in 1833. On 31st March, 1931, the deposits amounted to 1,053,153*l*. with 11,064 depositors.

#### *Means of Communication.*

The railway, which is of metre gauge, is 7½ miles long; it was originally built by the Malta Railway Company at the cost of about 100,000*l*. The railway became the property of the Local Government in 1890, under a clause of the concession which provided that if the service was suspended for a certain period, the railway would be forfeited to the Government. An electric tramway service was started in 1905, connecting the principal towns and some of the villages with Valletta. There is a telephone exchange with 785 miles of wires. Malta is a station of the Eastern Telegraph Company, with direct cables to Alexandria (3), Gibraltar (3), Bone (2), Messina (1), Tripoli (1), Sicily (1), and Zante (1).

Malta is a port of call for nearly all the Mediterranean lines of steamers, and is an important coaling station, facilities being given for coaling at any hour, day and night. There is direct mail communication with several Mediterranean ports and with England. The rates of postage are as follows:—

#### *Public Works.*

The drainage of the fortified towns, which was commenced in 1876 at the joint charge of the Colonial and Imperial Treasuries, was completed in 1886, and greatly improved their sanitary condition. New drainage works were commenced in 1899, and Cottonera, Sliema, St. Julian's, Misida, Pietà, Calcare, Zabbar, Hamrun, Curmi, Rabato Tarxien, Paula, Luca, Zeitun, Birkirkara, Balzan, and Attard, part of Casal Lia and other places have been drained. The waterworks have also been much improved, and have now been extended to all the Malta villages and to Gozo. Considerable progress has been made in public lighting, and in improving the roads and streets in accordance with the exigencies of modern

traffic. Electric lighting has been installed, and current is being supplied to the following places, Valletta, Floriana, Sliema, including the two harbours, St. Julian's, St. George's, Pietà, Misida, Hamrun, Marsa, Birchirca, Curmi, Lia and Belsan, Attard, Naxaro, the Three Cities, Rabato and Notabile, Musta, Paula, Tarxien, Zeitun, Zebbar, Calcaira, Zebbug, Bir.ebbugia, and Victoria, Gozo.

#### *Constitution.*

A Council of Government, partly elected, was constituted by Letters Patent in 1849, and reconstituted in 1887, the Letters Patent being amended in 1898 and again in 1903.

By Letters Patent dated April 14th, 1921, responsible government was established in Malta. The Letters Patent were proclaimed by the Governor at Valletta on 30th April, 1921, and became fully effective when, elections for the Senate and Legislative Assembly having been held, the newly constituted Legislature was formally, on 1st November, 1921, declared open in His Majesty's name by H.R.H. the Prince of Wales.

The previously existing Council of Government gave place to a Legislature composed of two Houses—the Senate and Legislative Assembly.

*The Legislature.*—The Senate consists of seventeen members, eight of whom form a quorum. Ten of the seventeen are called "Special Members," and represent the Clergy, Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council. The two members of the Clergy are nominated by the Archbishop of Malta, and the other eight are elected, in pairs, by the four special classes of electors whom they represent. The remaining seven Senators are called "General Members," and for their election Malta and Gozo are divided into two constituencies, one of which (Valletta and its environs) returns four senators, and the other (the remoter portions of Malta and Gozo), three. The voters for the special classes must be male British subjects over 21 years of age, and must have special qualifications, which are laid down in the Constitution Letters Patent. The voters for the General Members must be male British subjects over 21, able to read and write, and either paying £20 a year in rent or in possession of £20 a year from real property in Malta or other capital. Any person entitled to vote as a special elector may stand for election by his special class. A person qualified to vote for the general senators may be elected to the Senate upon fulfilling certain conditions, of which the most important are that he be an ecclesiastic of the higher orders, or hold a degree of the University, or be worth £100 a year, or pay rent to that amount.

The Senate continues in being for six years after election, unless sooner dissolved by the Governor.

The Legislative Assembly consists of 32 members. These are returned in groups of four by each of the eight electoral districts constituted by the Letters Patent (now repealed) of 3rd June, 1903; Malta being divided into seven districts, whilst Gozo forms one. Any male British subject who is over 21 years of age, and who either can read or write, or is worth £5 a year, or pays £5 a year in rent may vote in a constituency, and any person entitled to vote may be elected for any division. No person on full pay in the Navy, Army, or Air Force maintained by Imperial funds may, unless he has a legal domicile in Malta, be registered or vote.

For both Houses the first elections were held upon the principle of proportional representation. The Legislative Assembly continues in being for three years after election unless sooner dissolved by the Governor.

A person cannot be a member of both Houses, and a person elected to both Houses must elect in which he will sit.

The Maltese Legislature may not pass laws touching the public safety and defence of the Empire, or the general interest of British subjects outside Malta. In addition to this general reservation certain subjects are specifically withheld from its legislative competence. The principal subjects so reserved are matters dealing with the defence of the island, and naval, military or aerial matters generally, external trade, immigration, aliens, and coinage. Measures passed affecting a local Government matter (highways, buildings, territorial waters, etc.) which apply to Imperial property must be reserved by the Governor for the Royal Assent, and do not become operative unless that Assent is given within a year.

The Legislature (provided that two-thirds of each House are in favour) may pass a law to repeal any of the provisions of the Constitution, except those relating to reserved matters, or relating to Religious Toleration, Language, or the Reserved Civil List.

Elaborate provisions are made for the contingency of a difference of opinion between the two Houses as to a legislative measure. These provide for joint sittings, a dissolution and other arrangements intended to give time for reflection and compromise, and, ultimately to give effect to the considered opinion of a two thirds' majority of the two Houses sitting together.

Power is reserved to His Majesty to disallow any law passed by the Legislature and assented to by the Governor within one year of the giving of that assent, and the Governor may reserve any Bill for the signification of His Majesty's pleasure thereon.

H.M. in Council or the Governor, subject to H.M.'s approval, may make laws dealing with the "reserved matters" described in the Constitution Letters Patent.

*The Ministry.*—There is provision for seven Ministries in the Government, to which Ministers may be appointed by the Governor in His Majesty's name, and these include the headships of twelve departments—Justice, Treasury, Public Instruction, Public Health, etc. Ministers must sit in one House, and do not vacate their seats on appointment. They may sit and speak, but not vote, in either House. There is a Chief Justice and five Judges, whose salaries and tenure are secured by amendments inserted in the Constitution since its publication.

The Roman Catholic religion is by law the religion of the country; but full liberty of conscience and freedom of worship are guaranteed, and persons of any faith may hold any office.

*Language.*—English, and Italian as the language of the Maltese Courts, are the official languages of Malta. All administration is carried on in English, but in notices and documents an Italian translation may accompany the English text so far as desirable and convenient. No legislative or administrative act may be done which will diminish or detract from the position of the English language, or tend to restrict its use in education or the public service. The English and Italian languages are recognised as equal languages of culture in Malta at the University, in Secondary

Schools, and in the higher classes of Elementary Schools as subjects of study.

Italian remains the official language of the Courts. Persons, however, who do not understand Italian, but understand English, have the right to have the proceedings conducted in that language.

The Maltese language, which is the language of general intercourse among all classes in the Islands, is the language of instruction in the lower standards of the Elementary Schools, and is one of the languages recognised in Parliament and in the Courts.

**Finance.**—The revenue from all sources is paid into a Consolidated Fund, out of which the Public Service is supplied. The Legislature provides for audit and (subject to an obligation to pay the Reserved Civil List) controls expenditure. Money bills must originate in the Lower House and may not be altered by the Senate, but the Senate may return a money bill with their suggestions, which the Lower House must consider. The Senate may, finally, reject a money bill, but may not alter it. The Legislature can only appropriate money out of the Consolidated Fund or alter or impose taxation upon a recommendation of the Governor (advised by his Ministers), and money may only be paid out of the Treasury upon a Governor's Warrant to the Treasurer. The Consolidated Fund has to defray the expenses of the Maltese Imperial Government, and to pay any other sum which the Governor declares to the Lower House to be necessary either to pay the expenses of the Nominated Council, the Privy Council (*see infra*) or the Joint Committee of the Privy Council, or to meet other expenses entailed in dealing with questions as to reserved matters.

Appointments to Public Offices in Malta (except those of Ministers) are made by the Governor in Council. The Crown reserves power at any time to revoke or amend all or any of the provisions relating to reserved matters, language in debates, religious toleration, language generally, and the Reserved Civil List.

The Reserved Civil List covers the charges for the Maltese Imperial Government (that is for the Governor's salary and establishment, and the salaries and establishments of the Lieutenant-Governor and Legal Adviser), and also the Judges' salaries.

#### Councils.

The Governor is assisted by two Councils—an Executive Council, consisting of such of the Ministers as he selects, and a Nominated Council, consisting of the Lieutenant-Governor and Legal Adviser (who are *ex-officio* members) and three Officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the "Privy Council of Malta." When any legislative or administrative act is done or proposed which in the Governor's opinion affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself, and three members of the Executive Council appointed by the Head of the Ministry.

#### Education and Religion.

Elementary education is carried on principally in Government schools, which are Roman Catholic and free. There are two secondary schools with 234 scholars, 5 central schools and 93 elementary schools and 60 night schools with an average enrolment of 29,110 pupils, and an

average attendance of 24,764. There is a public Lyceum with 384 day scholars, and 426 who attend evening classes, and a university (founded in 1769) with an average attendance of about 100 students. At these two latter institutions the fees are comparatively low, ranging from 80s. to 120s. per annum in the Lyceum and not exceeding 6s., exclusive of laboratory and other fees, per annum for all lectures in the University. There are numerous private, elementary and secondary schools. The total number of these schools is about 46, with an approximate attendance of 4,300 pupils. Education is not compulsory, but attendance is obligatory for all pupils on the registers of a Government Elementary School.

#### Revenue.

The most important sources of revenue are the Customs duties, licences, stamp duties, succession and donation duties, fees of office and reimbursements, post office, water and electricity receipts, land revenue, interest, and Public Lotto profit.

#### Weights and Measures.

Malta barrel is equal to 9½ imperial gallons.  
 " salm " 1 " quarter.  
 " cantar " 175 lbs. English.  
 " caffiso " 4½ imperial gallons.

#### Public Debt.

There is, strictly speaking, no public debt in Malta, but interest at 2½% is paid by the Government on 79,081½ outstanding balance on 31st

March, 1931, of the debt known as "Massa Frumentaria," incurred by the Municipality of Valletta under the Government of the Order of St. John of Jerusalem, in connection with the monopoly of the trade of wheat. The funds of the "Massa Frumentaria" were, in 1798, appropriated by the French Government, then in occupation of the Island.

## MAURITIUS.

### *Situation and Area.*

Mauritius is an island in the Indian Ocean, between 57° 18' and 57° 48' E. long., and 19° 50' and 20° 31' S. lat., distant 115 miles from Réunion, 934 miles from Seychelles, 1,300 miles from Natal, 2,000 miles from Cape Comorin, 11,000 miles from England, 2,300 from the Cape of Good Hope, and 500 from Madagascar. It comprises an area of about 720 square miles (nearly equal to Surrey), having an extreme length of 39 miles from north to south, and an extreme breadth of 29 miles from east to west.

The island is chiefly of volcanic formation but is almost entirely surrounded by coral reefs. There are several small chains of mountains but none of great height. The principal peaks are the Piton de la Rivière Noire (2,711 ft.), Pieter Both (2,690 ft.), and the Pouce (2,661 ft.). There are numerous rivers and streams; they flow generally through deep ravines and their course is broken by many small waterfalls and rapids. None of them are navigable beyond a short distance from the sea. The land rises gradually from the coasts, and the centre of the island is composed chiefly of a fertile and picturesque plateau varying in altitude from 1,000 to 1,800 feet. On this high and healthy tableland the temperature and climate are excellent.

### *History.*

The island was discovered by the Portuguese between 1506 and 1528. Although neither the date of the event nor the name of the discoverer can be ascertained with accuracy, tradition has attributed its discovery to Pedro Mascarenhas. The island at that time went under the name of Santa Apollonia, which was later changed to Cerné. The Portuguese merely used the island

as a port of call, without making any settlement. The first settlers were the Dutch. In 1598 a Dutch fleet landed in the South-Eastern harbour of the island, to which its commander, Admiral Wybrandt Van Warwyk, gave the name of Mauritius, in honour of the Statholder, Prince Maurice of Nassau. For many years no attempt was made at colonisation, but from 1638 downwards petty settlements were established at various points, the seat of government being at the place known as Old Grand Port. The colony did not prosper, and was finally abandoned by the Dutch in 1710.

In 1715 the Island was formally taken possession of by the French, but was not actually occupied till 1721, when a small party of colonists were sent out on behalf of the French East India Company. The island was then named Isle de France. This name was retained until the landing of the English in 1810, when the former name of Mauritius was restored. Of all the Governors of the island, the most celebrated was Mahé de Labourdonnais (1735-1746), "a man of eminent talents" (in the words of Lord Macaulay), who encouraged the cultivation of sugar-cane and introduced many other valuable plants. He was the real founder of the prosperity of the Isle de France.

In 1767, the French East India Company, having gone into liquidation, handed over the island to the Crown, Jean Daniel Dumas being appointed Governor General for the King, and Pierre Poivre, Intendant. Poivre was a man of great ability; he introduced into the colony cloves and nutmegs secretly obtained from the Dutch Sunda Archipelago. Having purchased the ancient residence of the Company's Governors, at Monplaisir, he converted the grounds into a nursery where many useful plants introduced by him were cultivated. On his departure this property was sold to Government, the garden being entrusted to Poivre's friend, Nicolas Céré, under whose able management it became famous under the name of King's Gardens. It is now the Royal Botanical Gardens, Pamplemousses.

In 1771 an epidemic of small pox caused many deaths among the slave population.

In 1790, at the outbreak of the French Revolution, a Colonial Assembly was elected, which for 13 years governed the island *de facto*.

In 1792 another very able Governor was sent out from France, Comte de Malartic, who during this troubled period managed to gain the affection of the whole community. In 1803, the Isle de France was taken charge of by General Decaen, appointed Captain General by Napoleon Bonaparte, then First Consul, with instructions to suspend the Colonial Assembly and the Isle de France's constitution for a period of ten years.

During the long war between England and France, the Isle de France was a source of great mischief to our merchant vessels, owing to the facility with which sorties were made from its harbour by French men-of-war and privateers; and in 1809 the British Government determined on its capture. The neighbouring islands of Rodrigues and Réunion were taken possession of and several naval engagements were fought to the credit of both navies. The most famous of these was the battle of the Isle de la Passe, fought in the bay of Grand Port on the 23rd and 24th August, 1810, between four English frigates and two French frigates, a corvette and a captured East Indiaman. The English lost the day, two of their ships having gone on shoals early in the engagement,

but the great gallantry shown by both sides has rendered the fight memorable in the annals of the two navies.

A strong expeditionary force was then sent out from the three presidencies of India and the Cape. Twelve thousand troops under General Abercromby were landed, and the island finally surrendered to Great Britain on December 3rd, 1810, the laws, religion, and customs of the inhabitants being guaranteed in the instrument of capitulation.

The possession of the island was confirmed to England by the Treaty of Paris, 1814.

The first English Governor, Mr. (later Sir) R. T. Farquhar (1810-1823) gained a well-deserved popularity. During his tenure of office, on 25th September, 1816, the fourth part of the town of Port Louis was destroyed by a conflagration. On 28th February, 1818, the island was laid waste by a terrific cyclone, causing immense destruction to property.

In the year 1832, the Council of Government which was established on the 19th August, 1825, was abolished, and a Legislative Council, with half the members official, created. The oaths of office were taken by the new members on the 23rd January, 1832.

On the 1st April, 1835, the emancipation of slaves took place without disorder; but as this new class of free men refused employment as labourers the planters were obliged to resort to this introduction of labour from India which was finally authorised in 1842, under the supervision of an agent residing in India, and which continued, with temporary interruptions, until 1910.

In 1849, the Legislative Council voted the law constituting a municipal corporation for the town of Port Louis.

During the years 1854, 1856, 1861-62, epidemics of cholera prevailed, of which that of 1854 was the most severe, causing 7,650 deaths.

The year 1864 saw the opening of the North Railway Line from Port Louis to Pamplemousses, the Midland Line being inaugurated two years after.

In December, 1866, malaria broke out with great severity. During the year 1867, 31,758 persons died from fever, including 18,308 in Port Louis.

In 1868 and 1874, Mauritius was visited by severe cyclones. During the former two spans of the Grand River Railway Viaduct were brought down by the force of the wind. On the 29th April, 1892, one of the most violent cyclones ever recorded ruined a considerable portion of Port Louis, besides causing infinite havoc to buildings and crops. The death roll amounted to 1,232. In order to assist the planters and other owners of immovable property affected by the calamity, a loan of £600,000 was guaranteed by the Imperial Government.

On the 23rd of July, 1893, part of Port Louis was again destroyed by fire. At the end of the same year ocean telegraphic communication was opened.

In 1902, an outbreak of Surra caused great loss of draught animals, and mechanical means of transport had to be resorted to for the sugar plantations. A number of locomotives and traction engines were introduced, and a loan was raised to enable the planters to lay down tramways, and take other steps to provide for transport.

In 1909, a Royal Commission visited the Island to enquire into the administration and finances of the Colony.

During the Great War Mauritius suffered in no way by direct action on the part of the enemy. A number of volunteers proceeded to Europe for

military service and a "Labour Battalion" was supplied for Mesopotamia.

The enormous rise in the price of sugar brought great prosperity to the Colony, and the gross value of the crop of 1920-1921 is estimated to have been approximately Rs. 250,000,000.

In 1921 investigations of the sanitary and health conditions were made by Dr. Andrew Balfour, C.B., C.M.G., M.D. Many of the works recommended have been carried out.

In 1923 the Indian Government consented to the resumption of immigration of labourers from India consequent on the repeal of the penal clauses of the Labour Law of 1878 affecting labour.

Immigration was accordingly resumed for a period of 12 months ending on 31st May, 1924, but with disappointing results, most of the immigrants having returned to India by the end of the same year.

In March, 1931, a cyclone lasted three days and caused considerable damage to property. In the same year a Financial Commission visited the Island to enquire into the public finances.

#### General Description.

The permanent settled population of European race is greater in Mauritius than in any other tropical colony of its size. Many of the inhabitants are descendants of the ancient French noblesse. The higher and middle classes possess much intellectual culture.

Eight daily newspapers and ten other periodicals are published in the capital. The French language and a creole *patois* are spoken all over the island, English being used in the supreme court of justice. Debates in the Council of Government may take place in either language.

Mauritius is divided into nine districts, Port Louis, Pamplemousses, Rivière du Rempart, Flacq, Grand Port, Savanne, Moka, Plaines Wilhems, and Black River.

The City of Port Louis is the capital, and seat of Government, and contained, with its suburbs, an estimated population of 53,988 on 31st December, 1930. The harbour is one of the best in the East, and is sufficiently spacious to receive a large number of vessels. It possesses three graving docks.

Works for the reconditioning of the Harbour and improvements thereto have been carried out. The Harbour is defended by Fort Adelaide (the citadel) and by Fort George. There are large barracks and military stores. The trade of the island passes almost entirely through Port Louis. The city has an elected municipal corporation, and raised in 1930 a revenue of Rs. 673,875, against an expenditure of Rs. 747,676. Its debt amounts to 45,700l. at 31st Dec., 1930.

The principal public edifices of Port Louis are the Government House, the Institute, the Roman Catholic and Anglican cathedrals, the Civil Hospital, the Town Hall, the theatre, and the public offices. There is a racecourse most beautifully situated in the Champ de Mars.

A sewage scheme, designed by Messrs. James Mansergh & Sons, provides for the disposal of the sewage of the central part of the town.

After Port Louis, the largest town is Curepipe, incorporated in 1890 (population 17,709, census of 1921), situated on the uplands in the Plaines Wilhems district.

In the district of Grand Port is the small town of Mahebourg (population 2,641, census of 1921), so called in honour of Mahé de Labourdonnais.

*Population.*

At the Census of 1921 the population of Mauritius (exclusive of the Dependencies, but including Military) was found to consist of:—

Persons of European, African, or mixed descent ... ..	104,216
Indo-Mauritians, i.e., persons of Indian descent, born in Mauritius ... ..	248,468
Other Indians ... ..	17,506*
Chinese ... ..	6,745
	<u>376,935</u>

The total number of Indians was thus 265,974 or 70.5 per cent. of the total population.

At the Census of 26th April, 1931, the Civil population numbered 393,418. Details of the census are not yet available.

The descendants of the immigrants from India—the Indo-Mauritians—now form the largest section of the population; they are steadily increasing in numbers. They are predominant in the domestic, commercial, and still more in the agricultural callings, and the amount of land held by them as small planters is rapidly growing.

*Constitution.*

The constitution of Mauritius was altered in 1884-85. It now consists of a Governor, with an Executive Council of four *ex-officio* members, and a Legislative Council of twenty-seven members, eight being *ex-officio*, nine nominated by the Governor, and ten elected—two for the town of Port Louis, and one for each of the eight rural districts. At least one-third of the nominated members must be persons not holding any public office. Members are not paid; they may speak either in French or English. The number of registered electors on 31st December, 1925, was 11,366; the franchise qualification is ownership of immovables of annual value of Rs. 300, or movables worth Rs. 3,000, or payment of rent of Rs. 25 monthly, or of license duty of Rs. 200 annually, or receipt of salary of Rs. 50 monthly. The session usually lasts from April to December.

The law is based on the Code Napoléon, and other French laws modified by Colonial Ordinances.

*Climate and Rainfall.*

From December to April is the hottest season in Mauritius, but it is comparatively cool during the remainder of the year. The average mean temperature of Port Louis is 77.1°, the average rainfall 38 inches and the relative humidity 71 per cent. The average mean temperature of Curepipe is 67.5°, the average rainfall 124 inches, and the relative humidity 87 per cent. The climate at Curepipe, from 1,700 to 1,900 feet above the sea, resembles that of the South of France or Italy. The cyclone season extends officially from December to the end of April, but cyclones occur in the Indian Ocean eastward of Mauritius, from the equator down to 30° S. latitude, in every month of the year, except August and September.

During cyclones over 30 inches of rain have occasionally been registered in 24 hours.

*Water Supply.*

The Town of Port Louis is supplied by the Grand River, N.W. This source is not altogether satisfactory. Two reservoirs have

\* There is reason to believe that a number of old Indian immigrants (i.e. those whose contract has expired) returned themselves as Indo-Mauritians.

been constructed by the Government to ensure a better supply to the town. It is proposed to provide Port Louis with Mare-aux-Vacoas water as advised by Mr. E. Mansergh, of Messrs. James Mansergh & Sons, who visited the Island in September and October, 1921. The erection of a chlorination plant with filter beds at Grand River, N.W., as recommended by them, to purify the water, has been completed.

The *Mare aux Vacoas* works were started by the Government in 1895, and were extended by the addition of a filtering plant. The whole of the district of Plaines Wilhems and a part of Moka are now supplied with pure water from these works and a small main was also laid to supply the Barracks and Fort in Port Louis and also the Government Establishments and soda water factories. These works have cost about 2,000,000 rupees and the revenue derived therefrom, Rs. 130,878 in 1929-30, now exceeds the cost of the upkeep.

The water supply of other districts is under the control of other Local Boards and with the co-operation of the Government, works have been undertaken to distribute water from upland springs to the villages in the country districts; these works are now completed for some districts and in course of execution in others.

*Irrigation.*

Important schemes have been in progress in recent years. A reservoir, with an area of 562 acres and a capacity of 416 million cubic feet has been constructed at "La Ferme," in the District of Black River, and about 4,000 acres of land are now under irrigation.

*Scenery.*

The famous tale of *Paul and Virginia*, by Bernardin de St. Pierre, an engineer officer in the service of France, who was stationed in the island towards the close of the 18th century, scarcely exaggerates the picturesque beauty of large portions of Mauritius. Many of the forests have, however, been felled to make room for the cultivation of the sugar-cane, the staple industry of the colony. In the remaining woods deer abound (being carefully preserved) and afford good sport; there are also partridges, quails, hares, and wild ducks in several parts of the island. The far-famed Botanical Gardens of Pamplémousses contain many rare and valuable plants and flowers.

*Railways.*

There are seven lines of railway, all owned and worked by Government, viz.: (1) The North line, from Port Louis to the sea coast village of Grand River South-east. Its length is 31 miles, and its course is approximately parallel to the northern coast line of the island. (2) The Montagne Longue branch from Terre Rouge station on the North Line to the village of Montagne Longue; its length is 34 miles. (3) The Midland line, beginning at Port Louis and running across the island to the sea coast town of Mahébourg on the other side; its length is 35.3 miles, with a summit level of 1,822 feet at Curepipe; the gradient in many places is 1 in 27. Four miles of this line have been doubled and opened for traffic. (4) The Moka-Flacq line from the Rose Hill station on the Midland line to Rivière Sèche station on the North line; length 26.2 miles. (5) Savanne branch from Rose-belle station on the Midland line to the sea coast town of Souillac at

the southern extremity of the island; its length is 10.90 miles. (6) Black River branch, from Richelieu on the Midland line to Tamarin, distance 12.75 miles. (7) Rivière du Poste to Mexico and Richebois, length 24 miles. All the above are of standard gauge, 4' 8½", except the 7th which is 75 centimetres (2' 6"). The total number of miles of railway now open is 119.65 of standard gauge and 24 of 2' 6" gauge, the total cost up to date being about 2,151,363. The receipts in 1929-30 were Rs. 2,292,018 (including traffic done for other Government departments), and expenditure, Rs. 2,536,747, not including the charge on account of Railway Loans.

### Religion.

The Christian Churches are assisted by State grants. According to the census of 1921, the Roman Catholics numbered 117,491, and the Protestants about 3,400, including Dependencies and Military. The Roman Catholics receive an annual grant from Government amounting to Rs. 142,016, the Protestants Rs. 45,533, and the Church of Scotland Rs. 8,558.

### Education.

The system of education had been remodelled by Ordinance No. 33 of 1899, which repealed all former enactments. This Ordinance was amended in some important respects by Ordinance No. 35 of 1913.

Under the Education Ordinance of 1899, a Department of Public Instruction was created under a "Director of Public Instruction."

This system remained in force until it was superseded by the Education Consolidation Ordinance of 1919, under which the Department of Public Instruction was replaced by a Royal College Department and a Schools Department, the post of Director of Public Instruction being abolished. The Rector is the Head of the Royal College Department; and the Superintendent of Schools of the Schools' Department.

The Royal College, which has now a branch in Port Louis called "The Royal College School, Port Louis," provides for the Secondary Education of Boys. A Committee styled the "Royal College Committee," is annually appointed by the Governor to advise in the framing of Regulations and to act as a consultative body. It consists of the Rector as Chairman, and of six members chosen by the Governor.

The Schools' Department provides for Primary, Secondary, and Technical and Industrial Education:—

- (1) Primary Education is carried on through a system of Government Schools and of Grant-in-aid Denominational Schools, the latter under the immediate control of local managers.
- (2) Secondary Education is provided by means of a system of Grant-in-aid schools for boys and girls.
- (3) As regards Technical and Industrial Education, provision is made for the training of students in Engineering (Mechanical and Civil), in Horticulture and Woodwork, and for the training of students as Teachers. A consultative committee styled the "Schools Committee," similar to that of the Royal College, is annually appointed by the Governor. It consists of 10 members: five members are nominated by the Primary and Secondary Grant-in-aid Schools and

four are chosen by the Governor, with the Superintendent of Schools as Chairman.

- (4) A sum of Rs. 500,000 has been set aside from the Colony's Surplus Balances as a "Scholarship Fund." The interest on this amount is devoted annually to provide further facilities, in the shape of scholarships and educational grants, for young Mauritians in the Government service and on leaving school to pursue their studies and obtain higher technical qualifications.

### Higher Education.

On the books of the Royal College and other Schools on the 31st December, 1930, there were 408 pupils.

### Primary Education.

There were in 1930—

	Number.	Pupils.
Government schools . . . . .	55	13,280
Grant schools . . . . .	91	20,676
Total . . . . .	146	33,936

The total expenditure on education in 1929-30 amounted to Rs. 1,479,401. There are about 800 masters, mistresses, assistants, and monitors and monitresses employed in Government and Grant Schools. Of the pupils in the aided schools 59.0 per cent. are Roman Catholics, 2.0 per cent. belong to the Church of England, and 1.0 per cent. to other Christian denominations. Five Hindoo and three Moslem schools are also assisted.

### Agricultural Education.

To facilitate higher agricultural education, a small Agricultural College has been established. Regular delivery of courses of lectures on Agricultural Science is being made to Primary School Teachers by the Department of Agriculture.

### Communications.

Mail steamers of the Messageries Maritimes, starting from Marseilles, maintain a regular service *via* the Suez Canal, and the Union-Castle line provides a service *via* the Cape of Good Hope.

The British India Steam Navigation Company runs an irregular service between Colombo and Mauritius. There is frequent communication by both sailing and steam vessels with India, Australia, Madagascar, Natal, Réunion, &c.

The Imperial Wireless Station at Rose-belle, which was closed on the 30th June, 1922, has been taken over by the Government from the Admiralty for a term of 21 years, from 1st June, 1923. Telegraphic and telephonic communication is established along and beyond the railway, the total length of line being 545 miles of telegraph\* and 386 of telephone\*; and cable communication through a branch office of the Eastern and South African Telegraph Company with Europe, *via* Seychelles, Zanzibar, and Aden, was opened in November, 1893. There is also a direct communication with the Madagascar and Reunion, two French Colonies in the Indian Ocean. Through rate: United Kingdom to Mauritius, 3s. per word; and from Mauritius to United Kingdom, Rs. 1.35.

There are in Mauritius the General Post Office in the city of Port Louis, and 59 branch post offices in the rural districts, 59 money order offices, 49 telegraph and 10 telephone offices.

\* Including Block Telegraph and Telephone for the Railway.

In the island of Rodrigues there is one post office at Port Mathurin. There is no post office in any other of the Dependencies. The rates of postage as from 1st October, 1925, are :—

	Letters.	Newspapers.
United Kingdom, and British Possessions, &c. . . . .	per 20 grs., 10 cents; every additional 20 grs. or fraction thereof, 6 cents.	per 50 grs. or fraction thereof, 3 cents.

#### Commerce.

The island produces barely one-tenth of the food required for its inhabitants and almost all agricultural enterprise is devoted to the production of exports.

The chief exports are sugar, rum, molasses, aloë-fibre, oil, copra, &c. Oxen are imported from Madagascar and Rodrigues, and food-stuffs from India.

The imports consist mainly of grain (rice, wheat, &c.), cotton manufactures, wine, coals, hardware, and manure. Considerable progress has been recorded in connection with the tobacco industry. About 2,000 acres are under tobacco cultivation. The British American Tobacco Company have opened a factory in Port Louis and efforts are being made to establish an export trade. About 93 per cent. of the value of the exports consists of shipments of sugar. In 1930 the weight of sugar exported was 185,538,889 kilos., with an estimated value of Rs. 24,846,253. The value of the rum exported was Rs. 14,499; that of aloë-fibre, Rs. 347,889; that of cocoa-nut oil, Rs. 9,131; copra, Rs. 280,370. The number of vessels registered at Port Louis is now 20, of a total tonnage of 5,928.

#### Currency and Banking.

The Mauritius Commercial Bank has establishments in the Colony, the total amount of deposits on 31st Dec., 1930, being Rs. 8,718,592, with paid up capital of Rs. 2,000,000.

The Bank of Mauritius (Limited) was established in October, 1894, with paid up capital of 125,550*l.*, and opened in Mauritius in Dec., 1894. The business of that bank was taken over by the Mercantile Bank of India Limited on the 3rd May, 1916. Total deposits on 31st Dec., 1930, Rs. 2,284,812. The total paid up capital is now 1,050,000*l.*

The National Bank of South Africa, now Barclays Bank (Dominion, Colonial and Overseas), has opened branches in the Island since 1919.

The paid up capital being 4,975,500*l.*, and the total amount of deposits on 31st December, 1930, Rs. 2,773,716.

A Government savings bank was established in 1837. The total deposits during the year ended 30th June, 1930, amounted to Rs. 1,753,483. The sum standing to the credit of depositors at the end of June, 1930, was Rs. 5,393,791.

All accounts are kept in rupees and cents of a rupee, which is the currency of the island. A Government note issue was re-established in 1876, the notes being legal tender except at the office of issue. The average circulation for the year 1929-30 was Rs. 14,735,750.

*Weights and Measures.*—The Metric System, as regards weights and measures, came into force on the 1st May, 1878.

#### DEPENDENCIES.

The dependencies of Mauritius comprise a large number of islands scattered over the Indian Ocean.

*Rodrigues*, the most important, is situated in latitude S. 19° 44' and longitude E. 63° 34', and is 344 nautical miles from Mauritius. The island which has an area of 42 sq. miles, about 26,000 acres, is 18 miles long by 7 miles broad, and is surrounded by coral reefs, extending in some places 5 or 6 miles from the shore. It is under the administration of a magistrate, who takes his instructions from the Governor of Mauritius. Laws for the island are made in the form of regulations framed by the Governor of Mauritius in Executive Council. The estimated population at 31st December, 1930, was 8,256. The birth rate in 1930 was 40.9 and the death rate 14.6 per 1,000. Cable communication, through a branch of the Eastern and South African Telegraph Company, was opened on 16th May, 1902.

The island, which is volcanic, mountainous, and in some parts well wooded, is beautiful and picturesque in the extreme. The highest land is 1,760 feet above the level of the sea, and may be seen in clear weather at a distance of 10 or 12 leagues. The temperature differs little from that of Mauritius, although the breezes are stronger and hurricanes more frequent and severe. The climate is healthy. The principal industries are fishing and the rearing of cattle and goats, for which latter the pasturage is excellent. The soil is good: cotton, coffee, tobacco, maize, beans, and vanilla grow luxuriantly; a trained officer has of late (1921) been appointed Agricultural Superintendent in view of the agricultural development of Rodrigues. The wild guinea fowl and partridges, likewise the deer and wild pigs, which used to be plentiful, have almost disappeared.

The value of the imports in 1930 was Rs. 274,036. The exports of the island produce in 1930 were valued at Rs. 295,932. The people are all peasant proprietors and there is abundance of food.

The principal exports are beans, maize, salt-fish, cattle, goats, pigs, poultry, tobacco-leaf and acacia seeds.

Communication with Rodrigues is maintained by a chartered steamer and occasional sailing vessels.

*Diego Garcia* (population, 445, census 1921), the most important of the Oil Islands group, consists of four islands, at four days' steaming from Mauritius, the chief one being about 30 miles in length, extending in an irregular horse-shoe shape, and embracing between its extremities three minor islets. It is a coral atoll, fifteen miles by six and a half, nowhere over ten feet

high, but forming a spacious bay, roomy enough for large vessels to enter, being fifteen miles in length from end to end, and from two to five miles in breadth.

Diego Garcia is situated at 7° 20' latitude S. and 72° 26' longitude E., on the straight line between the entrance to the Red Sea and Cape Leeuwin. In 1885 it was placed under the jurisdiction of a magistrate, with a small force of police from Mauritius, which was, however, withdrawn in 1888.

The population of the smaller Dependencies, according to the 1921 census, was 1,773.

## NIGERIA.

### *Situation, Area and Population.*

The British Colony and Protectorate of Nigeria is situated on the north-eastern shore of that deep indentation in the western coast of the African continent known as the Gulf of Guinea, and is enclosed roughly by parallels of latitude 4° and 14° N. and by meridians of longitude 3° and 14° E.

It is bounded on the north and north-west by the military territories of the French Sudan, on the east and south-east by the Cameroons, on the south and south-west by the waters of the Gulf of Guinea, and on the west by the French colony of Dahomey. Its greatest length from east to west is 700 miles and greatest breadth from north to south 650 miles.

Great Britain has received a mandate over a small portion (amounting to 31,150 square miles) of the former German territory of the Cameroons, which portion has been placed, for purposes of administration, under the Nigerian Government.

The area of Nigeria, including the mandated area of the Cameroons, is approximately 373,078 square miles (Southern Provinces and Colony 91,139 square miles, Northern Provinces 281,939 square miles). The country is therefore a little less in area than the United Kingdom, France and Belgium together, or about one-third that of British India. The coloured population is estimated at 19,308,638, while the number of Europeans of all classes, on an average, in the country is 5,939.

### *Physiography.*

Topographically speaking, Nigeria consists of the following four main zones or areas:—

(1) An area of swamp and mangrove forest with almost impenetrable undergrowth, running parallel to the coast-line and varying in depth from 20 to 60 miles. This area, which includes the deltaic region of the River Niger, is covered by a network of creeks and traversed by numerous rivers, the most important of which are the Rivers Benue, Forcados (branch of the River Niger), Nun (branch of the River Niger), Sombreiro, Bonny, Imo, Kwa-Ibo, and Cross.

(2) A belt of dense forest with thick undergrowth extending from the western to the eastern boundary and from 50 to 100 miles in width. The southern border of this area is some 20 miles from the coast-line in the west and thence follows the northern limit of the swamp and mangrove area. Its northern edge is difficult to determine exactly, as the belt gradually changes to patches of forest alternating with thick scrub and grass plains running approximately along a line drawn in a general east-south-easterly direction from about 7° 30' N. on the western border to 6° N. on the extreme east. The country is generally

undulating with scattered hills, and an extensive view can seldom be obtained; there are, however, hills rising to over 3,000 feet, and the region becomes mountainous as the Cameroons frontier is approached. The zone is well watered by numerous rivers, which with few exceptions run from north to south, and contains extremely rich oil-palm areas. There are no open spaces, except around villages and clearings for farms.

(3) A zone of comparatively open country gradually developing into park-like land and thence into open expanses covered with high grass as the watershed of the River Benue and that of the Niger (above its confluence with the Benue) are neared. The zone is generally hilly and mountainous on the Cameroons frontier, where heights above 6,000 feet are to be found.

(4) A plateau occupying the greater portion of Nigeria north of the Rivers Niger and Benue. East of longitude 7° the southern limits of this plateau are determined by a zone of hills which succeeds the undulating grass country to the south. The features of the plateau are generally similar, and although many rivers take their rise in this tableland, it is broken to no great extent by their valleys, except in the cases of those of the Rivers Niger and Benue on the south and west. In elevation it does not exceed an altitude of much over 2,000 feet, except in the mountainous parts of Bauchi, where heights of 6,000 feet and more occur, and in the south-west of Yola, which is occupied by a part of the Cameroons mountain system. The surface is generally undulating, marked here and there by hills of granite and sandstone, which rise abruptly from the surrounding land. The country is clothed to a large extent with thin forests which become more and more scanty as the Western Sudan is entered and the arid "steppes" of the Sahara Desert are approached.

### *Climate.*

West Africa formerly had the reputation of being so unhealthy that almost certain death would be the fate of the white man who endeavoured to make it his permanent home. And in this general condemnation Nigeria has been included. Though it cannot be claimed, even at the present day, that the country is a healthy one for the European except to a moderate extent on the plateau, the conditions of living have been so greatly improved during recent years that the possibilities of good health during temporary residence have been enormously increased. Medical and sanitary efforts have effected much by anti-malaria precautions, such as the use of quinine, and, around Lagos, the reclamation of considerable areas of swamp lands at great expense to Government. In spite, however, of this undoubted improvement in the conditions of life, Nigeria is not a land which can be colonised in the proper sense of the term by Europeans.

The "dry season," characterised by the "Harmattan," a dry north-easterly wind accompanied by a thick haze composed chiefly of dust, and the "rainy season" are the predominating features in the climate of Nigeria. The former begins in the north in October, extending its influence gradually southward until it is perceptible at Lagos early in November. There it appears intermittently up to the beginning of March, but in the north the dust and haze are more continuous and last until April. During this period the maximum diurnal variations of temperature occur. The wind blows generally

reme east. The country is generally | temperature occur. The wind blows generally

from the north-east, and both diurnal variation and humidity vary with the severity of the Harmattan. Even in Lagos, where hourly observations are taken, during December and January the humidity has been known to fall to 28 per cent. This season is ushered in and out by short periods of tornados and the rainy season fills the remainder of the year. A prevailing south-west wind supplies on the coast a copious precipitation which decreases rapidly as it travels inland. At Bonny, on the coast, the rainfall recorded in 1923 was 150.99 inches, rain falling on 151 days; at Kaduna, in the middle of the country, 43.56 inches, rain falling on 112 days; while the lowest recorded was 25.05 inches at Sokoto, rain falling on 44 days.

#### *History.*

As far back as the 17th century British traders have had mercantile depôts on the mouths of the Niger and adjacent rivers and creeks, known as the Oil rivers, and in those early times the trade was mainly confined to the traffic in slaves. At this epoch the French attempted a settlement at the mouth of the Niger, but were unsuccessful, and during the 18th century British interests preponderated.

At the beginning of the 19th century the exploration of the upper river, which had hitherto been supposed to be identical with the Nile or Congo, began, and Mungo Park traced its course from Bamako to Bussa, where he lost his life in the rapids. Lander in 1830 demonstrated the identity of Mungo Park's river at Bussa with the lower Niger, and followed its course to the sea.

In the next two decades, 1840-60, efforts were made, both by the British Government and private individuals, including French and German merchants, to develop the trade of the Niger, while our knowledge of the interior was greatly enlarged by the travels of Clapperton and Allen, both British, and of Barth and others, all at British instigation. A consulate was founded at Lokoja, and, at the cost of much money and many lives, some progress seemed to have been made only to result in failure. The pioneer of these efforts was McGregor Laird, who in 1852 began to establish stations and to endeavour to secure the country for England, but the stations were destroyed by natives, or removed after Laird's death in 1861. The good results of his work were not, however, entirely lost.

The situation in the early seventies was that there were numerous trading firms—English, French, and German—on the Oil rivers, where the export trade in palm oil had begun to assume importance, the imports being chiefly confined to spirits, guns and powder. The expeditions sent by the British Government to the higher river, and the subsidies voted by Parliament, had been withdrawn, and European intercourse with the Niger would have ceased had it not been for the perseverance of a few British firms, who during the four months of high water each sent a trading steamer up the river, and soon established a few primitive stations, where the white population of Nigeria lived. These bold pioneers were at the mercy of powerful chiefs, and gross outrages were from time to time avenged by the despatch of a light draught gunboat.

At the close of 1877, Mr. Goldie-Taubman—afterwards Sir G. Taubman Goldie—visited the Niger and recognised that amalgamation of interests and a settled government must replace the chaotic rivalry of traders. With this object in view he determined to secure a charter for a British

Company. After much negotiation the small British interests, which were the only ones existent on the Niger at that date, were amalgamated in the United African Company in 1879, and in 1881 a charter was applied for. The objection was raised that the capital of the Company was too small, and hence the National African Company was formed with a capital of a million sterling, with the object of opening up direct relations with the great chiefs of the interior.

With great energy the new company founded stations, sent out a river flotilla, and pushed up the Niger and Benue, but meanwhile the foresight of Gambetta had prompted the establishment of two French Companies, which, being backed by the French Government, acquired a great influence on the lower Niger. Of these the *Compagnie du Senegal* had a capital of 600,000*l.*, and some thirty French stations were formed, and while the French flag remained the charter could not, of course, be granted. The energy of Sir George Goldie, however, secured the disappearance of the French flag just in time to announce at the Berlin Conference in 1885 that the British flag alone flew on the Niger, and to secure to Great Britain the guardianship of the international navigation rights on the Niger while the French companies and rival British interests which had meantime grown up were absorbed in the National African Company.

In April, 1885, a new danger arose from the mission of Herr Flegel to secure treaties with Sokoto and Gando on behalf of Germany, but he was anticipated by the British Company, who concluded treaties with those powerful emirs. Great Britain was, therefore, able to conclude the Agreement of 1886 with Germany, which settled the frontiers between Nigeria and the Cameroons as far north as Yola, and in July, 1886, the long-delayed charter was granted, and the Company changed its title to that of the Royal Niger Company. Meanwhile, the territories adjacent to the river had been placed under British protection.

The first decade was spent in founding a number of commercial and quasi-administrative stations on the Niger and Benue Rivers, and in making treaties with the native tribes, and consolidating the commercial organisation on which the Company was dependent for its revenue. The expeditions of Monteil to Lake Chad from the west, of Crampel from the south-east, and of Mizon by way of the Niger and Benue, were checkmated, and finally, in 1890, an agreement was arrived at with France by which the line dividing the French Sudan on the north from Nigeria was drawn with certain deflections from Say, on the Niger, to Barua, on Lake Chad, and in 1893 the Cameroons boundary was extended from Yola to the south of the same lake.

In 1897 the growing hostility of the great Fulah Power culminated in a plan to drive the white men out of the country. The Company were not unprepared, and they took the field with some 500 or 600 soldiers, led by about 30 British officers, against many thousands of the enemy, of whom a large proportion were mounted. Nupe, a dependency of Sokoto, which had thus challenged the Company's existence, was divided by the Niger into two nearly equal portions. The southern portion was first conquered, and then northern Nupe after a two days' fight before the capital at Bida. Ilorin, a smaller dependency, was next subdued. Prior to this southern Nupe had been partially cleared of the Fulah slave raiders, and on the 20th June, 1897,

the legal status of slavery in the Niger Territories was declared abolished by the Company.

Simultaneously with this crisis another, which was to have far-reaching effects, arose. The only indeterminate frontier remaining was that to the west. The Company perceiving, in 1894, that French enterprise contemplated the annexation to Senegal and Dahomey of the Borgu country, sent out Captain Lugard (now Lord Lugard) to negotiate treaties with the king or chiefs of that country. Anticipating the powerful French expeditions by only a few days, he succeeded in making treaties at the capital of Nikki, and with other semi-independent chiefs of districts. Disregarding these prior British treaties, a swarm of French expeditions spread over Borgu, and having obtained a pledge from our Government that Sir George Goldie's powerful expedition, then in the field against the Fulani, should not advance north of latitude 9°, they invaded Bussa, with which we had a specific treaty of many years' standing, and established themselves on the Niger at several points.

At the end of 1897, in view of this situation, the British Government decided to raise an Imperial local force, and the task was confided to Colonel Lugard, who left England in March, 1898. After a period of great tension, during which the British and French troops faced each other, and a conflict was daily imminent, a convention was signed laying down a boundary line from the intersection of the 9th parallel with the frontier of Dahomey to Illo on the Niger, and thence to the northern frontier, which was more accurately defined, to Lake Chad, and to its junction with the Cameroons frontier. Meanwhile, the Emir installed at Bida by the Company was ousted, and the Nupes were again in arms, while the army of Rabeh, which had penetrated from the Nile Valley to Lake Chad, conquered and laid waste the territory of Bornu, but eventually returned to the south of Lake Chad.

The Imperial force, called the West African Frontier Force, with a "Commissioner and Commandant" at its head, and independent of the Company, was rapidly being formed, with its headquarters at Jebba, and with numerous detachments holding the posts evacuated by the French throughout Borgu, and a strong garrison at Lokoja.

The Imperial Government having decided that the charter of the Royal Niger Company should be revoked, and that its administrative rights and powers should be transferred to the Crown, steps to this end were taken at the end of 1898, when the convention with the French Government had been signed. The actual transfer of the Company's rights and possessions to the Crown took place on the 1st of January, 1900, when the territories north of a line extending, with deflections, from approximately latitude 9° on the Dahomey frontier to Idah on the River Niger, thence to Takum on the Cameroons border, were formed into the Protectorate of Northern Nigeria under Colonel Lugard as High Commissioner.

During the first years of the protectorate of Northern Nigeria, the Government was engaged in bringing under control the powerful Emirates of the Hausa States and the Kanuri Kingdom of Bornu. These Emirs, who maintained large standing armies, a large proportion of which was mounted, annually took the field and devastated vast tracts of country in slave-raiding expeditions. Despite the treaty with Sokoto, under

which the Royal Niger Company paid him an annual subsidy, the Fulani Emirates now defied the Government. The Emirs of Nupe and Kontagora were brought under control in 1901; Yola, Bauchi and Bornu in 1902; and the work of pacification was practically completed in 1903 with the taking of Kano and Sokoto, and the action at Birmi. Since that date the Hausa States have maintained a record of peaceful progress, with the exception of a rising by a so-called "Mahdi" in 1906 at Satiru in the Sokoto Province, which was, however, quickly suppressed with the loyal assistance of the Emir of Sokoto. The minor Emirate of Hadejia in the extreme north, which had not previously been brought under control, assumed an aggressive attitude in 1906 which, however, was suppressed. It was necessary also to send minor expeditions against various unruly and truculent pagan tribes, of which the more important were the Munshis on both banks of the Benue, the Okpotos in the Bassa Province, and various hill-tribes in the Bauchi and Nassarawa Provinces.

In addition to the pacification of these vast areas—hitherto largely unexplored—the early years of the Protectorate were devoted to creating a Civil Government in all its departments, and to the housing of the civil and military officials, and the erection of public offices; the building of the first light railway from Barijuko (on the navigable Kaduna) to Zungeru (22 miles), to which place the seat of Government was transferred in 1902 from the temporary capital at Jebba; and the opening up of communications both by land and by the navigable waterways of the Niger, Benue, Kaduna and Gongola Rivers. In 1907 the construction of the main trunk line from the navigable Niger at Baro to Kano (356 miles), the great market of the Hausa States, was commenced and completed, as a pioneer line, in 1912. During the 14 years from the inception of the Government of Northern Nigeria on 1st January, 1900, to its amalgamation with Southern Nigeria on 1st January, 1914, there were constructed in the Protectorate 700 miles of railways and 5,500 wire miles of telegraphs, while the Marine Department worked 1,000 miles of river.

In the political and administrative sphere a complete Civil Service was created, which increased from half a dozen officers in 1900 to an establishment of 132 residents and assistants in 1913. The guiding principle of the Administration was indirect rule through the native chiefs, the powers delegated to whom varied with their degree of enlightenment. A form of direct taxation was evolved, based on the elaborate system which obtained in the Hausa States prior to the British occupation, but shorn of its abuses. The collection of these taxes was made through the chiefs, a fixed proportion of them being retained in "Native Treasuries," from which the salaries of the native officials were paid.

As an indication of the progress achieved, the Durbar held at Kano on 1st January, 1913, may be instanced, when practically all the chiefs of the Protectorate—from the great Mohammedan Emirs to the petty chiefs of pagan hill tribes— assembled with such retinues as they were allowed to bring, estimated at 20,000 horsemen and 40,000 foot.

**THE OIL RIVERS PROTECTORATE.**—When, in 1885, the British Government at the conference of the European Powers, held at Berlin, was able to obtain acknowledgment of the fact that a British

protectorate had been virtually established over the Niger districts, an Order-in-Council defining them was made, and the portion lying on the coast line was designated the Oil Rivers Protectorate, and placed under Consular rule.

In 1891 the rule of the Consul over the Oil Rivers Protectorate was exchanged for that of a Commissioner and Consul-General, stationed at Old Calabar (now Calabar), while Deputy Commissioners and Vice-Consuls were appointed to the Rivers Benue, Bonny, Brass and Forcados, and to the districts of Sapele and Warri.

By an Order-in-Council of 1893 the Oil Rivers Protectorate was extended definitely into the hinterland under the name of the Niger Coast Protectorate, and an administration established under an Imperial Commissioner and Consul-General.

**BENIN.**—In 1892 Captain Gallwey (now Sir H. L. Galway) concluded a treaty with the king of Benin. As time passed, however, it became evident that this potentate had no intention of adhering to its provisions.

At this period Benin held enormous power over the surrounding territory, and it was said that her influence extended even so far as Sierra Leone on one side and the Congo River on the other. The terrible nature of the fetish rites and the wholesale human sacrifices which took place in Benin City, urgently demanded European intervention and the introduction of civilised rule.

Early in 1897 a peaceful mission, organised by the Acting Consul-General to establish friendly relations with Overami, the king of Benin, and to induce him to carry out the terms of the treaty of 1892, was treacherously attacked, and with the exception of two, all the European members of the party were massacred. A powerful expedition was sent against Benin, and in a short time the capital had been captured, but the king made good his escape. The state in which Benin City was found passes all description. In every direction human remains, pits filled with bodies in various stages of decomposition, and altars dripping with fresh human blood were to be seen.

Overami eventually surrendered and was sent into exile at Calabar, where he died in the early part of 1914. In 1899 there was a second expedition into the Benin country, which resulted in the capture and execution of Ologbohere, the leader of the attack on the mission.

**THE PROTECTORATE OF SOUTHERN NIGERIA, 1900-1906.**—When in 1900 the charter of the Royal Niger Company was revoked by the Crown that portion of its territories lying between Idah and the coast was added to the Niger Coast Protectorate. At the same time by an Order-in-Council the Niger Coast Protectorate was constituted the Protectorate of Southern Nigeria, the administration being transferred from the Foreign Office to the Colonial Office, and placed under Sir R. Moor as High Commissioner. In 1901 the Niger Coast Protectorate troops were organised into a regiment of the West African Frontier Force, and remodelled on the lines of the original corps of that name raised in the Niger Company's territories by Colonel F. D. Lugard in 1898.

Towards the close of 1901 preparations for the Aro Expedition were commenced. These operations were directed against the southern Ibo people in general and the Aro, or Inokun tribe in particular. The Aros, who may be described as the dominant section of the great Ibo family, held paramount power over a large extent of

country lying between the Niger and Cross Rivers. They had established a powerful fetish, probably derived from Benin, known as the Long Juju which exercised an extremely evil influence on the ignorant and superstitious natives for miles around. After five months of arduous work, the Field Force accomplished the subjugation and disarmament of the Aro tribe, the destruction of the Long Juju and the bringing under Government control of that portion of the territories as far north as about the 5th parallel.

Between 1905 and 1909 several expeditions were sent into the hinterland with the object of opening to trade and civilisation previously unexplored tracts of country. The principal operations were the Bende-Onitsha Hinterland Expedition, 1905-06, and the Niger-Cross River Expedition, 1908-09. As the troops progressed through the country new administrative districts and stations were formed, broad roads constructed in all directions, and many new markets established.

The eastern frontier from the Cross River rapids to the sea was surveyed by an Anglo-German Commission in 1905-06; and from Cross River rapids to Yola in 1907-09. For some years before these delimitations, there were frequent raids across the border by German native soldiery from the Cameroons, which were invariably accompanied by robbery with violence and seizure; and even after the boundary line had been demarcated this violation of British territory did not cease.

**LAGOS OR EKO.**—During the reign of Kosoko, Lagos, or Eko as it is known to the natives, became the chief centre of the slave trade in the Bight of Benin. Akitoye, his cousin, from whom the throne had been usurped, issued a proclamation to the effect that he would make common cause with the British against slavery if he were reinstated. Acting on this statement, the British Government took decisive measures, and in 1851 a party of bluejackets from Her Majesty's warships attacked and reduced the town. Kosoko fled and Akitoye was restored to power. In 1852 Akitoye and his chiefs signed a treaty by the terms of which they agreed to abolish the export of slaves, and to encourage the work of missionaries and the establishment of stations for them. A Consul was appointed to Lagos for the protection of British interests.

About nine months after the signature of this treaty some Portuguese slave traders, who had been expelled, returned to Lagos and renewed their old practices. Akitoye was informed of what was going on, and their attempts were promptly suppressed. In consequence of this, the slave trade party, under the leadership of Kosoko, organised a rebellion which broke out in 1853. Indecisive encounters took place between the two factions, and bluejackets were landed to protect the Consulate. Attempts which were made by the Consul and officers to mediate failed, and finally marines were sent to assist Akitoye, when, after a short fight, Kosoko was defeated and fled. Dosumu, who succeeded his father Akitoye, was unable to adhere to the terms of the treaty, and was induced in 1861 to cede the sovereignty of Lagos and dependent territories to the Crown in consideration of a pension, which he continued to draw until his death in 1885.

**THE COLONY OF LAGOS.**—In 1862 these territories were erected into a Colony, and the following year Kosoko, who in 1854 had been acknowledged king of Lekki and Palma, districts lying to

the eastward, ceded these places to the Lagos Government. At the same time Protectorate rights were established over Ado and Oke-Odan on the west. In 1866 the Colony became a portion of the West African Settlements, retaining a separate Legislative Council, but being subject to the Governor-in-Chief at Sierra Leone. In 1874 the Colony, which extended from Badagry on the west to Odi on the east with an indefinite inland boundary, was united to the Gold Coast Colony.

In 1883 Appa, lying on the western border of the Colony, was the next district to be brought under British jurisdiction. In 1884, the British Consul concluded a treaty with the Jekris by which their country as far as Mollume, was placed under British protection, and similar treaties were made with the chiefs of Ogbó and Mahin, small tribal areas situated in the creek region to the eastward. In 1886 the Lagos territories were separated from the Gold Coast and erected into a separate Colony and Protectorate. Between the years 1886 and 1895 Mahin, Ijebu-Ro, Itebu, and Aiyesan to the east, and Kotonu, Igbessa, Ado and Ilaro to the west were proclaimed part of the Protectorate. An expedition was sent against the Ijebus in 1892, which resulted in the military occupation of their country, and in the opening of a most important trade route to the interior.

From this time onward British influence gradually spread inland towards the Niger, and in 1899 the Protectorate was extended to the confines of Northern Nigeria and to the border of the Niger Coast Protectorate. The country generally prospered, and Lagos became a great trading port with many large mercantile firms, both European and native, established. Great trade routes were opened into the interior, and a railway was constructed from Lagos to Ibadan, passing through a thickly populated and fertile agricultural country.

**THE COLONY AND PROTECTORATE OF SOUTHERN NIGERIA, 1906-1913.**—In 1906 the Colony of Lagos and its protected territory were amalgamated with the Protectorate of Southern Nigeria under one administration and designated the Colony and Protectorate of Southern Nigeria. For administrative purposes the country was partitioned into three main divisions—the Western Province, which coincided with the former Colony and Protectorate of Lagos; and the Central and Eastern Provinces, which previously formed the Protectorate of Southern Nigeria.

The next few years were spent in building up an extensive system of communications. The railway from Lagos to Ibadan was extended over the Northern Nigeria border to Jebba; thence across the Niger to Zungeru; and finally linked up with the railway in operation from Baro on the Niger to Kano, the great Mohammedan trade centre of the north. A light railway was built joining the main line at Zaria with the tin fields of Bauchi. Broad main roads were driven in all directions and telegraph lines constructed between important administrative and trade centres.

In 1901 the great undertaking of making Lagos an open port by the construction of huge moles and by the dredging of the sandbar, which obstructed the entrance to the harbour, was commenced; and by the end of 1913 sufficient progress had been made to permit of large ocean-going steamers entering the harbour and berthing alongside the wharves. For several years vessels drawing 20 feet of water have been able to use the harbour.

Large areas in the north-eastern portion of the Protectorate, notably the country inhabited by the warlike and hitherto intractable Munshi people were brought under Government supervision.

**THE AMALGAMATION OF NORTHERN AND SOUTHERN NIGERIA, 1914.**—By Letters Patent of 29th November, 1913, and an Order-in-Council dated the 22nd of November, 1913, which Instruments came into operation on the 1st January, 1914, the Colony and Protectorate of Southern Nigeria and the Protectorate of Northern Nigeria were formed into the Colony and Protectorate of Nigeria. By another Order of the same date the boundaries of the Colony of Nigeria were defined, and by a third Order, which applied to the Colony and to the Protectorate, an advisory and deliberative body known as the Nigerian Council was established.

Provision was made for an Executive Council and for a Legislative Council for the Colony. The legislative power for the Protectorate was vested in the Governor. The Colony was placed under an Administrator, and the Protectorate, divided into two groups of provinces—Northern and Southern—under two Lieutenant-Governors.

Since the amalgamation, the chief events in the history of Nigeria have been the Great War, which resulted in the conquest of the Cameroons; the building of the Eastern Railway, and the development of the ports of Lagos and Port Harcourt, and of the Government Colliery at Enugu; the great trade boom of 1919 and 1920, and the great trade depression which succeeded it in 1921; the institution in 1923 of an enlarged and partly elected Legislative Council for the Colony and the Southern Provinces of the Protectorate (*see under* Constitution); the visit of the Prince of Wales in 1925, and the introduction of direct taxation in the Southern Provinces.

#### *Political and Administrative Divisions.*

Nigeria is arranged in three main divisions, the "Colony" and two groups of provinces designated the "Northern Provinces" and the "Southern Provinces." The Colony comprises the former Colony of Southern Nigeria, while the two groups of provinces are formed from the late Protectorates of Northern and Southern Nigeria.

The Northern Provinces are Adamawa, Bauchi, Benue, Bornu, Ilorin, Kabba, Kano, Niger, Plateau, Sokoto, and Zaria.

The Southern Provinces are Abeokuta, Benin, Calabar, Cameroons, Ijebu, Oyo, Ogoja, Ondo, Onitsha, Owerri, and Warri.

The Provinces are each partitioned into divisions.

The seat of Government is established at Lagos. The Administrative Head-quarters of the Colony is at Lagos, while those of the Northern and Southern Provinces are at Kaduna and Kngugu, respectively.

**THE CAMEROONS.**—The conquest of the Cameroons was completed in February, 1916, after a series of operations which commenced in August 1914.

An Anglo-French military and naval force under the command of Brigadier-General C. Dohell, (afterwards Major-General Sir C. Dohell), the Inspector General of the West African Frontier Force, compelled Duala to surrender on 27th September, 1914, and after hard fighting drove the German forces from the surrounding districts.

On the 10th June, 1915, Garua, on the River Benue, fell after a siege of a few weeks by forces

from Nigeria and the French Chad Territory under the command of Brigadier-General Cunliffe, the Commandant of the Nigeria Regiment, W.A. F.F.; having cleared the north of the Cameroons, except Mora, these forces marched southwards driving the Germans before them to the Sanaga River.

French forces, with a Belgian contingent from the Congo, invaded the Cameroons from French Equatorial Africa under the command of General Aymerich and gradually pushed forward from the south-east and south towards Yaunde, which had become the headquarters of the German forces. Finally the main German forces, being almost surrounded by the converging advance of the Allied troops, retreated southwards into the Spanish territory of Muni, where they were interned, and the isolated garrison of Mora in the north then surrendered.

By an arrangement which came into effect on 1st April, 1916, the Cameroons was provisionally divided into British and French spheres. The British sphere (about 31,160 square miles in extent) consisted of two portions. The smaller, in the extreme north was intended to include the whole of the Sultanate of Dikwa or German Bornu. The larger consisted of a strip of country bordering on Nigeria, about 400 miles in length and with a maximum width of 80 miles, extending from about 30 miles south of Yola to the Cameroon estuary. It included Buea, the German administrative capital of the Cameroons, and the ports of Victoria, Tiko, and Rio del Rey, and consisted of nearly the whole of the Victoria District, the Kumba (or Johann Albrechtshöhe) District, the Ossidinge District, part of the Chang District, the Bamenda District, and parts of the Banyo and Garua Districts.

The estimated population of the British sphere was about 650,000.

The rest of the Cameroons, about 275,000 square miles, with Duala and Kribi, the chief ports, was assigned to France. Boundary adjustments with the French took place in 1920 in accordance with an agreement signed by Lord Milner and M. Simon on 10th July, 1919. The principal features of these were the transfer to the British of the country west of the Mandara Mountains from the Dikwa Sultanate in the north to the River Tiel in the south, and the transfer of nearly all the Chang District to the French.

The British sphere was placed under the control of the Governor of Nigeria, and the parts of the sphere to the north of the Bamenda District were administered by the staffs of the adjoining Nigerian Provinces of Bornu and Yola. The Bamenda, Ossidinge, Kumba and Victoria Districts were administered as a separate Cameroons Province with four Divisions (Bamenda, Mamfe, Victoria, Kumba) under a Resident stationed at Buea, responsible to the Governor of Nigeria through the Lieutenant-Governor of the Southern Provinces. The large German cocoa, rubber and banana plantations in the Victoria District, with about 48,000 acres under cultivation, were placed in the charge of a Plantation Department, in order that they might be kept in good order as far as possible until their mode of disposal was settled. They were sold by auction in November, 1924.

By the Treaty of Versailles, Germany renounced in favour of the Principal Allied and Associated Powers all her rights over the Cameroons.

In December, 1920, the British and French Governments submitted to the Council of the League of Nations draft mandates for the British

and French spheres with a joint recommendation (dated 17th December, 1920) for the division of the Cameroons in accordance with the Milner-Simon agreement of 10th July, 1919. In October, 1921, the Council of the League approved in principle the division of the country in accordance with that agreement and the application of the mandate system to those territories, and on 20th July, 1922, after a delay due to negotiations between the United States Government and the Mandatory Powers, the Council confirmed the mandates and defined their terms.\*

By an Order in Council, dated 1923 and brought into force in February, 1924, and by Nigerian Ordinance No. 3 of 1924, provision was made for the future government of the British Sphere as if it were part of the Protectorate of Nigeria. Under these enactments, the Cameroons Province is administered and legislated for as if it formed one of the Southern Provinces of the Protectorate, while the northern parts are administered and legislated for as if they formed parts of the Northern Provinces of Bornu and Yola; and most of the laws of Nigeria are applied to the British Sphere, subject to the terms of the mandate as regards the few provisions thereof which are not in accordance with ordinary Nigerian law and practice.

#### *Commerce and Industry.*

The progress of Nigeria may be illustrated by the fact that in 1904 the total value of imports and exports (excluding specie) was a little over 5 millions sterling, as compared with over 12 millions in 1914 and over 27 millions in 1930.

Imports consist chiefly of the following goods, which are arranged alphabetically, and not in order of value:—Aerated waters, bags and sacks, beads, beef, bicycles, biscuits, chemicals and drugs, cigars and cigarettes, kola-nuts, cooper's stores, cotton and woollen goods, cutlery, earthenware, enamelware, firearms, fish, flour, furniture, galvanized iron, gunpowder, haberdashery, hardware, kerosene, matches, motor vehicles, perfumery, rice, rope and twine, salt, silk goods, soap, spirits, stationery, sugar, timber, tobacco, umbrellas, wearing apparel, wines, and a great number of miscellaneous articles. Cotton-pie goods form the principal class in the import table, 3,045,144l. worth being received in 1930.

The principal exports are palm-kernels, palm-oil, tin, hides and skins, ground-nuts, cotton lint, cocoa, mahogany, rubber, and shea produce.

The influence of railway extensions in the Northern Provinces is shown by the largely increased exports of ground-nuts, hides and skins, and shea produce. In 1911, the year before the railway to Kano was opened, the total value of these three products shipped overseas was 89,000l. only, as compared with 3,130,207l. for these products in 1930. There is also a large increase in cotton goods carried to Kano.

Deposits of lignite and coal have been discovered near Asaba and Udi in the Southern Provinces. A colliery was opened by Government in 1915 at Enugu, the coal won being used by Government Departments or sold to the public. The output for 1930 was 364,844 tons.

Amongst minor products exported from the Colony and Protectorate may be mentioned ivory, ebony, copra, coffee, gutta percha, beeswax, silk, gums, benniseed, piassava fibre, capsulums, ginger and ostrich feathers.

\* For text of the British mandate see Cmd. 1794.

Crops cultivated for home consumption include maize, yams, cassava, sweet potatoes, sugar cane, guinea corn, ground-nuts, rice, millet, tobacco, plantains and bananas, beans of various kinds, etc. Wheat is grown to a small extent in some parts of the Northern Provinces.

Large herds of cattle, sheep, and goats are raised in the Northern Provinces, and in the extreme north, ostriches and camels are bred. Horses and donkeys are bred and in common use in the northern part of the Protectorate.

The ports served by ocean steamers are, from west to east, Lagos, Forcados and Burutu, Warri, Sapele, Koko Town, Akaassa, Bonny, Port Harcourt, Degema, Opobo, Calabar, and Victoria, and Tiko, Cameroons.

Import and export merchants are established at the ports, and also up-country along the main waterways, the Niger, Benue, and Cross Rivers, and at inland railway stations.

#### *The Nigerian Tin Fields.*

The principal tin fields are situated on the western boundary of the Bauchi Province and in the Provinces of Nassarawa, Zaria, and Kano adjoining that boundary. Tin is also known to exist in the Provinces of Ilorin, Calabar, and Yola, but as yet has not been found in payable quantities.

The tin is in the form of cassiterite, and is mostly found in the detrital deposits resultant on the vast denudation that has taken place all over the known field; it is therefore more readily discovered in the existing river-beds; and shows a tendency to increase in size and richness of deposit nearer their sources.

The pagan town of Bukuru may be taken roughly as the centre of the field (about 6,000 feet above sea level), from which three great waterways of the Northern Provinces take their origin. Flowing westwards we have the N'gel River becoming the Kwall Danchandon, and eventually the Kaduna, flowing north-east the Delimi River that goes to Lake Chad, and flowing east the numerous tributaries of the Gongola which joins the Benue, such as the Shen, Forum, Ropp and Jarawa Rivers.

Tin ore has been worked and smelted by the natives during the last hundred years, the Seriki (Chief) of Liruein-Delma being a grandson of the native who historically first discovered and worked it. There is, however, strong evidence to show that some former race knew of its existence. Beads may be seen that have been found in the deep detrital deposits that could only have been made by man. These beads bear no resemblance to the modern ornaments made by tin workers, nor are such beads worn by any existing race of natives near the fields, also the depth at which they have been found precludes a modern origin.

The ore won by the existing mines amounted in 1913 to 5,530 tons. The exports were 8,475 tons in 1921, and 13,070 tons valued at 2,209,545*l.* in 1928.

#### *Banking, Currency, Weights and Measures.*

Banking facilities are afforded by the Bank of British West Africa Ltd., and Barclays Bank (Dominion, Colonial and Overseas). The former is established at Lagos (local head office, Marina, and branch office, 196, Broad Street), Aba, Abonema, Abeokuta, Calabar, Ebute Metta, Enugu, Gossau, Ibadan, Jos, Kaduna, Maiduguri, Kano, Lokoja, Makurdi, Onitsha, Opobo, Oshogbo, Port Harcourt, Sapele, Warri and Zaria, and there are also a number of agencies. Barclays Bank

(Dominion, Colonial and Overseas) is established at Lagos, Aba, Burutu, Ebute Metta, Gossau, Ibadan, Jos, Kano, Port Harcourt, Zaria and Victoria (British Cameroons).

The coins current in Nigeria are:—U.K. gold, silver and bronze coins; *West African* silver coins value 2*s.*, 1*s.*, 6*d.* and 3*d.*, and *West Africa* alloy coins of the same denomination; *West African* nickel-bronze coins value 1*d.*, ½*d.* and ¼*d.* (tenthpence).

All coins, which under the Coinage Acts, 1870 and 1891, are legal tender in the United Kingdom, and all subsidiary coins coined in pursuance of the provisions of His Majesty's Order-in-Council dated 23rd July, 1906, as amended by Orders-in-Council dated respectively 9th September, 1907, 19th October, 1908, 2nd August, 1910, and 7th May, 1913, are current in all parts of Nigeria. The United Kingdom coins, however, are being superseded by the West African coins. Gold and silver coins of the United Kingdom and West African silver coins are legal tender to any amount; United Kingdom bronze coins and West African nickel-bronze coins are legal tender to the extent of one shilling.

The West African silver coins, authorised by the Nigerian Coinage Order, 1913, were introduced in May, 1913. Owing to the rapid disappearance of silver coins other West African coins of alloyed metal of the same denominations, and of the same standard weights, but of a low intrinsic value, were introduced in pursuance of the provisions of His Majesty's Order-in-Council dated 9th February, 1920, and the silver coins are being withdrawn. This alloy coinage has been in circulation since 31st July, 1920. The West African nickel-bronze coins were introduced in 1907, 1908 and 1911. Currency notes were introduced in 1916 under the Currency Note Ordinance of that year. Notes of the values of 20*s.* and 10*s.* are now in circulation.

The weights and measures in common use are the same as those in Great Britain.

#### *Chief Towns and Means of Communication.*

The principal towns of the Northern Provinces are:—Bida, Ilorin, Jos, Kaduna, Kano, Katsina, Lokoja, Maiduguri, Sokoto, Yola, and Zaria; while those of the Southern Provinces are:—Aba, Abeokuta, Benin City, Calabar, Enugu, Forcados, Ibadan, Igbu-Ode, Onitsha, Opobo, Oshogbo, Oyo, Port Harcourt, Sapele and Warri. The only large town in the Colony is Lagos, the capital of Nigeria.

Steamships maintain a regular service between Nigeria, Europe, other West African Colonies, etc., and there is cable communication with West and South West African ports, Europe and South Africa, and thus with all parts of the civilised world.

The Western Division of the Nigerian Railway (3ft. 6in. gauge) runs from Lagos on the coast through the important towns of Abeokuta, Ibadan, Kaduna and Zaria, to Kano, a distance of 706 miles, thus connecting large and populous commercial centres in the interior with each other and with the sea. The main line from Kano has been extended to N'Guru, situated just inside Bornu Province; this extension has a length of 144 miles, and was opened on the 1st of October, 1930. There are also three branch lines, one of 111 miles running from Minna to Baro, on the River Niger, another of 137 miles from Zaria through Funtua and Gossau to Kaura

Namoda, opened in 1929, and a third, a 2ft. 6in. light railway 134 miles long, from Zaria to Jos on the Bauchi Plateau. In 1913-16 a 3ft. 6in. gauge railway was built from Port Harcourt, on a branch of the Bonny River, to Enugu, a distance of 151 miles. This line, which is generally known as the Eastern Railway, runs through a rich oil-palm belt, and taps the coal field at the Government Colliery at Enugu. Construction was resumed after the war, and the next section, of 139 miles, from Enugu to Makurdi on the Benue River, was completed in 1923. The final section (279 miles), from the Benue to Kaduna, was completed in 1927. The line is 569 miles in length and affords an alternative outlet for the tin-ore and agricultural produce of the north, and renders the coal mined at Enugu available throughout the districts served by the Western Division of the Railway. A branch from the Eastern line at Kafanchan to Jos (63 miles) connects the tin mines of the Bauchi Plateau with Port Harcourt. A short branch line of 24 miles has been constructed between Ifo-Ilaro-Idogo, and was opened on the 1st of June, 1930.

A system of inland telegraphs, also owned and operated by Government, connects the majority of the principal towns on the coast and in the interior, and the African Direct Telegraph Company controls a wireless station at Lagos.

The Government has constructed a very large number of roads, many of which are suitable for motor traffic, between the headquarter stations of the Provinces, and there are, in addition, many minor roads. Construction is proceeding vigorously. The Rivers Niger and Benue are in themselves great natural highways, and in the south there are numerous other navigable waterways, which provide means of communication and transport.

#### *Religion and Education.*

The bulk of the population of the Northern Provinces is Muhammadan, the majority of the remainder being pagan. In the Southern Provinces however, the proportions are reversed: Muhammadan communities, occur especially in the western districts. Missionary societies of various Christian denominations have established many stations with churches and schools throughout the country.

Education work for the most part is carried on by the several missionary bodies whose schools outnumber those established and maintained entirely by Government. In the Southern Provinces the 1928 returns show that there are 49 Government Schools; 266 Assisted Schools in receipt of an annual grant-in-aid from Government awarded in accordance with the regulations of the Education Code; and 2,363 Non-Assisted Schools which are in no way controlled by the Department of Education. In addition to the above schools, a high-grade secondary school for boys is maintained at Lagos by the Government. This school called King's College was built and equipped at a cost of nearly 10,000. Pupils are prepared for London Matriculation, and a branch for instruction in commercial subjects has been instituted. A secondary school for Girls was opened in Lagos in 1927. A new Education Code was introduced in 1916, under which grants in aid are paid on the general efficiency of the schools as disclosed by the reports of the Inspectors, account being taken

of (1) adequacy and efficiency of staff; (2) tone, discipline, organisation, and moral instruction; (3) results of examinations by Masters and test examinations by Inspectors, and general progress; and (4) buildings, equipment, etc. The Education Boards set up under the Ordinance are in the Northern Provinces confined in their functions to Christian assisted schools.

In the Northern Provinces there are 96 Government Schools, in which elementary and primary instruction are given, and 169 Non-Assisted and over 31,000 Muhammadan schools. The local vernacular language is first employed as the medium for teaching elementary subjects; the course is then repeated in Hausa, and in Hausa only is given primary instruction in all standards except the highest, where the study of English is begun. In addition to the Government Schools there are very many Native Muhammadan Schools in which, however, little is taught except the study of the Koran and of the traditions of Islamic faith. Missionary societies also have opened schools, more especially in the southern pagan parts of the Northern Provinces.

#### *Constitution.*

The territorial divisions of Nigeria are the "Colony of Nigeria," the "Northern Provinces" and the "Southern Provinces." The Northern Provinces and the Southern Provinces together form the Protectorate.

The Government of the Colony of Nigeria is provided for by Letters Patent of 9th December, 1922, and Royal Instructions to the Governor of the Colony of the same date, as amended by Royal Instructions, dated 17th February, 1928. The Government of the Protectorate is provided for by the Nigeria Protectorate Order in Council, 1922, of 21st November, 1922, and Royal Instructions to the Governor of the Protectorate of 9th December, 1922 and 17th February, 1928.

The Nigeria (Legislative Council) Order in Council, 1922, dated 21st November, 1922, as amended by the Nigeria (Legislative Council) Order in Council, 1928, dated 16th May, 1928, provides for a Legislative Council for the Colony and the Southern Provinces of the Protectorate, and this Council is also given control over Protectorate Government expenditure in the Northern Provinces. The Legislative Council consists of:—

The Governor, as President.

The Official Members, viz:

The Members of the Executive Council.

The Senior Residents.

The Deputy Chief Secretary to Government.

The Secretary, Northern Provinces, and the Secretary, Southern Provinces.

## NORTHERN RHODESIA.†

### Situation and Area.

Northern Rhodesia comprises the northern part of the Territory formerly administered by the British South Africa Company, whose principal field of operations was defined in the Charter of Incorporation as "the region of South Africa lying immediately to the North of British Bechuanaland, and to the North and West of the South African Republic, and to the West of the Portuguese dominions." It lies wholly to the

north of the Zambesi River and is bounded by Tanganyika Territory and the Belgian Congo on the north; Nyasaland and Portuguese East Africa on the east; Southern Rhodesia and South-West Africa on the south and Portuguese West Africa on the west.

The area of the Territory is estimated at about 287,950 square miles.

A map of Northern Rhodesia and Southern Rhodesia will be found in the section relating to the latter.

Northern Rhodesia is divided into nine Provinces for fiscal and administrative purposes. The seat of government is at Livingstone, situated seven miles from the Victoria Falls. Other important settlements are at Broken Hill, Fort Jameson, Lusaka, Mazabuka, Ndola near which the copper mines of Bwana Mkubwa, Nehanga, Nkana, Roan Antelope, and Mufuilira are situated, Abercorn, Kasama, and Mongu-Lealui in Barotseland.

### History and Constitution.

In 1855, Dr. Livingstone, the great explorer, with whose advent the authentic history of Northern Rhodesia may be said to begin, arrived at the Zambesi near the place where the town bearing his name now stands. The Arab slave trade had begun a few years before Livingstone's arrival and flourished from that time onwards till 1893, twenty years after the death of Livingstone at Chitambo. The Arab influence was at first most felt in the North but soon extended over the whole country. It was not until 1893, by which time a Government post (Abercorn) near the south of Lake Tanganyika, and several mission stations were established, that this trade received any check. Blow after blow was inflicted by the destruction of the Arab settlements on Lake Nyasa, and with the defeat of the Arab chief Mlozi by Sir Harry Johnston at Karonga in 1894, the days of the slave trade in British Central Africa were numbered. The last caravan of slaves in Northern Rhodesia (intercepted on its way to the East coast via Lake Nyasa) was released at Fort Jameson, which had just been established, in 1898. An account of the early operations of the British South Africa Company under the Royal Charter of Incorporation of 1889 will be found under the section relating to Southern Rhodesia. Prior to 1911 the territory now called Northern Rhodesia consisted of two separate territories (a) Barotseland-North-Western Rhodesia and (b) North-Eastern Rhodesia. On the 4th May of that year these two territories were amalgamated under the title of Northern Rhodesia. Mr. (now Sir) Lawrence Wallace was appointed the first Administrator of the combined territory, and continued in office until 1921.

Several engagements took place during the Great War with forces from German East Africa, and on the 2nd May, 1916, General Northey ordered a general advance into German East Africa of the troops under his command, and by July all enemy territory adjacent to the Northern Rhodesia border had been cleared of the enemy. Towards the end of October, 1918, the fugitive German force, under Colonel Von Lettow-Vorbecke doubled southwards, and on the 1st November made an unsuccessful attack on the frontier station, Fife. From there they proceeded south-west to Kasama, the advanced base of supplies

for the forces operating on the border. The bulk of the stores had, however, been evacuated on the first news of the enemy's advance. After burning most of the buildings and their remaining contents, Von Lettow marched along the Kasama-Kashitu motor-road, and early on the 13th November his advanced parties opened fire on the British South Africa Company's rubber factory on the Chambeshi River. At this juncture the news of the Armistice was received by the District Commissioner and communicated to Von Lettow, who accepted the position and suspended hostilities.

In March, 1921, Sir Drummond Chaplin, Administrator of Southern Rhodesia, became also Administrator of Northern Rhodesia. He relinquished office on the 20th September, 1923, and was succeeded by Mr. (now Sir Richard) Goode, C.M.G., C.B.E., as Acting Administrator in Northern Rhodesia.

In July, 1923, a settlement was arranged of the various outstanding questions relating to the British South Africa Company's position in Southern and Northern Rhodesia. As far as Northern Rhodesia was concerned, the effect of the settlement, which was conditional on its acceptance by the shareholders and the approval of Parliament, was that the Company surrendered its buildings and assets used for administrative purposes, and its land and monopoly rights other than mineral rights under its concessions in Northern Rhodesia but retained three freehold areas in the Tanganyika Province of North-Eastern Rhodesia; on the other hand the Company would receive on the 1st October, 1923, a cash payment from His Majesty's Government, and would retain a half interest for 40 years in the net proceeds of the disposal of land in North-Western Rhodesia, such disposal to be in the hands of the administration of the territory; the Company would receive the Crown's recognition of its mineral rights in Northern Rhodesia and a considerable measure of protection for its railway interests; and the Crown would waive its whole claim against the Company in respect of extraordinary military expenditure incurred in the course of the Great War. Subject to the foregoing, the Company would retain the whole of its commercial rights and assets; no further question would be raised as to any liability of the Company in respect of land appropriated for the purpose of its own commercial undertakings or granted to other parties; and the Company would be relieved of the duty of carrying on the administration of Northern Rhodesia. This provisional arrangement was unanimously approved by the shareholders, and on the 26th July, 1923, was approved by the House of Commons.

By Orders in Council dated 20th February, 1924 the office of Governor of Northern Rhodesia was created, an Executive Council constituted and provision made for the constitution of a Legislative Council. The Executive Council is composed of the Governor as President, the Chief Secretary to the Government, the Attorney-General, the Treasurer, the Secretary for Native Affairs, and the Director of Medical and Sanitary Services. The Legislative Council comprises the Governor as President, the members of the Executive Council, *ex officio*, four nominated official members and seven unofficial elected members. On the 1st April, 1924, Mr. H. J. Stanley, C.M.G. (now Sir Herbert Stanley, K.C.M.G.), assumed office as the first Governor and Commander-in-Chief of Northern Rhodesia.

He was succeeded in 1927 by Sir James Crawford Maxwell, K.C.M.G., K.B.E., M.D.

#### *Administrative and Judicial.*

The natives are administered as far as possible through their own chiefs or headmen, who function as Native Authorities and Courts. Administrative and judicial functions are combined in the District officers. The Barotse Province is a native reserve, and is administered under conditions differing in some respects from those obtaining elsewhere. The Paramount Chief of the Barotse has a Khotla or Native Council to assist him.

The law of the Territory is that of England except in so far as it may be inapplicable or may have been or may hereafter be modified by legislation, but no Act of Parliament of the United Kingdom passed subsequent to the 17th August, 1911, is deemed to apply to the Territory unless it has been specifically applied.

District Officers in their capacities as Native Commissioners and Magistrates have a limited civil and criminal jurisdiction. Appeals, both civil and criminal, lie from Native Commissioners' Courts to Provincial Commissioners as Magistrates, and from Magistrates Courts to the High Court.

#### *Population, 1931 Census.*

#### *Education.*

*European.*—For the education of European children there were in 1931 controlled Schools at Livingstone, Choma, Mazabuka, Lusaka, Broken Hill, Bwana Mkubwa, Ndola, Luanshya, Nkana, and Mufulira offering primary Education up to Standard VII, with the additional subjects Latin, French, Algebra in Standards VI and VII and Geometry in Standard VII. There were Schools at Machili, Tara, Kafue, Silver Rest, Chilongolo, Nchanga, Kananashi and Fort Jameson, offering primary education up to Standard V. All these schools were under Government Management. The Convent School, Broken Hill, offering education up to the standard of the Southern Rhodesian Junior Certificate Examination and Chiposa School offering primary education up to Standard V, were controlled schools but under private management.

Boarding accommodation was available for girls at the Beit School, Choma and for boys at the Codrington School, Mazabuka, both under Government management and at the Convent School, Broken Hill and Chiposa School, Fort Jameson, both under private management. There was also open during the year a number of uncontrolled schools with small enrolments and uncertain lives.

*Native.*—The Department of Native Education supervises the educational work of the Missionary Societies working in the Territory, and apportions the grants in aid of the Mission Schools which conform to the Government syllabus and requirements. There is an Advisory Board on Native Education upon which Missions, Settlers and Government Departments are represented. A Government School for the training of "Jeanes" Teachers and Agricultural Demonstrators was opened at Mazabuka in

1930, connected with the Central Research Station. The Barotse National School is also a Government Institution. An elementary school was opened at Ndola during 1931, and it is proposed shortly to open other Government schools at Fort Jameson, Broken Hill, and Kasama.

#### *Climate.*

The climate, except in the low-lying parts, may be described as sub-tropical. Temperatures are moderate during the winter months, viz., from April to August. In low-lying parts the mean temperature varies from 70° to 90° with a maximum of 103° and a minimum of 56°. In the high plateau the mean temperature varies from 55° to 75° with a maximum of 86° and a minimum of 40°. In some parts the maximum temperature has been known to reach the high figure of 120°, whilst minima round about 30° are not infrequent.

As a whole the country may be said to be suitable for white settlement, and Europeans have little to fear from the point of view of health if reasonable precautions are taken.

The average rainfall varies from 50 inches in the northern and high-lying portions of the territory to 25 and 30 inches only in the southern and south-eastern parts. On the average little or no rain falls during the period May to September. The month of October usually brings from about half an inch to two inches. The period, November to March, is the real wet season, during which anything from 70% to 90% of the total annual rainfall occurs. From April onwards the rains diminish again. The average rainfall so far as present investigations shew is 34.18 inches per annum.

#### *Commerce and Industry.*

##### *Agriculture.*

The cattle and ranching industries are gradually attaining a more satisfactory position owing to increased fencing and better cattle-management amongst European-owned stock and to the dipping which has been commenced amongst Native-owned stock in the Reserves.

The consumption in the local mining areas, together with the demands in the mining areas of the Belgian Congo, are so great that the whole of the markets cannot be supplied from the cattle of the Territory. The stocks available are now nearly sufficient to supply the local markets, but those in the Belgian Congo are still supplied to a great extent from Southern Rhodesia and Ngamiland.

The cattle of the Territory are singularly free from major diseases and the mortality is not high upon those farms or ranches where good cattle-mastership is practised.

The dairy industry is small and is not making the progress which the demands of the local markets require. The principal creamery of the Territory has been closed down, and, at the moment, a small local creamery at Lusaka is the only one available. As a result, practically the whole of the butter consumed in the Territory is imported. There can be no doubt of the scope for increased effort in the production of dairy produce.

By far the greater portion of the Territory may be said to be undeveloped agriculturally. The indigenous population is self-supporting in the matter of its food supply, practically the whole of its requirements being produced in the village gardens. There is little or no general trade in food commodities other than in a purely local sense. The staple native cereals are finger-millet (*Eleusine coracana*), Kafir-corn (*Sorghum*), and Maize. The former is produced over huge tracts of the Territory on a system of shifting cultivation whereby one grain crop is grown in

rotation with forest re-growths which may occupy the land for from fifteen years to upwards of sixty years or more in the less favoured places. In this system, the gardens revert to bush after each grain crop. Other native crops are bulrush millet (*Pennisetum typhoidum*), ground-nuts, cassava, sweet-potatoes, and great variety of pumpkins, gourds, and beans. Tobacco is widely cultivated by the natives but on a small scale for private consumption and a small localized trade only. Considerable numbers of cattle are owned by natives in the Territory but these are mainly confined to certain tribes, notably the Marosi, Baila, Matoka, and, to a less extent, the Angoni in North-eastern Rhodesia.

Many parts of the Territory are impassable to animal transports owing to the presence of tse-tse fly.

In the tracts adjoining the railway line considerable areas are given over to farming and ranching operations under European management.

Maize is the chief crop and the demand for this from the mines is steadily increasing. The acreage was increased by 8,900 acres during the season 1929-30 but, owing to the unfavourable season, the total yield showed no material increase on the previous year. The increasing use of tractors in certain districts is having an important bearing on the total yield and where these up-to-date methods, combined with adequate green manuring, are practised the results are most encouraging. Increased competition from the south, evidenced by offers of grain at low prices, has not been without its effect on the local market and prices have tended to decrease during the last few years. During 1931, however, a three years contract with certain of the mining companies was made.

The cultivation of cotton is still confined to experimental work at the Central Research Station and on selected farms. Jassid resistant varieties have been obtained but attacks by other insects such as Stainer and Bollworm makes it impossible, as yet, to state whether this crop is likely to occupy any position amongst the export crops of the Territory. Its value, however, as a rotation crop for maize makes it essential that every avenue should be explored to obtain a variety suitable to local conditions.

The position as regards tobacco is still one of some difficulty. The leaf which can be produced in the Territory has been proved to be of good quality and acceptable to the limited market in the United Kingdom. Extensive increase in the acreage planted to tobacco depends almost entirely on the absorption of leaf in the home markets and there is little evidence yet to show that this is likely to be largely increased in the near future. Every effort is being made to consolidate the position of Northern Rhodesia leaf on the markets by exporting only that leaf which is of good quality.

Most of the wheat produced in the Territory is handled by the Co-operative Society at Lusaka. A trade has sprung up for good Boermeal and practically the whole of the crop is now offered in this form. Considerable extension in wheat production would appear to depend upon adequate grinding and grading facilities which are essential for putting upon the market a flour which can compete with present-day well-established brands.

The Central Research Station, which is situated about three miles from Mazabuka on the railway line in the centre of the farming areas, was opened on the 2nd November, 1929. This station, which is a joint Agricultural and Veterinary one, is staffed and equipped to deal with general agricultural investigations of local economic importance on the one hand, and on the other, with specific researches designed to lead to the control of animal diseases of economic

importance in the Territory. Joint investigations, having as their object the improvement of the general standard of animal husbandry in the Territory, are also proceeding.

Two agricultural sub-stations are in process of formation, one at Fort Jameson and the other at Abercorn. These sub-stations, which will be under the supervision of the District Agricultural Officers now stationed at these points, in addition to the conduct of investigations of purely local significance in their respective districts, will undertake the testing out of local application of results obtained in the more detailed investigations carried out at the Central Station and will constitute centres for the dissemination of agricultural information and instruction in the areas which they serve. It may confidently be expected that the combined work of these Stations will be of considerable aid to agriculture generally in the Territory in which, hitherto, no facilities have existed for accurate investigation of any of the many problems which confront the local agriculturist.

The Jeanes School at Mazabuka, in the vicinity of the Central Research Station, provides agricultural training for selected natives who will subsequently be employed, under technical direction, as agricultural demonstrators in the native areas.

#### Forestry.

More than 60 per cent. of the entire area of Northern Rhodesia is estimated to be more or less covered with trees and shrubs, but the forest growth, chiefly of the Savannah Woodland type, is undergoing considerable modification in composition and area as a result of native shifting cultivation and annual fires. A Forestry Branch has been instituted in recent years and three forestry officers are now carrying out investigations in various parts of the Territory. Reafforestation and protective measures have already been commenced in one forest. It is proposed to maintain certain areas as protection forests for the prevention of soil erosion and the preservation of water supplies in springs and rivers. Further areas are to be dedicated to the production of timber of the more useful indigenous species. The aerial survey at present being carried out over part of the Territory will greatly accelerate the demarcation of Forest Reserves in that region. Experimental plantations of fast growing exotic tree species are being established and private enterprise in this direction has already commenced in the mining areas.

The only commercial timber industry in the Territory at present is that of the Zambesi Saw Mills Ltd., whose operations extend from Livingstone to the Machili River under concessions granted by the Government. This Company is chiefly concerned with the extraction, by light railway, of timbers of the Kalahari sand belt type, including *Mkushi*, *Baikiaea plurijuga*; *Mukwa*, *Pterocarpus angolensis*; *Mwangura*, *Pterocarpus stevensonii*; *Mupumena*, *Entandophragma* sp.; *Mkamba*, *Azelaia quanzensis*; *Mugongo* *Ricinodendron rautanenii*; and *Musheshe*, *Burkea africana*. The Company has contracts for supplying sleepers to the South African and Rhodesian Railways.

#### Land Settlement.

An Agricultural Survey Committee has been appointed for the purpose of reporting upon the unalienated land within 25 miles of the railway suitable for European settlement, and this Committee will advise as to the class of farming or ranching for which the land is suitable. Pending the report of this Committee the Government is not embarking on any extensive programme of land settlement. Privately owned land, however, suitable for mixed farming and ranching is available within easy distance of the railway and the price ranges between 3s. and

15s. per acre depending upon the quality of the soil, water supply, distance from railway, etc. A settler must be in possession of at least 2,000l. capital in order to obtain a grant of a farm from the Government on permit of occupation. Special travelling facilities are given to bona fide farm settlers and their wives and families proceeding to Northern Rhodesia for the first time to take up land, and special local railway rates are in force for their benefit. Applications for land in Northern Rhodesia should be addressed to the Lands Department, Livingstone.

#### Department of Mines.

The outstanding mining developments of the year 1930 were:—

(a) Great improvement in economy and output of zinc of the Broken Hill Mine and the completion of preparations for vanadium recovery.

(b) Excellent strides in the development and equipment of the Roan Antelope Mine towards production. By the end of the year the 5,000 tons a day plant was within six months of completion and underground development became intense; all this work was carried out in an exceptionally safe manner.

(c) Progress was good in the development particularly of the Nkana Mine but also of the Mufulira Mine and of Nchanga West.

(d) Kansanshi Mine development for the actual working of the mine commenced during the year.

(e) Vigorous geological and topographical survey was being carried out by the Rhodesia Congo Border Concession, the Loangwa (Concession Ltd.), Rhodesia Minerals Concession, and the Kafue Copper Development Company.

(f) In the North Charterland Concession the Mining Trust ceased operations at the end of the year.

During 1930 7,510 ozs. of gold, 637 ozs. of silver, 6,269 tons of copper, 8,954 lbs. of mica, 122,577 lbs. of vanadium, 872 tons of manganese ore, 9 tons of iron ore, and 20,063 tons of zinc were produced.

#### Means of Communication.

The Railway was extended from Victoria Falls northward to Broken Hill—374 miles—in 1906, and the extension to the border of Northern Rhodesia, a further 132 miles, where it connects with the railway system of the Congo Belge, was completed in 1909. The Zambesi is crossed by a single span bridge, 660 feet long, 30 feet wide and about 420 feet high. The gauge of the railway is 3 feet 6 inches, the standard gauge of South Africa.

Branch lines have now been constructed from Ndola to Luanshya (Roan Antelope Mine), a distance of 24 miles, and to Nchanga via Nkana, a distance of 84 miles. Another line runs from Mokambo, in the Belgian Congo, to Mufulira, nine miles distant.

Consideration is being given by a private company to the construction of a short connecting link, which has already been surveyed between Kansanshi Mine and the Katanga Railway which will bring that mine into more direct communication with the port of Lobito and, it is estimated, will save about 14 days in shipment of freights to and from Europe.

A survey is also being made of a direct connection to Kansanshi from the Benguela Railway at a point in Portuguese West Africa.

Road communications are being opened up, and dry season motor tracks are now in use from Victoria Falls (via Livingstone, Lusaka and Broken Hill) to Elizabethville in the Congo Belge (790 miles approx.); Broken Hill to Abercorn (604 miles), and thence via Mwenzo, on the border of Northern Rhodesia, to Tanganyika and Kenya Colony; this portion forming part of the Cape to Cairo Route. Lusaka and Fort Jameson are also connected by road, a distance of 375 miles, and a road, leaving the Great North Road

about 45 miles north of Broken Hill, runs through the Mining Areas via Ndola, Nchanga, Solwezi, Kasempa, and Mumbwa to rejoin the Great North Road at Chisamba.

The Zambesi, Kafue, Luapula, and Chambesi Rivers are navigable for small boats for a considerable portion of their course, and where necessary for motor traffic these and other rivers may be crossed by pontoons.

Aerodromes, equipped with re-fuelling masts, and suitable for large aircraft are situated at Livingstone, Broken Hill, Ndola, and Mpika. Aerodromes suitable for small aircraft exist at Mazabuka, Solwezi, Kasempa, Fort Jameson, Mongu, Abercorn, and at each of the large copper mines. Emergency landing grounds are available at Isoka, Chinsali, Serenje, and Mtuga.

Mails to and from England are despatched and received weekly via Bulawayo and Cape Town. Mails from and to Fort Jameson are carried via Beira and Nyasaland. There are 45 post offices in the Territory, 18 of which are money order offices. There is a telegraph line alongside the railway line from Livingstone to the Congo Border and other lines link up Abercorn and Fort Jameson with Nyasaland, Tanganyika Territory, and Southern Rhodesia. The total mileage of telegraphic line through the Territory is 2,499 miles.

" " " in excess of 600l.	" "	3s. 0d.

Before arriving at the chargeable amount the following deductions are allowed:—

(i) Ten per cent. of earned income subject to a maximum deduction of 200l.

(ii) Personal, 300l.

(iii) For wife, 600l.

(iv) For children—90l. for first child, other children 60l. each. Age limit 18.

(v) For Insurance, &c.—One-sixth of chargeable income before making deductions for insurance and deductions under (iii) and (iv) above, and (vi) below.

(vi) For dependant, 50l.

The tax upon the chargeable income of a Company is at the rate of 3s. on every pound thereof.

\*Excl. specie and Govt. stores.

There are branches of the Standard Bank of South Africa at Livingstone and Lusaka and an Agency at Mazabuka and branches of Barotays Bank (Dominion, Colonial and Overseas) at Broken Hill and Fort Jameson, and an Agency at Swana M'Kubwa.

## NYASALAND PROTECTORATE.†

### *Situation and Area.*

The Protectorate comprises the western shore of Lake Nyasa, with the high tablelands separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambezi and the Shiré Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruw (an affluent of the Shiré) on the east, including the mountain systems of the Shiré Highlands and Mlanje.

It is bounded on the north by Tanganyika Territory, on the west by Northern Rhodesia, on the south and east by Portuguese East Africa, and according to the most recent survey has a total area of about 47,949 square miles (land, 37,956).

It is divided into two Provinces, each under the control of a Provincial Commissioner. These provinces are sub-divided into twenty districts, each in charge of a district commissioner, who is also a district magistrate.

The chief town is Blantyre, in the Shiré Highlands, where there are about 700 Europeans. The headquarters of the Government are at Zomba.

### *Population* (31st December, 1930).

Europeans, 1,905; Asiatics, 1,599; Natives, 1,392,742.

\* Exclusive of allowances.

*History.*

In 1859 Dr. Livingstone was placed at the head of a Government Expedition, and reached the southern shore of Lake Nyasa on the 16th of September of that year. His expedition was recalled in 1863, but resulted in the founding, from 1874 to 1881, of various Missionary Societies, notably the Universities Mission, the Livingstonia Mission, and the Church of Scotland Mission.

The Missions were followed by the African Lakes Corporation, and in 1883 Captain Foote, R.N., was appointed first British Consul for the Territories north of the Zambesi, to reside at Blantyre.

Opposition of the new settlers to the slave trade carried on by Arab coastmen and natives alike resulted in a conflict with the Arab traders under Chief Mlozi, settled at the north end of Lake Nyasa, which spread to the Yao chiefs, who were under their influence.

In 1889 public attention was drawn to Nyasaland by the application for a Charter by the British South Africa Company, and the despatch of an imposing expedition under Major Serpa Pinto to the Upper Zambesi and Lower Loangwa. At the same time Mr. D. Rankin announced the discovery of a navigable entrance to the Zambesi by the Chinde mouth.

In the summer of 1889 Mr. Johnston (later Sir H. H. Johnston, G.C.M.G., K.C.B.) arrived at Mozambique as H.B.M. Consul, and proceeded to travel in the interior to inquire into the troubles with the Arabs.

Treaties having been concluded with the remaining Makololo chiefs and with the Yaos round Blantyre, Mr. Johnston proceeded up Lake Nyasa, leaving Mr. John Buchanan, Acting-Consul, in charge, who, after the first encounter between Major Serpa Pinto and Mlauri, a powerful Makololo chief, proclaimed on the 21st September, 1889, a British Protectorate over the Shire districts.

Mr. Johnston, during his progress up the Lake, induced the "Jumbe" or Sultan of Kota-Kota to place his country under British protection, and on arriving at Karonga arranged similar treaties with Mlozi and other Arab and Wahenga chiefs, after which he proceeded to Lake Tanganyika. On his return an agreement was made with Mponda, a Yao chief at the south end of Nyasa.

In 1891, an Anglo-Portuguese convention ratified the work of Mr. Johnston. Mr. Sharpe (later Sir A. Sharpe, K.C.M.G., C.B.), and other pioneers of British Central Africa, and in the following spring a British Protectorate over the countries adjoining Nyasa was proclaimed. The Protectorate of Nyasaland, under the administration of an Imperial Commissioner, was confined to the regions adjoining the Shire and Lake Nyasa; the remainder of the territory under British influence north of the Zambesi being placed, subject to certain conditions, under the British South Africa Company.

In the autumn of 1891 an expedition was successfully conducted by the Commissioner and Captain Maguire against Mohandanjani and Mponda, slave-raiding Yaos at the south end of Nyasa, which resulted in the former being attacked and his followers effectually dispersed, and the latter suing for peace after his town had been shelled. The next few years brought much trouble to the Protectorate in the way of slave-trading and constant raids, but owing to three gun-boats being placed on the Lake for the suppression of the slave trade, further reinforcements of Sikhs arriving from India, and the recruitment of native troops

from the Atonga of West Nyasa, the slave trade was abolished and the peaceful development of the Protectorate secured. In 1893, the name of the Protectorate was changed to "The British Central Africa Protectorate," but the old name "Nyasaland Protectorate" was revived in 1907, by the Order in Council which amended the Constitution.

*Constitution.*

The administration of the Protectorate, control of which was transferred to the Colonial Office from the Foreign Office in March, 1904, was originally conducted by a Commissioner and Consul-General, assisted by the Deputy and Assistant Deputy Commissioner. On transfer to the Colonial Office the post of Consul-General was abolished, and by an Order in Council which came into force in October, 1907, the Commissioner became a Governor and Commander-in-Chief. By the same Order Executive and Legislative Councils were established.

The Laws consist of local Ordinances duly enacted with such British Acts as are of general application. Justice is administered in the High Court, which has jurisdiction in Civil and Criminal matters, and also as a Court of Admiralty. Subordinate Courts are held by Magistrates and Assistant Magistrates in the various districts. Appeals from decision of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa sitting at Nairobi.

*Climate and Products.*

There are two distinct climates in the Protectorate, one of the Shire Valley and Lake Nyasa, the other of the Shire Highlands and the rest of the country which lies at a high elevation. The first has a rainfall averaging 35 inches yearly, and a temperature which touches 120° in the summer. The second has a pleasant climate, the thermometer ranging from 96° or 97° in the summer to a minimum of about 40° in the winter. The rainfall in the Shire Highlands varies from about 40 to 100 inches.

*Industry and Customs.*

The chief products of the Protectorate are tobacco, cotton, tea, chillies, rubber, rice, maize, wheat, and fibre.

The export of cotton for the year ended 31st December, 1930, was 3,798,338 lbs.: of tobacco 14,073,247 lbs. 99·2 per cent. of the export trade in 1930 was to the United Kingdom and British Colonies.

The chief imports are provisions, cotton goods, motor vehicles, earthenware, hardware, wines and spirits, salt, silk and woollen goods, agricultural machinery, arms and ammunition. 55 per cent. of the imports in 1930 came from the United Kingdom and British Colonies.

The Customs revenue is derived principally from an import duty of 17% on the cost at the seaport of discharge, i.e., Beira. No export duties are levied.

Nyasaland being wholly within the regions covered by the Congo Basin Treaties, 1885, and the Convention of St. Germain-en-Laye, 1919, may not grant preferential rates of duty. Its Customs Tariff, therefore, applies equally to imports from all nations.

Customs revenue collected during 1930 amounted to 148,531l. as against 141,229l. in the previous year.

The following table shows the origin of direct consignments of domestic trade imports during the last five years:—

Year.	United Kingdom.		British Possessions.		Foreign Countries.	
	£	%	£	%	£	%
1926 ...	353,394	44·66	163,923	20·73	273,797	34·61
1927 ...	410,659	43·76	211,065	22·49	316,737	33·75
1928 ...	343,383	39·49	175,567	20·19	350,523	40·32
1929 ...	269,703	36·28	185,808	22·29	368,029	41·42
1930 ...	258,957	34·79	147,642	19·83	337,773	45·38

The total exports of the Protectorate during 1930 weighed 12,436 tons and were valued at 691,908*l.* Of the domestic products exported 97·29 per cent. of the weight and 99·2 per cent. of the value were consigned to the United Kingdom.

#### Means of Communication.

A railway from Port Herald, on the Lower Shire, to Blantyre, 113 miles, via Chiromo and Luchenza, was built by the Shire Highlands Railway, under an agreement made in 1902 with the Nyasaland Government under which a subsidy was paid to the Railway. Subsequently the Central African Railway Co., Ltd., constructed a section, opened in 1915, from Chindio on the Zambesi to Port Herald, 61 miles, of which the first 45 are on Portuguese territory. Both lines are of 3ft. 6in. gauge. A railway of the same gauge was opened for traffic in April, 1922, by the Trans-Zambesia Railway Co., Ltd., which runs from Murraça on the south bank of the Zambesia to Dondo, the junction with the Mashonaland trunk line, about 20 miles from Beira (165 miles, all in Portuguese territory). A bridge across the Zambesi to connect the Trans-Zambesia Railway with the Central Africa Railway is now under construction, as is also an extension of the railway system from Blantyre to Lake Nyasa. There are eight British steamers plying on the Zambesi and Shire between Chinde and the railway terminus. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,418. There are eight steamers on Lake Nyasa.

Mails to and from England, are despatched every week *via* Cape Town and Beira.

#### Telegraphs.

In 1925 the Government purchased the assets of the African Trans-continental Telegraph Company. The line is in use from Ujiji on Lake Tanganyika southwards through the Protectorate, *via* Blantyre and Tete, to Umtali in Southern Rhodesia and thence to Cape Town and England. The total mileage through the Protectorate is 787 miles. Telegrams may also be transmitted over the railway line and the Portuguese line between Chinde and Tete. Since Government assumed control of the telegraph service extensions have been constructed in the Central Province providing 140 additional miles of line. The telephone service now links up Zomba, Blantyre, Limbe, Cholo, and Luchenza.

#### Education.

An educational policy has been prepared by the Director of Education. Provision is made for the education of European children; native education in the hands of the missionary societies is controlled by the Government.

A grant of 7,616*l.* was made by the Government in 1930.

#### Currency and Banking.

By a Proclamation of February, 1894, the legal currency is declared to be English sterling.

Banking operations in the Protectorate are governed by "The Banking Ordinance, 1902."

Two Banks have branches at Blantyre, the principal trading centre of the country, *viz.*, The Standard Bank of South Africa, Limited, and Barclays Bank (Dominion, Colonial and Overseas); the former has a branch at Zomba, and agencies at other centres.

There is a Post Office Savings Bank.

## PALESTINE.

Palestine is bounded on the north by the French sphere of Syria and Lebanon, on the west by the Mediterranean, and on the south by Egyptian and Hejaz territory, the boundary running from just west of Rafa on the Mediterranean to just east of Taba at the end of the Gulf of Akaba, and then north-east. On the east, the boundary is defined as a line drawn from a point two miles west of the town of Akaba in the Gulf of Akaba up the centre of the Wady Araba, the Dead Sea and the River Jordan to the junction of the latter with the River Yarmuk, thence up the centre of the River Yarmuk to the Syrian frontier.

The boundary on the north was settled by the Anglo-French Convention of 23rd December, 1920. From the Mediterranean Sea, just south of Ras-el-Nakura, and about half way between Tyre and Acre, it runs eastwards and northwards to Metulla (British), and across the Upper Jordan Valley to Banias (French). It then runs south-eastwards to Skek, and thence down the rivers Jeraba and Massadiye to the north-eastern shore of the Lake of Tiberias and across the Lake to Samakh at its southern extremity.

The detailed delimitation is set out in a Parliamentary Paper (Cmd. 1910), published in 1923.

Palestine comprises four zones of country. On the west, along the shores of the Mediterranean, which are deficient here in good natural harbours, is a low plain, which varies from 15 to 20 miles in width at Gaza to about two miles at Acre, but which, at one place, the plain of Esdraelon, stretches for a considerable distance into the interior, and separates the high lands of Galilee from

those of Samaria and Judea. From the coastal plain, the country rises into a plateau, intersected by deep valleys, which drops steeply to the east to the third zone, which is formed by the great depression down which the River Jordan runs to the Dead Sea, and which is prolonged for another 100 miles to the Red Sea as the Wadi Araba. This depression reaches a depth below sea level of 2,600 feet in the deepest portion of the Dead Sea, the surface of which is about 1,300 feet below sea level, and which is 46 miles long with an average breadth of 8½ miles.

The climate of Palestine varies with the altitude: the coastal region is sub-tropical and humid; the elevated hilly zone is drier and more temperate while the Jordan Valley is hot and the rainfall slight. The summer months are almost rainless. January and February are the wettest months, and the main rainfall occurs between November and April.

Water for domestic use is obtained in towns mostly from rock-out cisterns in which rain water is collected, and in rural districts also from wells. Jerusalem has a piped water supply, pumped partly from a spring about 10 miles south of the town by an installation made by the Military Authorities soon after its occupation, partly from Solomon's Pools, near Bethlehem, by an installation made by the Civil Administration, and partly from the springs of Ain Farah and 'Ain Fawar by works constructed for the Municipality in 1926.

Considerable progress has been made towards the eradication of malaria, formerly so prevalent, by Government distribution of quinine in villages, oiling of wells and cisterns, provision of pumps, and drainage of swamps. The Government has been assisted in anti-malarial work by research and survey units attached to the Department of Health by the Joint Distribution Committee of America and the Rockefeller Institute of America.

The country is relatively free from epidemic disease.

#### *Government.*

Under Turkish rule, part of Palestine was in the Vilayet of Beirut and part in the independent Sanjak of Jerusalem. After its conquest in 1917-1918 by the British forces, the country remained under British Military Administration until July 1st, 1920, when Sir Herbert Samuel was appointed High Commissioner, and a Civil Administration set up.

By the Treaty of Peace, signed at Lausanne on 24th July, 1923, Turkey renounced all rights over Palestine. The Principal Allied Powers had selected His Britannic Majesty as Mandatory at the Conference at San Remo on 25th April, 1920. The terms of the Mandate were approved by the Council of the League of Nations on the 24th July, 1922, and the Mandate came into force on September 29th, 1923. The Mandatory is responsible for carrying into effect the terms of the Balfour Declaration of November 2nd, 1917, viz.:—"His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish Communities in Palestine, or the rights and political status enjoyed by Jews in any other country."

### *Constitution.*

On 1st September, 1922, a new constitution was promulgated to replace the existing arrangements. It provided for the appointment of a High Commissioner and Commander-in-Chief and an Executive Council.

Under this Constitution a Legislative Council is provided for and is given authority to pass such Ordinances as may be necessary for the peace, order and good government of Palestine, provided (1) that no Ordinance shall restrict complete freedom of conscience and the free exercise of all forms of worship, save in so far as is required for the maintenance of public order and morals, or shall tend to discriminate in any way between the inhabitants of Palestine on the ground of race, religion or language; (2) that no Ordinance shall take effect until either the High Commissioner or His Majesty has assented thereto; (3) that the High Commissioner may reserve any Ordinance for the signification of His Majesty's pleasure, and shall so reserve any Ordinance which concerns matters dealt with specifically by the provisions of the Mandate, and (4) that His Majesty may disallow any Ordinance to which the High Commissioner may have assented within one year of the date of the High Commissioner's assent.

The Legislative Council is to consist, in addition to the High Commissioner, of 22 members, of whom 10 will be official members and 12 unofficial members. All the unofficial members are to be elected, not less than two of them being Christians and two Jews, and the rest Moslems.

The elected members are to be chosen by primary and secondary elections. Every male Palestinian citizen over 25 years of age is entitled to vote at the primary election, unless he has lost his civil rights or claims to be a foreign subject, or under foreign protection, or is otherwise disqualified. The number of secondary electors to be elected in each electoral area is determined on the basis that every 200 primary electors elect one secondary elector. If any village or quarter has between 150 and 200 primary electors, it is entitled to vote for one secondary elector; if it has between 350 and 400 primary electors it is entitled to vote for two secondary electors, and so on.

Any person may be elected as a secondary elector provided he is on the register of primary electors for the district.

The secondary electors are then to be formed into twelve electoral colleges according to the religious community to which they belong; the number of colleges to be allotted to each religious community being proportioned to the number of secondary electors belonging to the several communities; and each electoral college elects one member of the Council.

Owing to the refusal of the Arabs to take part in the elections, no Legislative Council has yet been elected; and, in order to secure the enactment of legislation until such time as the Legislative Council can be elected according to the provisions of the Constitution, the High Commissioner, under the Palestine (Amendment) Order in Council, 1923, has formed an Advisory Council composed of a number of the chief officials.

English, Arabic and Hebrew are the official languages of the country.

Regulations were made by the High Commissioner in 1927 for the organisation of the Jewish population of Palestine as a religious community

and its recognition as such by the Government. The Jewish community thus enjoys autonomy for its internal affairs, religious, cultural and communal, and has power to levy rates on its members. The organs of the community are a Chief Rabbinate and local rabbinical offices, an Elected Assembly, a General Council, which is elected by the Assembly and which represents the community in its dealings with the Government, and local committees. A number of Jews have opted out of this community.

The British Government and Palestine Administration recognise the Jewish Agency as the representative body of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home.

The Supreme Moslem Council was constituted by order of the High Commissioner in December, 1921, to control and manage Moslem Awqaf and affairs in Palestine; it consists of a President (Rais-ul-Ulema), and four members elected by secondary electors, who again are elected by the inhabitants of the Liwa of Jerusalem (two members) and the Liwas of Nablus and Acre. It nominates, for approval by Government, the officers of the Sharia Courts, and controls the appointments and dismissals of Sharia and Waqf officers. It has established an orphanage in Jerusalem and a technical office to deal with the repair of sacred buildings, and has carried out extensive tree planting on Waqf land and in Moslem cemeteries.

A Committee appointed in 1926 to make proposals for the revision of the Regulations of the Supreme Moslem Council reported in 1929.

The Committee made recommendations of far-reaching import for the creation of a Central Moslem Assembly and a Supreme Moslem Council separately elected.

### *Area and Population.*

The country is, at present, divided into three districts—the Jerusalem, Northern and Southern Districts, each administered by a District Commissioner.

Palestine, as administered by the Palestine Government, is nearly 10,000 square miles in extent, and includes only that part of historic Palestine which lies to the west of the Jordan. The population of this territory taken by census on November 18th, 1931, was 1,036,154, of which number 387,525 were living in 23 towns and large villages.

There are 759,952 Moslems, 175,006 Jews, 90,607 Christians. The remaining 9,589 include Druzes, Samaritans and Bahais.

The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1517, surrendered to General Allenby on December 9th, 1917. Its population in 1931 was 90,407. The Church of the Holy Sepulchre is visited annually by large numbers of Christian pilgrims, principally of the Orthodox and Coptic Churches. The site of Solomon's Temple is occupied by the Dome of the Rock, which contains a relic of Muhammad and the reputed sacrificial stone of Abraham. Bethlehem, the scene of Christ's Nativity and the birthplace of King David, is five miles south of Jerusalem. The Church of the Nativity, at the east end of the present village, is said to be the oldest Christian church in existence.

The population figures for the other principal towns are: Jaffa, 51,366; Tel Aviv, 46,166; Haifa, 50,533; Gaza, 17,069; Nazareth, 8,719;

Nablus, 17,171; Safad, 9,446; Tiberias, 8,633; Hebron, 17,532; Ramle, 10,417; Bethlehem, 6,817; Lydda, 11,249; Acre, 7,893.

The Jewish settlements number 108. Their total population is now about 46,000. More than thirty of them are built on land belonging to the Jewish National Fund, which was established by the Zionist Organization (the predecessor of the Jewish Agency) for the purpose of acquiring land to remain the property of the Jewish people, and was founded with the assistance of Keren Hayesod, also created by the Zionist Organisation. The American Zion Commonwealth owns about 100,000 dunums of land, mostly in the Valley of Esdraelon, on which six settlements are established. The Palestine Land Development Company, also organised by the Zionist Organization, owns lands on the Carmel, on the Kishon, at Jaffa, Jerusalem, etc. About 30 settlements were founded by Baron Edmond de Rothschild, and are administered by the Palestine Jewish Colonization Association. The total area of the Jewish settlements exceeds 1,200,000 dunums (4½ dunums equals 1 acre).

The local affairs of the smaller Jewish settlements are controlled by Vaads or Councils elected by the male and female residents who own registered holdings or pay taxes.

The larger villages, Arab and Jewish, are, for internal order and rates, administered by Local Councils, constituted under Ordinance, which exercise modified municipal powers.

#### *Education.*

The approximate number of children between the ages of 3 and 18 years in Palestine is as follows:—Moslem, 175,000; Jews, 48,000; Christian, 25,000. The schools maintained by the Government number 308, and contain 22,828 scholars; the great majority of whom are Moslems. In the Government Colleges for Teachers there are 82 men and 63 women students. Technical education is being carried out systematically in the villages and in some of the towns. A Law School exists in Jerusalem, in which lectures are given in the three official languages by Judges and Government officers learned in law and by practising advocates.

The Christian and Jewish Communities provide, the former to a very large extent, and the latter almost entirely, for the education of their own children.

The Jewish Agency through the Department of Education attached to its local Executive, and other Jewish bodies control 330 educational institutions in Palestine, attended by about 31,000 pupils. These institutions include Secondary Schools in Jerusalem, Tel Aviv and Haifa, Teachers' Training Colleges (General, Orthodox, Women's and Kindergarten), Schools of Music in Jerusalem and Jaffa, an Agricultural School, an Arts and Crafts Institute (Bezalel), Evening Classes, and a Technical College at Haifa. A Hebrew University has also been established in Jerusalem with Institutes of Chemistry, Biology and Jewish studies. It has 250 students. The Christian schools maintained by various foreign and religious bodies number 149, including several secondary schools and two higher colleges; some 15,000 pupils are on their rolls.

There are also 94 private Moslem schools, mainly maintained by local committees; these provide for about 5,600 children of whom 812 are girls. Two of these schools are secondary.

Most non-government schools receive a capital grant-in-aid from the Department of Education, conditional on the acceptance of a certain measure of Government supervision and inspection. A block grant of £P.20,000 a year is made to the Jewish Agency for its schools.

#### *Justice.*

The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and Waqfs (charitable endowments), and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate's Court in every sub-district and, in the larger towns, such as Jerusalem, Jaffa and Haifa two such courts. The Magistrate is in every case a Palestinian and has jurisdiction in first instance in minor criminal cases for which the punishment is not more than one year's imprisonment, and in civil cases where the value of the subject-matter does not exceed £P.100. He has also jurisdiction in actions for the recovery of the possession of land.

There are four District Courts, each composed of a British President and two Palestinian judges. They serve respectively the sub-districts of Jerusalem, Hebron and Beersheba; Jaffa and Gaza; Nablus, Jenin, Tulkarem, and Nazareth; and Haifa, Acre, Tiberias and Safad. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death and in all civil cases outside the jurisdiction of a Magistrate. It also hears appeals from the decisions of Magistrates both in civil and in criminal cases, except in cases for the recovery of the possession of land. Crimes punishable with death are tried by a Court of Criminal Assize composed of the Chief Justice or senior Puisne Judge of the Supreme Court sitting with the District Court.

In the Southern District, in addition to the District Court, there are two Land Courts, each composed of a British President and a Palestinian judge, which hear all cases in which the ownership of land is in issue. In the other District such cases are tried by the District Court.

The highest Court in Palestine is the Supreme Court, which is composed of a British Chief Justice and one other British judge and four Palestinian judges. The Court sits in two forms:

(1) As a Court of Appeal, in which capacity it has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, the Land Courts and the Court of Criminal Assize;

(2) As a High Court of Justice, in which capacity it hears applications of the nature of *habeas corpus* and *mandamus* proceedings.

The Court of Appeal is composed normally of three judges, while the High Court may sit with two judges. In either case a British judge presides. An appeal lies from the Supreme Court in civil cases to the Judicial Committee of the Privy Council where the value of the suit exceeds £500.

A bench of honorary magistrates has been established in Jerusalem, Jaffa, and other towns, who try contraventions for which the maximum penalty does not exceed £P. 5 fine and 15 days' imprisonment. In addition to the bench of honorary magistrates, a stipendiary magistrate has been appointed to try such contraventions in the Municipal Areas of Jerusalem and Jaffa.

Special arrangements exist in the Beersheba sub-district, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. The District Court of Jerusalem visits Beersheba every month to hear appeals from the local courts and to try more serious criminal cases.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Kadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Jews, and jurisdiction by consent in other matters. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Latin and Orthodox) have similar jurisdiction to that of the Jewish Courts.

Special provisions exist with regard to the trial of foreigners. The general effect of these rules is that where a foreign subject is charged with an offence other than a petty offence, he may claim to be tried by a British magistrate or by a court containing a majority of British judges. In the Court of Appeal he can claim a majority of British judges and in matters of personal status that the action be heard by the British President.

The Police Establishment in December, 1930, was 152 officers (including 61 British officers) and 2,368 other ranks (including 631 British constables).

1,172 heinous crimes were reported in 1930 (1,276 in 1929) and seven death sentences were carried out.

There are Central Prisons in Jerusalem and Acre for long term prisoners. Prisoners serving shorter sentences are mainly employed, in Gaol Labour Companies of 250 prisoners each, on public works.

#### *Industry, Trade and Customs*

Modern methods are making headway and hold out hopes of development and progress. The country is generally fertile, and cereals, wine, oranges, olives and various fruits are produced, while sheep and goats thrive both in the lowlands and in the mountains.

For the most part the crops are raised without irrigation, except where springs exist, and on the banks of the Auja, in the district of Jaffa. There are generally two cereal crops each year, harvested in May and September.

The yield of crops in 1929 was :—

Wheat	...	...	85,064 metric tons.
Barley	...	...	51,972 " "
Durra	...	...	31,178 " "
Lentils	...	...	1,397 " "
Olive Oil	...	...	3,178 " "

In 1930, there were in Palestine 252,773 sheep, 440,132 goats, 25,341 camels, 5,247 buffaloes.

Limestone abounds all over the country; sandstone abounds on the coast; gypsum of good quality is found at Mount Gipsia near Menahemia (Galilee). Rock salt abounds in the Jordan Valley and on the shores of the Dead Sea, where sulphur is also obtainable. Mineral oil is said to be found, but work has not yet commenced. The Dead Sea contains sodium chloride, chloride of potash, magnesium chloride and bromides. Experimental work is now in progress under a concession granted for winning and marketing these

salts. There are medicinal hot springs in the Jordan Valley, the most important being at Tiberias.

The principal industries of export importance are those of wine-making, especially in the Jewish Colonies, Zikhron-Ya'akov, Rishon-le-Tsion, and Petah-Tigva; soap-boiling in Nablus and Haifa; olive oil in Nablus, Acre, and the district round Jaffa; and tanning. An export trade with Syria in cement and textiles is being developed.

Durrah, lentils, sesame and edible oils are also exported in considerable quantity.

Oranges, grown chiefly in the Jaffa District, are exported to Egypt and Europe, the total quantity exported during 1930 being valued at £P. 857,233.

Melons are exported mainly to Egypt and Syria.

The principal imports are rice, sesame, flour, sugar, petroleum products, textiles, building materials, automobiles, industrial machinery.

A Woods and Forests Ordinance has been promulgated and also various Forestry Regulations, supplementary to the Ordinance, for the protection, management and control of existing forests. The country had been terribly deforested during the Ottoman régime.

Twenty-one Government nurseries are conducted for the raising of forest trees and fruit stock. Planting, commenced in 1920 at each centre where nurseries exist, is being considerably extended. Special attention is being given to the reclamation of sand dunes and the planting of roadsides.

Nearly 200,000 acres of state forests have been reserved. Approximately two million trees were planted in 1930.

There are a considerable number of small factories and industries, including flour mills, soap, brick and tile, knitted goods, textile, artificial teeth, furniture, match and cigarette factories, oil mills and distilleries. One flour mill produces 1,500 tons of flour monthly. There is a brick factory with an annual output of 15,000,000 bricks and tiles, a cigarette factory producing annually one hundred million cigarettes, and an oil factory with an annual capacity of 10,000 tons of refined oil, and a cement factory capable of producing 40,000 tons annually.

The annual production of tobacco, in fourteen factories, is 607,000 kilograms.

The Palestine and Jaffa Electric Corporations, Ltd., supply electric light and power to Haifa and Tiberias, and to the Jaffa district. The Jerusalem Electric and Public Service Corporation supply them in Jerusalem and its environs, including Bethlehem.

The Customs Tariff, which is non-differential, is partly on a specific and partly on an *ad valorem* basis, the total imports of the country being about equally divided in this respect. The principal articles on which specific duties are levied are Benzine and Kerosene, Sugar, Rice, Coffee, Wheat flour, leaf Tobacco, Cigarettes, Wood and timber for building and Rubber tyres and tubes. *Ad valorem* duties are levied on silk (15%) and woollen (12%) goods and on motor cars (15%).

The total of the import duties collected during 1930 was £P991,560.

Of the imports 16.66 % came from the United Kingdom, 1.71 % from other parts of the British Empire, 22.78 % from Egypt, 14.82 % from Syria, and 10.91 % from Germany.

Exports to the United Kingdom constituted 37.07 % of the total exports in 1930. Exports to other parts of the British Empire formed 2.25 %, to Egypt 20.85 %, to Syria 11.09 % and to Germany 10.72 %.

*Shipping and Communications.*

The chief ports of Palestine are Jaffa and Haifa. The new harbour at Haifa is under construction. Acre and Gaza are also ports of entry, but their trade is small and is carried out mainly by sailing vessels.

The following are the principal shipping lines which call at Jaffa and Haifa:—

Khedivial Mail, Lloyd Triestino, Servizio Marittimo, Messageries Maritimes, Fabre, Prince, Moss, American Export, Deutsche Levante. Tourist steamers of various lines call at Haifa during February, March and April.

In 1930, 1,228 steamers, totalling 2,751,159 tons, and 2,186 sailing vessels, totalling 49,500 tons called at Palestine ports.

Palestine possesses no shipping of its own, other than small sailing vessels and power launches.

Postal despatches are exchanged daily (in some cases twice daily) between all principal towns. There is also a daily exchange of despatches with Egypt and Syria. Direct mails for Great Britain are despatched thrice weekly but supplementary mails are forwarded to Egypt at other than the regular mail days for transmission by intermediate steamers.

Imperial Airways have established aerodromes at Gaza and Samakh (near Tiberias) and a flying boat station at Tiberias. The two latter are used in connection with the weekly service to India. There is also a regular service from Samakh to Cairo.

In 1930 there were conveyed 11,763,770 letters, 932,060 postcards, 6,194,900 printed communications and samples, 168,526 parcels, 264,378 telegrams.

There is a weekly Overland and Desert Mail service (letters and parcels) with Iraq and Persia and a weekly Air Mail service (letters and newspapers) with Iraq.

All the principal towns are connected by telegraph and telephone. There is direct telegraph communication with Egypt and Syria and a trunk telephone service with Egypt. Total length of main telegraph and telephone lines, 13,152 kilometres; local lines 13,807 kilometres. Number of telephone subscribers 2,821; instruments in use 4,336.

The total length of the Palestine Railways, is approximately 750 miles, including branch lines and sidings, sub-divided in the following sections:—

**Standard Gauge (4' 8½").**

	Miles.
Kantara-Haifa .....	250½
Lydda Section, Jaffa-Jerusalem .....	54½
Safriah-Sarafand .....	2½
Kafr Jinit-Beit Nabala Quarry Siding .....	2½

**Narrow Gauge (3' 6"). Hejaz Railway.**

Haifa-Samakh .....	54½
Nasab South-Kalaf-el-Madawara .....	232½
Acre Junction-Acre .....	11
Afula-Nablus-Tulkarem .....	61

732

The Kantara-Rafa Section, known as the "Sinai Military Railway" (125 miles) is operated by the Palestine Railways on behalf of the Air Ministry.

There is through communication with Egypt, and trains connect at Kantara West daily with Cairo, Alexandria, Port Said, and Suez and other parts of Egypt, railway vehicles being sent across the canal by means of a truck transporter.

Sentinel-Cammell steam rail cars are in use on the Haifa-Gaza-Jaffa; Haifa-Acre; and Haifa-Samakh sections.

East of Haifa the Palestine Railways system terminates at El Hamme, and the Section El Hamme-Deraa (junction of the Hejaz Railway to Medina) is operated by the Hejaz Railway, which in turn is controlled by the French Government.

There are 575 miles of metalled roads in Palestine extensively used by motor transport, and in addition, many hundreds of miles of tracks passable for wheeled traffic of all kinds during dry weather.

*Banking and Currency.*

The most important Bank in Palestine is Barclays Bank (Dominion, Colonial and Overseas), with branches at Jerusalem, Jaffa, Tel Aviv, Haifa, Nazareth, Acre and Nablus. The Anglo-Palestine Bank has its head office in Jerusalem, with branches in Jaffa, Tel Aviv, Haifa, Tiberias, and Safad. In addition, there are branches in Jerusalem of the Ottoman Bank (also in Haifa, Jaffa, Nablus and Amman, and sub-offices at Bethlehem and Ramallah), and the Banco di Roma (also in Jaffa and Haifa). There is a Workers' Bank at Jaffa, and banks have been established for granting building loans to co-operative societies.

A Currency Board was appointed in London in 1926 in order to introduce and control a Palestine currency based on the pound sterling; and the new currency was issued on the 1st November, 1927, under the authority of an Order of His Majesty in Council dated the 7th of February, 1927.

The standard of currency is the Palestine Pound divided into 1,000 mils. The Palestine Currency Order provides for a gold coin of one Palestine Pound containing 123·27447 grains of standard gold (the equivalent of the English Pound); it is not intended at present to introduce gold coins. The Currency Board has issued silver coins of 100 and 50 mils, nickel bronze coins of 20, 10 and 5 mils, bronze coins of 2 and 1 mils, and Currency notes of £P. 100, £P. 50, £P. 10, £P. 5, £P. 1, and mils 500. The Currency notes are legal tender for the amounts expressed therein. Silver coins are legal tender for the payment of £P. 2, nickel bronze coins of 20 any 10 mils are legal tender for the payment of and amount not exceeding 200 mils, and coins of lower denomination are legal tender for an amount not exceeding 100 mils. The amount of Palestine currency in circulation at the 31st October, 1931, was: coins £P. 325,948; notes £P 2,033,716.

The metric system is followed by the Government and local authorities, but the use of local weights and measures is still permitted for the general public.

*Antiquities.*

Excavation, conservation and disposal of antiquities are controlled by the Department of Antiquities under an Ordinance designed to carry out the provisions of the Mandate in this respect. Twelve scientific archaeological expeditions were at work in 1930. The Palestine Archaeological Museum, built with funds made available by Mr. John D. Rockefeller, Jr., is nearing completion at Jerusalem.

For further information on all the above subjects, see the "Handbook of Palestine," (Luke, H. C. and Keith-Roach, E.), published in 1930 by Macmillan & Co., and issued under the authority of the Government of Palestine.

## ST. HELENA.

*Situation, Area, &c.*

St. Helena is an island in the South Atlantic Ocean, 700 miles S.E. of Ascension, and 1,200 miles from the coast of Africa, in 15° 55' S. lat., and 5° 42' W. long. It is 10½ miles long and 6½ broad, covering an area of 47 square miles, or about 30,000 acres (a little larger than Jersey). The distance from Southampton is 4,477 miles, and from Capetown 1,695 miles. The usual mail passage is, from England, 17 days, and from Capetown, 6 days.

A census taken in April, 1931, showed a population of 3,995, of whom 48 were members of the Garrison.

The capital and only town is Jamestown, on the N.W. of the island, with a population in April, 1931, of 1,381. The climate is mild, and varies little, the thermometer in Jamestown ranging in summer between 68° and 84°, and in winter between 57° and 70°. The country is 10° colder. The rainfall for the years 1925, 1926, 1927, 1928, 1929 and 1930 was 35·13, 30·16, 31·57, 23·31, 30 and 30·30 inches respectively. The island is very healthy. The death-rate per 1,000 inhabitants was for 1925, 12·16; for 1926, 17·97; for 1927, 16·78; for 1928, 18·17; for 1929, 10·4; and for 1930 10·24; and the birth-rate per 1,000 inhabitants for 1929, 31·46; and for 1930, 30·98.

*History.*

St. Helena, then uninhabited and well wooded, was discovered by the Portuguese Commander Juan de Nova Castella, on St. Helena's day, May 21st, 1502. The Portuguese contrived to keep secret the situation of the island from other European nations until 1588, when it was visited by Captain Cavendish, on his return from a voyage round the world. They built a church there, but made no permanent settlement. The Dutch held it from 1645 to 1650, when they abandoned it. It was taken possession of by the East India Company in 1651, and a charter for its administration was granted in 1661. In 1665 it was seized by the Dutch, who were, however, expelled the same year. Again, in January, 1673, they seized it, to be driven out finally in May, by Captain Munden, of the English Navy. A new charter was issued by Charles II. to the East India Company for its possession in December, 1673, and it remained under that Company, with the exception of the period of Napoleon's imprisonment there, till 22nd April, 1834, when it was brought under the direct government of the Crown by an Act of Parliament of 1833.

*Education and Local Government.*

The Government maintain 3 schools, having 284 scholars. There are also 5 endowed and private day schools, two of which are aided by Government, having 306 scholars. School attendance is compulsory under Ordinance No. 11 of 1903, and fees of 1d. a week per child are charged.

The only local authority is the Poor Relief Board, the revenue and expenditure of which for 1928 was 916*l.* and 916*l.*, and for the year 1929 was 963*l.* and 943*l.*, and for the year 1930 was 901*l.* and 842*l.* respectively.

*Industry.*

St. Helena is well watered by clear springs, which are abundant. It is situated in the heart of the South Atlantic trade wind, blowing from the

S.E. for about 330 days in the year, and in the direct track of vessels homeward bound from the East round the Cape of Good Hope. Previous to the opening of the Red Sea route it was a port of call for a vast quantity of shipping and passengers to and from India and other parts of the East, and in consequence of its importance in connection with the Eastern trade, large establishments were maintained, both civil and military. For many years it was also a *dépôt* for liberated Africans landed from slavers captured by the West Coast squadron. As early as 1818 a law was passed that all future children born in the Island should be free.

Beyond the supply of the passing shipping it has never produced any article of export properly so called, except flax fibre (*phormium tenax*). The company which started this industry failed from bad management in transporting the green leaves to town for treatment. For every 100 tons so transported at a heavy cost the yield was only about three tons of fibre, though, under present conditions of working, ten tons of phormium leaves give one ton of fibre and a quarter ton of tow. The industry was re-started with the help of a grant from the Home Exchequer. The Government Mill opened in 1907, but was closed down in May, 1910, on exhaustion of millable leaf. It was re-opened on 13th November, 1911, and still continues to run; but Government has handed over control to a Limited Liability Company. This company went into voluntary liquidation in 1930 and the Mill is now on lease to Messrs. Solomon & Co., of this Colony.

There are now nine mills operating in the Island, the amount of fibre and tow exported in 1930 being 540 and 342 tons respectively. A rope and twine industry was also established in 1925, the amount of rope and twine exported during 1930 was 52 tons.

In 1928 the land under cultivation of Flax was estimated at 2,000 acres.

A lace-making industry was established in August, 1907, with the help of a grant from Imperial funds.

The number of ships calling at Jamestown (now a free port) for supplies, including steamers and ships of war was 40 in 1930. It is a port of registry.

The chief industries are phormium fibre, lace-making, aloe and bead work, fishing and agriculture, the main arable crop being phormium *tenax*.

The Government savings bank was established in 1865 (the amount standing to the credit of depositors on 31st December, 1930, was 17,135*l.*), and the Government issues bills of exchange on England at par.

There are excellent facilities for the supply of coal and water to ships.

*Means of Communication.*

Steamers arrive from England at regular intervals of 4 weeks, and proceed to the Cape and Natal, steamers arrive from thence at the same interval and proceed to England. The interval between the arrival and departure of the mails is 6 days. The rate of postage to the U.K., India, and British Possessions is 2*d.* for the first oz. and 1½*d.* for each additional ounce; to other parts of the world 3*d.* for the first oz. and 1½*d.* for each additional ounce. There is no internal post, but there are 41 miles of telegraph, constructed by the Colonial Government and the War Office at a cost of 400*l.* The cable from the Cape (which is being worked by the Eastern Telegraph Company with a staff of 13, including a Superintendent) reached St. Helena at

the end of 1899, and was carried forward to Ascension by February, 1900. It is completed to St. Vincent.

#### *Constitution.*

The Government is administered by a Governor, aided by an Executive Council.

The Governor alone makes Ordinances, there being no Legislative Council, but power is reserved to legislate by Order of His Majesty in Council.

## ASCENSION.

The island of Ascension, 34 square miles in area, lying in the South Atlantic, lat. 7° 53' S. and long. 14° 18' W., was taken possession of in 1815, and, until 1922, it was under the supervision of the Admiralty and a small naval station was maintained there.

By Letters Patent dated 12th September, 1922, it was made a Dependency of St. Helena and placed under the control of the Secretary of State for the Colonies.

It is famous for its turtles, large numbers of which are caught between December and May. It is connected by telegraph with St. Vincent, St. Helena, and Sierra Leone, and is an important cable station of the Eastern Telegraph Company. It is a barren, rocky peak of purely volcanic origin, and destitute of vegetation, except at the highest point, 2,870 feet high, but has been cultivated to an extent permitting the maintenance of about 600 sheep and cattle.

Population at 1931 Census, 188, of whom 126 are St. Helenians.

*Resident Magistrate and Receiver of Wrecks*, C. H. Hurlston (acting).

*Controller of Labour* (vacant).

*Postmaster*, A. S. Roberts.

*Harbour Master*, F. Robson.

## SEYCHELLES.

*Description.*

The Seychelles Islands are situated between the parallels of S. lat. 4° and 5°. The total area of the Colony and its dependencies is 156½ sq. miles. The number of islands under the Seychelles Government is 92.

The death-rate in 1930 was 13·99 per 1,000; the birth-rate being 27·99 per 1,000.

Mahé is the largest and most populous of the Seychelles Islands. It is 17 miles long and 4 to 7 miles broad, and is estimated to contain 55½ square miles. It has about 105 miles of good roads and paths, and communication between all the districts of the island is easy.

It is distant from Mauritius 934, from Madagascar 600, and from Zanzibar 970 miles. It is fertile, and healthy. The shade temperature seldom exceeds 84, and falls frequently at night to 72, and the records taken on the hills are several degrees lower. The rainfall at Victoria was in 1925, 134 inches.

The island rises abruptly from the sea, and the highest peak reaches the elevation of 2,997 feet. Victoria, the capital of the island, is situated in a valley in the north-east, and has a safe and commodious harbour, provided with a lighthouse showing a white flash of 1 second duration every 10 seconds.

The other chief islands are Praslin (9,700 acres); Silhouette (4,900 acres); La Digue (2,500 acres); Curieuse (900 acres); Félicité (800 acres); North Island (525 acres); St. Anne (500 acres); Providence (500 acres); Frigate (500 acres); Denis (340 acres); Cerf (290 acres); and Bird or Sea Cow Island (160 acres).

The following islands are also dependencies of Seychelles:—The Amirantes, Alphonse Island, Bijoutier Island, St. François Island, St. Pierre Island, the Cosmoledo Group, Astove Island, Assumption Island, Coëtivy, Aldabra and Farquhar Island.

The island of Coëtivy, formerly a dependency of Mauritius, was transferred to Seychelles by Letters Patent in 1907, and the Farquhar Island in 1922.

*History.*

The islands are believed to have been discovered by a Portuguese named Pedro Mascaregnas, in 1505, but the discovery was not apparently followed by any attempt at colonisation.

Previous to the French occupation they were the resort of pirates or corsairs who infested the Indian Ocean, some of whose names are borne by descendants in Mahé at the present time.

Under the Government at Mauritius of Labourdonnais, whose name they originally bore, their position was first defined in 1743, and M. Picault, who took possession of the Islands in the name of the King of France, called the principal island Mahé. In 1756 the group was re-named the Seychelles Islands, in honour of the Vicomte Moreau des Séchelles, who was Controller-General of Finance under Louis XV., from 1754 to 1756.

The natural resources of the Islands, and their freedom from hurricanes, induced the French to transplant from the Isle de France (now Mauritius) cinnamon, cloves, and nutmegs, under the directions of M. Poivre. Much secrecy was at first observed in regard to the existence of these retired plantations, the object being to wrest from the Dutch the lucrative spice monopoly which the colonies of that nation then enjoyed in Europe from their own possessions.

The rumours of the war that broke out between France and England in 1778, induced the then French Governor of Mauritius, Count de Souillac, to issue peremptory orders that in the event of an attack the spice plantations should be at once destroyed. Soon afterwards a French ship from Madagascar, having slaves on board, called at Mahé to take in wood and water, but fearing that the English might be in possession, adopted the ruse of hoisting the English flag. The small French force at Mahé had already been withdrawn, and the officer in charge, knowing that resistance was useless, at once set fire to the whole of the spice trees, each of which had previously been surrounded with dry wood and inflammable material.

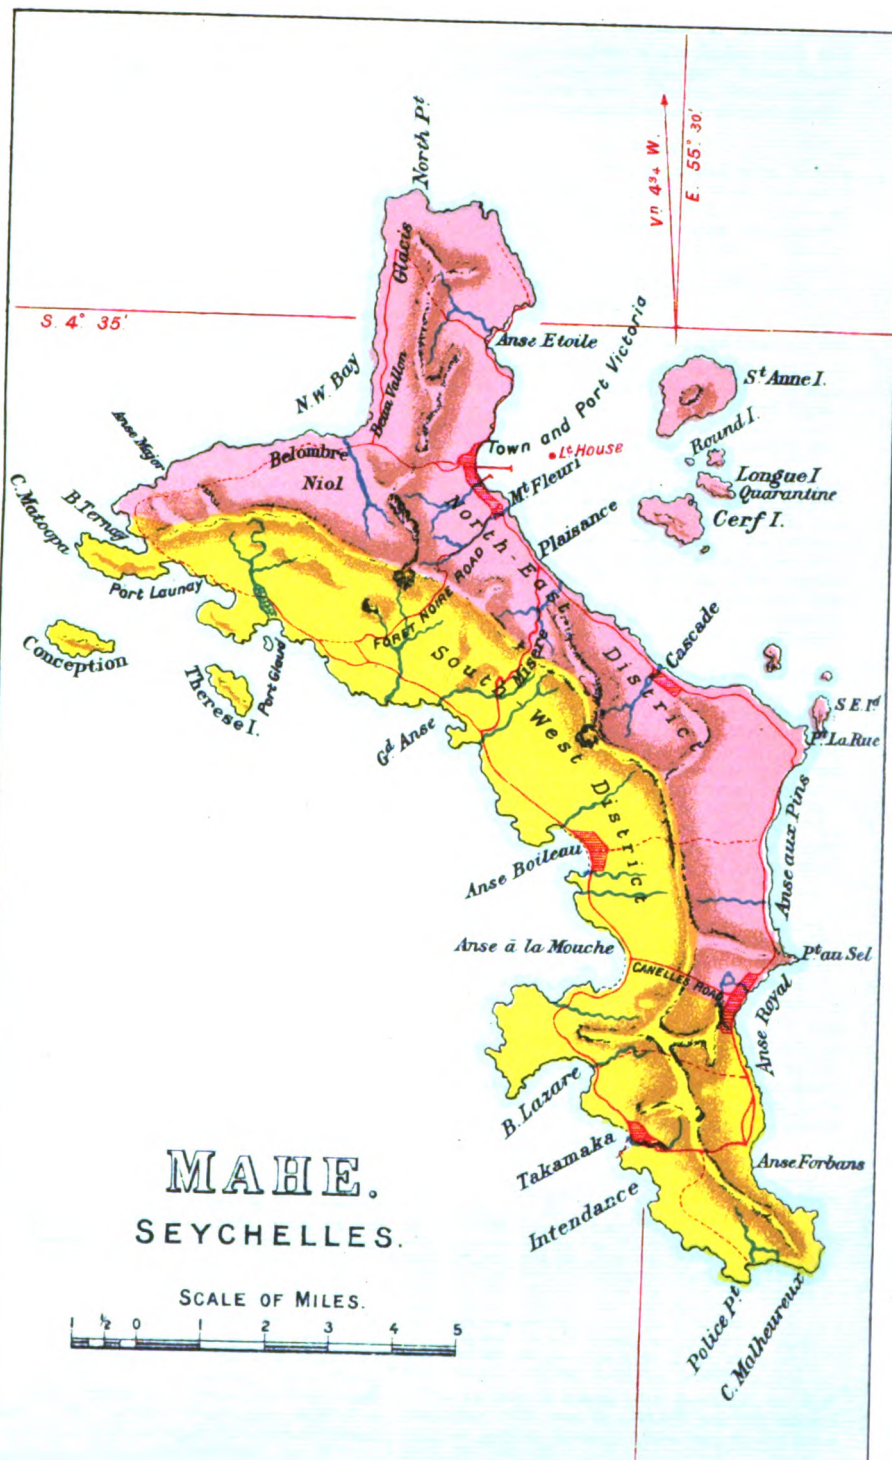

During the war of the French Revolution Mahé was extremely useful to French ships as a place of refuge and refitment, but on the 17th May, 1794, it was captured by Captain Newcome, of His Majesty's ship "Orpheus."

The last French Governor, M. De Quincy, who was born at Paris in November, 1748, became, after Lieutenant Sullivan, R.M., who had been placed in charge, had left, the first Agent Civil under the British Government. M. De Quincy's reign as French Governor lasted twenty years. He remained for eighteen years in the service of the British Government, and died on the 10th July, 1827.

The capitulation was renewed in 1806 by Capt. Ferrier, of His Majesty's ship "Albion," but it was not until the capture of Mauritius in 1810, that Seychelles was formally taken possession of by the appointment of an Agent, and incorporated as a dependency of that Colony. From 1794 to 1810 Seychelles, though nominally a British Colony, seems to have been administered as a French Colony, and all Civil Status Acts ran in the name of the French Government. A Board of Civil Commissioners was appointed in 1872, when the finances of the Seychelles were separated from those of Mauritius. The title of the Head of the Government was changed from that of Civil Commissioner to that of Chief Civil Commissioner. The powers of the Board were further enlarged in 1874 by another Order in Council.

The increasing importance of these islands was considered sufficient to warrant an alteration in the constitution of the Government, and in December, 1888, an Order in Council was passed creating the office of Administrator, and nominating an Executive and Legislative Council. In 1897, by Letters Patent and Royal Instructions, the Administrator was given full powers as Governor, and Seychelles was practically separated from Mauritius. The separation was completely carried out by Letters Patent of 31st August, 1903, by which Seychelles was erected into a separate Colony under its own Governor and Commander-in-Chief.

An education grant of Rs. 22,464 is given for assisting schools of all denominations, of which there were 27 in 1930. All schools are now denominational, and Government Scholarships and Awards are offered both to primary and secondary schools. Technical education is dealt with by means of Government apprenticeships. All schools are inspected by the Inspector of Schools.

#### Communications, &c.

The British India Company's steamers call regularly once every 4 weeks from Bombay to East African Ports, and once every 8 weeks on their return voyage from Mombasa to Bombay. The Norwegian East Africa Line and the Havraise steamers call irregularly at this port on their way to Europe. The Admiralty used Victoria as a coaling station. Seychelles is now included in the East Indies Naval Station.

Telegraphic communication with Mauritius and Europe via Zanzibar was completed in November, 1893. Direct cables to Aden and Colombo were completed in 1922. The rates for telegrams from Seychelles are 75 cts. per word to Mauritius or Zanzibar, and Rs. 1.50 to Aden or Europe.

The present letter rate of postage to the United Kingdom, India, Dominions and British Possessions is 12 cents; to other countries of the Postal Union 20 cents. The parcels post has been in full operation since April, 1890. The cash on delivery service for parcel post was introduced in 1911. The money order system is in operation with England and numerous other countries and colonies, including Bombay, Aden, Zanzibar, Mauritius and Ceylon.

#### Savings Bank and Currency.

A Government Savings bank was established in March, 1897, and at the close of the year 1930, the amount standing to the credit of depositors was Rs. 199,534. All the Savings Bank funds are invested. There is a Branch Savings Bank at Praslin. The branches which were established at Anse Royale and La Digue were closed during 1906, as there were no transactions.

The currency consists of the Indian rupee and the Mauritius subsidiary coinage. Accounts are kept in rupees and cents. Indian, Mauritius, and Seychelles Government Notes also circulate freely.

#### Local Boards.

A Local Board of Health, vested with powers and duties somewhat similar to those entrusted to Municipal Bodies, was created in Victoria at the end of 1900. In 1922 the title was changed to that of "The Victoria Town Board." Similar Boards were created for the Islands of Praslin and La Digue at the end of 1901, and for the South Mahé District in March, 1902.

#### Products and Industries, Trade and Customs, &c.

In 1930 the chief exports were copra, 5,909½ tons; guano, 15,977 tons; vanilla, 3,636 kgs.; tortoise-shell, 1,323½ kgs.; essential oils, 52,842 litres; tripangs, 9,647 kilos.

In Victoria, there is a Botanic Garden containing many interesting tropical plants.

More especially at Praslin, though also in other parts of the group, are to be found the celebrated coco-de-mer, with the leaves of which beautiful hats and delicate basket work are made by the natives.

The Aldabra group of islands under the Seychelle administration is the habitat of the gigantic land tortoises; numerous living specimens are, however, to be seen in Mahé and the neighbouring islands, and there are some, large and small, in the tortoise pens at Government House.

The revenue is derived principally from specific import duties, which are light, and an *ad valorem* duty of 15 per cent. on articles not otherwise enumerated (10 per cent. surtax on Customs Imports duty was imposed for the period of the War and is still in force), licences, a capitation tax and a tax on immovable property and stamps. An export duty of Rs. 1 a ton is levied on guano, prepared fertiliser, and mangrove bark, and Rs. 1 per hectolitre of whale oil. There is also a fixed export duty of Rs. 2.50 per kilo. on tortoise-shell (carot).

The percentage of trade is as follows:—

	Imports.	Exports.
	%	%
United Kingdom ..	32.50	13.55
British Empire ..	36.60	42.43
Foreign Countries ..	30.90	43.92

There are lighthouses on Denis Island and Mamelles Island (9 miles north-east of Mahé in long. 55° 32' 20" E., and lat. 4° 29' S.), and in Victoria Harbour. The light installed on Capucin Point discontinued on the 31st July, 1922, is to be re-exhibited. The quarantine station is placed on Long Island opposite to Victoria.

## SIERRA LEONE.

*Situation and Area.*

The territory known as the Colony and Protectorate of Sierra Leone is an area of some 27,925 square miles, roughly circular in shape, lying between 6° 55' and 10° of N. lat., and 10° 20' and 13° 25' of W. long. The sea coast, 210 miles in length, extends from Kiragba at about lat. 9° N., on the border of French Guinea, to the Mano River at lat. 6° 55' N. on the border of the Republic of Liberia.

The Colony portion of this area, i.e. the territories acquired by the Crown by Treaty of Cession or otherwise consists of the following:—the Sierra Leone Peninsula in which is situated Freetown (the seat of Government), Sherbro Island, the islands of Tasso, Bananas, Turtles, York, Buna, Shaye and other small islets, the Lower Lokko and Matoki Chiefdoms in the Northern Province, and the Bumpo, Kagboro, Bagru, Mano Bagru, Timdel, Bendu, Cha, Mongoba Bullon, Mesi Krim, and part of the Manosa Krim Chiefdoms in the Southern Province. The Crown has also acquired a strip of land, varying in depth from a quarter of a mile to one mile throughout the whole coast line not included in the areas specified above. Of these areas the Peninsula of Sierra Leone, Tasso Island, Banaza Islands, York Island, and the township of Bonthe in Sherbro Island, only, are administered as strictly Colony; the other areas are administered as part of the Protectorate.

*History.*

The Colony of Sierra Leone originated in the sale and cession of a portion of land by "King" Nembana and his subordinate chiefs to Captain John Taylor, of His Britannic Majesty's brig "Miro," on behalf of the "free community of settlers, their heirs, and successors, lately arrived from England, and under the protection of the British Government." This portion of land was described in the treaty as extending from the bay commonly called Frenchman's Bay, but of which the name was changed to St. George's Bay, coastwise up the River Sierra Leone to Gambia Island, and southerly or inland from the riverside 20 miles. The treaty is dated 22nd August, 1788.

The main purpose of the Colony in its inception was to secure a home on the African Continent for a number of natives of Africa, and some others, who from various circumstances had been separated from the countries of their origin, and were destitute in and about London. Subsequently the Colony was used as a settlement for Africans rescued from slave-ships during the period when England was putting forth her efforts for the suppression of the over-sea traffic in slaves. The territory of the Colony received additions from time to time by various concessions from the native chiefs. Thus, on the 10th July, 1807, "King" Farima and "King" Tom ceded all the land they possessed in the peninsula of Sierra Leone lying to the westward of the Colony; and in 1861 Bai Conteh, "King" of Kwaia, with his chiefs, ceded a portion of the Kwaia country abutting on the Colony of Sierra Leone, measuring 10 miles in width and 16 miles in length from the River Sierra Leone to the River Ribbi, and particularly described as to its inland boundary in the Treaty of Cession. In 1825 the Governor of Sierra Leone made a treaty of cession with various Chiefs in, and in the neighbourhood of, Sherbro Island, for the purpose of adding these countries to the territories of the Colony. The

treaty, not immediately ratified by the Crown, was revived by a new agreement made in 1882. Other Treaties of Cession were made from time to time.

On August 21st, 1896, a Proclamation was issued declaring a Protectorate over the Hinterland of Sierra Leone, and Ordinances were passed providing for the administration of this Protectorate, which, by Order-in-Council is divided into two Provinces as follows:—

Northern Province Districts.—Port Loko, Karene, Bombali, Kambia and Koinadugu.  
Southern Province Districts.—Moyamba, Kono, Kenema, Kailahun, Bo, Bonthe and Pujehun.

*General Description.*

The peninsula of Sierra Leone is about 25 miles in length, and from 10 to 12 miles in breadth at its widest part. It is one of the few points on the African coast where there is high land near the sea. It is formed by a range of volcanic mountains, running parallel to the sea from N.N.W. to S.S.E., the summits of which, in the Picket Hill, Sugar Loaf and Leicester Mountains, rise in conical form to a height of from 2,000 to 3,000 feet. The mountains are composed principally of norite, and are thickly wooded. They are intersected by ravines and small valleys, and there are considerable tracts of level ground, especially on the eastern side of the peninsula, where it sinks to the mainland.

The configuration of the Protectorate varies much in different localities. The coastal strip is flat and low-lying and the river estuaries, below high tide mark, are bounded by extensive mangrove swamps. The western and southern part of the Protectorate consists of rolling wooded country, broken in places by ranges of hills rising to 1,600 ft. or more. The ground rises to the north and east to form an upland plateau having a general elevation of about 1,500 ft. The Sula and Kangari hills rise to nearly 3,000 ft., while to the east, near the French Guinea frontier, Bintumane Peak and the summits of the Binwa range rises to above 6,000 ft. Unlike many regions on the West Coast of Africa the country is well watered by rivers and streams. The principal rivers of Sierra Leone which empty themselves into the Atlantic Ocean are the Great and Little Scarcies, the Rokel or Seli, the Tong or Taia, the Ribbi, the Bum or Sewa, the Moa and the Mano, most of which are navigable by small craft for several miles.

The capital, Freetown, lies about four miles up the Sierra Leone River, at the foot of a chain of hills rising 2,900 feet above the sea. In 1921 it contained 44,142 inhabitants. It possesses the best harbour in West Africa, and is an important coaling station and a port of registry.

The peninsula of Sierra Leone and the lands immediately adjoining have a population (including Freetown and its Districts) of 85,163. It yields only a small quantity of exportable commodities, but ginger and coffee thrive if well looked after. The extent of the territory is, however, small (256 square miles), and the generally rocky soil is not very well adapted for cultivation.

Considerable quantities of palm kernels, palm oil, piassava, with other articles of lesser importance are exported via Bonthe in the Southern Province.

Many districts in the Protectorate are fertile and well adapted to the growth of oil palms, coconuts, bene seed, kola nuts, gum-producing trees, ginger, cocoa, rice, and other tropical products.

Alluvial platinum deposits occur near York, and are being worked on a small scale. Alluvial gold deposits are being worked in the Protectorate and are giving encouraging results.

Chromite has been discovered in several parts of the Protectorate and the most promising deposit, occurring in the Kambui Hills near Hangha, is being actively prospected.

A recently discovered deposit of diamonds in Kono District is now being prospected.

Deposits of iron ore have been discovered, and steps are being taken to work and export the ore on a large scale.

The population of the Protectorate was in 1921 estimated at 1,456,148 and is composed of the following tribes:

Northern Province	Temnes, Limbas, Susus, Lokkos, Fulahs, Mandingoes, Korankos, Yalunkas.
Southern Province	Mendes, Sherbroes, Konnos, Krims, Gallinas, Gollas, Vais, a few Kissis.

#### *Constitution.*

A Charter, issued on May 27th, 1863, created an Executive Council for the Colony composed of four members nominated by the Crown. The Legislative Council was to consist of the members of the Executive Council and nominated members.

A Charter, dated the 19th of February, 1866, established a Central Government of the settlements on the West Coast of Africa, with the seat of government at Sierra Leone.

A new Charter, dated the 24th of July, 1874, revoked so much of the Charter of the 19th of February, 1866, as provided for the government of the Gold Coast and Lagos under the Governor-in-Chief of the West Africa Settlements, and those settlements were erected into a distinct government. A further Charter, dated 17th of December, 1874, erected a new government of the "West Africa Settlements," consisting of Sierra Leone and the Gambia, and created a Legislative Council in each settlement, consisting of the officer administering the government, and not less than two other persons, to be designated by royal instructions or warrant. New letters patent dated 17th June, 1885, provided for the continuance of the government on the same lines, with some minor differences. By letters patent of 28th Nov., 1888, the Gambia was again made a separate government. By letters patent, dated 3rd April, 1913, and Royal Instructions, dated 4th May, 1922, there were constituted an Executive Council composed of the Officer in command of the troops, the Colonial Secretary, the Attorney-General, the Colonial Treasurer and the Director of Medical and Sanitary Services, and a Legislative Council, composed of the members of the Executive Council and four unofficial members nominated by the Crown.

On March 7, 1913, an Imperial Order-in-Council was issued providing for the administration of the Protectorate of Sierra Leone. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, and beginning at the extreme southerly point of the Colony on the Anglo-Liberian boundary, as delimited under the provisions of the Anglo-Liberian Conventions, November 11, 1885, and January 21, 1911.

The Governor and Commander-in-Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate. Authority is

given to the Governor by Ordinances passed in the Legislative Council to exercise and provide for giving effect to the powers and jurisdiction acquired by the Crown in Sierra Leone.

Letters Patent, dated the 28th January, 1924, revoked those issued on the 3rd April, 1913, and made fresh provision for the appointment of the Governor and Commander-in-Chief, and instructions issued under the Royal Sign Manual and Signet on the same date cancelled those of the 3rd April, 1913, and 4th May, 1922. An Order of the King in Council dated the 16th January, 1924, provided for a new and considerably enlarged Legislative Council, introducing an elective element and direct representation of Protectorate interests into the constitution of that Council for the first time in the history of Sierra Leone.

#### *Climate.*

The seasons may be divided into wet and dry, the former commencing in May and lasting till October. The shade temperature varies during the year from about 62° to 97°. Tornadoes or violent thunderstorms occur at the commencement and close of the rainy season. They are accompanied by strong wind, but do not last long, and seldom do much damage. The atmosphere during the rainy season is excessively damp. The rainfall in Freetown for the year 1929 was 114.51 inches. Between the months of December and March the wind known as the "Harmattan" is prevalent; it is very dry, and often brings with it a fine dust said to come from the Sahara. Its direction ranges from N.E. to S.E.

The climate of Sierra Leone, as elsewhere on the West Coast of Africa, is trying, but conditions have been greatly improved in recent years through the efforts of the Medical and Sanitary Services, and if ordinary precautions are taken the risk of contracting malarial fever can be much reduced.

#### *Vegetable Products.*

The principal products exported from Sierra Leone are palm kernels, palm oil, piassava, bene seed (sesame), ground nuts, kola nuts, ginger and hides. The chief agricultural work lies in the cultivation of rice and cassava for local consumption. The kola tree is found near almost every village, and from its product a considerable portion of the revenue of the native inhabitants is derived. Gum copal is also collected.

#### *Industries, Trade and Customs.*

The inhabitants of Freetown and the Colony generally are traders and shop-keepers, and do little in the way of agriculture beyond the planting of cassava. In the Protectorate the inhabitants plant "farms," chiefly of rice and cassava, and collect natural products for sale to the various merchants and traders of the Colony. They also weave "country cloths," many of which are of a good texture and handsome design. There is also a flourishing industry of mat making, basket making, etc., and in the Northern Province, a certain amount of ornate leather work is produced. The fishing industry at Sherbro is of considerable importance, vast quantities of dried fish being taken inland. Syrians are now an important element in Freetown, where they form a large portion of the shopkeepers. In the Protectorate their numbers are increasing and they are responsible for much of the motor transport on the Protectorate roads.

The products from the Protectorate which constitute the principal exports are palm kernels, palm oil, kola nuts, piassava, peppers, hides, cocoa, ginger. Attempts to grow American Up-land Cotton, made originally with the aid of the British Cotton Growing Association, failed on account of the unsuitable climate, but local varieties of cotton are successfully grown in considerable quantities. The principal imports are tobacco, cotton goods, spirits, furniture, groceries, etc., and hardware.

The import duties, which are non-differential, are mainly specific; but many important articles such as cotton goods and wearing apparel are liable to an *ad valorem* duty (20 per cent.). There are also export duties on palm kernels and kola nuts.

#### Currency and Banking.

Besides English currency, West Africa silver coins (2s., 1s., 6d. and 3d.) were put into circulation in 1913, and alloy coins of similar denominations in 1920. Currency Notes of the value of 20s. and 10s. were introduced in 1916 and of 2s. in 1917, and 1s. in 1919, but the last two denominations are not now current. The Bank of British West Africa has two branches in the Colony and some agencies in the Protectorate. Barclays Bank (Dominion, Colonial & Overseas) Ltd. also is established in Freetown. A Government Savings Bank was established in 1882.

#### Education.

From the beginning of 1928 Primary Education in the Colony passed under the new scheme of amalgamating Mission Schools, thus building up stronger centres, and in a measure providing separate schools for Infants and Standard Classes. The payment of Teachers Salaries having been taken over by government, much closer attention is being made to qualifications, and with the additional supervision now provided, the grade of work should steadily improve. Education is not compulsory. The Church Missionary Society and the Wesleyan Mission have a College at Fourah Bay, affiliated to Durham University, which prepares students for the Degrees of that University. The College also undertakes the training of Male Teachers for Primary Schools. The training of Female Teachers for Primary Schools is now undertaken by the Wesleyan Missionary Society at its College at Wilberforce. In the Protectorate, while the old system still obtains, plans are under consideration for the complete re-organisation of all schools. A Government school for the sons and nominees of native chiefs was established at Bo in the Kenema District of the Protectorate on 1st March, 1906, under European supervision. The number of pupils at the close of 1930 was 153. There is also a Government Model School in Freetown at which 287 pupils attended in 1930. An agricultural training college for vernacular teachers was established in 1919 at Njala in the Protectorate.

The school was transferred with all but its two junior classes to the new Central Protectorate College which is being set up at Koyeima; 80 pupils were enrolled in 1930. There are also 10 Government Rural Schools in the Protectorate, with a roll of 386 pupils.

The total number of children being instructed in the Government and assisted Mission Schools in the Colony and Protectorate was as follows:—

#### Means of Communication.

Mail steamers leave Liverpool for Freetown and Freetown for Plymouth and Liverpool every fortnight. The passage takes about 10 days.

Telegraphic communication with Europe was established in 1886, there being now three cables, to Bathurst, Conakry, and Accra respectively. A wireless telegraphic station was opened in 1913.

The main line of the Sierra Leone Government Railway, which was the first Railway to be constructed in British West Africa, runs from the Freetown terminus to Pendembu in the Railway District, a distance of 227½ miles. The number of stations and flag stations is 53. From Bauya Junction, 64½ miles from Freetown, a branch line runs to Makeni, a distance of 83 miles. The gauge of the Railway is 2 ft. 6 in.

The total railway receipts for 1930 were 190,577l.; the working expenses for the same year were 198,539l.

There are 1,912 miles of combined telegraph and telephone lines in operation.

There are about 700 miles of motorable roads in the Protectorate and the main thoroughfares in Freetown and its vicinity are motorable.

The Sherbro river is navigable for over 20 miles (up to York Island), the Sierra Leone, or Rokell river, for 40 miles (as far as Magbile).

For six months of the year the Kittam River is navigable for launches to Mopalma (about 80 miles) all the year and for six months to Pujehun. Much of the produce from the Northern Sherbro District is thus transported to Bonthe.

There are 69 post offices and postal agencies. The estimated number of letters, &c., handled in 1930 was 2,014,666: of parcels 44,614, of which the Inland Post dealt with 1,031,461 and 14,732 respectively.

The rates of postage are as follows:—

	Letters, per ½ oz.	Post Cards.	Newspapers, Books, etc., per 2 ozs.
	d.	d.	d.
Internal	1	½	½
To U.K. British Dominions and Colonies	2d. per oz. (1½d. each additional oz.)	1½	½
To Other Coun- tries	3 (1½d. each additional oz.)	1½	½

Parcels: maximum weight 22 lbs. for places inland and to certain countries which accept heavy parcels; 11 lbs. other countries.

Inland, 6d. for 2 lbs.; 3d. each additional lb.  
Gt. Britain, N. Ireland—Up to 3 lbs., 2s. 3d.; 7 lbs., 3s. 6d.; 11 lbs., 4s. 9d.; 22 lbs., 7s.; British W. A. Colonies, 2s., 3s., 4s., and 7s. respectively.

Parcels for other countries are forwarded through the U.K.

British Imperial Postal Orders are issued and paid in the Colony; there is also an Inland and Foreign Money Order Service.

At the close of 1930 the Post Office Savings Bank held 62,796*l.* to the credit of 8,005 depositors.

## SOMALILAND PROTECTORATE.

In 1884, a Protectorate was established over the tribes on the Somali Coast, extending from Lahadu (Loyi-ada), half-way between Ras Jibouti and Zeyla, to the 49th meridian E. long. The boundary has been settled by agreements with France, Italy, and King Menelik of Abyssinia. Till 1898, the Somaliland Protectorate was administered by the Resident at Aden, as a dependency of the Government of India. In that year, it was transferred to the charge of the Foreign Office, and on 1st April, 1906, to that of the Colonial Office. The chief ports are Berbera, Bulhar, and Zeyla. Area about 68,000 square miles.

Exports consist of skins and hides, sheep and cattle, gums, ostrich feathers, and salt.

Imports consist of rice, dates, cotton piece goods and shirtings, iron and hardware.

Although the camel remains the chief means of transport, the last few years have seen a considerable increase in the use of motor transport. The approximate mileage of road and cleared tracks suitable for general traffic and mechanical transport of medium weight is 940 miles. There are no railways in the Protectorate. There is a weekly steamer service with Aden.

The climate at the coast is trying for Europeans, but is comparatively healthy in the interior, where an elevation of from 4,500 feet to 6,800 feet is reached.

The Haud waterless plains constitute the principal pastures of the country. The chief source of wealth of the people lies in their live stock.

In the beginning of 1901, operations were commenced against a fanatical Somali leader, the Mullah Mohammed Abdullah, and a native levy with British Officers penetrated into the Nugal Valley. The Mullah was defeated at Somala and Fordiddin, and driven into Italian territory.

The dervishes afterwards gathered together again, and a similar expedition, strengthened by the 2nd King's African Rifles (Yao), was despatched in the summer of 1902, and again drove the Mullah into Italian territory with heavy loss, but met with a severe check in Italian territory at Erego, on October 6th. The Mullah, however, retired as the result of this action still further into Italian territory, to Geladi.

Five months later a third expedition, comprising British and Boer M.I., Indian and African troops, with the main base at Obbia in Italian Somaliland, proceeded to Mudug, thence detaching a force to Geladi, which place was up till then the headquarters of the enemy. A force of 200 Yao and Sikha, was overwhelmed at Gumburru, in April, 1903, after a fight of the fiercest description. A column of 200 men, was at the same time attacked at Daratoleh, whence it retired fighting to Bohotleh, and in June the expedition fell back on the Berbera-Bohotleh lines of communication, when Lieut.-General Sir C. O. Egerton, K.C.B., was placed in command.

Reinforcements, increasing the force to 7,000 rifles, were despatched and placed in the field, and in January, 1904, 3,250 troops defeated 5,000 dervishes at Jidballi.

In March, 1906, an agreement was concluded between the Italian Government and the Mullah Seyyid Mahommed, whereby peace was declared between the dervishes and the neighbouring tribes, both those subject to the Government of Italy and those under the protection of the British Government. The Mullah was given a port on the east coast and was assigned certain territories within the Italian sphere of interest, beyond which he and his dervishes undertook not to encroach.

In the latter part of 1908, some unrest was caused by the unfriendly attitude of the Mullah, and reinforcements were brought into the Protectorate from East Africa, Uganda, Nyasaland, and India during 1909.

Subsequently, arrangements were made to arm the friendly tribes to enable them to defend themselves against attack, and in March, 1910, all troops were withdrawn from the interior; the 6th Battalion King's African Rifles was disbanded, and a policy of strict coastal concentration was then adopted. This policy having disappointed expectations, a Camel Constabulary, 150 strong, was raised at the end of 1912 to check inter-tribal fighting, which by this time had assumed serious proportions. A measure of peace among the friendly tribes was quickly restored, but in August, 1913, the Corps, at a strength of 109 rank and file, encountered at Dulmadoba a raiding party of dervishes estimated at 2,000 rifles, and in the action which ensued, though heavy losses were inflicted on the enemy, the Constabulary sustained casualties amounting to 50 %, including the Commandant, killed. The force thereupon fell back on Sheikh, and reinforcements of Indian infantry were moved up from the coast. His Majesty's Government later decided to increase the forces of the Protectorate in order to preserve the necessary grazing grounds of

the friendlies from dervish attack, and to maintain peace among the tribes living in the west.

In November, 1914, Military Headquarters were established at Burao, 80 miles from the coast. At this time the dervishes were in occupation of the Ain Valley, which is one of the principal grazing grounds of the friendlies. Strong forts had been constructed by the Mullah at Jidali and Shimber Berris and these were used as forward bases for raids against our tribes. The position at Shimber Berris was accordingly attacked by the local troops and after a stubborn resistance all the forts were finally captured and blown up. In 1914 the dervishes made serious raids and their aggressions went on during the war, but early in 1920 operations against them were carried out by air attacks followed up by mounted forces with infantry supports. These operations were completely successful, the power of the dervishes was destroyed, and the Mullah became a fugitive in Abyssinian territory; he died there in 1921. Since 1923 the condition of the country has been peaceful and as a result the stock wealth of the native population has largely increased while in the western areas the development of agriculture has made great progress. A geological survey of the Protectorate has been made which has shown some areas of promise.

## SOMALILAND PROTECTORATE.

In 1884, a Protectorate was established over the tribes on the Somali Coast, extending from Lahadu (Loyi-ada), half-way between Ras Jibouti and Zeyla, to the 49th meridian E. long. The boundary has been settled by agreements with France, Italy, and King Menelik of Abyssinia. Till 1898, the Somaliland Protectorate was administered by the Resident at Aden, as a dependency of the Government of India. In that year, it was transferred to the charge of the Foreign Office, and on 1st April, 1906, to that of the Colonial Office. The chief ports are Berbera, Bulhar, and Zeyla. Area about 68,000 square miles.

Exports consist of skins and hides, sheep and cattle, gums, ostrich feathers, and salt.

Imports consist of rice, dates, cotton piece goods and shirtings, iron and hardware.

Although the camel remains the chief means of transport, the last few years have seen a considerable increase in the use of motor transport. The approximate mileage of road and cleared tracks suitable for general traffic and mechanical transport of medium weight is 940 miles. There are no railways in the Protectorate. There is a weekly steamer service with Aden.

The climate at the coast is trying for Europeans, but is comparatively healthy in the interior, where an elevation of from 4,500 feet to 6,800 feet is reached.

The Haud waterless plains constitute the principal pastures of the country. The chief source of wealth of the people lies in their live stock.

In the beginning of 1901, operations were commenced against a fanatical Somali leader, the Mullah Mohammed Abdullah, and a native levy with British Officers penetrated into the Nogal Valley. The Mullah was defeated at Somala and Fordiddin, and driven into Italian territory.

The dervishes afterwards gathered together again, and a similar expedition, strengthened by the 2nd King's African Rifles (Yao), was despatched in the summer of 1902, and again drove the Mullah into Italian territory with heavy loss, but met with a severe check in Italian territory at Erego, on October 6th. The Mullah, however, retired as the result of this action still further into Italian territory, to Geladi.

Five months later a third expedition, comprising British and Boer M.I., Indian and African troops, with the main base at Obbia in Italian Somaliland, proceeded to Mudug, thence detaching a force to Geladi, which place was up till then the headquarters of the enemy. A force of 200 Yao and Sikha, was overwhelmed at Gumburru, in April, 1903, after a fight of the fiercest description. A column of 200 men, was at the same time attacked at Daratoleh, whence it retired fighting to Bohoteh, and in June the expedition fell back on the Berbera-Bohoteh lines of communication, when Lieut.-General Sir C. C. Egerton, K.C.B., was placed in command.

Reinforcements, increasing the force to 7,000 rifles, were despatched and placed in the field, and in January, 1904, 3,250 troops defeated 5,000 dervishes at Jidballi.

In March, 1905, an agreement was concluded between the Italian Government and the Mullah Seyyid Mahommed, whereby peace was declared between the dervishes and the neighbouring tribes, both those subject to the Government of Italy and those under the protection of the British Government. The Mullah was given a port on the east coast and was assigned certain territories within the Italian sphere of interest, beyond which he and his dervishes undertook not to encroach.

In the latter part of 1908, some unrest was caused by the unfriendly attitude of the Mullah, and reinforcements were brought into the Protectorate from East Africa, Uganda, Nyassaland, and India during 1909.

Subsequently, arrangements were made to arm the friendly tribes to enable them to defend themselves against attack, and in March, 1910, all troops were withdrawn from the interior; the 6th Battalion King's African Rifles was disbanded, and a policy of strict coastal concentration was then adopted. This policy having disappointed expectations, a Camel Constabulary, 150 strong, was raised at the end of 1912 to check inter-tribal fighting, which by this time had assumed serious proportions. A measure of peace among the friendly tribes was quickly restored, but in August, 1913, the Corps, at a strength of 109 rank and file, encountered at Dulmadoba a raiding party of dervishes estimated at 2,000 rifles, and in the action which ensued, though heavy losses were inflicted on the enemy, the Constabulary sustained casualties amounting to 50 %, including the Commandant, killed. The force thereupon fell back on Sheikh, and reinforcements of Indian infantry were moved up from the coast. His Majesty's Government later decided to increase the forces of the Protectorate in order to preserve the necessary grazing grounds of

commerce of the East, but as the Portuguese pushed their operations further to the east, in the archipelago and neighbouring countries, the trade of Malacca gradually declined and it ceased to be of consequence as a collecting centre, except for the trade of the Malay Peninsula and the Island of Sumatra. This trade it retained under Dutch rule till the establishment of Penang in 1786. In a few years from that date its trade almost ceased, and it became a place of reduced commercial importance, but possessing great agricultural resources. Its trade has recently somewhat revived. The trade of the Malay Peninsula and Sumatra passed to Penang, which also carried on a large traffic with China, Siam, Borneo, the Celebes, and other places in the archipelago not under Dutch control; but no sooner was Singapore established than Penang in its turn had to yield the first place to Singapore, and came to depend chiefly on the local trade. At first unimportant, that trade has now assumed enormous proportions, owing to the development of the rich tin-mining areas and rubber-bearing lands of the Malay Peninsula.

Penang, or Prince of Wales' Island, was the first British settlement in the Malay Peninsula, having been ceded to the East India Company by the Raja of Kedah in 1786, with the proviso that the sum of 6,000 dols. should be paid annually to the Raja of Kedah so long as the British occupied the island. In 1800, in consequence of the prevalence of piracy, a strip of the coast of the mainland, now called Province Wellesley, was acquired from the Raja, the annual payment being in return increased to \$10,000. This has been subsequently enlarged from time to time, until it now extends from the Muda River to 10 miles south of the Krian River, a distance of 45 miles, containing in all 282 square miles. This province is in a high state of cultivation, the chief articles cultivated being sugar, paddy, coconuts, and rubber. In 1806 Penang was made a separate Presidency, of equal rank with Madras and Bombay. In 1826 Singapore and Malacca were incorporated with it under one government, Penang still remaining the seat of government. In 1836 the seat of government was transferred to Singapore.

The island of Pangkor and the Sembilan Islands were ceded by Perak in 1826, with a view to the suppression of piracy, but no use was made of the cession at the time. In 1874 the cession of these islands was confirmed by the Treaty of Pangkor (to which reference is made in dealing with the relations of the Colony with the Malay States), by which a strip of territory in the mainland opposite also became British. The whole now forms, under the name of the Dindings Territory, an outlying portion of the Settlement of Penang.

The original city of Singapore is said to have been founded by immigrants from Sumatra. It rose into prominence in the fourteenth century. Its greatness came to a sudden end about 1377, when it was sacked and destroyed by the Javanese, and thenceforth the island was scarcely inhabited until Sir Stamford Raffles took possession of it in 1819 by virtue of a treaty with the Johore princes. The new settlement was at first subordinate to Bencoolen (Fort Marlborough) in Sumatra, but in 1823 it was placed under the Government of Bengal; in 1826 it was, as above stated, united with Penang and Malacca under the Governor and Council of the Incorporated Settlements.

#### *Constitution, Law, and Justice.*

The Government consists of a Governor aided by an Executive and Legislative Council. The Executive Council consists of 6 official members, excluding the Governor who presides, such other official members as the Governor may nominate, at present 3 in number,

and 3 unofficial members. The Legislative Council consists of 13 official members and 13 unofficial members, of whom 2 are nominated by the Chambers of Commerce of Singapore and Penang.

The law in force is contained in local Ordinances, and in such English and Indian Acts and Orders in Council as have been made applicable to the Colony. The Indian Penal Code, with slight alterations, has been adopted, and there is a Civil Procedure Code based on the English Judicature Acts, as well as a Criminal Procedure Code based on the Indian one.

There is a Supreme Court, which holds assizes at Singapore and Penang every two months, and quarterly at Malacca; and which holds civil sittings, monthly at Singapore and Penang, and once a quarter at Malacca. Ordinance 5/1931 provides for the institution of a Court of Criminal Appeal.

#### *Climate.*

The climate shows but little variation during the year. The mean temperature during 1930 was:—Singapore 80·4° F.; Penang 81·8° F.; Province Wellesley 80·8° F.; Malacca 79·0° F. Labuan 79·2° F.

The mean monthly maximum and minimum temperatures varied as follows:—

Mean monthly maximum.		Mean monthly minimum.

Singapore	93 on several days in June, July, Aug. and Sept.	70 on several days in Nov. and Dec.
Penang..	95 on several days in Jan., April and June.	70 on 2nd January.

There are no well-marked dry and wet seasons, rain falling throughout the year. Records for the last 22 years at Singapore show that the average annual rainfall is 99·11 inches, July being the driest month with an average of 5·62 inches and January the wettest with 12·02 inches. The average number of wet days is 183.

Rainfall has, however, been recorded regularly in Singapore since 1862, the wettest year being 1914 with 135·52 inches and the driest 1877 with 58·37 inches.

In Penang the average annual rainfall for the last 7 years was 105·12 inches, October being the wettest month with an average of 22·38 inches and February the driest with 2·66 inches. The average number of wet days is 195.

The force of the monsoons is not much felt, though the prevailing winds are generally in the direction of the monsoon blowing at the time, viz.:—S.W. from May to October, N.E. from November to April. But at the coastal stations the diurnal land and sea breezes are often stronger than the prevailing monsoons.

*Commerce.*

The foreign trade of the Colony of the Straits Settlements is not separately distinguished, being

merged in that of the Malayan Registration area which includes the Colony, the Federated Malay States, and the States of Johore, Kedah, Perlis, Kelantan, and Trengganu. This trade passes principally through the two free ports of Singapore and Penang in the Colony, and Port Swettenham in the F.M.S.

The principal agricultural products are rubber, coconuts, pineapples, palm oil, and rice.

The principal imports comprise foodstuffs, petroleum products, tin ore, rubber, clothing, and machinery; the chief exports, raw materials, particularly rubber, smelted tin, copra, and palm oil, and manufactured articles. There is an important transit trade in the ports of Singapore and Penang.

The following shew the total imports and exports for the six years up to 1930 and the values of some of the principal articles in 1930.

*Shipping.*

Singapore and George Town (Penang) are ports of registry; Singapore had on the 31st December, 1930, 862 steam, motor and sailing vessels registered, of a total gross tonnage of 144,965 tons.

The ports of Singapore and Penang are administered under Ordinance No. 125 (Merchant Shipping) by the Marine Department. There are also Harbour Boards under Ordinance No. 130 (Ports) in each Settlement (Singapore and Penang) for the management of the wharves. Malacca is also a port at which ocean steamers call. The number of merchant steamers of 50 tons net register and over with cargo and in ballast,

and the aggregate tonnage entering the ports in 1930 were:—

But in no case shall a packet of such newspaper be chargeable with a higher rate than that chargeable on a packet of printed papers of the same weight.

The operations of the Money Order Branch amounted in 1930 to \$7,642,129 the principal business done being with India, the Federated Malay States, the United Kingdom, the Netherlands East Indies, Ceylon, and the United States of America.

(iii) *Telegraphs and Telephones.*

Eleven submarine cables radiate from Singapore :— 5 to Penang, thence to Madras (2), Colombo (2), Deli (Sumatra (1) ; 2 to Batavia of which one thence to Cocos ; 1 to Banjarmasin (Java) thence to Darwin (2) ; 1 direct to Hong Kong ; 1 to Cochin China, thence to Hong Kong (1), and 1 to Labuan, thence to Hong Kong (1).

There are also Government telegraph lines from Penang to Province Wellesley, and thence to Perak, Selangor, Pahang, Trengganu, Negri Sembilan, Kedah, Perlis, Kelantan, Siam, Johore, Malacca and Singapore. The land line from Singapore to Penang via Kuala Lumpur (503 miles) was opened for traffic in 1909. There are 685 miles of telegraph line, 16½ nautical miles of submarine cable between Penang and Province Wellesley and there are 36,555 miles of telephone line.

The Telephone Exchange in Singapore is worked by the Oriental Telephone Co. and the Exchanges in Penang, Province Wellesley and Malacca, are worked by the Post Office. There are 10,284 connections, including extensions to the three systems.

A telephone service between Singapore, Johore, and the Federated Malay States was opened in 1931.

(iv) *Railways and Roads.*

The Federated Malay States Railways system connects with the Royal State Railways of Siam, the distance between Singapore and Bangkok being 1,194 miles, the journey taking 60 hours. Sections connect the main line with ports on the West Coast. A new line from Gemas in Negri Sembilan, through Pahang and Kelantan, connects with the Royal Siamese State Railways on the East Coast. A diavision on Singapore Island to bring the terminus to the vicinity of the wharves is under construction and will be completed in 1932.

There is a total length of 906 miles of metalled roads in the Colony, 2,780 miles in the Federated Malay States, and 1,047 miles in the Unfederated Malay States.

*Education.*

The control of all the Government schools is vested in the Director of Education, Straits Settlements and Federated Malay States.

By an Ordinance passed in 1909, an Education Board has been established, consisting of official and unofficial members, under the chairmanship of the Director of Education. Provision has been made by the same Ordinance for the levying of an Education Rate, the expenditure of which is under the control of the Board.

Vernacular instruction is provided for Malays free of charge. Attendance at these schools is compulsory for Malay children. The Government assists Chinese vernacular education by grants-in-aid to such schools as apply for them and are satisfactorily conducted. Instruction in English for all nationalities is provided in Government or grant-in-aid schools, and fees are charged. All the schools established by Government are secular. Raffles College was opened in Singapore in 1929 for a higher education in English. There is a Reformatory in Singapore for juvenile offenders and vagrants, in which technical instruction is provided.

The number of schools and scholars in 1930 was as follows :—

	No. of schools.	Enrolment.	Attendance.
Government English schools (boys and girls).	22	9,991	9,535
Grant-in-aid English schools (boys and girls).	29	15,732	15,023

*Currency and Banking.*

The standard coin of the Colony, by an Order of the Queen in Council dated 2nd February, 1896, was the silver Mexican dollar, the British dollar and the old Hong Kong dollar being also at that time legal tender.

A Committee to consider the currency question was appointed in England in 1902, and reported in favour of a change to the gold standard, if the local Government so desired. In accordance with the Committee's recommendations, a new Straits Settlements dollar was coined in India and introduced into the Colony and the adjoining Malay States. This coin was of the same weight and fineness as the British dollar. Under Order of the King in Council of 25th June, 1903, the Government declared this dollar to be the standard coin on 5th October, 1903. The Mexican and British dollars were demonetised from 1st September, 1904.

Under Order of the Governor in Council dated 29th January, 1906, the Currency Commissioners were empowered to issue notes in exchange for gold at the rate of \$60 for £7 sterling, thus fixing the sterling value of the dollar at 2s. 4d. In November, 1906, gold sovereigns were declared legal tender at this rate under an Order of the King in Council of the 22nd October, 1906. In view of the great rise in the value of silver, an Order of the King in Council was passed on 11th February, 1907, under which the weight of the Straits Settlements dollar and fifty cent piece was reduced in order to preserve the fixed ratio to gold and by an order of the King in Council, dated the 17th day of May, 1920, the fineness of the Straits Settlements dollar and fifty cent piece was reduced.

Local silver and nickel coins representing fractional parts of the dollar are legal tender up to \$2 and copper coins are legal tender up to \$1. The half-dollar is unlimited legal tender. Under an Ordinance passed in 1917 currency notes of denominations 25 cents and ten cents were issued to the public owing to shortage of subsidiary silver. These notes were only legal tender to the extent of \$2, and have now been withdrawn from circulation.

By the Currency Ordinance passed in 1923 the various funds controlled by the Currency Commissioners were amalgamated into one fund styled the Currency Guarantee Fund.

The following banks have establishments in the Colony: the Chartered Bank of India, Australia, and China; the Hong Kong and Shanghai Banking Corporation; the Mercantile Bank of India, Limited; the Netherlands Trading Society; the National City Bank of New York; the Banque de l'Indo-Chine; the Netherlands India Commercial Bank; and Sze Hai Tong Banking and Insurance Company, Bank of Taiwan, Chinese Commercial Bank, The Yokohama Specie Bank, The Ho Hong Bank, The Oversea Chinese Bank, the China Southern Bank, Lee Wah Bank, the P. and O. Banking Corporation, Thomas Cook & Son (Bankers) Limited, Kwong Lee Banking Company, Eastern Bank Limited, and the National Commercial and Savings Bank, Limited.

The first-mentioned Bank is allowed under its Charter to issue notes, but none have been issued since 1909. The amount of notes of local banks in circulation at the end of 1930 was \$137,981 only.

In addition to bank-notes a Government Currency Note issue was introduced in 1899. The amount of notes in circulation at the end of 1930 was \$82,423,391. These notes circulate freely within the Colony and the Malay States, and are largely used in North Borneo.

There is a Post Office Savings Bank at each Settlement.

The operations of the Money Order Branch amounted in 1930 to \$7,642,129 the principal business done being with India, the Federated Malay States, the United Kingdom, the Netherlands East Indies, Ceylon, and the United States of America.

(iii) *Telegraphs and Telephones.*

Eleven submarine cables radiate from Singapore :— 5 to Penang, thence to Madras (2), Colombo (2), Deli (Sumatra) (1); 2 to Batavia of which one thence to Cocos; 1 to Banjowangi (Java) thence to Darwin (2); 1 direct to Hong Kong; 1 to Cochin China, thence to Hong Kong (1), and 1 to Labuan, thence to Hong Kong (1).

There are also Government telegraph lines from Penang to Province Wellesley, and thence to Perak, Selangor, Pahang, Trengganu, Negri Sembilan, Kedah, Perlis, Kelantan, Siam, Johore, Malacca and Singapore. The land line from Singapore to Penang via Kuala Lumpur (503 miles) was opened for traffic in 1909. There are 685 miles of telegraph line, 16½ nautical miles of submarine cable between Penang and Province Wellesley and there are 38,555 miles of telephone line.

The Telephone Exchange in Singapore is worked by the Oriental Telephone Co. and the Exchanges in Penang, Province Wellesley and Malacca, are worked by the Post Office. There are 10,284 connections, including extensions to the three systems.

A telephone service between Singapore, Johore, and the Federated Malay States was opened in 1931.

(iv) *Railways and Roads.*

The Federated Malay States Railways system connects with the Royal State Railways of Siam, the distance between Singapore and Bangkok being 1,194 miles, the journey taking 60 hours. Sections connect the main line with ports on the West Coast. A new line from Gemas in Negri Sembilan, through Pahang and Kelantan, connects with the Royal Siamese State Railways on the East Coast. A deviation on Singapore Island to bring the terminus to the vicinity of the wharves is under construction and will be completed in 1932.

There is a total length of 906 miles of metalled roads in the Colony, 2,780 miles in the Federated Malay States, and 1,047 miles in the Unfederated Malay States.

*Education.*

The control of all the Government schools is vested in the Director of Education, Straits Settlements and Federated Malay States.

By an Ordinance passed in 1909, an Education Board has been established, consisting of official and unofficial members, under the chairmanship of the Director of Education. Provision has been made by the same Ordinance for the levying of an Education Rate, the expenditure of which is under the control of the Board.

Vernacular instruction is provided for Malays free of charge. Attendance at these schools is compulsory for Malay children. The Government assists Chinese vernacular education by grants-in-aid to such schools as apply for them and are satisfactorily conducted. Instruction in English for all nationalities is provided in Government or grant-in-aid schools, and fees are charged. All the schools established by Government are secular. Raffles College was opened in Singapore in 1929 for a higher education in English. There is a Reformatory in Singapore for juvenile offenders and vagrants, in which technical instruction is provided.

The number of schools and scholars in 1930 was as follows :—

	No. of schools.	Enrolment.	Attend-ance.
Government English schools (boys and girls).	22	9,991	9,535
Grant-in-aid English schools (boys and girls).	29	15,732	15,023

Grant-in-aid vernacular schools (boys and girls).	50	5,319	4,790
Total	320	53,347	50,361

*Currency and Banking.*

The standard coin of the Colony, by an Order of the Queen in Council dated 2nd February, 1896, was the silver Mexican dollar, the British dollar and the old Hong Kong dollar being also at that time legal tender.

A Committee to consider the currency question was appointed in England in 1902, and reported in favour of a change to the gold standard; if the local Government so desired. In accordance with the Committee's recommendations, a new Straits Settlements dollar was coined in India and introduced into the Colony and the adjoining Malay States. LABUAN.

The Island of Labuan is situated on the north-west coast of Borneo, in 5° 16' N. lat., and 115° 15' E. long. Its area is about 35 square miles. It is distant from the coast at the nearest point, about six miles; from Brunei, the capital of the Protected State of that name, about forty miles; and from Singapore 725 miles, or three days' steam.

The average annual rainfall is about 130 inches, and the thermometer ranges from 71° to 93°.

An attempt was made by the East India Company's servants, who were expelled from Balambangan by Sulu pirates in 1775, to establish a trading station in Labuan, but the project was soon abandoned, and for practical purposes the history of the island begins with its cession to Great Britain in 1846 by the Sultan of Brunei. It was then uninhabited. The reason for the cession, given in the treaty by which the island was handed over to Great Britain, was that it was "desirable that British Ships shall have some port where they may careen and refit, and deposit such stores and merchandises as shall be necessary for the carrying on of the trade with the dominions of Brunei," and the consideration given by Great Britain was an undertaking to suppress piracy and protect lawful trade.

The island was first occupied only as a naval station under the control of a naval officer, and the formal establishment of a Crown Colony was deferred until 1848. From that date until the end of 1889 Labuan was governed as a separate Colony. Until 1889 it was assisted by grants-in-aid from the Imperial Exchequer, but this help was then withdrawn, and the Colony supported itself, though with difficulty, for the next twenty years. In 1889, the financial troubles came to a head, and, as it was thought that the island

LABUAN.

The Island of Labuan is situated on the north-west coast of Borneo, in 5° 16' N. lat., and 115° 15' E. long. Its area is about 35 square miles. It is distant from the coast at the nearest point, about six miles; from Brunei, the capital of the Protected State of that name, about forty miles; and from Singapore 725 miles, or three days' steam.

The average annual rainfall is about 130 inches, and the thermometer ranges from 71° to 93°.

An attempt was made by the East India Company's servants, who were expelled from Balambangan by Sulu pirates in 1776, to establish a trading station in Labuan, but the project was soon abandoned, and for practical purposes the history of the island begins with its cession to Great Britain in 1846 by the Sultan of Brunei. It was then uninhabited. The reason for the cession, given in the treaty by which the island was handed over to Great Britain, was that it was "desirable that British Ships shall have some port where they may careen and refit, and deposit such stores and merchandise as shall be necessary for the carrying on of the trade with the dominions of Brunei," and the consideration given by Great Britain was an undertaking to suppress piracy and protect lawful trade.

The island was first occupied only as a naval station under the control of a naval officer, and the formal establishment of a Crown Colony was deferred until 1848. From that date until the end of 1889 Labuan was governed as a separate Colony. Until 1889 it was assisted by grants-in-aid from the Imperial Exchequer, but this help was then withdrawn, and the Colony supported itself, though with difficulty, for the next twenty years. In 1889, the financial troubles came to a head, and, as it was thought that the island

subjects the right to free trade in Perak. In 1826 a British arbitrator settled the boundary between Perak and Selangor. By the Burney Treaty with Siam, in 1826, the independence of Perak and Selangor was recognised, though the Sultan of Perak was

permitted to send tribute to Siam if he desired. In the same year the Sultan ceded to the British the Dindings and the island of Pangkor as posts for the suppression of piracy, and agreed to rely solely on the protection of Great Britain. From 1872 to 1874 there was almost continuous fighting of more or less severity between rival factions of Chinese in the Larut district where valuable tin deposits had been found.

Having regard to the anarchy which prevailed, Sir Andrew Clarke, in 1874, induced the Perak chiefs, to sign the Pangkor Treaty (20th January, 1874), and to accept thereby a Resident whose advice should be "asked and acted upon on all questions other than those touching Malay religion and customs." The murder of the first British Resident (Mr. J. W. Birch) in 1875 led to a military expedition and the banishment of the Sultan and some chiefs implicated in the affair. The country soon settled; and the Malay constitution was restored under a Sultan protected by the British Government.

#### *Selangor.*

In the 14th century, Klang, which is now a district of Selangor, is said to have been subject to the Javanese Empire of Majapahit. In the next century it was given to a Penghulu of the family of the Bendaharas of old Malacca, and a son of Sultan Mansur Shah (1458-1477 A.D.) of Malacca was made ruler of Jeram, near Langat. During the period of Portuguese ascendancy, little is known of the Selangor coast. The Dutch opened factories for the purchase of tin at Kuala Selangor and at Kuala Linggi. In 1718 Daeng Chelak, a Bugis chief, who had married a Johore princess, settled at Kuala Selangor, and about 1780 their descendant was recognised as Sultan Salehu'd-din by the Sultan of Perak. The throne has remained in the same family ever since. In 1783, the Dutch blockaded Kuala Selangor and forced the Sultan to acknowledge the suzerainty of Holland.

In 1818 the Sultan of Selangor made a commercial treaty with the East India Company at Penang. In 1874 anarchy prevailed amongst the Malay chiefs at Selangor, and pirates ravaged the coastal trade. The Sultan's difficulties were such that he was glad to accept a British Resident and to come under the protection of Great Britain.

#### *Negri Sembilan.*

This federation of "Nine States" consists of the four major States of Sungai Ujong, Jelebu, Johol, and Rembau, and the five minor States of Ulu Muar, Jempul, Terachi, Gunong Pasir, and Inas. Sungai Ujong is mentioned in a Javanese poem in 1365 as being subject to the Javanese Empire of Majapahit. In the 16th century it was ruled by Chiefs of the old kingdom of Malacca. Nearly all the Malay inhabitants of the "Nine States" are descendants from immigrants from Menangkabau in Sumatra. Portuguese accounts prove that this immigration had begun in the 16th century. The original Malay federation consisted of Sungai Ujong, Klang (now a district of Selangor), Jelebu, Rembau, Naning (now part of Malacca), Segamat (now in Johore), Pasir Besar (also in Johore, its place having been taken by Johol), Jelai (now Inas), and Ulu Pahang, the region between the Ulu Serting and Temerloh. After the wresting of Malacca from the Portuguese by the Dutch and the Johore Malays in 1641, Johore took a leading part in Negri Sembilan politics until 1773, when the chiefs of the four major States brought from Sumatra a Yam Tuan named Raja Melewar, ancestor of the Yang present di-pertuan Besar.

In 1874, the Dato' Klans, Chief of Sungai Ujong, the most important of the "Nine States," invited and obtained the assistance of the British Government

to maintain his rule and the appointment of a British Resident. In 1883, Jelebu applied for a British Officer; and Rembau agreed to refer all its disputes to the British Government, and in 1887 accepted a British adviser. In 1889, the Yam Tuan of Sri Menanti and the Rulers of Tampin and Rembau asked for a Resident, and agreed to a confederation known as "the Old Negri Sembilan." In 1895, the Resident of this confederation took charge of Sungai Ujong and of Jelebu, and the modern Negri Sembilan was constituted. Finally, in 1898, the Yam Tuan of Sri Menanti was elected titular Ruler of the whole State.

#### *Pahang.*

Chao Ju Kua, a Chinese, writing about 1225, mentions Pahang as being subject to the old Sumatran Buddhist Kingdom of Sri Vijaya. Later, Pahang and Tioman are claimed as conquests of Majapahit. In the 15th century, Sultan Mansur Shah of Malacca captured the Ruler of Pahang, and married his daughter. Before the Malacca royal house died out, in 1699, its Pahang branch provided several Rulers for the senior throne of Johore, which directly represented the Malacca dynasty. Later, Pahang fell under the suzerainty of the new Sultans of Johore, who, when they removed to Lingga, left a Dato' Bendahara in charge of Pahang.

In 1887 Sir Frederick Weld negotiated a treaty with the Bendahara of Pahang, promising British help in the event of external attack, and arranging for a British agent to be stationed at his capital. At the same time, the title of Sultan was substituted for that of Dato' Bendahara. In 1888, the Sultan applied for and obtained British protection, and the appointment of a Resident.

#### *Constitution of the States.*

The supreme authority in each State is vested in the Sultan, or the ruler, in State Council. His Highness the Sultan or ruler presides over the State Council. The British Resident is a member, and, in Perak and in Selangor, the Secretary to Resident is also a member. The other members consist of members of the royal family, the leading chiefs and some Chinese. Since the creation of a Federal Council, the State Councils legislate only on matters affecting the State.

The Residents are appointed by the Secretary of State and are subordinate to the Chief Secretary and to the High Commissioner for the Malay States, who is also the Governor of the Straits Settlements. They are assisted by a staff of European officers, whose duty it is to carry out the executive functions. The administration of each State is carried on, as far as may be, on the Colonial System.

#### *The Federation.*

In 1895 a treaty was signed by the rulers of the four States, by which they agreed to constitute their countries into a Federation (to be known as the Federated Malay States), to be administered under the advice of the British Government, while all existing treaties and arrangements were to stand. The States agreed to the appointment of an officer, to be styled Resident-General of the Malay States,\* to control the Residents appointed to each State, and to be the means of communication between the State Governments and the High Commissioner. They agreed to follow the Resident-General's advice in all matters of administration other than those touching Islam. Subject to the authority created by the appointment of the Resident-General, the system of administration under the advice of British Residents remained unchanged.

\* The title of this post has since been altered to Chief Secretary to Government.

The States undertook to give each other material assistance in men and money, the wealthier States assisting those in want of help, and all moneys so advanced being considered as loans; and also undertook to raise and equip a force of Indian troops for service throughout the States, and to supply a portion of these troops on requisition for the defence of the Colony of the Straits Settlements, should Great Britain be at war with any foreign Power.

It was also provided by the Treaty of 1895 that the rulers of the Federated States should meet periodically in one of the States, under the presidency of the High Commissioner, to discuss affairs of mutual interest. The first of these meetings was held at Kuala Kangsar, Perak, in July, 1897, and was attended by the High Commissioner, the rulers of all the four States, with their most important chiefs, the Resident-General, and all the British Residents. At this meeting many important matters were discussed and arrangements made to deal with them in the councils of the various States.

The second meeting was held at Kuala Lumpur in July, 1903, and at it the Sultan of Perak expressed for himself and the other Malay rulers entire satisfaction with the administration of affairs.

No further meetings of this nature have been held since 1903, as the necessity for them has been removed by an important development of the principle of Federation, which was introduced in 1909. In that year a Federal Council was created by an agreement between the High Commissioner and the four native rulers. The object in view, as stated in the preamble to the agreement, was to provide means "for the joint arrangement of all matters of common interest to the Federation or affecting more than one State and for the proper enactment of all laws intended to have force throughout the Federation or in more than one State." Under an Agreement concluded in 1927 the Federal Council was reconstituted with the High Commissioner as President, twelve official, and eleven unofficial members to be nominated by the High Commissioner with the approval of the King. At least four of the unofficial members are, if possible, to be Malays. The Federal Council generally meets three times a year and considers the drafts of laws, which are to apply to more than one State, and the annual estimates of the revenue and expenditure of the four States. The first meeting of the Council was opened on the 11th of December, 1909, at Kuala Kangsar.

#### *Climate.*

The temperature of the West Coast of the Malay Peninsula has but a small annual range. On the East Coast, however, the North-East Monsoon, lasting from November until March, causes a distinct contrast with the rest of the year with regard to temperature, wind and rainfall. At Jelebu, in Negri Sembilan, the driest station where records have been kept, the average rainfall for 1891-1929 was 65 inches, but in the mountains the average yearly rainfall is very high, being nearly 250 inches near Taiping. The heat is at times oppressive, although 100° F. has never been recorded in the shade, but the nights generally are cool. On some of the higher mountains (5,000 feet) the night temperature has been known to fall to 42° F. In the day time there is almost always a breeze to modify the heat. The Peninsula lies within the region of the South-West and North-East Monsoons, but the only really strong regular wind is the North-East Monsoon, which strikes the East Coast from the China Sea. Violent squalls, known as "Sumatras," are not infrequent on the West Coast of the Peninsula between April and October. Generally they are of short duration and occur during the night.

#### *Population.*

The result of the census taken in 1931, as far as they are at present available, show that the population of the Federated Malay States has increased during the decade from 1,324,890 to 1,713,096 or by 29·3%.

The racial composition of the population may be roughly analysed as follows:—

Malays of British Malaya	..	443,618
Other Peoples of Malay Archipelago		150,113
Chinese	..	711,540
Indians	..	379,998
Europeans	..	6,350
Eurasians	..	4,251
Others	..	17,228
Total	..	1,713,096

These figures indicate the predominant influence of immigration as does the fact that only 47·2% of the population enumerated was born in British Malaya.

#### *Railways.*

The Federated Malay States Government owns the railways both in the Federated Malay States and the Colony of the Straits Settlements (Singapore Island, Malacca, and Province Wellesley) and also in the Unfederated States of Kedah, Perlis, and Kelantan. It has leased the Johore State Railway (121 miles), extending from Johore Bahru at the Southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the Federated Malay States. At Gemas the line branches into the West Coast and the East Coast Lines; the West Coast Line runs North-North-West through Negri Sembilan, Malacca, Selangor, Perak, and Province Wellesley to Prai—the port opposite Penang Harbour—490 miles from Singapore. From Bukit Mertajam near Prai the line proceeds northwards through the Unfederated States of Kedah and Perlis, to the Siamese frontier station of Padang Besar, 582 miles from Singapore. Through traffic with the Siamese State Railways was opened on July 1st, 1918, the distance between Singapore and Bangkok being 1,197 miles. Through services are in operation between Penang and Bangkok, the journey occupying 27 hours.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the North-East Coast of the Unfederated State of Kelantan, 327½ miles from Gemas. At 142 miles the line passes through Kuala Lipis, the Capital of Pahang and at 187½ miles crosses the Pahang-Kelantan Border. Guillemard Bridge across the Kelantan River at 292 miles is the largest bridge in Malaya. It is 2,166 feet long and consists of 5 spans of 250 feet and 5 spans of 160 feet. The East Coast Line provides an alternative route to Siam.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 13 miles to the Golok River at the Siamese Boundary, where it joins with the Siamese line running to Haad Yai Junction, where a junction is made with the main Bangkok-Penang line.

Through working between the Federated Malay States and Kelantan via the Siamese State Railways commenced in 1921, and via the East Coast Railway in 1931.

Branch lines connect the main line with the ports on the West Coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a roadway has been built across the Johore Strait, connecting the Island of Singapore with the Peninsula.

*Perak.*

*His Highness Paduka Sri Sultan Iskandar Shah, K.C.M.G., K.C.V.O., ūni al-Marhum al-Sultan Idris.*

Perak is the most northerly of the Federated States on the west coast, touching Province Wellesley on the north and Selangor on the south having an area of 7,800 square miles. About 1850 the discovery of tin in Larut was followed by the immigration of Chinese in great numbers. Since the appointment of a British Resident in 1874, the record of the State has been one of remarkable progress.

The State is well watered, the Perak (with its tributaries, the Singor, the Temengor, the Rui, the Plus), the Kinta, Batang Padang, Bidor and Sungkai, being the most important rivers. Other rivers of importance are the Krian, the Kurau, and the Bernam (with its tributary, the Slim). The mountains on the east boundary which are part of the main range of the Peninsula, rise to a height of over 7,000 feet.

Sanatoria have been established on the Larut Hills and on Gunong Kledang, at heights varying from 3,300 to 4,500 feet. Experimental gardens with English flowers and vegetables are to be found on the Larut Hills.

The chief exports are tin and rubber. Coconuts and rice are extensively grown. In the Krian district the Government has completed an extensive scheme for the irrigation of more than 74,102 acres of land, the larger proportion of which is already under cultivation for rice.

Larut, Kinta, Batang Padang, and Klian Intan are the chief mining districts. The district of Batang Padang lies between the Kinta Valley and the Selangor boundary, and contains a little gold and wolfram mixed with its tin.

The total mileage of completed roads in Perak is (a) 981 of metalled and (b) 70 of unmetalled cart roads, 1,003 miles of bridle and other paths.

The British Resident has residencies at Taiping, the Headquarters of Government, and at Ipoh, the chief commercial centre. The chief towns are Ipoh, Taiping, Kuala Kangsar, Kampar, and Tapah. The chief port is Teluk Anson.

Since the Anglo-Siamese treaty of 1909 the territory claimed by Perak for many years, and held by Patani since 1826, has been formally ceded to Perak, and the State now includes the whole watershed of the river that gives it its name. The new territory which was taken over in 1909 and incorporated in the Upper Perak District, exceeds 1,000 square miles of area. It extends from Kedah on the West to Legeh on the East, and contains the tin mines of Klian Intan and much good stanniferous country. This territory is well watered, and the rolling plains of the Kroh plateau, 1,000 feet above the sea, afford a healthy Government station. At Tasek on the Kedah border there is a small natural lake. At the time when the territory was taken over the population was about 3,000 of various nationalities.

*Selangor.*

*His Highness Ala'udin Sulaiman Shah, G.C.M.G., ūni Al-Marhum Raja Muda Musa, Sultan.*

Selangor, situated on the Western side of the Peninsula, is bounded on the North by Perak, on the East and South-east by Pahang and Negri Sembilan, and on the West by the Straits of Malacca.

Its coast line extends for about 125 miles. Where the State touches the central range of the Peninsula there are several peaks of over 5,000 feet and one of 5,812 feet.

The state is drained by four rivers: The Bernam, forming the boundary between Perak and Selangor; the Selangor, the Klang and the Langat. The natives are said to be the descendants of a Colony from the Celebes.

For administrative purposes the State is divided into six districts, viz., Kuala Lumpur, Klang, Ulu Langat, Ulu Selangor, Kuala Langat, and Kuala Selangor, each under a District Officer.

The capital of the State is Kuala Lumpur, which is also the headquarters of the administration of the Federated Malay States. It is the largest town on the mainland of the Peninsula, with a population of 111,737 (1931 Census). It has a water supply from an impounding reservoir 7 miles distant, and is also lighted by electricity. There are 114 miles of town streets. It also possesses a picturesque public garden covering about 180 acres, and several imposing Government buildings, the principal being the Government offices of modern Saracenic design, with a clock tower 130 feet high, town hall, museum, courts, prison, railway station and offices, and post office. There are also branches of the Chartered Bank of India, Australia and China, the Hong Kong and Shanghai Banking Corporation, and the Mercantile Bank of India. The currency is the Straits Settlements dollar, with a fixed exchange at two shillings and fourpence.

There were 442 Schools in the State in 1930, including 6 Government English Schools, 92 Government Vernacular Schools, 212 grant-in-aid Vernacular Schools, 10 grant-in-aid English Schools, 24 unaided English Schools and 98 unaided Vernacular Schools.

Port Swettenham, situated at the mouth of the Klang River, and 27 miles by rail from Kuala Lumpur, is the chief port, and is regularly visited by ocean-going steamers. The aggregate tonnage of vessels, exclusive of native craft, which called at the port in 1930 was 5,902,056.

The total Revenue of the State in 1930 was \$25,175,349, and the expenditure \$31,315,154. There is no public debt except such as is included in the public debt of the Federation.

The principal sources of revenue are customs, excise, and land. Import duties are charged on spirituous liquors, wines, beers, petroleum, tobacco, matches, and alum. In 1930 the gross total value of imports was \$33,636,895 and the exports \$70,041,629.

The chief industry of the State is tin mining. The amount of tin exported in 1930 was 306,101 pikuls valued at \$22,677,486. The area alienated for mining is 52,144 acres. Coffee planting under European supervision, made good progress some years ago but has now been almost entirely abandoned. In 1930 there were 113,192 acres under coconuts. Rice, gambier, pepper, and other products are grown with success. The rubber industry which had made great progress has met with a set back owing to the unprecedented slump. At the end of 1930 the area under rubber cultivation was approximately 501,351 acres. The value of cultivated rubber exported during 1930 was \$37,145,872.

The length of roads upkept in 1930 was 1,038 miles as against 1,011 miles in 1929. The total number of miles metalled during the year 1930 was 171 miles as against 164 miles in 1929; 152 miles of road were treated with bituminous materials. The average cost of maintenance of metalled and gravelled roads was \$1,293 per mile.

*Negri Sembilan (The Nine States).*

*His Highness Muhammad, G.C.M.G., K.C.V.O., ūni Almarhum Aniah, Yang Di-pertuan Besar.*

The Federation of States known as the Negri Sembilan lies on the Western side of the Peninsula and is bounded on the North-west by Selangor, on the North-east by Pahang, on the East by Johore, on the South by Malacca, and on the South-west by the sea.

The headquarters of the Resident are at Seremban in Sungai Ujong, where the principal Government

offices are situated. District Officers are stationed at Port Dickson, at Kuala Klawang in Jelebu, at Ulu Muar in Kuala Pilah, and at Tampin.

The value of imports amounted to \$15,313,586 in 1930 and that of exports to \$28,249,222. The revenue of the State, which in 1930 amounted to \$10,766,116 is derived mainly from tin mining and agriculture.

At the end of 1930, 8,458 acres of land were in occupation for mining, and 546,975 acres for building and agriculture. The alluvial tin fields are worked and owned by Chinese, whilst the hydraulic and other workings requiring the installation of expensive machinery are supervised and financed by Europeans. Gold reefs exist in Gemencheh and on the Muar River, but have not up to the present proved remunerative. The Malay population is almost entirely agricultural. By far the larger portion of this population inhabits the Kuala Pilah and Tampin districts, where there are extensive and fertile rice fields. The Malays, however, merely aim at supplying their own needs and do not cultivate for export or even for the supply of the Chinese and other foreign immigrants.

A great part of the State is mountainous, the rest consisting of undulating country suitable for agriculture. The whole State is well watered, the chief rivers being the Muar and the Linggi, the latter of which forms, for some distance, the boundary between the State and the Settlement of Malacca.

Much valuable timber is found in the forests of the State, and the areas of reserved forests are being considerably extended with a view to its preservation.

The chief agricultural products are rubber, rice, and coconuts. During 1930 the areas under cultivation with these products were approximately as follows:—

Rubber .. ..	352,389 acres
Rice .. ..	32,451 "
Coconuts .. ..	32,112 "

Coffee is very little grown now, and its place has been taken by rubber. The cultivation of rubber has increased very greatly of late years, and there is now a considerable European planting community in the State.

Educational facilities comprise 88 Malay Vernacular Schools, seven English Schools, and 63 Tamil Schools.

The State is provided with a good system of roads, connecting the centres of each district with headquarters and each other. The total mileage is 496 miles of metalled roads of which 330 miles are tarred, together with 272 miles of bridlepaths, which provide access to outlying portions of the districts.

#### *Pahang.*

*His Highness Al-Moktasim Bi'Allah Al-Sultan Abdullah, K.C.M.G., ibni Al-Marhum Al-Sultan Ahmad Al-Maazam Shah, Sultan.*

Pahang occupies a large portion of that part of the Malay Peninsula which lies on the eastern side of the central mountain range. It is bounded on the North by the States of Kelantan and Trengganu, on the South by the territory of Johore, on the West and South-west by Perak, Selangor, and Negri Sembilan, and on the East by the China Sea. It is the largest of the States of the Federation.

Several peaks of the main range of mountains forming the western boundary exceed 6,000 feet, the highest being Gunung Kerbau, which is 7,160 feet. Gunung Tahan, in the centre of the Pahang-Kelantan boundary, has been found to be 7,186 feet high, and is therefore the highest elevation in the Federated Malay States, and probably in the Malay Peninsula.

The State is drained by one of the largest rivers in the Peninsula, if not the largest, the Pahang River,

which is fed by the Lipis, Jelai, Tembeling, Semantan, Triang, Bera, Luit, Lepar and other rivers. To the north the Kuantan and to the south the Rompin and Endau also debouch into the China Sea, the last named forming part of the boundary between Pahang and Johore.

The total length of the Pahang River is about 285 miles, of which 232 are navigable for houseboats and other small craft. The bars at the mouth of all rivers, with the exception of the Kuantan, prevent the ingress of vessels except those of very shallow draft.

The chief industry of the State, after agriculture, is tin mining, the principal mines being in the Bentong, Raub and Kuantan districts. Gold has been worked for many years by the Raub Australian Gold Mining Company, Limited. Gold-bearing lodes have also been worked by Europeans at Penjun, Selensing, Kechau, and other places in the State; the mines have been closed for some years. From the reports of old travellers it is clear that in the eighteenth and previous centuries very large quantities of alluvial gold were exported from Pahang. The European mines mentioned above were all on the sites of extensive native workings.

The administrative headquarters of the State are at Kuala Lipis, 209 miles up stream from the mouth of the Pahang River.

The Sultan, however, resides at Pekan, the old capital which is near the mouth of the Pahang River.

The East Coast Line of the Federated Malay States Railways runs through Pahang and is now open for traffic as far as Tumpat, Kelantan.

There is a motor car service both ways from Kuala Lumpur to Kuala Lipis, 119 miles; also from Jerantut Station on the Railway to Kuantan, a distance of 109 miles.

The total mileage of metalled roads in Pahang is 393.07. The road from Kuantan to Pekan, a distance of 22 miles, is completed as regards earth-work and bridging, while metalling has been done for seven miles at each end and work on the remaining portion is proceeding steadily. A road from Batu Talam to Kuala Medang has been completed up to the 22nd mile post and it is hoped to link this road with Kuala Lipis, when funds are made available.

The total revenue of the State during 1930 amounted to \$5,432,685 and the expenditure to \$7,168,215.

There are 5 Government English Schools, 2 private English Schools, 77 Malay Boys' Schools, 5 Malay Girls' Schools, 11 Tamil Schools, 23 Chinese Schools, and 1 Javanese School in the State.

*Perak.*

*His Highness Paduka Sri Sultan Iskandar Shah, K.C.M.G., K.C.F.O., ibni al-Marhum al-Sultan Idris.*

Perak is the most northerly of the Federated States on the west coast, touching Province Wellesley on the north and Selangor on the south having an area of 7,900 square miles. About 1860 the discovery of tin in Larut was followed by the immigration of Chinese in great numbers. Since the appointment of a British Resident in 1874, the record of the State has been one of remarkable progress.

The State is well watered, the Perak (with its tributaries, the Singor, the Temengor, the Rui, the Plus), the Kinta, Batang Padang, Bidor and Sungkai, being the most important rivers. Other rivers of importance are the Krian, the Kurau, and the Bernam (with its tributary, the Slim). The mountains on the east boundary which are part of the main range of the Peninsula, rise to a height of over 7,000 feet.

Sanatoria have been established on the Larut Hills and on Gunong Kledang, at heights varying from 3,300 to 4,600 feet. Experimental gardens with English flowers and vegetables are to be found on the Larut Hills.

The chief exports are tin and rubber. Coconuts and rice are extensively grown. In the Krian district the Government has completed an extensive scheme for the irrigation of more than 74,102 acres of land, the larger proportion of which is already under cultivation for rice.

Larut, Kinta, Batang Padang, and Klian Intan are the chief mining districts. The district of Batang Padang lies between the Kinta Valley and the Selangor boundary, and contains a little gold and wolfram mixed with its tin.

The total mileage of completed roads in Perak is (a) 961 of metalled and (b) 70 of unmetalled cart roads, 1,003 miles of bridge and other paths.

The British Resident has residences at Taiping, the Headquarters of Government, and at Ipoh, the chief commercial centre. The chief towns are Ipoh, Taiping, Kuala Kangsar, Kampar, and Tapah. The chief port is Teluk Anson.

Since the Anglo-Siamese treaty of 1909 the territory claimed by Perak for many years, and held by Patani since 1826, has been formally ceded to Perak, and the State now includes the whole watershed of the river that gives it its name. The new territory which was taken over in 1909 and incorporated in the Upper Perak District, exceeds 1,000 square miles of area. It extends from Kedah on the West to Legeh on the East, and contains the tin mines of Klian Intan and much good stanniferous country. This territory is well watered, and the rolling plains of the Kroh plateau, 1,000 feet above the sea, afford a healthy Government station. At Tasek on the Kedah border there is a small natural lake. At the time when the territory was taken over the population was about 3,000 of various nationalities.

*Selangor.*

*His Highness Ala'udin Sulaiman Shah, G.C.M.G., ibni Al-Marhum Raja Muda Musa, Sultan.*

Selangor, situated on the Western side of the Peninsula, is bounded on the North by Perak, on the East and South-east by Pahang and Negri Sembilan, and on the West by the Straits of Malacca.

Its coast line extends for about 125 miles. Where the State touches the central range of the Peninsula there are several peaks of over 5,000 feet and one of 5,812 feet.

The state is drained by four rivers: The Bernam, forming the boundary between Perak and Selangor; the Selangor, the Klang and the Langat. The natives are said to be the descendants of a Colony from the Celebes.

For administrative purposes the State is divided into six districts, viz., Kuala Lumpur, Klang, Ulu Langat, Ulu Selangor, Kuala Langat, and Kuala Selangor, each under a District Officer.

The capital of the State is Kuala Lumpur, which is also the headquarters of the administration of the Federated Malay States. It is the largest town on the mainland of the Peninsula, with a population of 111,737 (1931 Census). It has a water supply from an impounding reservoir 7 miles distant, and is also lighted by electricity. There are 114 miles of town streets. It also possesses a picturesque public garden covering about 180 acres, and several imposing Government buildings, the principal being the Government offices of modern Saracenic design, with a clock tower 130 feet high, town hall, museum, courts, prison, railway station and offices, and post office. There are also branches of the Chartered Bank of India, Australia and China, the Hong Kong and Shanghai Banking Corporation, and the Mercantile Bank of India. The currency is the Straits Settlements dollar, with a fixed exchange at two shillings and fourpence.

There were 442 Schools in the State in 1930, including 6 Government English Schools, 92 Government Vernacular Schools, 212 grant-in-aid Vernacular Schools, 10 grant-in-aid English Schools, 24 unaided English Schools and 98 unaided Vernacular Schools.

Port Swettenham, situated at the mouth of the Klang River, and 27 miles by rail from Kuala Lumpur, is the chief port, and is regularly visited by ocean-going steamers. The aggregate tonnage of vessels, exclusive of native craft, which called at the port in 1930 was 5,902,066.

The total Revenue of the State in 1930 was \$25,175,349, and the expenditure \$31,315,154. There is no public debt except such as is included in the public debt of the Federation.

The principal sources of revenue are customs, excise, and land. Import duties are charged on spirituous liquors, wines, beers, petroleum, tobacco, matches, and alum. In 1930 the gross total value of imports was \$83,636,895 and the exports \$70,041,629.

The chief industry of the State is tin mining. The amount of tin exported in 1930 was 306,101 pikuls valued at \$22,877,486. The area alienated for mining is 52,144 acres. Coffee planting under European supervision, made good progress some years ago but has now been almost entirely abandoned. In 1930 there were 113,192 acres under coconuts. Rice, gambier, pepper, and other products are grown with success. The rubber industry which had made great progress has met with a set back owing to the unprecedented slump. At the end of 1930 the area under rubber cultivation was approximately 601,351 acres. The value of cultivated rubber exported during 1930 was \$37,145,872.

The length of roads upkept in 1930 was 1,038 miles as against 1,011 miles in 1929. The total number of miles metalled during the year 1930 was 171 miles as against 164 miles in 1929; 152 miles of road were treated with bituminous materials. The average cost of maintenance of metalled and gravelled roads was \$1,293 per mile.

*Negri Sembilan (The Nine States).*

*His Highness Muhammad, G.C.M.G., K.C.F.O., ibni Almarhum Aniah, Yang Di-pertuan Besar.*

The Federation of States known as the Negri Sembilan lies on the Western side of the Peninsula and is bounded on the North-west by Selangor, on the North-east by Pahang, on the East by Johore, on the South by Malacca, and on the South-west by the sea.

The headquarters of the Resident are at Seremban in Sungai Ujong, where the principal Government

offices are situated. District Officers are stationed at Port Dickson, at Kuala Klawang in Jelebu, at Ulu Muar in Kuala Pilah, and at Tampin.

The value of imports amounted to \$15,313,586 in 1930 and that of exports to \$28,249,222. The revenue of the State, which in 1930 amounted to \$10,766,116 is derived mainly from tin mining and agriculture.

Malacca then grew to be the first trading centre of the East, and after its conquest by the Portuguese in 1511, the son of the conquered King settled at Johore Lama and founded the historic Sultanate of Johore.

The history of the next 300 years, however, is an almost uninterrupted record of wars. Persistent hostilities with the Portuguese continued nearly until the arrival of the Dutch in 1602. The State bears no small part in Dutch Colonial history; relations were friendly, despite a diplomatic struggle by for commercial privileges. But, after violent attacks the Achinese, Johore had become by 1637 practically an appanage of the Achinese Kingdom. In return for assistance rendered at the successful attack on Malacca in 1641, the Dutch tried to restore Johore to its former position as the premier Malay State. A port with a customs officer existed at Singapore. But the capital was plundered and burnt by Jambi in 1673, in 1699 the Sultan was assassinated, and in 1717 the throne was seized by a Sumatran adventurer, Raja Keohil. Then the Bugis ships appeared. The subsequent process, partly conquest, partly assimilation, while disturbing to Johore, resulted in a wide extension of its sovereignty, which now spread to Pahang, Siak, Riau, Linggi and part of Selangor.

After 60 years of continuous intrigues between the Malay and Bugis chiefs the Dutch in 1784 recognised the Malay Sultan as ruler of Johore, drove the Bugis from Riau and stationed there a Resident with a garrison; after some further fighting the Malay Sultan and the Bugis viceroy accepted the position of dependent princes, but the old empire of Johore (Linggi and Klang had been ceded to the Dutch in 1787) was in a state of dissolution, the Bendahara and Temenggong being virtually territorial chiefs in Pahang and Johore respectively. This was the position when the English, by virtue of treaties made in 1819 and 1824, obtained a complete cession of the island of Singapore.

Contemporary visitors emphasize the deserted character of the country; in 1847 the capital consisted merely of 25 huts. (In 1855 the capital was moved to its present situation at Johore Bahru.) But the extension of the Pax Britannica and the assistance rendered by the Governor of the Straits Settlements "helped Johore to grow populous again," moreover, the country has been governed since 1862 by two enlightened and progressive rulers, Sultan Abubakar, who died in 1895, and Sultan Ibrahim the present ruler.

In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer; in 1910, the Sultan having had an unofficial adviser for some years, reorganised his Government with the assistance of the Governor of the Straits Settlements; in 1914 a General Adviser with enlarged powers was appointed. The recent history of the State has been a record of continued prosperity. Telephonic communication was established between Johore and Singapore in 1883; a postal service was inaugurated in 1884, letters being transported by coach till the opening of the railway across Singapore Island in 1903; in 1909 the Johore State railway, linking up with the Federated Malay States Railway system, was completed; finally, in 1924, the completion of the causeway across the Straits permits uninterrupted railway connection between Singapore and Bangkok.

#### Constitution.

In 1895 the Sultan promulgated a written constitution, to which supplements have been added.

His Highness has a Council of Ministers, consisting entirely of high Malay Officers of State, together with an Executive Council consisting of certain Malay and British officers.

The Orders of the Executive Council are carried out by a Civil Service containing Malay and European Officers.

The Legislature consists of a Council of State, to which Asiatic and European official and unofficial members are appointed.

The Judicial system resembles that of the Federated Malay States, minor cases being decided by Magistrates with appeal to the Supreme Court, and major cases by the Supreme Court, with appeal to the Court of Appeal, and thence in special cases to the Privy Council.

Cases involving matters regulated by Muhamadan law are decided in the Court of Kathi, with appeal to the Sultan in Executive Council.

Judges of the Supreme Court of the Straits Settlements and of the Federated Malay States are *ex-officio* Judges of the State of Johore, and vice versa.

### MALAY STATES NOT INCLUDED IN THE FEDERATION.

In addition to the territories comprised in the Federated Malay States, the British sphere in the Malay Peninsula includes the States of Johore, Kedah, Perlis, Kelantan, and Trengganu.

#### JOHORE.

*His Highness Sir Ibrahim, G.C.M.G., K.B.E., etc., etc., Sultan and Sovereign Ruler of the State and Territories of Johore.*

The State of Johore lies at the southern extremity of the Malay Peninsula, and is bounded on the North by Pahang, on the North-west by Negri Sembilan and Malacca, on the West by the Straits of Malacca, on the South by the Strait North of Singapore, and on the East by the China Sea.

The area of the State is approximately 7,670 square miles. The interior is in great part covered with jungle. The country is, as a whole, less mountainous than any other part of the Peninsula. The most important mountain group is formed by the Blumut Hills, which lie near the centre of the State. Mount Ophir, or Gunung Ledang, the highest peak in Johore (4,186 feet), is situated near the border of Malacca.

The principal river is the Muar, in the North-west running through the district on the same name, which was formerly a separate State, but was united to Johore in 1877. The only other rivers of importance are the Endau, in the North, which, during part of its course forms the boundary with Pahang and Johore; and the Johore river which flows into the Straits opposite to the eastern end of the island of Singapore.

The only towns of any importance are Johore Bahru, the capital, situated on the Straits, opposite to Singapore, Bandar Maharani in Muar, and Bandar Penggaram in Batu Pahat.

The climate approximates to that of Singapore and the Federated Malay States, the highest maximum and the lowest minimum temperature in 1930 being 98° and 66° respectively.

The 1931 census gives the total population at 505,311, the Malay inhabitants were found to constitute 47 per cent. of the total, and the population of Johore Bahru town was returned as 21,776.

In area, Johore approximates to Wales; in population to Cyprus, though the area, revenue, and trade of Johore are twice, thrice, and seven times respectively that of Cyprus.

#### History.

Of Johore history little is known prior to the advent of the Portuguese. A number of semi-wild "proto-Malay" tribes exist chiefly along the coasts: while the civilised occupants of the country are the descendants of the Malays who brought their civilization from Palembang in Sumatra.

As the Buddhist State of Palembang grew in power, colonies of Malays commenced to settle on the Peninsula. The "Ma-li-yi-erh" of Chinese writers had, in 1295, been long at variance with Siam. Marco Polo (1292) mentions the city of Malavir. Singapore, founded under the name of Tamasek about this time, was ruled by its own kings. A Siamese law of 1360 includes Ujong Tanah, Malaka, and Malayu among tributary states.

About 1365 A.D. Javanese from Majapahit conquered the country and destroyed Singapore.

Malacca then grew to be the first trading centre of the East, and after its conquest by the Portuguese in 1511, the son of the conquered King settled at Johore Lama and founded the historic Sultanate of Johore.

The history of the next 300 years, however, is an almost uninterrupted record of wars. Persistent hostilities with the Portuguese continued nearly until the arrival of the Dutch in 1602. The State bears no small part in Dutch Colonial history; relations were friendly, despite a diplomatic struggle by for commercial privileges. But, after violent attacks by the Achinese, Johore had become by 1637 practically an appanage of the Achinese Kingdom. In return for assistance rendered at the successful attack on Malacca in 1641, the Dutch tried to restore Johore to its former position as the premier Malay State. A port with a customs officer existed at Singapore. But the capital was plundered and burnt by Jambi in 1673, in 1699 the Sultan was assassinated, and in 1717 the throne was seized by a Sumatran adventurer, Raja Kecik. Then the Bugis ships appeared. The subsequent process, partly conquest, partly assimilation, while disturbing to Johore, resulted in a wide extension of its sovereignty, which now spread to Pahang, Siak, Rian, Linggi and part of Selangor.

After 60 years of continuous intrigues between the Malay and Bugis chiefs the Dutch in 1784 recognised the Malay Sultan as ruler of Johore, drove the Bugis from Rian and stationed there a Resident with a garrison; after some further fighting the Malay Sultan and the Bugis viceroy accepted the position of dependent princes, but the old empire of Johore (Linggi and Klang had been ceded to the Dutch in 1757) was in a state of dissolution, the Bendahara and Temenggong being virtually territorial chiefs in Pahang and Johore respectively. This was the position when the English, by virtue of treaties made in 1819 and 1824, obtained a complete cession of the island of Singapore.

Contemporary visitors emphasize the deserted character of the country; in 1847 the capital consisted merely of 25 huts. (In 1855 the capital was moved to its present situation at Johore Bahru.) But the extension of the Pax Britannica and the assistance rendered by the Governor of the Straits Settlements "helped Johore to grow populous again," moreover, the country has been governed since 1862 by two enlightened and progressive rulers, Sultan Abubakar, who died in 1895, and Sultan Ibrahim the present ruler.

In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer; in 1910, the Sultan having had an unofficial adviser for some years, reorganised his Government with the assistance of the Governor of the Straits Settlements; in 1914 a General Adviser with enlarged powers was appointed. The recent history of the State has been a record of continued prosperity. Telephonic communication was established between Johore and Singapore in 1883; a postal service was inaugurated in 1884, letters being transported by coach till the opening of the railway across Singapore Island in 1903; in 1909 the Johore State railway, linking up with the Federated Malay States Railway system, was completed; finally, in 1924, the completion of the causeway across the Straits permits uninterrupted railway connection between Singapore and Bangkok.

Malays—who are Muhammadans. Only a few families of the aborigines (Semang) are left in the forest at the source of the Muda River. They numbered 106 all told at the 1911 census.

South Kedah, the area lying South of the mountain known as Kedah Peak (Gunong Jerai), is for the most part populated with Europeans, Chinese and Tamils planting rubber, coconuts and tapioca. There is also a Malay population planting rice along the banks of the Muda River and in the low lying land along the coast. Kulim was formerly a tin-mining centre of some importance, but the alluvial deposits are now said to be worked out.

North Kedah is almost entirely populated by Malay cultivators of rice. The soil is generally a heavy fertile clay. A quantity of rice is exported annually to Penang and to the Federated Malay States.

The population of Kedah was 245,986 at the 1911 census and 338,558 at the 1921 census. At the 1931 census the population was 429,691, of whom 411 were Europeans, 108 Eurasians, 286,262 Malays, 78,415 Chinese, 50,824 Indians, and 13,671 "other races."

Galena has been found in Langkawi, and indications of coal and oil have been reported; nothing of commercial value has, however, yet been discovered, with the exception of a deposit of marble which may prove to be of value.

#### Climate.

The climate resembles that of Perak. Meteorological returns kept in ten places record an average shade temperature in the day-time rising to over 90° F. and falling to nearly 70° F. at night. The driest months are January to March and the wettest August to October, when half the annual rainfall occurs, averaging from 100 to 130 inches a year. Cholera has sometimes broken out in prolonged droughts, but the provision of a good water supply which is now completed, should prevent this. The health on rubber and other estates is good.

#### Communications.

Steamers ply between Penang and Sungai Petani (Central Kedah), and between Penang and Alor Star (the capital, six miles up the Kedah River) in North Kedah. There is a bi-weekly steamer communication between Penang and Langkawi Island.

A metalled road connects Alor Star with Province Wellesley, a distance of 45 miles. A metalled road extends to the Perlis boundary (25 miles), and a road which branches off at the 12th mile connects the State with Singgora. Another road extends to Kuala Nerang at the 23rd mile from Alor Star. A metalled road has been made to Baling and North Perak, and other metalled roads have been completed or are under construction. There are a number of earth roads connecting the tapioca and rubber estates in South Kedah with the towns; 250 miles of canals and 33 miles of irrigation channels are maintained by the Public Works Department.

The Federated Malay States railway administration has extended its railway service through Kedah into Perlis. The line leaves the main line at Bukit Mertajam, in Province Wellesley and is 98 miles in length to the Siamese frontier, trains have been running regularly since October, 1915. A connection through Perlis with the Siamese railway system has been completed, establishing railway communication between Bangkok and Singapore.

Telegraphic and telephonic communication extends throughout the State.

#### Education.

There are English schools in Alor Star (644 pupils) and Sungai Petani (205 pupils) and a Malay Girls' school in Alor Star. There are 88 Malay schools, including 5 Girls' schools.

#### Constitution.

Until the beginning of this century the Siamese Government interfered but little in the government of the country, only requiring the Sultan to refer to Bangkok matters of importance, and applications for land by foreign subjects. In 1905, however, the finances of the country had reached such a state that the Sultan was compelled to negotiate with Siam for a loan in order to avoid bankruptcy. With the loan the Siamese Government sent an adviser to advise the Sultan in the general management of the country, and more particularly in its finances.

In 1905, the Sultan by an edict appointed a State Council to assist him in the administration of the country. The first President was H.H. the Raja Muda, Tunku Abdul Aziz, who died in 1907. He was succeeded by H.H. Tunku Mahmud who was in turn succeeded in 1918 by H.H. Tunku Ibrahim. The Adviser and the Chief Malay Judge are *ex-officio* members, and two members may be nominated.

In 1913, the Sultan's health became such that it was necessary to appoint his eldest son, Tunku Ibrahim, as Regent, pending the restoration of the Sultan's health.

With the transfer of the suzerainty of Kedah from Siam to Great Britain under the treaty of 1909, the adviser appointed by Siam has been replaced by an adviser appointed by Great Britain.

#### Finance.

The amount of the loan obtained in 1905 from Siam was of \$2,600,000 at the rate of 6 per cent. This loan was, with the transfer of the suzerainty of the State from Siam to Great Britain under the treaty of 1909, taken over by the Federated Malay States Government at 4 per cent. The Federated Malay States Government paid the interest, \$120,953, due at the time of the transfer, and added it on to the capital, thus making the loan amount to \$2,720,953.

The whole of the loan due to the F.M.S. Government has been paid off. The State is now free from debt.

The public revenue and expenditure during the last five years were respectively:—

Year.	Revenue. \$	Expenditure. \$
A.H. 1345 (A.D. 1926-1927)	8,988,428	6,396,507
A.H. 1346 (A.D. 1927-1928)	7,722,507	7,325,338
A.H. 1347 (A.D. 1928-1929)	6,886,576	7,245,091
A.H. 1348 (A.D. 1929-1930)	6,586,701	6,937,299
A.H. 1349 (A.D. 1930-1931)	5,086,692	7,198,036

#### Trade.

The following were the principal exports from Kedah during the year 1349 (29/5/30 to 18/5/31:—Padi and rice, rubber, tapioca and sago, forest produce, tin-ore, fish, bricks, cattle, hides and horns, pigs and poultry.

The value of the Kedah trade with the Straits Settlements during 1349 was as follows:—Exports, \$14,032,572, imports, \$3,310,179.

The value of Kedah trade with the F.M.S. during 1349, was: Exports, \$906,381; imports, \$99,447.

## KEDAH.

*His Highness Sir Abdul Hamid Halimahah ibni Ahmad Tajudin*, K.C.M.G., Sultan; *His Highness Tunku Ibrahim*, C.M.G., C.V.O., Regent.

Kedah is a State on the West coast of the Malay Peninsular, situated between the parallels of 5° 5' and 6° 35' N. lat. and the meridians of 99° 35' and 101° 10' E. long. It is bordered on the interior (North and East) by the States of Singgora and Patani (Siamese) and by the State of Perak (F.M.S.), and extends along the sea coast from the River Sanglang, its boundary with its northern neighbour the State of Perlis (under British protection), to the Muda River, its boundary with Province Wellesley. Thence it extends behind the narrow strip of coast which forms Province Wellesley, down to the northern bank of the Krian River, its boundary with the State of Perak.

Both the island of Penang and the territory of Province Wellesley were originally part of Kedah. Penang was acquired from the "King of Quedah" by Captain Light on behalf of the East India Company by the treaty of 1786, and Province Wellesley was ceded by Kedah to Sir George Leith, on behalf of the Company, by the treaty of 1800, to enable the Company to check the piracies on the coast. A sum of \$10,000

is, under the treaty of 1869, paid annually by the Government of the Straits Settlements to the Kedah Government in respect of Penang and Province Wellesley.

The State includes the island of Langkawi and a number of smaller islands to the South. It formerly included the island of Terutau to the North of Langkawi, but this island and a small area in the interior of the State, in the eastern water-shed, were ceded to Siam in the treaty of 1909.

The mainland of Kedah is about 105 miles in length and about 65 miles in width at its widest part. Its area is, including the Langkawi groups, about 3,648 square miles. The four highest peaks on the mainland are Gunung Bintang (6,103 feet), Gunung Kangar (4,760 feet), Gunung Jerai (3,978 feet) and Bukit Perak (2,823 feet). Gunung Raia, on Langkawi Island, is 2,960 feet high.

*History.*

There are no authentic records of the early history of the State, and little is known except that the country was converted to Muhammadanism in the 16th or 16th century, and that, like the other States in the Peninsular, it was at various times under the domination of Burmah, Achén, Malacca, and Siam. Like the other States, too, it depended upon the personality of its ruler. Under a strong raja its boundaries extended to include Setul, Perlis, and part of Singgora on the North, and Krian on the South, and under a weaker man, or upon the rising of a stronger raja beyond the borders, its boundaries contracted.

There is no record of the Portuguese, during their occupation of Malacca (A.D. 1511 to 1641), having had any intercourse with Kedah. The Dutch, however, after they had wrested Malacca from the Portuguese, established Opperhoofden (commandants) in Kedah from 1654 to 1711.

From that date until 1786, when Captain Light acquired Penang from the Sultan for the East India Company, little is known of the history of the State.

In 1821, a Siamese fleet appeared off the mouth of the Kedah River, and, by a sudden descent upon the unexpected Malays, took possession of the fort, and later of the river. The Sultan, who was in the Merbok district at the time, fled to Province Wellesley, where he was afforded protection by the British Government. He was later afforded an asylum in Malacca.

In 1831, Tunku Kudin, a nephew of the Sultan, made a desperate attempt to recover Kedah from the Siamese. He succeeded in driving out the Siamese, and held the country from April until October, but was later conquered by a combined force of British and Siamese. In 1838, the Malays made another attempt under Tunku Muhammad Saad, and again succeeded in expelling the Siamese. Again, however, they were worsted by the combination of a Siamese army and a blockade by British gunboats.

In 1841 the Siamese allowed the Sultan to return to Kedah and re-assume the government. The Sultan was, however, only allowed to exercise authority over part of the territory that formerly was subject to him. Setul, Perlis, and Kubang Pasu were given to other rajas independent of him. Setul, under the treaty of 1909, is now part of Siam (Monthon Puket); Perlis is still independent and is now under British protection. Kubang Pasu was some years ago again made part of Kedah.

*General Description.*

The language line between Siamese and Malay runs through Kedah and Perlis, and in the interior parts of these States the Malays speak Siamese as freely as their own language. There is a large number of Sam-sam—a mixed race of Siamese and

The relations between Perlis and Great Britain are defined in a Treaty signed at Aron on 28th April, 1930.

The Raja is assisted by a State Council in the government of the country, and is himself President of the Council. There are four other members of the Council, one of them being the Adviser.

#### KELANTAN.

*His Highness the Sultan Ismail ibni Almarhum,  
Sultan Mohamed IV., K.C.M.G.*

The State of Kelantan is situated on the eastern side of the Malay Peninsula, and lies between latitudes 4° 35' and 6° 15' North, and between longitudes 101° 22' and 102° 37' East. It is bounded on the North by the China Sea; on the East by Trengganu; on the South by Pahang; and on the West by Perak and Siamese Territory. The area of the State is estimated to be 5,713 square miles.

As in the case of Kedah, the Government of Siam claimed rights of suzerainty over Kelantan for many years before any attempt was made to direct the administration of the State. Towards the end of the nineteenth century, at the time when the affairs of Kelantan were involved in much confusion owing to a disputed succession, a Siamese Commissioner was appointed to reside at Kota Bharu, the capital, but in spite of this fact the exact rights of Siam were a subject of constant dispute, until matters were placed on a stable footing at the end of 1902 by an agreement under which the Raja undertook to receive a British Officer in the Siamese service as his Adviser, and to administer the state according to his advice. The Adviser took up his post in 1903, and since that date great improvements have been effected in the Government of the State. The transfer to the protection of Great Britain was formally effected on July 15th, 1909.

About a sixth part of the area of Kelantan consists of a fertile plain, extending from ten to twenty-five miles from the shore; the greater part of this plain is under cultivation with padi and coconuts. From this plain the land rises gradually into mountain ranges, which reach their greatest height in the South. Gunung Tahan, on the southern boundary, is 7,186 feet high, and is the highest peak in the Malay Peninsula.

The principal river is the Kelantan, which enters the China Sea about ten miles from the western boundary of the State. The Kelantan River is a fine river some 150 miles long, navigable for launches for 80 miles. The basin of the Kelantan River, with those of its tributaries, comprises the greater part of the State. Of the other rivers, the most important are the Golok and the Semerak. By the Anglo-Siamese treaty of 1909, the Golok forms the boundary between Kelantan and the Siamese territory from its source to Kuala Tabal, where it debouches into the China Sea. The Semerak, like the Golok, is a deep river

with a shallow bar at its mouth; it enters the sea near the border of Trengganu.

Kelantan possesses a larger Malay population than any other State in the Peninsula. The total population at the 1931 census was 362,517, including 330,774 Malays, 17,612 Chinese, 6,752 Indians, 124 Europeans, 32 Eurasians, and 7,223 others.

Kota Bharu, the capital, which lies on the right bank of the Kelantan River, about eight miles from its mouth, has a population of about 15,490 people. It is a clean, well laid-out town with good metalled roads. It contains the Sultan's Palace and the British Residency. It has five schools attended by some 975 scholars. Kota Bharu is connected by telegraph with the Siamese Administration. A telegraph line connecting Kota Bharu with Pahang has been completed. Kota Bharu is also connected by telephone with Tumpat, the port of Kelantan, Pasir Puteh, Kuala Krai, Pasir Mas, Bachok, and Plekbang. Of the smaller towns the principal are Tumpat (population 2,500), Bachok (population 800), on the coast, Pasir Puteh (population 900), and Kuala Krai, the headquarters of the southern district of the State. The trunk road from Kota Bharu to Kuala Krai is open for traffic.

Pasir Puteh is connected with Kota Bharu by a road which is practicable in all weathers. The East Coast Railway, connecting Kelantan with Singapore, has been completed. There is also a daily train service between Tumpat and Penang via the Royal Siamese Railway.

The main industries of the State are agricultural. The soil is exceedingly fertile. The chief product is padi, the annual harvest of which amounts to 70,000 tons. Coconuts and betelnuts are also extensively grown in the coastal plain. The coconut palms are remarkably free from disease. As elsewhere in the Malay Peninsula, Para rubber has been largely planted in recent years; in addition to several small properties owned by Malays, there are twenty large estates owned by Europeans. The area under rubber is about 92,687 acres, of which rather more than one half comprises Asiatic holdings. Fishing and fish drying provide occupation for a large number of Coast Malays. Cattle breeding is also a large industry, though it has been necessary temporarily to restrict the export in order to maintain sufficient cattle for agricultural purposes. The women throughout the State are expert weavers, and a large number of silk sarongs are annually exported to neighbouring States.

Some 2,335 acres are held on ore mining titles for tin ore, but the production is as yet small; the only metallic export of the year being some 3½ tons of tin ore.

The chief exports of Kelantan are copra, rubber, cattle, betelnuts, fish, and silk manufactured goods. The chief imports are rice, tobacco, cotton goods, provisions, kerosene oil, gambier, sugar, timber, salt, and machinery.

The climate of the State is equable, and may be described as hot and dry compared with the rest of the Peninsula (except in the monsoon), but both temperature and rainfall vary a little during each half of the year. In the plain the temperature in the shade rarely exceeds 90°F., or goes below 69°F., except in January, when 64°F. is not unknown. The nights are cool; the land breezes in the mornings and the sea breezes in the afternoons keep the air pleasant.

In the interior the range of temperature is slightly higher, the days being hotter and the nights cooler. The rainfall averages 103 inches a year.

The currency is the Straits Settlements dollar, but a coin made from an alloy of tin and lead and called pitis is also current in the bazaar; 480 pitis equal one dollar.

Regular steamer communication is maintained between Singapore and Kelantan.

#### TRENGGANU.

*His Highness Suleiman Badaru'l-alam Shah*,  
*K.C.M.G., bin Almerhum Zainalabidin, Sultan.*

The State of Trengganu lies on the eastern seaboard of the Malay Peninsula roughly between latitude 4° 30' and 5° 45' North, and longitude 102° 15' and 103° 30' East. The area of the State is estimated to be about 5,000 square miles.

The total population of the State, as recorded by the census taken in April, 1931 is 179,789. This total is made up as follows:—

Malay races	..	..	..	164,564
Chinese	..	..	..	13,254
Indians	..	..	..	1,371
European and kindred races	..	..	..	35
Others	..	..	..	563

There are 134 miles of road open to traffic. A sixty-six-mile trunk road from Kuala Trengganu to the Kelantan boundary is nearly completed and 55 miles have been opened to light traffic. There are no railways (except for one or two light railways on mines). Communication with the interior is entirely by means of the rivers and good native paths. Telegraphic communication was established between the State, the Federated Malay States, and the Straits Settlements in 1922. There are telephone exchanges at Kuala Trengganu, Kemaman, and Besut.

The chief town is Kuala Trengganu, situated on both banks of the mouth of the Trengganu river, with a population of 13,972.

Other navigable rivers with considerable settlements at their mouths are the Kemaman, Kretai, Dungun, Paka, Marang, Ibai, Stiu, and Besut.

The public revenue and expenditure in A.H. 1349 (29.5-1930 to 17.5-1931) were \$1,235,230 and \$1,445,708 respectively.

Total value of exports from Trengganu in 1930 was \$5,227,489, and of imports \$4,799,763. The principal exports and imports were:—

The rainfall is heavy and well distributed throughout the year, though excessive during the North-east monsoon from November to February. The annual average is about 120 inches. The temperature ranges between 63° and 92° F., the greatest range in 24 hours being 25°. Soil and climate are suitable for the cultivation of Para rubber, coconuts, coffee, and pepper.

During part of the North-east monsoon season the coast is difficult of access, though seldom quite unapproachable. British protection dates only from the 14th July, 1909. The suzerainty of Siam, transferred on that date to Great Britain, was merely a nominal overlordship, of which practically the only token was the triennial despatch of the Bunga Mas to Bangkok. This tribute is not now rendered either to Siam or to Great Britain.

An Agreement between His Britannic Majesty's Government and His Highness Sultan Zainal Abidin was signed in Singapore in 1910.

This agreement of four articles provides that mutual help shall be rendered by the two Governments, and for the rendition of fugitive criminals. It also provides for the appointment of a British Officer to reside in Trengganu to be an Agent with functions similar to those of a Consular Officer. His Majesty's Government undertake to protect the Government and the State of Trengganu and all its Dependencies from attack by foreign enemies, and the Trengganu Government surrenders the management of all political matters with Foreign Governments to His Britannic Majesty's Government. The limitation of mining and agricultural concessions to any person other than natives and subjects of Trengganu is also provided for.

The relations between Perlis and Great Britain are defined in a Treaty signed at Aron on 28th April, 1930.

The Raja is assisted by a State Council in the government of the country, and is himself President of the Council. There are four other members of the Council, one of them being the Adviser.

### †TANGANYIKA TERRITORY.

#### Extent and Boundaries.

The Tanganyika Territory consists of that portion of the former Colony of German East Africa which, under Article 23, Part I, of the Treaty of Peace with Germany, the Principal Allied and Associated Powers agreed should be administered under a mandate by His Britannic Majesty. The remaining portions of the Colony, namely the districts of Ruanda and Urundi in the North-West, and the Kionga Area, South of the Rovuma River, were similarly entrusted to the administration of Belgium and of Portugal respectively. The Territory extends from the Umba River on the North to the Rovuma River on the South, the coast line being about 500 miles in length, and includes the adjacent islands. The Northern Boundary runs in a north-westerly direction to Lake Victoria at the intersection of the first parallel of latitude with the eastern shore of the lake (Mohuru Point), and thence along the first parallel of latitude until it strikes the Kagera River about 70 miles west of Lake Victoria. From this point the western boundary follows the Kagera River to approximately latitude 2°25', and thence along the eastern boundary of Urundi to the Mlagarasi River which it follows to Lake Tanganyika. The boundary then follows a line due west until it reaches the centre line of Lake Tanganyika which it follows to Kasanga (formerly Bismarckburg), at the southern end of the lake. Thence it follows the boundary of Rhodesia to the northern end of Lake Nyasa and continues along the centre line of Lake Nyasa to a point due west of the Rovuma River whence the boundary runs east and joins the Rovuma River, whose course it follows to the sea. The total area of the Territory is about 374,085 square miles, which includes about 20,000 square miles of water.

The Island of Mafia was transferred in 1922 from Zanzibar to the Territory.

#### General Description.

Along the coast lies a plain, varying in width from 10 to 40 miles, behind which the country rises gradually to a plateau constituting the greater part of the hinterland. This plateau falls sharply from a general level of 4,000 feet to the level of the lakes (Tanganyika, 2,590 feet, Nyasa, 1,607

feet), which mark the great Rift valley extending northwards to Lake Naivasha.

The seat of government is Dar-es-Salaam (population 35,000) which lies along the northern and north-western shores in an almost land-locked harbour, about 3 miles long. The chief buildings are solid and roomy. The second town in importance is Tanga, 136 miles north of Dar-es-Salaam and 80 miles distant from Mombasa. Other seaports are Pangani, Bagamoyo, Kilwa, Lindi, and Mikindani. The most important inland town is Tabora, which has a population of 25,000, and is situated at the junction of the main caravan routes from the coast of Tanganyika and from Victoria Nyanza to Nyasa. Other inland towns are, in the north, Moshi and Arusha; in the central area, Morogoro, Kilosa, and Dodoma; and in the south, Iringa, Mahenge, and Songea. On the great lakes the chief towns are Mwanza and Bukoba, on Victoria Nyanza; Kigoma, the terminus of the Central Railway; Ujiji, on Tanganyika; and Mwaya, on Nyasa.

The highest points in the Territory are in the north-east, where are the extinct volcanoes, Kilima Njaro, which rises to 19,720 feet, and is snow-capped, and Mount Meru (14,960 feet). In the south-west are the Livingstone Mountains, where the highest peak is over 9,000 feet.

Portions of the great lakes of Central Africa are included in the Territory, viz.: the southern portion of Lake Victoria, the eastern shores of the lower part of Lake Tanganyika, and the northern and north-eastern shores of Lake Nyasa. There are smaller lakes and numerous rivers.

#### Climate.

The climate of the Territory varies greatly according to the height above sea-level of the several districts. Roughly, four climatic zones can be distinguished, though even among these there are considerable local variations:—(i) The warm and rather damp coast region with its adjoining hinterland.—Here, conditions are tropical, though not unpleasant except just before and during the rainy seasons, when the heat is trying and the atmosphere humid. The average yearly temperature is 78 degrees. (ii) The hot and moderately dry zone between the coast and the central plateau (300 feet—2,000 feet). This zone is characterised by low humidity of atmosphere, less rain, and a temperature rather lower but with greater daily and yearly variations. (iii) The hot and dry zone of the central plateau between 2,000 feet and 4,000 feet in height.—The climate of this zone differs greatly in parts, but its prevailing characteristics are low humidity, little rainfall (at Tabora an annual average of 32 inches), a fairly high mean temperature, with great daily and yearly variations, sometimes exceeding 36 degrees Fahrenheit daily. The heat is dry, but not so trying to the European as the moist and steamy warmth of the coast, while the nights are invariably cold. These districts enjoy a bracing climate, and alone can be considered healthy for Europeans, but prolonged residence in these altitudes is apt to produce nervous strain, even though physical fitness is maintained. There are two well-defined rainy seasons annually. Generally speaking, the long rains begin in February or March, and last

This agreement was amended on May 24th, 1919 Under the amended agreement the Sultan agrees to accept a British Officer, called the British Adviser, whose advice must be asked and acted upon in all matters affecting the general administration of the country and the collection and disbursement of all revenues.

The ruling of Sultans dates from the seventeenth century, as there is unbroken succession from Sultan Zainal Abidin, through ten intermediary Sultans to the present ruler.

Two loans of \$1,000,000 each granted by the Straits Government in 1923 and 1925 have enabled Trengganu to resume large Ruling House Land Concessions and to commence a programme of surveys, road construction, and other development works.

A further loan of \$1,500,000 for the continuation of the road programme was approved by the Straits Settlements Government in 1928, and \$1,200,000 drawn to the end of A.H. 1349 (May 1931), at which date the Public Debt thus amounted to \$113,200,000 (\$73,333½).

The mining and agricultural resources of the State are being gradually developed.

## BRUNEI.

### *His Highness Ahmed Tajudin, Sultan.*

Brunei is a State lying between North Borneo and Sarawak, between 114° and 116° E. long., and touching the sea at Brunei Bay, in which lies the island of Labuan. It is 770 nautical miles distant from Singapore.

The Sultanate of Brunei was formerly a great and powerful State, and in the early years of the 16th century the authority of its rulers appears to have extended, not only over the Northern part of the Island of Borneo, but over the Sulu Islands and some part of the Philippines. Its wealth and importance at this period are shown by the description given by Pigafetta of the Sultan's Court, and by the fact that the early European navigators extended the name of the Sultanate to the whole of the island, "Borneo" being a corruption of Brunei. The power of the State appears to have begun to decline about the end of the 16th century, and by the middle of the 19th century it had fallen hopelessly into decay. The cession of the district of Sarawak to Sir James Brooke in 1841 was followed by many similar cessions to Sarawak and to the British North Borneo Company, and the State of Brunei has now been reduced to about 2,500 square miles, containing a population of about 30,000, and consisting of the town and district of Brunei and some outlying districts, of which the most important are Tutong, Belait, and Temburong.

In 1888, an agreement was concluded with the Sultan under which the control of foreign relations

was placed in the hands of H.M.'s Government, Whilst internal affairs were left to the Sultan, and a further agreement was made at the end of 1905, under the terms of which a British Resident has been appointed to advise and assist in the administration of the State. Until 1915 the Resident combined these duties with those of Resident of Labuan, while an Assistant Resident was stationed in Brunei. In 1915 a separate resident was appointed for Brunei and the appointment of Assistant Resident discontinued.

The chief town is Brunei, with a population of about 10,000.

Besides the old Malay town which is built over the water on the Brunei River there is a new township on the mainland which has steadily developed since 1910. There are vernacular schools at Brunei and in the out-districts. The climate resembles that of the Federated Malay States. The average annual rainfall at Brunei is a little over 100 inches.

Trade is chiefly in the hands of Chinese, of whom there are about 2,600 in the State. Native industries include fishing, cloth weaving, brass foundries, and the manufacture of silversmiths' ware. The principal imports are rice, cloth, tobacco, sugar, and petroleum, and the principal exports, cutch (mangrove extract), wild and plantation rubber, sago, and dried prawns. The trade, to which an impetus was given by the inauguration of the new system of administration, passes through Labuan.

Concessions and monopolies of all kinds were recklessly granted in the past. Many of these have now lapsed and others have been redeemed.

In 1924 the British Malayan Petroleum Company, Limited commenced prospecting and drilling operations for petroleum in the Belait District. In 1930 it became definitely established that an oil-field of considerable commercial value had been found at Seria, 10 miles North-west of Kuala Belait. The Company is now developing and testing this field for production and the export of oil by small tank steamers has already begun.

Several companies are engaged in planting Para rubber.

A cutch factory, established by a London syndicate, is at work at Brunei. The output of cutch in 1930 was 2,994 tons, valued at \$220,080.

There are two native industries of importance, the manufacture of brassware and silverware, and these are more of less restricted to certain families or guilds. Weaving is done by Brunei women, and the natives are excellent fishermen.

The revenue of the State is derived principally from the land and mining rents, from an opium monopoly under Government control, from the collection of customs duties, and from purchased Cession moneys. About half of the original Cession moneys have now been purchased by the Government.

The Public Debt on the 31st December, 1930, was \$401,000.

#### Communications.

There is regular communication with Labuan by steam launch and so with Singapore by the Straits

Steamship Company, which maintains a weekly service.

A Central Wireless Telegraph Station was opened in 1921 at Brunei with a subsidiary station at Labuan which enables telegraphic communication to be maintained with Labuan and thence by cable with Singapore and Europe. There are other Wireless Stations in the Belait and Temburong Districts.

The currency is the Straits Settlements dollar.

## †TANGANYIKA TERRITORY.

### *Extent and Boundaries.*

The Tanganyika Territory consists of that portion of the former Colony of German East Africa which, under Article 23, Part I, of the Treaty of Peace with Germany, the Principal Allied and Associated Powers agreed should be administered under a mandate by His Britannic Majesty. The remaining portions of the Colony, namely the districts of Ruanda and Urundi in the North-West, and the Kionga Area, South of the Rovuma River, were similarly entrusted to the administration of Belgium and of Portugal respectively. The Territory extends from the Umba River on the North to the Rovuma River on the South, the coast line being about 500 miles in length, and includes the adjacent islands. The Northern Boundary runs in a north-westerly direction to Lake Victoria at the intersection of the first parallel of latitude with the eastern shore of the lake (Mohuru Point), and thence along the first parallel of latitude until it strikes the Kagera River about 70 miles west of Lake Victoria. From this point the western boundary follows the Kagera River to approximately latitude 2°25', and thence along the eastern boundary of Urundi to the Mlagarassi River which it follows to Lake Tanganyika. The boundary then follows a line due west until it reaches the centre line of Lake Tanganyika which it follows to Kasanga (formerly Bismarckburg), at the southern end of the lake. Thence it follows the boundary of Rhodesia to the northern end of Lake Nyasa and continues along the centre line of Lake Nyasa to a point due west of the Rovuma River whence the boundary runs east and joins the Rovuma River, whose course it follows to the sea. The total area of the Territory is about 374,085 square miles, which includes about 20,000 square miles of water.

The Island of Mafia was transferred in 1922 from Zanzibar to the Territory.

### *General Description.*

Along the coast lies a plain, varying in width from 10 to 40 miles, behind which the country rises gradually to a plateau constituting the greater part of the hinterland. This plateau falls sharply from a general level of 4,000 feet to the level of the lakes (Tanganyika, 2,590 feet, Nyasa, 1,607

feet), which mark the great Rift valley extending northwards to Lake Naivasha.

The seat of government is Dar-es-Salaam (population 35,000) which lies along the northern and north-western shores in an almost land-locked harbour, about 3 miles long. The chief buildings are solid and roomy. The second town in importance is Tanga, 136 miles north of Dar-es-Salaam and 80 miles distant from Mombasa. Other sea-ports are Pangani, Bagamoyo, Kilwa, Lindi, and Mikindani. The most important inland town is Tabora, which has a population of 25,000, and is situated at the junction of the main caravan routes from the coast of Tanganyika and from Victoria Nyanza to Nyasa. Other inland towns are, in the north, Moshi and Arusha; in the central area, Morogoro, Kilosa, and Dodoma; and in the south, Iringa, Mahenge, and Songea. On the great lakes the chief towns are Mwanza and Bukoba, on Victoria Nyanza; Kigoma, the terminus of the Central Railway; Ujiji, on Tanganyika; and Mwaya, on Nyasa.

The highest points in the Territory are in the north-east, where are the extinct volcanoes, Kilima Njaro, which rises to 19,720 feet, and is snow-capped, and Mount Meru (14,960 feet). In the south-west are the Livingstone Mountains, where the highest peak is over 9,000 feet.

Portions of the great lakes of Central Africa are included in the Territory, viz.: the southern portion of Lake Victoria, the eastern shores of the lower part of Lake Tanganyika, and the northern and north-eastern shores of Lake Nyasa. There are smaller lakes and numerous rivers.

### *Climate.*

The climate of the Territory varies greatly according to the height above sea-level of the several districts. Roughly, four climatic zones can be distinguished, though even among these there are considerable local variations:—(i) The warm and rather damp coast region with its adjoining hinterland.—Here, conditions are tropical, though not unpleasant except just before and during the rainy seasons, when the heat is trying and the atmosphere humid. The average yearly temperature is 78 degrees. (ii) The hot and moderately dry zone between the coast and the central plateau (300 feet—2,000 feet). This zone is characterised by low humidity of atmosphere, less rain, and a temperature rather lower but with greater daily and yearly variations. (iii) The hot and dry zone of the central plateau between 2,000 feet and 4,000 feet in height.—The climate of this zone differs greatly in parts, but its prevailing characteristics are low humidity, little rainfall (at Tabora an annual average of 32 inches), a fairly high mean temperature, with great daily and yearly variations, sometimes exceeding 36 degrees Fahrenheit daily. The heat is dry, but not so trying to the European as the moist and steamy warmth of the coast, while the nights are invariably cold. (iv) The semi-temperate regions around the slopes of Kilimanjaro and Meru, of the Usambara Highlands, the Ufipa Plateau, and the mountainous areas of the south-western area (5,000 feet—10,000 feet).—Frosts occur at the higher altitudes, and the nights are cold. These districts enjoy a bracing climate, and alone can be considered healthy for Europeans, but prolonged residence in these altitudes is apt to produce nervous strain, even though physical fitness is maintained. There are two well-defined rainy seasons annually. Generally speaking, the long rains begin in February or March, and last

for two or three months, while the short rainy season extends from October to November, but the rainfall is low for a tropical country, and droughts are not infrequent.

#### History.

Plentiful evidence exists of Arab traders having visited the Territory for several centuries and of their opening up the great slave route from Bagamayo on the Indian Ocean to Ujiji on Lake Tanganyika. The British explorer, Burton, first entered the Territory in 1836, and was soon followed by Speke, Livingstone, and Stanley.

The territory was visited in 1884 by Dr. Karl Peters, who made twelve treaties with native chiefs, and in the following year the German Government established a protectorate. This arrangement was recognised by the British Government in 1886. In 1889 an Arab rising was quelled, and the first German steamer launched on Lake Nyasa. A serious native rising took place in 1905. It is estimated that some 120,000 natives died during the struggle or from its immediate results.

Early in 1916 Lieut.-General J. C. Smuts attacked and defeated the German forces at the foot of Kilima Njaro and occupied Moshi on March 13th of that year. By the end of 1916 all the country north of the Central Railway was effectively occupied by His Majesty's Forces or by Belgian troops, and a provisional civil administration was established in that area on January 1st, 1917. In November, 1917, the Germans were driven across the Rovuma River into Portuguese East Africa, and in March, 1918, the jurisdiction of the Administrator was extended to include the greater part of German East Africa. After the surrender of Major-General von Lettow-Vorbeck, in accordance with the terms of the armistice, the military forces were withdrawn, leaving only a garrison of the King's African Rifles; and a Royal Commission was issued in 1919 appointing an Administrator, The Tanganyika Order-in-Council, 1920, which was read and proclaimed in Dar-es-Salaam on September 25th, 1920, constituted the office of Governor and Commander-in-Chief. The Governor is assisted by an Executive Council. In 1921 the district of Ujiji and portions of the districts of Bukoba and Ufipa, which had formerly been administered by the Belgians, were taken over.

In 1920 draft mandates for "German East Africa" were submitted to the Council of the League of Nations in favour of Great Britain and Belgium, and these were approved by the League of Nations in 1922. The mandate for the part to be assigned to Great Britain lays down conditions directed against slavery, forced labour (except for essential public works and services), abuses in connection with the arms traffic and the trade in spirits, the recruiting of labour, transfer of native lands (except between natives) without the consent of the authorities, and usury. It is provided that nationals of States members of the League of Nations are to have complete commercial equality. An annual report is to be made to the Council of the League. By an Order in Council dated the 19th of March, 1926, provision was made for the constitution of a Legislative Council consisting of the Governor as President, thirteen official members, and not more than ten unofficial members, which came into operation on the 1st July, 1926.

#### Population.

The number of Europeans in Tanganyika Territory is approximately 6,900. There are also over 18,000 Indians, 4,000 Arabs, and 1,000 Goans.

The natives are estimated at 4,852,244. The majority of the natives are Bantu, but considerable areas in the north are occupied by the Masai and other Hamitic races, and in the south by tribes of Zulu extraction. The most important language is Swahili, which is a hybrid between Arabic and Persian and all sorts of African tongues. It is more or less spoken as a lingua franca from Aden in the north to Durban in the south, and from the Indian Ocean to the waters of the Nile and the Congo.

Most of the natives are pagans, but the majority of the coastal tribes and a few in the hinterland profess Mohammedanism.

The territory is divided into 11 Provinces as follows:—

#### Education.

During 1930 there were 3,044 Mission schools devoted to African education with an average attendance of 97,745 pupils. There were also 94 Government schools with 5,600 children in average attendance. The amount allocated to education in 1931/32 is 124,893. Two schools are maintained by Government for the education of European children, one a day school at Dar-es-Salaam and the other a small boarding school at Engare Nairobi in the Northern Province. Assistance is given to three Dutch schools in the Arusha District, to two Roman Catholic schools in Dar-es-Salaam and Tabora, to a German school in the Tanga Province, and to a private kindergarten at Dodoma. There are a number of other schools as yet unassisted from public funds in various parts of the Territory. 36 Indian schools are in existence with a total enrolment of 2,300 pupils. All these are now in receipt of financial assistance. Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

#### Forests and Minerals.

The total area under close forests is approximately 4,117 square miles, of which 96·8 per cent. is in Government Forest Reserves, 1·5 per cent. awaits reservation, and 1·7 per cent. is valuable forest in private ownership. The forests are most numerous in the north, on the shores and islands of Lake Victoria, in the North-east on Kilimanjaro and Meru Mountains; in the East along the Pare and Usambara ranges and in the Uluguru and Nguu Mountains; and at the coast, in the districts of Rufiji, Kilwa, and Lindi. Further considerable areas of close forest are situated in the highlands of Iringa Province, most of which have now been explored and demarcated for reservation, while others, including such forests as Ukwama, Kisinga and Nyumbanito, totalling over 150 square miles, have been gazetted as Forest Reserves. The number of timber-producing species is large and includes among many others the following:—Pencil Cedar (*Juniperus procera*), Podocarpus, Chlorophora

Excoela (resembling Burma Teak), Oocotea Usam-barenensis, Pterocarpus Busei, Parinarium Holstii, Pygeum africanum, Afzelia cuanzensis, Khaya Senegalensis and Cassipourea Eikii. In addition, valuable species of hardwoods occur as single trees or in groups widely scattered throughout large areas of dry savannah forest. Mangroves of excellent quality cover large areas of the littoral. Ebony and gum copal are plentiful near the coast. Bamboo and baobab are found and may prove suitable for the manufacture of paper pulp.

The following have been mined for export or local use:—Gold, diamonds, mica, salt, tin, and red ochre. Other minerals known to exist include:—Coal, copper, iron, graphite, asbestos, and soda. Extensive areas remain to be prospected. The total mineral production for 1930 was valued at £125,395.

Further information with regard to trade and cognate matters in Tanganyika Territory can be obtained from the Chairman, Tanganyika Trade and Information Local Advisory Committee, c/o The Comptroller of Customs, Dar-es-Salaam.

#### Communications.

The Territory is served by two railways of metre gauge.

1. The Central Railway from Dar-es-Salaam to Kigoma on Lake Tanganyika (77½ miles), with a branch line from Tabora (522 miles) to Mwanza (236 miles) on Lake Victoria.

2. The Tanga or Northern Railway from Tanga via Moshi (219 miles) to Arusha (272 miles). The extension Moshi to Arusha was completed in May, 1930. From Kahe Junction (206 miles) a line links up with the Kenya and Uganda Railway at Voi. The Voi-Kahe line is run under the management of the Kenya and Uganda Railway.

The two feet gauge line in the Lindi District was closed down in March, 1930.

Light motor traffic is now possible over 12,740 miles of roads during the dry season.

The ports of Lake Victoria are served by the steamers of the Kenya and Uganda Marine; those of Lake Nyasa by the Nyasaland Government steamers, and the Tanganyika Railways steamship "Liamba" and a smaller one "Mwanza," together with a Belgian service, maintains communications on Lake Tanganyika. The British steamer "Liamba" (late German s.s. "Goetzen," 796 and 427 tons gross and net respectively) was put into commission on June 9th, 1927, and maintains a fortnightly service to Mpulungu, in Northern Rhodesia, via Albertville and Southern Lake Ports.

#### Posts and Telegraphs.

The telegraph system comprises 3,579½ route miles with 7,176½ miles of wire, and the number of offices, including railway telegraph offices, open for public business is 141. The principal offices are Dar-es-Salaam, Tanga and Lindi on the coast, Bukoba and Mwanza on Lake Victoria, Kigoma on Lake Tanganyika, Kilosa, Dodoma and Tabora on the Central Railway Line, Moshi on the Kenya Border and Tukuyn on the Nyasaland Border.

The inland telegraph system forms a link of land line communication between Kenya and Uganda to the north, and Nyasaland, Northern and Southern Rhodesia, and the rest of South Africa to the south, while communication is established with the Belgian Congo through a wireless station at Kigoma.

Dar-es-Salaam is connected by cable with Zanzibar, through which is established communication with all parts of the world.

Trunk Telephone communication is provided on some of the important routes by utilising the telegraph wires when required, while between Tanga and Dar-es-Salaam the telegraph is superimposed on a permanent trunk, with an extension to Mombasa.

Thirty eight Telephone Exchange centres are established, comprising 227½ route miles with 1,091½ miles of wire.

Letter mails from Great Britain are despatched from London weekly via Marseilles, whence they are conveyed direct by vessels of the Messageries Maritimes, and by the P. & O. line via Aden, the average time in transit being 22 days. Letter mails to Great Britain are despatched from Dar-es-Salaam by all available steamers.

Parcel mails are despatched weekly by steamers of the P. & O. line from London by the all-sea route to Aden, whence they are conveyed by any steamer proceeding to Mombasa or beyond. The Aden-Mombasa-Dar-es-Salaam service is irregular, and the average time of transit of parcel mails from London to Dar-es-Salaam is 30 days.

Fortnightly mail services are maintained with India and South Africa, and there is a frequent exchange of mails by sea with Kenya Colony and Zanzibar.

Places on the Central Railway line between Dar-es-Salaam and Tabora exchange mails three times weekly, between Tabora and Kigoma twice weekly, on the Mwanza line between Tabora and Mwanza twice weekly, on the Tanga-Moshi-Arusha line between Tanga and Korogwe daily, between Korogwe and Buiko five times weekly and between Buiko and Arusha twice weekly. Outlying districts served by motor or runner have a mail service weekly, and in a few cases more frequently.

*Currency and Banking.*

The German Government and the German East Africa Company issued local rupees of the Indian Standard, and subsidiary coins. But the German rupee was exchanged for two shillings of East African Currency and withdrawn from circulation. Indian Rupees (coins and notes) have been demonetised. Shillings and subsidiary coins, and currency notes of the East African Currency Board have been introduced at the rate of twenty shillings to the pound sterling and this is the only currency now recognised.

The Banks operating in the Territory are the National Bank of India, the Standard Bank of South Africa, Barclay's Bank (Dominion, Colonial, and Overseas), and the Banque du Congo Belge.

*Trade and Customs.*

Since 1923 the Customs Tariff of the Territory has been identical with that in force in Kenya and Uganda and provision was made for the duty-free interchange of all goods grown, produced or manufactured in any one of the three territories. In 1927 the Customs management laws of the three territories were co-ordinated, and on the 1st August, 1927, effect was given to an Agreement under which all goods on which duty had been collected in one of the territories may be transferred to any of the other territories without further formality except the preparation of simple transfer forms, on which inter-territorial adjustments of revenue are subsequently arranged.

The tariff was revised in 1930, being enacted simultaneously in Tanganyika, Kenya, and Uganda. The basic fiscal rate is 20 per cent. *ad valorem*, assessed on the current domestic value of the goods in the exporting country together with the cost of packing, delivery on board, freight, insurance and all other charges up to the time of importation into the Territory. On certain goods which permit of such an imposition duty is charged at specific rates corresponding generally to an equivalent *ad valorem* rate of 20 per cent. On liquors and similar spirits the duty is 40 shillings per Imperial gallon, while whisky, brandy, gin and rum are charged with duty at 40 shillings per proof gallon as ascertained by Syke's hydrometer. Manufactured tobacco is liable to 62½ per cent. *ad valorem*, with a minimum of 5 shillings per pound on cigars, and 2/40 per pound on cigarettes and tobacco. In the case of certain specific commodities such as sugar, timber, wheat flour, bacon and ham, butter, cheese and ghee, which can be produced locally in sufficient quantity to meet the demands of the three territories, provision is made, in the form of additional "suspended" duties, for a modified degree of protection. A reduced rate of 10 per cent. *ad valorem* is payable on building materials, metals, tools, printing materials, lubricants, paints, sporting goods, children's toys, and infants' foods, while the free list includes machinery, packing materials, ships and boats, aircraft, motor and steam lorries and tractors, materials and equipment for the construction and maintenance of telegraph and telephone lines and of railways, tramways and roads; medicines, disinfectants and insecticides; coal, coke and oil fuel; fertilisers; blasting compounds; filters and refrigerators; surgical and scientific instruments, and all used personal and household effects imported as passengers' baggage.

The values in pounds sterling of the import and export trade of the Territory, the total Customs receipts, and the tonnage of vessels entered at Tanganyika ocean ports, are given below. The import figures are exclusive of Government imports, transit traffic, and bullion and specie, while transit exports are similarly excluded from the export figures.

mouths of the Orinoco. The distance between Chacachacare, the most westerly of the Bocas Islands and Venezuela is only seven miles. The island of Tobago (formerly in the Windward Islands) was amalgamated with Trinidad by an Order in Council under the Act 50 & 51 Vict., c. 44. on 1st Jan., 1889.

#### History.

Trinidad was discovered by Columbus, on his third voyage, on the 31st July, 1498; and taken possession of by him for the crown of Spain. No Governor was, however, appointed by the King of Spain until 1532, and even then, and for many years afterwards, the Spanish colonists had the greatest difficulty in maintaining a footing in the island. It was visited by Sir Robert Dudley, and by Sir Walter Raleigh in 1595, who signalled his visit by burning the newly-founded town of St. Joseph, and it was included in the Earl of Montgomery's grant, 1628. In 1640 it was raided by the Dutch, and again in 1677 and 1690 by the French. Towards the end of the 17th and the beginning of the 18th centuries, cocoa was largely and successfully cultivated, but a blight fell upon the plantations about 1725, and Trinidad made scarcely any progress until 1783, when, in consequence of the representations made to the Court of Madrid by M. Rome de St. Laurent, a French planter of Grenada, who, when on a visit to the island, had been struck by its extraordinary fertility, a Royal cedula or proclamation was issued, by which extraordinary advantages were offered to foreigners of all nations to settle in Trinidad, the sole condition imposed, and that not very strictly insisted upon, being that they should profess the Roman Catholic religion. The consequence of this proclamation was a large influx of population, which was soon augmented by many French families, who were driven from St. Domingo and elsewhere by the terrible events of the French Revolution, and to this cause is to be traced the preponderance of the French element in a colony which never belonged to France.

On the 12th February 1797, Great Britain being then at war with Spain, a British expedition sailed from Martinique for the reduction of Trinidad. The expedition resulted in the surrender of the island to His Majesty's forces, and on the 18th February, 1797, the articles of capitulation were signed by Sir R. Abercromby, Admiral Harvey, and Chacon, the Spanish Governor.

In 1802 Trinidad was finally ceded to the Crown of Great Britain by the Treaty of Amiens.

The population of Trinidad and Tobago at the census of 1921 was 365,913. The white population is chiefly composed of English, Portuguese, French, and Spanish. There is also a large number of East Indians, totalling 130,542. The French lower classes speak a *patois* peculiar to the West Indies.

#### Constitution.

The Government is administered by a Governor, with an Executive Council of seven members. The legislative body is the Legislative Council of Trinidad and Tobago, which was reconstituted by Letters Patent and an Order in Council which came into operation on 21st August, 1924. It now consists of the Governor, the Colonial Secretary, the Attorney-General, the Treasurer, nine nominated official members, six nominated unofficial members and seven elected members. Trinidad is divided into six electoral districts, each returning one member. Tobago forms the seventh electoral district.

#### General Description.

The north coast is rock bound through its whole extent, the east coast is so exposed to the surf as to be almost unapproachable, while the south coast is steep in most parts; only on the west coast is there a good natural harbour, at Chaguaramas. The whole Gulf of Paria, however, is so shut in and sheltered as to afford a most safe anchorage. The climate of Trinidad is tropical and may be divided into two seasons, a dry season from January to the middle of May, with an average rainfall of 2 to 3 inches per month, and a wet season from June to December, with an average of 8 inches per month. The coolest months of the year are December to April. The average temperature during the day is 84 and during the night 74. The average rainfall in 1930, from records taken at 78 stations, was 64.13 ins. The climate is healthy and by no means hurtful to Europeans, provided reasonable precautions are taken. Hurricanes are unknown.

There are three ranges of hills running roughly east and west, the most northerly fringing the north coast, and rising to 3,000 feet; the central range runs south-west from Manzanilla point to San Fernando, and the southern runs parallel and near to the south coast. There are numerous rivers, but none of them of any size or navigable, and all running east or west.

The soil is varied, extremely fertile, and excellently adapted to the growth of tropical products, more particularly of sugar, cacao, and coconuts, which are its staples.

The chief town and principal port is Port of Spain (population by the census of 1931, 70,077), situated on a gently inclined plane near the north-east angle of the Gulf of Paria. It is a port of registry, and had, on 31st Dec., 1929, 34 vessels registered. Ten miles of electric tramway and 21,234 miles of telephone have been constructed in Port of Spain and its environs. The latter also extends to some of the country districts.

#### Production and Industry, Trade and Customs.

The quantity and value of the principal products exported during the year 1930 were:—

	Quantity.	Value. £
Asphalt . . . .	118,055 tons	313,397
Bitters . . . . .	22,698 galls.	38,065
Cocoa . . . . .	64,261,993 lbs. (a)	1,363,789
Coconuts . . . .	5,886,127 nuts	25,830
Copra . . . . .	21,974,628 lbs. (b)	176,627
Molasses . . . .	899,051 galls. (c)	11,238
Rum . . . . .	72,063 "	14,313
Petroleum (crude & fuel)	213,311,382 "	1,533,023
Petrol Spirit . .	53,332,576 "	1,204,902
Refined Kerosene	1,807,916 "	(d) 50,913

*Sugar.*—The sugar crop yielded 69,139 tons in 1930.

Canes are grown not only by the Estates but also by Cane Farmers, who sell usually on a sliding scale, to the Factories.

*Coconuts.*—The coconut industry continues to expand. The value of the exports of coconuts, copra and coconut oil in 1930 being 2,707,737, compared with 281,455, in 1929.

(a) Re-exports 10,436,473 lbs. of a value of	227,733.
(b) " 83,369 "	662.
(c) " 44,033 galls. "	3,908.
(d) " 3,461 "	244.

**Asphalt.**—The asphalt lake, 114 acres in extent, situated in the Ward of La Brea, was first leased as a whole in 1888 for 21 years. The lease was renewed for a further period of 21 years from the 1st February, 1909. In February, 1925, a fresh lease of the lake comprising 109 acres was made to the Trinidad Lake Asphalt, Limited, for 21 years, from the 1st February, 1930, on payment of the following Royalties and Export Duties:—

For each ton of Crude Pitch or Asphaltum a Royalty of 2s. 6d. and an Export Duty of 6s.

For each ton of Dried Pitch or Asphaltum a Royalty of 3s. 6d. and an Export Duty of 6s. 11d.

The quantity of Asphalt produced during 1930 was 157,859 tons as against 219,603 tons in 1929.

The quantity of Asphalt exported during 1930 was 118,055 tons of the value of £13,397, and yielding a revenue of £3,473, as compared with 164,311 tons exported in 1929 of a value of £32,085, and yielding a revenue of £8,521.

**Petroleum.**—At the close of 1930 there were fourteen Companies actively engaged in the exploitation of oil in the Colony. These Companies, having a total share capital of more than 14,000,000, held over 137,000 acres of Crown Lands under licenses and leases, of which approximately 125,000 acres were held under mining lease. In addition, appreciable areas of private lands are held. Up to 30th January, 1902, oil rights were not reserved by the Government when disposing of Crown Land, but after that year all Crown grants reserve the oil rights to the Crown. There are, consequently, three categories of oil lands, viz., lands disposed of prior to 1902 in which the oil rights rest in the surface owner. Land sold since that date in which the oil rights are reserved to the Crown, and lands where both the surface and the underlying oil remain the property of the Crown.

The principal oil producing companies are the Trinidad Leaseholds, Limited, from Crown and private lands at Fyzabad, Barrackpore, etc.; the United British Oilfields of Trinidad, Limited, from Crown and private lands at Point Fortin, Parry Lands, etc.; the Trinidad Lake Petroleum Company, Limited, from their own lands at Brighton; the Petroleum Development Company, Limited, from Crown Lands in the Ward of Oropuche; the Apex (Trinidad) Oilfields, Limited, from Crown and Private Lands at Fyzabad; Siparia; the Trinidad Central Oilfields, Limited, from Crown Lands at Tabaguite and Guapo; the Kern (Trinidad) Oilfields, Limited, from Crown and private lands at Guapo, the Trinidad Oilfields Operating Co., Ltd., from private lands at Palo Seco, Fyzabad and San Francique, the Trinidad Petroleum Development Co., Ltd., from Crown and private lands at Naparima, Palo Seco and Fyzabad, the Venezuelan Consolidated Oilfields, Ltd., from private lands at Fyzabad, and Palo Seco and the Fyzabad Dome Oilfields from private lands at Fyzabad. There are five refineries at work in the Colony situated at Pointe-à-Pierre, Point Fortin, Brighton and Tabaguite, and La Brea, and all grades of petroleum products from petrol to road oil are produced. The total quantity of oil produced during 1930 was 329,661,745 gallons, an increase of 24,613,925 gallons over the production for 1929. Of this total, 184,112,810 gallons were from Crown Lands or lands in which the oil rights belonged to the Crown. The Royalty paid by operating companies on oil, won from Crown rights during the year 1930, amounted to £77,260,.

as against £74,937, in 1929, and wayleaves to £8,585, as against £8,844, in 1929. The quantity of crude oil and products exported amounted to 268,758,245 gallons valued at £2,790,695, as against 288,505,805 gallons valued at £3,051,450, in 1929.

**Fruit.**—Increased attention is being given to the possibility of establishing an export trade in fruit. A Fruit Growers' Association has been formed for the purpose of developing the fruit industry. Exports during the year 1930 were valued at £27,540.

Better prices have given renewed vigour to the lime trade. Several factories have commenced operations within recent years in Trinidad, and one was formed in 1930 in Tobago.

The cultivation of Para rubber has been successfully carried out on one estate.

Of the total area of the Colony, including Tobago, 1,367,236 acres, the alienated acreage at the end of December, 1930, was estimated to be approximately 686,400 acres. About 330,000 acres are under cultivation.

The chief imports are textiles, flour, and rice, dried fish and meat, hardware, machinery, and lumber. About one-third, and one-fourth of the whole trade of the Colony is with the United Kingdom, and the United States of America respectively.

Under the Customs Tariff, goods of Empire origin are admitted at a preferential rate of duty, the principal items being entitled to a preference of 50% of the general rate of duty. Approximately one half the list of items on the tariff are chargeable with duty *ad valorem*, the remainder, including all high duty goods, being subject to specific duties.

The following tables show the direction of the import and export trade of the Colony for 1930:—

nouths of the Orinoco. The distance between Chacachacare, the most westerly of the Bocas islands and Venezuela is only seven miles. The island of Tobago (formerly in the Windward Islands) was amalgamated with Trinidad by an Order in Council under the Act 50 & 51 Vict. s. 44. on 1st Jan., 1889.

#### History.

Trinidad was discovered by Columbus, on his third voyage, on the 31st July, 1498; and taken possession of by him for the crown of Spain. No Governor was, however, appointed by the King of Spain until 1532, and even then, and for many years afterwards, the Spanish colonists had the greatest difficulty in maintaining a footing in the island. It was visited by Sir Robert Dudley, and by Sir Walter Raleigh in 1595, who signalled his visit by burning the newly-founded town of St. Joseph, and it was included in the Earl of Montgomery's grant, 1628. In 1640 it was raided by the Dutch, and again in 1677 and 1690 by the French. Towards the end of the 17th and the beginning of the 18th centuries, cocoa was largely and successfully cultivated, but a blight fell upon the plantations about 1725, and Trinidad made scarcely any progress until 1783, when, in consequence of the representations made to the Court of Madrid by M. Rome de St. Laurent, a French planter of Grenada, who, when on a visit to the island, had been struck by its extraordinary fertility, a Royal cedula or proclamation was issued, by which extraordinary advantages were offered to foreigners of all nations to settle in Trinidad, the sole condition imposed, and that not very strictly insisted upon, being that they should profess the Roman Catholic religion. The consequence of this proclamation was a large influx of population, which was soon augmented by many French families, who were driven from St. Domingo and elsewhere by the terrible events of the French Revolution, and to this cause is to be traced the preponderance of the French element in a colony which never belonged to France.

On the 12th February 1797, Great Britain being then at war with Spain, a British expedition sailed from Martinique for the reduction of Trinidad. The expedition resulted in the surrender of the island to His Majesty's forces, and on the 18th February, 1797, the articles of capitulation were signed by Sir R. Abercromby, Admiral Harvey, and Chacon, the Spanish Governor.

In 1802 Trinidad was finally ceded to the Crown of Great Britain by the Treaty of Amiens.

The population of Trinidad and Tobago at the census of 1921 was 365,913. The white population is chiefly composed of English, Portuguese, French, and Spanish. There is also a large number of East Indians, totalling 130,542. The French lower classes speak a *patois* peculiar to the West Indies.

#### Constitution.

The Government is administered by a Governor, with an Executive Council of seven members. The legislative body is the Legislative Council of Trinidad and Tobago, which was reconstituted by Letters Patent and an Order in Council which came into operation on 21st August, 1924. It now consists of the Governor, the Colonial Secretary, the Attorney-General, the Treasurer, nine nominated official members, six nominated unofficial members and seven elected members. Trinidad is divided into six electoral districts, each returning one member. Tobago forms the seventh electoral district.

#### General Description.

The north coast is rock bound through its whole extent, the east coast is so exposed to the surf as to be almost unapproachable, while the south coast is steep in most parts; only on the west coast is there a good natural harbour, at Chaguaramas. The whole Gulf of Paria, however, is so shut in and sheltered as to afford a most safe anchorage. The climate of Trinidad is tropical and may be divided into two seasons, a dry season from January to the middle of May, with an average rainfall of 2 to 3 inches per month, and a wet season from June to December, with an average of 8 inches per month. The coolest months of the year are December to April. The average temperature during the day is 84 and during the night 74. The average rainfall in 1930, from records taken at 73 stations, was 64.13 ins. The climate is healthy and by no means hurtful to Europeans, provided reasonable precautions are taken. Hurricanes are unknown.

There are three ranges of hills running roughly east and west, the most northerly fringing the north coast, and rising to 3,000 feet; the central range runs south-west from Manzanilla point to San Fernando, and the southern runs parallel and near to the south coast. There are numerous rivers, but none of them of any size or navigable, and all running east or west.

The soil is varied, extremely fertile, and excellently adapted to the growth of tropical products, more particularly of sugar, cacao, and coconuts, which are its staples.

The chief town and principal port is Port of Spain (population by the census of 1931, 70,077), situated on a gently inclined plane near the north-east angle of the Gulf of Paria. It is a port of registry, and had, on 31st Dec., 1929, 34 vessels registered. Ten miles of electric tramway and 21,234 miles of telephone have been constructed in Port of Spain and its environs. The latter also extends to some of the country districts.

#### Production and Industry, Trade and Customs.

The quantity and value of the principal products exported during the year 1930 were:—

	Quantity.	Value. £
Asphalt . . . . .	118,055 tons	313,397
Bitters . . . . .	22,698 galls.	38,065

*Sugar.*—The sugar crop yielded 69,139 tons in 1930.

Canes are grown not only by the Estates but also by Cane Farmers, who sell usually on a sliding scale, to the Factories.

*Coconuts.*—The coconut industry continues to expand. The value of the exports of coconuts, copra and coconut oil in 1930 being 207,733*l.* compared with 281,455*l.* in 1929.

(a) Re-exports	10,436,773 lbs. of a value of	227,733 <i>l.</i>

Steamers calling at Trinidad comprised the following lines:—Elders and Fyffes, Leyland Line, Harrison Line, Compagnie Generale Transatlantique, Navigazione Generale Italiana, Trinidad Line (Furness Withy and Coy., Ltd.) Trinidad Line, Western Ocean Steamship Corporation, Prince Line, Ocean Dominion Steamship Corporation, Transatlantica Italiana, Royal Netherlands West India Mail, Canadian National Steamers, Aluminium Line, Orinoco Line, Nourse Line, Hamburg-America Line, Prince Line and the Horne Line. Mails are regularly forwarded and received by these steamers.

In addition an increasing number of steamers call to load oil cargoes, or to take in coal or fuel oil for bunker purposes. During the winter months a number of tourist ships call.

Aerial services were established in the Colony in 1929 by two American Companies, viz: the Pan American Airways, Incorporated, and the New York, Rio de Janeiro and Buenos Aires Line, and seaplanes now ply from Miami, Florida, via Porto Rico and the Northern Islands to the Colony and thence to South America, a weekly service in either direction being maintained by the companies in question.

In August, 1930, the Pan American Airways Inc., and the New York, Rio and Buenos Aires Line were amalgamated. A weekly air mail service to Venezuela has been established.

#### Currency and Banking.

British Currency and United States gold are legal tender. Accounts are kept in sterling by the Government and in dollars by the public, and the coin in circulation is almost exclusively British silver and bronze, there being no limit to silver as legal tender.

In 1903 an Ordinance providing for the issue of Government Currency Notes was brought into force. Under this Ordinance notes of the denominations of \$1, \$2, and \$1,000 have been issued, the total value in circulation at 31st December, 1930, amounting to 122,300.

Government Savings Banks are established in 35 districts with a head office in Port-of-Spain. The total number of depositors at 31st December, 1930, was 37,906, with deposits amounting to 470,273*s*. The savings banks are largely made use of by the East Indians, of whom at the 31st December, 1930, there were 12,651 depositors. The amount deposited by this section of the community during the year is estimated at 70,546*s*.

The Commercial Banks are (1) Barclays Bank (Dominion, Colonial and Overseas) Ltd., with a note circulation in the Colony estimated at 1,500,000*s*.; (2) the Royal Bank of Canada, with an authorized note circulation in the Colony of 1,500,000*s*.; (3) The Canadian Bank of Commerce, with an authorized note circulation of 750,000*s*.; (4) Messrs. Gordon, Grant & Company, Limited. Barclays Bank (Dominion, Colonial and Overseas) Ltd., the Royal Bank of Canada, and the Canadian Bank of Commerce have Savings

bank branches and pay the same rate of interest as is paid by the Government Savings Bank, viz. 3 per cent. The Bank of Messrs. Gordon Grant and Co., Limited, is not a bank of issue. In addition to the above Banks there is the Trinidad Co-operative Bank, an institution established in 1914, for the encouragement of thrift.

#### Education.

At the close of 1930 there were 287 elementary and intermediate schools in the Colony, 43 being Government and 244 assisted schools. There were 251 schools in Trinidad and 36 in Tobago.

The number of pupils on the roll in December, 1930, was 64,167, of whom 35,661 were boys and 28,506 were girls. The average daily attendance was 41,093, or 65·5 per cent. of the number on roll. As compared with the previous year there was an increase of 776 on the roll, or 1·8 per cent., and of 676 in average attendance or 1·7 per cent. The number of teachers and pupil teachers employed was 1,769 (1,743 in 1929).

The total expenditure on education during the year 1930, deducting the amount received in school and examination fees, was 149,968*s*. 14*s*. 3*d*. as compared with 137,625*s*. 3*s*. 7*d*. in 1929.

#### Secondary Education.

The following Colleges afford facilities for the higher education of boys:—The Queen's Royal College and its affiliated institutions, the St. Mary's College in Port-of-Spain, and the Naparima College in San Fernando, the Bishop's High School in Tobago. The St. Joseph's Convent and the St. Hilary's High School in Port-of-Spain, and the Naparima Girls' High School at San Fernando, which are also affiliated to the Queen's Royal College, provide similar education for girls.

The affiliated institutions work under the same curriculum as the Queen's Royal College. and receive a Government grant-in-aid.

Besides the public schools, of which mention has been made above, there are many private schools.

Opportunities for technical education are afforded by a Board of Industrial Training established in 1906, which also supervises a small institution for the instruction of the blind.

#### TOBAGO.

##### History.

Tobago was discovered by Columbus in 1498, at which time it was occupied by Caribs. The British flag was first planted on the island in 1580, and the sovereignty was regularly claimed by James I. in 1608. In 1625 an attempt was made by some adventurers from Barbadoes to form a colony; but many were killed by the Carib Indians, and the remaining few escaped and settled at Providence. In 1628 a grant of the island was made by Charles I. to the Earl of Pembroke. The island remained unoccupied until 1632, when 300 Zealanders were sent out by a company of Dutch merchants, who styled it New Walcheren. After a residence of about two years these settlers were all destroyed or expelled by the Indians and Spaniards from Trinidad. In 1641 James Duke of Courland obtained a grant of the island from Charles I., and in 1642 two vessels arrived with a number of Courlanders, who settled on the north

*Municipalities.*

In 1914 Port of Spain was constituted a municipal city. The corporate body created under provisions of the Port of Spain Board Ordinance, 1907, and known as the Port of Spain Town Board, was dissolved.

The next town and port is San Fernando, about 30 miles south from Port of Spain. The population at the census of 1921 was 10,610.

San Fernando has an elective municipal council and mayor. The chief source of revenue in both boroughs is a rate on property.

A charter of incorporation has been granted to Arima, an inland town about 16 miles from Port of Spain (population at 1921 census, 4,210). The total municipal revenue of the two boroughs, and town of Port of Spain for the year ended 31st December, 1930, was 186,633 $\frac{1}{2}$ ., the expenditure, 196,488 $\frac{1}{2}$ ., and the debt, boroughs of San Fernando and Arima excepted, was 279,207 $\frac{1}{2}$ ., on the 31st December, 1930. This includes the loan of 84,000 $\frac{1}{2}$ ., for the purchase of the Woodbrook Estate, which has become an important suburb of Port of Spain.

*Means of Communication.*

The service to Tobago is maintained by the Government coastal steamers "Tobago" and "Trinidad." The "Tobago" plys between Trinidad and Tobago five times per fortnight, going every alternate week by the northern and southern routes. The "Tobago" is mainly for passengers and the "Trinidad" for cargo.

The railway system consists of the following:—

The Port of Spain—Arima—Sangre Grande line (opened in 1897) 29 miles, along the southern foot hills of the northern range of hills to within 8 miles of the eastern coast.

The San Fernando—Siparia line, 44 miles (leaving the former line at St. Joseph) following roughly the western coast line of the Colony (opened to Couva in 1880, San Fernando in 1882, Siparia in 1913); total distance, Port of Spain to Siparia, 51 miles.

The Caparo valley and Caparo valley extension lines, 23 $\frac{1}{2}$  miles (opened to Tabaquite in 1898, Rio Claro in 1914), leaving the Port of Spain—San Fernando—Siparia line at Jerningham Junction (14 $\frac{1}{2}$  miles from Port of Spain) and running in a generally south-eastern direction; total distance from Port of Spain 43 miles.

The Guaracara line (10 miles) opened in 1884, leaving the Port of Spain—San Fernando—Siparia line at Marabella Junction (33 miles from Port of Spain) and running in an easterly direction to Princes Town; total distance from Port of Spain 43 miles, and

The Cipero tramway, to the south of San Fernando, also proceeding by another route to Princes Town.

The total length of this system is now 123 miles.

The railways afford opportunities of communication for passengers between all lines three times a day, and there are goods train opportunities once a day.

A suburban service of trains is run between Port of Spain and Arima (16 miles) at low fares, giving a service of 6 trains daily each way.

In connection with the railway, a steamer makes one trip a week between Port-of-Spain, San Fernando and La Brea (near the celebrated Pitch Lake), the Oilfields, Cedros, and to the south-western point of the Island at Icacos, stopping at eight intermediate places along the

coast, and carrying passengers and goods. This steamer also makes three trips a week each-way between Port-of-Spain and the Bocas entrance to the Gulf, including the Islands to the West of Port-of-Spain.

The railway stations are in telegraphic communication one with the other on all parts of the system, giving a total length of about 118 miles of telegraph and about 14 miles of telephone lines. There is also a service telephone along the Cipero Section between San Fernando and Princes Town.

The total receipts from the railways, railway-steamers, telegraphs and telephones for the year 1930 amounted to 140,409 $\frac{1}{2}$ ., and the working expenses to 167,333 $\frac{1}{2}$ ., exclusive of provision for loan and capital interest and sinking fund amounting to 99,219 $\frac{1}{2}$ .. There has been a considerable falling off in the Railway receipts during the last few years, due to competition from motor omnibuses and lorries.

The total number of passengers carried during 1930 was 2,150,529. The total tonnage of goods (including canes, 117,393 tons) was 303,779 tons.

The Island is intersected by numerous roads either metalled or gravelled, and capable of carrying fairly heavy motor traffic. Many of the most important roads have been reconstructed in recent years, and their surfaces treated with Trinidad Road Oil or Trinidad Road Binder. This method of construction is being steadily pursued. The total mileage of roadway is 2,337 $\frac{1}{2}$  43, of which 1,758 $\frac{1}{2}$  34 miles of main and local roads are under the control of the Public Works Department, and 579 $\frac{1}{2}$  09 miles of local roads are under the control of Road Boards.

There are numerous motor bus services plying along the Eastern Main Road between Port of Spain and Arima, and along the Southern Main Road between Port of Spain and San Fernando. These services are not continuous, individual owners plying for hire along different sections of the routes. There is also a bus service which links the suburb of Woodbrook to the city.

There is a General Post Office in Port of Spain, branch offices at San Fernando and Tobago, and 116 out-offices throughout the Colony.

Communication by cable with the United Kingdom, Europe, North America and other parts of the world is maintained by the Pacific Cable Board (All Red Route) and the West India and Panama Telegraph Company. The Pacific Cable Board and the West India and Panama Telegraph Company are both now under the management of Imperial and International Communications Ltd., but both continue to operate separately.

A wireless system of communication is also maintained between the following Islands—Barbados, St. Vincent, Grenada, Carriacou, St. Lucia, Dominica, Antigua, Montserrat and St. Kitts.

The principal tariffs are:—

To the United Kingdom from

Port-of-Spain	...	...	2/4 per word
To Eastern Canada	...	...	1/6 " "
To Western Canada	...	...	1/8 $\frac{1}{2}$ " "

There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

Three wireless stations are maintained by the Trinidad Government, namely Port-of-Spain, North Post and Tobago. The North Post Station deals exclusively with ship and Tobago traffic, while communication with British Guiana, St. Martin, Venezuela and Paramaribo is carried out by Port-of-Spain.

Steamers calling at Trinidad comprised the following lines:—Elders and Fyffes, Leyland Line, Harrison Line, Compagnie Generale Transatlantique, Navigazione Generale Italiana, Trinidad Line (Furness Withy and Coy., Ltd.) Trinidad Line, Western Ocean Steamship Corporation, Prince Line, Ocean Dominion Steamship Corporation, Transatlantica Italiana, Royal Netherlands West India Mail, Canadian National Steamers, Aluminium Line, Orinoco Line, Nourse Line, Hamburg-Amerika Line, Prince Line and the Horne Line. Mails are regularly forwarded and received by these steamers.

In addition an increasing number of steamers call to load oil cargoes, or to take in coal or fuel oil for bunker purposes. During the winter months a number of tourist ships call.

Aerial services were established in the Colony in 1929 by two American Companies, viz: the Pan American Airways, Incorporated, and the New York, Rio de Janeiro and Buenos Aires Line, and seaplanes now ply from Miami, Florida, via Porto Rico and the Northern Islands to the Colony and thence to South America, a weekly service in either direction being maintained by the companies in question.

In August, 1930, the Pan American Airways Inc., and the New York, Rio and Buenos Aires Line were amalgamated. A weekly air mail service to Venezuela has been established.

The rates of postage are as follows, per 1 oz. letter:—

#### TOBAGO.

##### History.

Tobago was discovered by Columbus in 1498, at which time it was occupied by Caribs. The British flag was first planted on the island in 1580, and the sovereignty was regularly claimed by James I. in 1608. In 1625 an attempt was made by some adventurers from Barbados to form a colony; but many were killed by the Carib Indians, and the remaining few escaped and settled at Providence. In 1628 a grant of the island was made by Charles I. to the Earl of Pembroke. The island remained unoccupied until 1632, when 300 Zealanders were sent out by a company of Dutch merchants, who styled it New Walcheren. After a residence of about two years these settlers were all destroyed or expelled by the Indians and Spaniards from Trinidad. In 1641 James Duke of Courland obtained a grant of the island from Charles I., and in 1642 two vessels arrived with a number of Courlanders, who settled on the north

side of the island. These were followed by a second Dutch colony in 1654, who, having effected a compromise with the Courlanders, established themselves on the southern coast; but in 1658 the Courlanders were overpowered by the Dutch, who remained in possession of the whole island until 1662, when the Dutch Company resigned their right to it. In this year Cornelius Lampais procured letters patent from Louis the Fourteenth, creating him Baron of Tobago, and proprietor of the island under the Crown of France.

In 1664 the grant of the Island to the Duke of Courland was renewed by Charles II. The Dutch refused to recognise the Duke's title, but in 1667 they themselves were compelled by the French Admiral Estras, to evacuate the island the Dutch Admiral Binks being defeated in Scarborough Bay, whereupon Louis the Fourteenth restored the island to the Duke of Courland, who, in 1681, made over his title to a company of London merchants. In 1748, by the Treaty of Aix-la-Chapelle, the island was declared neutral; the subjects of all European Powers being at liberty to form settlements or carry on commerce but not to place garrisons on it. At the peace in 1763, by the Treaty of Paris, Tobago was ceded by France to England in perpetuity.

In 1781 Tobago was captured by the French under the Duke of Bouillé, after a most gallant defence by the Colonists. In 1783 it was surrendered by treaty to the French Crown. On 15th April, 1793, it was captured by a British force under Admiral Lefrey and General Cuyler, and was once more restored to the French by the Treaty of Peace in 1802, and again reconquered in 1803 by Commander Hood and General Greenfield, and in 1814 finally ceded in perpetuity to the British Crown.

#### *Situation and Area.*

Tobago lies between 11° 8' and 11° 21' N. lat. and 60° 30' and 60° 50' W. long., distant from Barbados 120 miles, from Grenada 75 miles, and from Trinidad, 26 miles. It is 26 miles long and  $\frac{1}{2}$  miles at its greatest breadth, and has an area of 114 square miles, or 73,213 acres, of which about 41,675 acres are under cultivation.

The formation of the island is volcanic: its physical aspect is irregular and picturesque, with conical hills and ridges, which descend from a common base or dorsal ridge 1,800 feet high and 18 miles in length.

The population of Tobago in 1921 was 23,378 according to census.

#### *General Description.*

Tobago is a Ward of Trinidad and its exports out of the Colony all pass through Trinidad and are included in the general statistics of the Colony. It has also a considerable trade in minor products, vegetables, live stock, etc., with Trinidad. The total value of the Tobago trade in 1930 was 127,741.

The great progress made by Tobago in the last thirty-two years is shown by comparing the value of the chief products for 1897 and 1930:—

	1897.	1930.
Cacao .. ..	1,671 ..	70,858
Coconuts, Copra and Oil ..	776 ..	28,441
Live Stock .. ..	7,694 ..	20,294

Miscellaneous items bring the total values to 14,503, in 1897 and 8,148, in 1930.

The island is divided into seven parishes. Scarborough, the principal town, is on the south side of

the island, about 8 miles from the S.W. point, and is situated at the south-western base of a hill 425 feet above the level of the sea, on which stands Fort King George, now without a garrison. The town had a population, according to the census of 1921, of 773. It is a port of registry. Courland Bay, at Plymouth, also has good anchorage. There is a lighthouse at Fort King George, Scarborough; it is a fixed white light, at an elevation of about 425 feet above the level of the sea.

Regular communication with Trinidad is maintained by means of wireless telegraphy, and a service of a coastal steamer, provided by the Government.

The island possesses a large mileage of good roads and these are rapidly being extended and improved.

Education is in the hands of the Anglican, Roman Catholic, Moravian, and Wesleyan bodies, who are assisted by a Government grant.

#### *Constitution.*

The Government was formerly administered by a resident Administrator, subordinate to the Governor-in-Chief of the Windward Islands at Grenada, and a Legislative Council was established by an Order in Council of the 7th of February, 1877, to consist of not less than three persons, designated by Her Majesty.

By an Order in Council of 17th November, 1888, issued under Act 50 & 51 Vict. cap. 44, Tobago was amalgamated with Trinidad, the name of the new Colony being Trinidad and Tobago. The latter island was administered by a Commissioner appointed by the Governor of the United Colony, who was *ex officio* a member of the Legislative Council, and one unofficial member of Council represented Tobago. The Commissioner was assisted by a financial board of five members, two nominated by the Governor and three elected. The revenue, expenditure, and debt of the islands remained distinct, but there was entire freedom of commercial intercourse between them, and the laws of Trinidad were, with some specified exceptions, the laws of both.

By an Order in Council of the 20th of October, 1898, the Order in Council of the 17th of November, 1888, was almost entirely revoked, and it was provided that the Island of Tobago should become a ward of the United Colony of Trinidad and Tobago; that the revenue, expenditure, and debt of Tobago should be merged in those of the United Colony; that the debt due from Tobago to Trinidad should be cancelled; that (with some specified exceptions) the laws of Trinidad should operate in Tobago, and those of Tobago cease to operate so far as they conflicted with the laws of Trinidad; that all future Ordinances of the Legislature of the Colony should extend to Tobago, with the proviso that the Legislature should be able to enact special and local Ordinances and regulations applicable to Tobago as distinguished from the rest of the Colony.

This Order in Council was brought into effect from the 1st of January, 1899, by a proclamation of the Governor issued on the 8th of December, 1898. The post of Commissioner ceased to exist, and the post of Warden and Magistrate was created.

side of the island. These were followed by a second Dutch colony in 1654, who, having effected a compromise with the Courlanders, established themselves on the southern coast; but in 1658 the Courlanders were overpowered by the Dutch, who remained in possession of the whole island until 1662, when the Dutch Company resigned their right to it. In this year Cornelius Lampais procured letters patent from Louis the Fourteenth, creating him Baron of Tobago, and proprietor of the island under the Crown of France.

In 1664 the grant of the Island to the Duke of Courland was renewed by Charles II. The Dutch refused to recognise the Duke's title, but in 1667 they themselves were compelled by the French Admiral Estras, to evacuate the island the Dutch Admiral Binks being defeated in Scarborough Bay, whereupon Louis the Fourteenth restored the island to the Duke of Courland, who, in 1681, made over his title to a company of London merchants. In 1748, by the Treaty of Aix-la-Chapelle, the island was declared neutral; the subjects of all European Powers being at liberty to form settlements or carry on commerce but not to place garrisons on it. At the peace in 1763, by the Treaty of Paris, Tobago was ceded by France to England in perpetuity.

In 1781 Tobago was captured by the French under the Duke of Bouillé, after a most gallant defence by the Colonists. In 1783 it was surrendered by treaty to the French Crown. On 15th April, 1793, it was captured by a British force under Admiral Lefrey and General Cuyler, and was once more restored to the French by the Treaty of Peace in 1802, and again reconquered in 1803 by Commander Hood and General Greenfield, and in 1814 finally ceded in perpetuity to the British Crown.

#### *Situation and Area.*

Tobago lies between 11° 8' and 11° 21' N. lat. and 60° 30' and 60° 50' W. long., distant from Barbados 120 miles, from Grenada 75 miles, and from Trinidad, 26 miles. It is 26 miles long and 7½ miles at its greatest breadth, and has an area of 114 square miles, or 73,213 acres, of which about 41,675 acres are under cultivation.

The formation of the island is volcanic: its physical aspect is irregular and picturesque, with conical hills and ridges, which descend from a common base or dorsal ridge 1,800 feet high and 18 miles in length.

The population of Tobago in 1921 was 23,378 according to census.

#### *General Description.*

Tobago is a Ward of Trinidad and its exports out of the Colony all pass through Trinidad and are included in the general statistics of the Colony. It has also a considerable trade in minor products, vegetables, live stock, etc., with Trinidad. The total value of the Tobago trade in 1930 was 127,741l.

The great progress made by Tobago in the last thirty-two years is shown by comparing the value of the chief products for 1897 and 1930:—

Live Stock .. .. .	7,694	20,294

Miscellaneous items bring the total values to 14,503l. in 1897 and 8,148l. in 1930.

The island is divided into seven parishes. Scarborough, the principal town, is on the south side of

the island, about 8 miles from the S.W. point, and is situated at the south-western base of a hill 425 feet above the level of the sea, on which stands Fort King George, now without a garrison. The town had a population, according to the census of 1921, of 773. It is a port of registry. Courland Bay, at Plymouth, also has good anchorage. There is a lighthouse at Fort King George, Scarborough; it is a fixed white light, at an elevation of about 425 feet above the level of the sea.

#### *Constitution.*

The Government was formerly administered by a resident Administrator, subordinate to the Governor-in-Chief of the Windward Islands at Grenada, and a Legislative Council was established by an Order in Council of the 7th of February, 1877, to consist of not less than three persons, designated by Her Majesty.

By an Order in Council of 17th November, 1888, issued under Act 50 & 51 Vict. cap. 44, Tobago was amalgamated with Trinidad, the name of the new Colony being Trinidad and Tobago. The latter island was administered by a Commissioner appointed by the Governor of the United Colony, who was *ex officio* a member of the Legislative Council, and one unofficial member of Council represented Tobago. The revenue, expenditure, and debt of the islands remained distinct, but there was entire freedom of commercial intercourse between them, and the laws of Trinidad were, with some specified exceptions, the laws of both.

By an Order in Council of the 20th of October, 1898, the Order in Council of the 17th of November, 1888, was almost entirely revoked, and it was provided that the Island of Tobago should become a ward of the United Colony of Trinidad and Tobago; that the revenue, expenditure, and debt of Tobago should be merged in those of the United Colony; that the debt due from Tobago to Trinidad should be cancelled; that (with some specified exceptions) the laws of Trinidad should operate in Tobago, and those of Tobago cease to operate so far as they conflicted with the laws of Trinidad; that all future Ordinances of the Legislature of the Colony should extend to Tobago, with the proviso that the Legislature should be able to enact special and local Ordinances and regulations applicable to Tobago as distinguished from the rest of the Colony.

This Order in Council was brought into effect from the 1st of January, 1899, by a proclamation of the Governor issued on the 8th of December, 1898. The post of Commissioner ceased to exist, and the post of Warden and Magistrate was created.

## UGANDA.

(FOR MAP SEE UNDER KENYA.)

*Extent and Boundaries.*

The British Protectorate over Buganda was proclaimed on August 27th, 1894. The Protectorate was further extended over Bunyoro and Basoga on July 3rd, 1896. By numerous treaties concluded by various officers in the service of the Protectorate, the British administration has spread still further over countries adjoining the kingdom of Buganda proper, and the boundaries of the Protectorate may now be set forth as follows:—

On the east by Kenya Colony as far north as Mount Zulin, near the 4th degree of north latitude, the natural boundaries being the Turkana escarpment, Mount Elgon, and the Sio River running into the north-east corner of Lake Victoria; on the south, by Tanganyika Territory and by the 1st degree of south latitude; on the west, by the frontier of the Belgian Congo, the natural boundaries being Lake Edward, Mt. Ruwenzori, the Semliki River, Lake Albert and the Nile watershed; and on the north, by the Uganda-Sudan boundary.

The area of the Uganda Protectorate is estimated at 94,204 square miles, including 13,616 square miles of water. Pending the complete survey of the country, it is not possible to give the correct area.

For administrative purposes the Protectorate is divided into four provinces (Eastern, Northern, Western, and Buganda), and then again into numerous districts.

The headquarters of the Uganda administration are at Entebbe, and the chief commercial towns in the Protectorate are Kampala and Jinja; all three are on or near the North shore of Lake Victoria.

*Climate.*

The climate, when compared with that of some tropical countries, is not unpleasant, but there are parts of the country which can by no means be called healthy. The conditions vary with the altitude in different parts of the Protectorate: the Nile Valley, which lies about 2,000 feet above sea-level, is hot, and is considerably more unhealthy than the higher-lying regions between Lakes Victoria and Albert. The most congenial climate for European residence is found in the Buganda kingdom and in the Western Province, where in some districts the altitude exceeds 5,000 feet above sea-level. European children thrive well in infancy in a few of the healthier stations, but considerable risk is attached to bringing them out when over six or seven years old, as they are always liable to attacks of malaria and the anaemia and general ill-health resulting therefrom.

The climate is mild, neither excessively hot nor cold, the average temperature for the year 1930 at Entebbe being—Mean maximum, 78.4° Fahrenheit; mean minimum, 63.4° Fahrenheit. Average daily sunshine, 6.7 hours.

The lowest rainfall for 1930 was recorded at Mwirasandu in Mbarara district, which registered 35.45 inches, the highest (86.18 inches) being recorded at Kalangala, Sese Islands.

The seasons are not well defined, but there are two dry seasons within the year; one dry season usually includes June and July, and the other December, January and February.

The healthiest months of the year are usually January, February and March, July, August, September and October, and the least healthy, April, May, November and December, or the periods corresponding to those immediately following the rains, when the mosquitoes become more in evidence and malarial infections more numerous.

No part of the Uganda Protectorate can be said to be absolutely free from malaria, but in some districts, for example those of Toro and Ankole in the Western Province, there is comparatively little, while on the other hand, in the Nile valley and along the courses of the larger rivers, malaria prevails at all seasons of the year.

Sleeping sickness, which proved such a scourge to the country in 1902 and the years following and necessitated the evacuation of the natives from the islands in Victoria Nyanza, and from the shores of the great lakes and rivers, is now well under control. During 1921 and 1922 the island population was to a great extent restored and many of the islands were successfully reopened. The focus of the disease is no longer on Lake Victoria.

Plague and smallpox are unfortunately endemic in the native population, but it has been possible to confine outbreaks for the most part within narrow limits. Active measures against these diseases are constantly engaging the attention of the medical and administrative authorities.

#### History.

The countries that now make up the Uganda Protectorate did not become known to Europe until the journey of Speke and Grant in search of the sources of the Nile, which brought them to Buganda in 1862 and to Bunyoro a year later. In both countries they found a somewhat advanced indigenous civilisation, and it is around the rivalries of these two principalities that all the early history of the country centres. The Swahili form of "Buganda," the country of the Baganda people, has been adopted as the name of the whole Protectorate, although there are many other quite separate races and tribes among its inhabitants. Speke's discoveries were not at first credited, but were soon confirmed by Sir Samuel Baker and his wife who discovered Lake Albert. The first missionaries arrived in Buganda in 1877, and the rivalries of Protestant, Catholic and Mohammedan which soon naturally arose ended after the death of the old king, Mutesa, and the accession of his weak and vacillating son, Mwanga, to the throne in 1884, in bloodshed. The Imperial British East Africa Company which, after concluding a treaty with Mwanga in 1890, had occupied Kampala with a weak force under Capt. Lugard, had much difficulty in trying to compose these rivalries, and would have been forced to abandon the country but for the intervention of the British Government, which sent out a Special Commissioner, Sir Gerald Portal, in 1893. His enquiry and negotiations led to the establishment of the Protectorate in the following year. For three years the country remained quiet, but in 1897 mutiny broke out among some of the Sudanese troops who had been recruited by the Company from the remains of the Egyptian forces cut off by the Mahdist rebellion. It soon spread to all the discontented elements, but was ultimately overcome after having seriously menaced British rule. Finally the two kings—Mwanga of Buganda and Kabarega of Bunyoro—who had always resented European penetration and had seized upon the mutiny as a good opportunity to put an end to it, were captured and deported.

Since then there is little but peaceful progress to record. Sir Harry Johnston was sent out by the British Government in 1900 as Special Commissioner to settle the country, and concluded agreements with the heads of the native principalities of Buganda, Toro and Ankole, which laid down the principles governing their administrative relations with the Crown and the ownership of the land. No such arrangements could be made at the time with regard to the rest of the present Protectorate, but adminis-

tration has since been extended gradually over the more primitive and unorganised tribes, and the same principles of "indirect rule" have been followed wherever and whenever it was possible as in the "agreement districts." In 1903 the Eastern highlands of the Protectorate along with the Kavirondo country were transferred to what is now Kenya Colony, and the succeeding years saw further adjustments of frontiers with the Sudan, the Belgian Congo, and German East Africa, now Tanganyika Territory. In 1903 the superintendence of the Protectorates affairs passed from the Foreign to the Colonial Office. In the Great War the population, of all races, remained devotedly loyal and played a great part in the East African campaign. Since then progress, both material and cultural, has continued, the former made possible by the success of the cotton industry and the development of communications, the latter based on the activities of the missions, both Protestant and Catholic, in whose hands was all educational work until 1925.

#### Constitution.

By the Uganda Order in Council, 1920, it was provided that there should be an Executive Council and a Legislative Council both consisting of such persons as may be directed by Royal Instructions. Under the Royal Instructions dated the 5th June, 1920, the Executive Council consists of the Chief Secretary, Attorney-General, Treasurer, and Director of Medical and Sanitary Services (*ex-officio* members), and such other persons holding office in the public service as the Governor may appoint (official members), and such other persons (if any) not holding such office as the Governor may appoint (unofficial members), with the Governor as President.

It is further provided that the Legislative Council shall consist of the Governor, Attorney-General, Treasurer, and Director of Medical and Sanitary Services (*ex-officio* members), with official and unofficial members as in the case of the Executive Council.

The membership of both Councils has now been increased by the addition of the Director of Education and the Director of Agriculture; the Provincial Commissioner Buganda has been appointed a member of the Executive Council.

The Native Government of Buganda has certain rights of internal legislation granted by agreement. The king or *Kabaka*, who is accorded the title of "His Highness," rules the Buganda people with the advice of the Governor and of a native Council known as the *Lukiko*, which also has judicial functions.

#### Communications.

The Uganda Protectorate is separated by about 500 miles from the nearest point on the east coast of Africa. Over this stretch of country, all of which lies within the Colony of Kenya, transport was exceedingly difficult before the construction of the "Uganda Railway" from Mombasa to the north-east corner of Lake Victoria, which the Imperial Government decided in 1895 to undertake. This railway at the end of 1901 had covered the whole 584 miles separating Mombasa from Kisumu on Victoria Nyanza, which was the terminus of the railway until recent years.

There is a Lake Steamer Service connecting Entebbe, Port Bell (Kampala), and Jinja with

Kisumu and the other ports on Lake Victoria. Steamers ply also on Lake Kioga and on Lake Albert and the Albert Nile as far North as Nimule. All these services are maintained by the Kenya and Uganda Railways and Harbours Administration.

A railway, 62 miles long, from Jinja to Namasagali on the Victoria Nile, giving access to the waterways of Lake Kioga, was completed in 1912, and one from Port Bell on Lake Victoria to Kampala, the principal commercial centre, a distance of 7½ miles, was opened for public traffic in 1915.

Since the Great War considerable railway development has taken place, and a main line of the Kenya and Uganda Railway, leaving the original line at Nakuru, now extends into the Eastern Province of Uganda to join the Jinja-Namasagali railway at Mbulamuti, and so places Uganda in direct communication with the Coast. An extension of this line from Tororo, near the Kenya border, to Mbale and Soroti was completed in 1929, and the linking up of Jinja with Kampala—a scheme which involves the bridging of the Victoria Nile at the former place was completed in the early part of 1931.

The system of all-weather main roads radiating from Kampala to the principal administrative centres is maintained by the Public Works Department, which has a road mileage of 1,619 under its control. A new system of roads is coming into being in the Western Province, destined to establish connection between the tin-mines and the Kagera River steamship service, to tap the resources of the Ruchuru area of the Belgian Congo for that service, and to link up direct the district headquarters in the west of the Protectorate. The bridge which will take the railway across the Nile at Jinja will also carry road-traffic, and eliminate the tiresome ferry-journey which travellers between Kampala and Jinja have at present to undergo. Many miles of excellent roads are also kept up by the Native Administration. Motor-transport, in consequence of these facilities, has reached an advanced stage of development in the Protectorate.

The Uganda Posts and Telegraphs Department is amalgamated with that of Kenya under the control of the Postmaster-General at Nairobi.

Uganda is now in telegraphic communication with Mombasa and Dar-es-Salaam by land lines, and thence by cable with Great Britain and other countries. All important centres within the Protectorate are connected also by telegraph.

The total mileage of telegraph and telephone pole route at the end of 1930 was 1,642 and the wire mileage 3,491. Telephone exchanges are worked at Entebbe, Kampala, Jinja, Iganga, and Mbale, and connected by trunk lines.

#### *Aviation.*

Landing grounds are kept up at Entebbe, Tororo and Jinja, and landing facilities for sea-planes exist at Entebbe, Port Bell near Kampala, and Butiaba. There is no accommodation in Uganda for housing aircraft, but repairs can be carried out at the above places. Weekly communication by air with Europe and South Africa has now been established by means of Imperial Airways, Ltd.

#### *Industries.*

Coffee of the *Arabica* and *Robusta* varieties has been introduced and thrives exceedingly well; the former is the principal crop on European plantations, and both are being grown in increasing quantities by natives. The principal industry is cotton, and 516,489 cents of lint, valued at 1,555,341*l.*, as well as 33,678 tons of cotton seed, of a value of 137,387*l.*,

were exported in 1930. Rubber (principally plantation grown), hides and skins, ground-nuts and chillies, are the other principal agricultural exports, and, except for rubber, practically all the production is in native hands. Mineral discoveries have been made in recent years, and there is a steadily rising export of high-grade tin ore from the Western Province. This amounted in 1930 to 352 tons, of a value of 55,300*l.* Cattle are plentiful. Leasehold grants of land can be obtained from the government, but the issue of freehold concessions has been withdrawn for the present.

The weights and measures in common use in the Protectorate are the Imperial weights and measures. The currency is the same as that of Kenya.

Banking facilities are afforded by the National Bank of India Ltd., with branches at Entebbe, Kampala, and Jinja, the Standard Bank of South Africa Ltd., with branches at Kampala and Jinja, and by Barclays Bank (Dominions, Colonial and Overseas), with branches at Kampala and Jinja.

#### *Trade and Customs.*

Since 1917 Kenya and Uganda have been one administrative unit for purposes of Customs.

Following lengthy negotiations, a uniform Tariff was adopted in 1923 for Kenya and Uganda, operating also in Tanganyika Territory. Under this tariff all export duties were abolished and the import schedules were remodelled to provide for the imposition of "specific" duties and of "ad valorem" duties varying from 10% to 50% of the landed value of goods liable to duty on importation. In addition, free trade between Kenya, Uganda and Tanganyika Territory in goods, the growth produce or manufacture of each of the territories was established. The 1923 Tariff with minor alterations, remained in force until April, 1930, advantage of the existence of a tariff common to the three territories being taken to institute in August, 1927, a system of extending unrestricted trading to imported goods passing between the territories. Under this procedure, which is operated by means of transfer forms, single payment of duty only is chargeable, the Customs Revenue involved being credited to the consuming territory by inter-departmental entry.

In 1930 a uniform modernised Tariff scheduled according to commodities as opposed to rates was negotiated and enacted in the three territories simultaneously. Included in the provisions of the Tariff Ordinance is an amended definition of value for purposes of assessment of duty which brings the East Africa Tariff Laws into conformity with the practice followed in many other countries and allows of the acceptance of certificates of value endorsed on invoices in the stereotyped form approved by the Imperial Customs Conference, 1921.

The basis of assessment is now the current domestic value in the country of export plus freight and other charges incurred up to the time of importation of goods into Kenya, Uganda or Tanganyika Territory as the case may be. As regards certain specially protected commodities (wheat flour, sugar, timber, etc.) the device of "suspended duties" has been adopted in order to allow of a defined margin of elasticity in each territory in the matter of imposition on specified articles of "suspended duties" as distinct from basic duties, without interference with the main principle of a common Tariff. The 1930 Tariff Ordinances of the three territories provide that the Governor, with the approval of Legislative Council, may impose by Proclamation either in part or in full a duty referred to in the Tariff schedules as a "suspended duty," the effect being that each

Government has the right to vary "suspended duties" up to the amount specified in the Tariff. At the same time an undertaking has been given by each Government that removals of any of the "suspended duties" will only take place after prior consultation with the other Governments concerned.

In 1931 the Consumption Tax previously leviable on wines and spirits cleared for consumption in Kenya was incorporated in the common Tariff and certain increases in the rates of duty chargeable on vehicles and parts (including tyres and tubes) were imposed in the three territories.

The import tariff as it now stands admits free of duty goods essential to the agricultural, industrial, educational and scientific development of the territories and has been designed, as far as possible, to protect imports essential to the opening up and development of the country and to foster local production of agricultural and other commodities in which Kenya, Uganda and Tanganyika Territory, taken as an economic unit, are, or can be made, self-supporting.

For Kenya and Uganda, the value in pounds sterling, of Trade Imports (excluding imports on Government Account, railway material and goods in transit and transshipment) and of exports (domestic and foreign) and the net amount of Customs receipts from all sources and the tonnage entered at Kenya Ports were as follows:—

WESTERN PACIFIC.

*High Commission.*

The office of High Commissioner in, over, and for the Western Pacific Islands, was created by an Order in Council, cited as the Western Pacific Order in Council of 1877.

The jurisdiction of the High Commissioner extends over all islands in the Western Pacific not being within the limits of the territories administered by His Majesty's Governments in the Commonwealth of Australia and in New Zealand or the Colony of Fiji, and not being within the jurisdiction of any other civilised Power. In 1893 a new Order in Council was issued, known as the Pacific Order in Council, 1893, in accordance with which the High Commissioner's jurisdiction is extended to foreigners and (in most cases) to natives residing in British settlements or protectorates within the limits of the Order. Under the provisions of the New Hebrides Order in Council, 1922, the jurisdiction of the High Commissioner extends also to the islands in the Pacific Ocean known as the New Hebrides, and all the islands known as the Banks Islands and Torres Islands. The expenses of the High Commission at Suva, Fiji, are met from the funds of the Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate, but a contribution is paid from Imperial funds in respect of work in connection with Tonga and the New Hebrides.

The Chief Justice of Fiji, and every other Judge for the time being of the Supreme Court of Fiji, is by virtue of his office a Judicial Commissioner.

Deputy Commissioners are appointed by the High Commissioner on behalf of His Majesty.

The High Commissioner's Court consists of the High Commissioner, the Judicial Commissioners, and the Deputy Commissioners, and in it is vested all His Majesty's civil and criminal jurisdiction exercisable in the Western Pacific Islands.

The Court of a Judicial Commissioner has powers similar to those of the Superior Courts of England, and the Deputy Commissioners have civil jurisdiction in Common Law, Equity and Bankruptcy, with a limited jurisdiction in Probate, and have a criminal jurisdiction in respect of offences not punishable with seven years' penal servitude or upwards.

With some few exceptions all decisions of the High Commissioner's Court may be appealed against to the Supreme Court of Fiji.

In addition to the other means of preserving order the High Commissioner has certain special powers for the deportation of persons whose proceedings endanger the peace of the Islands.

The principal groups under the High Commissioner are:—

The Gilbert and Ellice Islands Colony.  
 The British Solomon Islands Protectorate.  
 Tonga.  
 The New Hebrides.  
 The Phoenix Group.  
 Pitcairn Island.

Particulars of these are given below.

### THE GILBERT AND ELLICE ISLANDS COLONY.

The Colony, which includes Ocean, Christmas,  
 Fanning, and Washington Islands, besides the  
 Gilbert and Ellice groups, is under the charge  
 of a Resident Commissioner, who is responsible  
 to the High Commissioner for the Western  
 Pacific who resides in Fiji.

THE GILBERT AND ELLICE GROUPS. — The  
 Gilbert Group is comprised of the following  
 sixteen islands:—Makin, Butaritari, Marakei,  
 Abeiang, Tarawa, Maiana, Kuria, Aranuka and  
 Abemama (Northern Gilberts); Nonouti and  
 Tabiteuea (Central Gilberts); Onotoa, Beru,  
 Nukunau, Tamana and Arorae (Southern Gilberts).

The Ellice Islands are the following nine:—  
 Nanumea, Nanumaga, Nukunau, Nui, Vaitupu,  
 Nukufetau, Funafuti, Nukulaelae and Nurakita.

The two groups consist of a series of coral atolls  
 lying between 4° N. latitude and 10° S. and 170°  
 to 180° E. longitude with an area of 180 square  
 miles. The principal export is copra.

The population of the Gilbert Group is  
 24,800. Of these, 92 were Europeans, 25 Chinese  
 and 24,683 natives.

The population of the Ellice Group is 3,974, 5  
 of whom were Europeans. The native population  
 numbered 3,969.

With few exceptions the hereditary chieftain-  
 ships have ceased to exist, but each island has its  
 own native government, presided over by a native  
 magistrate.

A revised code of native laws is validated by an  
 Ordinance of the Colony, and law and order is  
 well maintained under the general supervision of  
 European officials.

The natives are of Malayo-Polynesian race.  
 The majority are adherents either of the London  
 Missionary Society or the Roman Catholic Mission  
 of the Sacred Heart. There is no similarity  
 between the languages of the Gilbert and Ellice  
 Groups.

OCEAN ISLAND (or Banaba), in lat. 0° 52' S.,  
 long. 169° 35' E., about 1,500 acres in extent,  
 is the Headquarters of the Government and the  
 site of operations of the British Phosphate

Commission. Population, 1930: 2,594, including  
 94 Europeans.

FANNING AND WASHINGTON ISLANDS lie about  
 3° 51' N. latitude, and 159° 21' W. longitude.  
 There is no indigenous population but labour is  
 recruited from the Gilbert Islands for the copra  
 industry. A District Officer is in charge of these  
 islands under the Resident Commissioner. On  
 Fanning Island is the mid-ocean Station of the  
 Pacific Cable Board, whose employees and their  
 wives comprise practically the entire European  
 population of 33. There is no regular communica-  
 tion between these islands and the rest of the  
 Colony; periodical visits are made for engaging  
 and repatriating labour by a small auxiliary  
 vessel of the Fanning Island Company. The  
 total population on the 30th June, 1930, was 268.

CHRISTMAS ISLAND (about 1° 59' N. latitude,  
 157° 30' W. longitude) lies 164 miles South-East  
 by East of Fanning Island. The area is about  
 60,000 acres, of which 1,200 are under coconuts.  
 Under the terms of a License dated the 27th  
 October, 1914, the Central Pacific Coconut  
 Plantations Limited of London were granted the  
 exclusive right to occupy the island for their own  
 use for the planting of coconuts, the manufacture  
 of copra, the export of coconut oil, pearl shell,  
 and guano during the term of 87 years from the  
 1st January, 1914. The port of entry for  
 Christmas Island is Fanning Island, so that all  
 inward entries and outward clearances must be  
 made at the latter port. Periodical visits are  
 made by H.M.'s ships.

The climate of all the groups is fairly healthy  
 for Europeans, but the natives suffer from lung  
 diseases, especially pulmonary tuberculosis. A  
 considerable amount of medical work has been  
 undertaken of late years and a large central  
 hospital is maintained at Tarawa in the Gilbert  
 Group. Every Island has a native hospital under  
 the charge of a native student trained at the  
 Tarawa Hospital.

Communication between the various islands was  
 formerly infrequent, depending on the irregular  
 movements of vessels belonging to or chartered by  
 Messrs. Burns, Philp and Company, Limited, On  
 Chong and Company, and the British Phosphate  
 Commissioners, but the acquisition by the Admini-  
 stration of the auxiliary sailing vessel "Nimanea"  
 has considerably increased the facilities for  
 regular communication.

Revenue is obtained from a copra tax, trading  
 and other licences, import and export duties,  
 non-native capitation tax, etc.

### THE BRITISH SOLOMON ISLANDS PROTECTORATE.

THE BRITISH SOLOMON ISLANDS consist of the southern islands of the group, viz., Shortland Island, Choiseul, Ysabel, New Georgia, Guadalcanar, Malaita, San Christoval, Bellona, and Rennell Islands, together with Ongtong-Java, Santa Cruz, Duff, and Reef Groups, and other smaller islands in the vicinity of the main group, and all lying between the 7½ and 13th degrees of south latitude, and the 150th and 163rd degrees of east longitude. The natives are in the main, Melanesians, but showing traces of the intrusion of small bodies of Polynesians and others. According to the 1931 census figures the native population is 90,719. Malaita is the

most densely populated, 39,356 (1931 census figures). The natives have been described as treacherous, but of late years have shown themselves amenable to law and civilisation. All emigration of native labourers to places beyond the limits of the Protectorate has been stopped by legislation. There have long been a few traders, mostly of British nationality, resident in the islands; these have now increased largely in number, and in the extent of their operations. Lever Bros. and Burns, Philp and Co., have undertaken coco-nut planting on a large scale, and employ a large number of white men in overseeing and superintending the native labour. The estimated area of land planted with coco-nuts amounts to 60,000 acres. The non-native population in 1931 numbered 497 Europeans and 193 Asiatics. The principal articles of trade are copra, green snail and trochus shells, ivory nuts, pearl shell, and tortoise shell. The climate is unhealthy, malaria being very prevalent, especially during the North-West season, which lasts from the end of October to the beginning of March. Lung diseases, especially pulmonary tuberculosis, are common among the natives. These islands were placed under British protection in 1853. The headquarters of the Protectorate is at Tulagi, a small island off Florida. District Officers are stationed at Shortland Island, Mala, Gizo, San Cristoval, Guadalcanal, Ysabel and Santa Cruz. There is regular steam communication with Sydney, New South Wales.

The Customs Tariff consists of duties at specific or *ad valorem* rates on certain imports and exports.

#### TONGA.

THE TONGAN, or FRIENDLY ISLANDS, with an area of about 250 square miles, are situated between the 18th and 22nd degrees of south latitude. They were discovered by Tasman in 1643. Most of the islands are of coral formation, but some are volcanic, notably Tofua, Kao, and Niuafoou (Good Hope Island). The natives belong to the Polynesian race, and are closely allied to the natives of New Zealand and Samoa. The islands are very rich in coconuts; and copra forms the principal export. There is monthly communication by steamer with Auckland via Fiji and Samoa. Passengers, goods, and mails from other countries tranship, as a rule, at Suva. During the dry season, i.e., from April to December, steamers of the Clan and other Lines call at regular intervals for copra freights.

In 1845 George Tubou I, who was the first to establish an effective government over the whole of Tonga, was proclaimed King. The present Ruler is assisted by a Parliament and a Privy Council. The Privy Council is composed of three European and six Native Ministers of the Crown who are also heads of the various government departments. The civil service is composed mostly of Tongans, the European officials numbering about 43. The general tariff is 12½ % ad valorem and there are no preferential duties.

1929 ...	198,078	259,090
1930 ...	148,306	169,610

The imports, apart from oils, motor cars and a small quantity of drapery are of Empire origin. The following figures show the percentage of imports from foreign countries :—

Year.	Per Cent.
1926 .. .. .	9
1927 .. .. .	11
1928 .. .. .	12
1929 .. .. .	14
1930 .. .. .	12

Of the rest of the imports during 1930 the United Kingdom supplied 20 per cent, New Zealand 35 per cent, Australia 25 per cent and other British possessions 8 per cent.

The climate may be considered a healthy one. The thermometer ranges between 53 and 93 degrees Fahrenheit.

There are six churches in Tonga, viz., the Wesleyan Free Church of Tonga, with about 22,000 adherents; the Free Church of Tonga, with about 3,000; the Roman Catholic Mission, with about 3,000; the Church of England, 240; the Church of Latter Day Saints, 630; and the Seventh Day Adventist Mission, with about 60 adherents.

The Wesleyan Mission was first founded in Tonga in the year 1826, and a few years later the chiefs and people embraced Christianity and became members of the Church. The control and management of the Mission in Tonga were entrusted about the year 1857 to the Australasian Conference and continued until the year 1885, when King George Tubou I, after trying unsuccessfully to obtain local autonomy for the Church in Tonga, seceded, with a large majority of his chiefs and people and, with the assistance of the Rev. Shirley Baker, established the Wesleyan Free Church of Tonga as a separate and independent body though retaining the same doctrines, discipline, and form of worship as the Wesleyan Church. In January, 1887, an attempt was made by some escaped native convicts on the life of Mr. Shirley Baker, the Premier. The attempt was made the pretext for increased persecution of the "Fakaogoa," or members of the Wesleyan Mission Church. About 100, whom no ill-usage could induce to abandon the Mission Church, were ordered to be deported to Pylstart Island, a barren islet south of Tonga, but they were finally allowed to go to Fiji. Shortly after an inquiry was made into the causes of the disturbances by Sir Charles Mitchell. At this inquiry the allegation that the attempt on Mr. Baker's life was due to a "Fakaogoa" conspiracy was abandoned, and a letter written by Mr. Baker, purporting to be signed by the king, was addressed to Sir Charles Mitchell, promising an amnesty to political prisoners and freedom of worship. The services in the Mission Church at once recommenced.

In 1890 complaints were made that freedom of worship was still being interfered with; that persons were deprived of their lands and unjustly imprisoned on account of their adherence to the Wesleyan Church; and Tongan officials denied that the king had written to Sir Charles Mitchell promising to accord freedom of worship. Sir John Thurston therefore made a further inquiry, and finding that Mr. Baker was the principal cause of the wrongs endured by the Wesleyans, he issued an Order prohibiting Mr. Baker from being within the group for a term of two years from the 17th July, 1890. A few days before the issue of the Order, the king, on the request of the leading chiefs, had dismissed the Premier from office, and a fresh Government was formed with a native Premier (Tukuaho). Under the new Government the fullest freedom of worship was allowed, and the exiles were recalled from Fiji, the king having requested Sir John Thurston to make arrangements for their return.

In the year 1923 much dissatisfaction existed in the Wesleyan Free Church, and an enquiry that was held into the state of the finances disclosed a very lax state of affairs. As a result of this enquiry it was decided to approach the Wesleyan Church with a view to the union of the two bodies as a separate and independent Conference of

the Wesleyan Methodist Church. At a joint conference of the two churches held in April, 1924, union was decided upon. A minority, under the leadership of the late Rev. J. A. Watkin, declined to join the united body and carried on under the title of the Free Church of Tonga. Protracted litigation ensued as a result of this division in respect of the ownership of the churches and property of the Wesleyan Free Church of Tonga established by King George I in 1885. It was finally decided on appeal in favour of the united Church, of which the present Queen is the head.

King George Tubou died on 18th February, 1893, and was succeeded by his great-grandson, George Taufaaahau, under the title of George Tubou II. On the death of the latter on the 5th April, 1918, Princess Salote, his daughter by his first wife the late Queen Lavinia, succeeded to the throne. The young Queen, who was born on the 13th March, 1900, was married in 1917 to Prince Uiliami Tugi, the present Premier, and chief of highest rank in Tonga.

Early in 1900 Mr. Basil Thomson was sent out to Tonga by Her Majesty's Government, and concluded a Treaty with the king by which the latter placed himself and his territory under Her Majesty's protection. A protectorate was proclaimed on 18th May, 1900.

The present premier, Uiliame Tugi, is the Prince Consort, and was formerly Minister for Lands. The progress of Tonga since 1905 has been satisfactory.

Every Tongan is entitled to an allotment of land for cultivation, so that no unemployment exists. Primary education for Tongans between the ages of 6 and 14 is compulsory. There are two boys' colleges at which provision is made for secondary education. Secondary education of girls is entirely in the hands of the Christian missions. Medical work is well organised; and, unlike most native communities in the Pacific, the native population steadily increases in number.

British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding two years, are subject to the jurisdiction of the Tonga Courts. In other respects they are subject to the jurisdiction of the Court of the High Commissioner. Licences are charged for carrying on stores and trades.

#### *Currency and Banking.*

The legal tender currency is British and Australian sterling.

Arrangements were made in 1919 for the issue of Tongan Government Treasury notes. At the end of 1930, 10s., 1l., and 5l. notes were in circulation to the value of 21,000l. The issue is secured by a coin and investment reserve.

There are no private banks in the Kingdom. A Government Savings Bank was established in 1928. At the end of 1930 there were 452 depositors and 21,886l. in deposits.

The Cabinet Council is composed of the same Ministers, with the exception of the Minister of the Crown.

#### THE NEW HEBRIDES.

THE NEW HEBRIDES, to which are attached the Banks and Torres Islands, lie between the 12th and 20th degrees of south latitude, and the 165th and 170th degrees of east longitude. The area is about 5,700 sq. miles.

The natives are Melanesians, but in many places there is an admixture of Polynesian blood. The Europeans are mostly British or French.

Missions have been established by the Melanesian Missionary Society, Seventh Day Adventists and Church of Christ, by the Presbyterian churches of Canada and Australia, and by the Roman Catholic Church.

The principal exports are copra, cocoa, cotton, coffee, trocas; maize, hides and various miscellaneous products are also exported. The climate of most of the islands is rather unhealthy and malarial fever is prevalent. At first, a joint commission, of British and French naval officers, was appointed to protect the lives and property of British and French subjects, and to maintain order. British and French Residents were appointed in 1902. In February, 1906, a conference of British and French officials took place in London, and a draft convention was prepared to provide for the settlement of land claims, and for an arrangement which would put an end to the difficulties arising from the absence of jurisdiction over the natives. A convention confirming the above-mentioned draft was signed in London on October 20th, 1906, and was provisionally proclaimed at Vila, the chief town of the New Hebrides, on December 2nd, 1907. Its provisions include the establishment of a joint court, and of an executive government consisting, for some purposes, of the British and French representatives in the group acting in concert. For other purposes British and French nationals remain subject to the control only of their own authorities.

A Protocol drawn up in London in 1914 to replace the Convention of 1906, was ratified on March 18th, 1922. It was proclaimed in the New Hebrides in August, 1923.

British and French Resident Commissioners, subordinate to their respective High Commissioners, each with a staff of officers have been appointed. In addition there is a Condominium Staff working in Departments under the joint control of the two Resident Commissioners.

The Customs Tariff in force in the New Hebrides is mainly on an ad valorem basis at varying rates with specific duties in a few cases.

The import trade of the Group is mainly confined to Australia and France in roughly equal proportions, while the bulk of the exports are shipped to the latter country.

#### PHENIX GROUP.

The Phoenix group comprises Phoenix, Birnie, Hull, Canton, Gardner, McKean, Enderbury, Sydney, Baker and Howland Islands, and is situated to the east of the Gilbert and Ellice groups. The Islands are of coral formation, and several of them are planted with coconuts. All except McKean and Enderbury Islands are leased to Messrs. Burns, Philp (South Sea) Company, Limited, for 87 years, from 1st January, 1914.

#### PITCAIRN ISLAND.

Pitcairn Island (two square miles) is situated in the Pacific Ocean, nearly equidistant from Australia and America (25° 3' S. lat., 130° 8' E. long). It was discovered by Carteret in 1767, but remained uninhabited until 1790, when it was occupied by the mutineers of H.M.S. "Bounty," with some women from Otaheite. Nothing was known of their existence until the island was visited in 1808. No regular government was established, but assistance of various kinds was given on the subsequent visits of English vessels. In 1856, the population having become too large for the island's resources, the inhabitants (192 in number) were, at their own

request, removed, with all their possessions, to Norfolk Island; but 40 of them soon returned. In 1879 these had increased to 90. The population numbers 209 persons.

It is a British Colony by settlement, and was brought within the jurisdiction of the High Commissioner for the W. Pacific in 1898 under s. 6 of the Pacific Order in Council, 1893. *Chief Magistrate*, A. H. Young.

The islands of Henderson, Ducie, and Oeno were annexed in 1902, and are included in the district of Pitcairn.

## THE WINDWARD ISLANDS.

### *Situation, Area, and Trade.*

The Windward Islands consist of the three islands of St. Lucia, St. Vincent and Grenada, lying in the order named from north to south, together with the smaller islands known as the Grenadines, which lie between St. Vincent and Grenada, and are attached partly to the one island and partly to the other. Geographically, Barbados, Trinidad and Tobago belong to the group, and were formerly associated with it politically, Tobago from 1764 to 1783, and all three in 1838. The three first-named islands are grouped for administrative purposes under one Governor, who usually resides at St. George's, Grenada. The total area of the three Colonies is 524 square miles (about twice the size of Middlesex), and their estimated population at the census of 24th April, 1921, 162,264.

### *History.*

Some account is given of the history of each island in its proper place, but particulars of their several federal unions may be conveniently inserted here. As early as 1764 there was one Governor for the "Southern Caribbee Islands" of Grenada, Dominica, St. Vincent, and Tobago. Dominica was separated in 1771, St. Vincent in 1776, and in 1783 Tobago was ceded to the French. In 1838

St. Vincent was included with Barbados, Grenada, and Tobago in one general government, the Governor-in-Chief being resident at Barbados, with Lieutenant-Governors in each of the other islands. In 1838 St. Lucia was included in this general government.

On the 17th March, 1885, Letters Patent were passed constituting the Government of the Windward Islands, Barbados being omitted. Tobago was subsequently united with Trinidad.

The majority of the inhabitants are of the negro race, less than 5 per cent. being white and there are some Indian Coolies. A few Caribs still remain in St. Vincent. English is spoken throughout, but in St. Lucia, the prevailing language with the peasantry is a French *patois*. In Grenada the same condition obtains, but to a less extent.

### *Constitution.*

Each island retains its own institutions, and, when the Governor is absent, is presided over by a resident Administrator, who is also Colonial Secretary. There is no common legislature, nor common laws, revenue, or tariff. A Windward Islands Court of Appeal was set up in 1850 (13 & 14 Vict. c. 15), and abolished in 1920 by an Act (9 & 10 Geo. V. c. 47), which set up a Court of Appeal for the West Indies, consisting of the chief justices of the several West India Islands except Jamaica. There is also a common audit system instituted in 1889.

### *Currency and Banking.*

The legal tender currency is British sterling and the gold coins of the United States. Barclays Bank (Dominion, Colonial and Overseas) Ltd. and the Royal Bank of Canada, which have branches in the larger islands, issue five-dollar notes. Public accounts are kept in sterling, but banking and private accounts generally in dollars. There is no limit to the legal tender of silver.

### *Communications.*

The usual length of the voyage from England to Grenada is about 14 days.

The steamers of Harrison Direct Line call at Grenada on the outward voyage, and on the homeward voyage they call at the three islands as cargo offers. There is also direct fortnightly communication between Grenada and New York by the steamers of the Furness, Withy Line. The passenger and cargo steamers of the Canadian National Line call regularly at Grenada, St. Lucia and St. Vincent, and connect these islands with Canada, St. John and Halifax being the ports of arrival and departure there.

There are no railways in any of the islands. A general telephone system exists throughout the islands. All three islands of the group are in communication with Europe, the United States, Canada, and the other West Indian islands by wireless, operated by the Pacific Cable Board, and by the Cables of the West India and Panama Telegraph Company Ltd. The rate per word for telegrams to the United Kingdom from Grenada, St. Lucia and St. Vincent is 2s. 4d. The rate to Europe varies from 3s. 2½d. to 3s. 7½d. per word. (Government messages pay half rates.) There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

A wireless installation has been erected at Carriacou by the local Government. It communicates with Grenada and through that island

to the United Kingdom, Canada, North America, &c., the ordinary tariff being 2d. per word more than from Grenada.

**GRENADA.**

*Situation, Area, &c.*

Grenada, the most southerly of the Windward group, is situated between the parallels of 12° 30' and 11° 58' N. lat., and 61° 20' and 61° 35' W. long.; is about 21 miles in length, 12 miles in its greatest breadth, and contains about 133 square miles (about half the size of Middlesex). It lies 68 miles S.S.W. of St. Vincent, and about 90 miles north of Trinidad, and between it and the former island are certain small islands called the Grenadines, attached partly to the government of St. Vincent, and partly to that of Grenada; the largest of the latter is Carriacou, which has an area of 8,467 acres, and a population (at 24th April, 1921) of 7,104.

*General Description.*

Grenada is mountainous and very picturesque, its ridges of hills being covered with trees and brushwood. The mountains are chiefly volcanic, and have several lofty peaks, the highest of which is Mount St. Catherine, 2,749 feet, running off in spurs from the centre of the island, giving it an appearance of romantic beauty when viewed from the sea.

The island abounds in streams, and in mineral and other springs. The Grand Étang, a lake on the summit of a mountain ridge 1,749 feet above the level of the sea, and 7 miles from the town of St. George, and Lake Antoine, both old craters, are among the most remarkable natural curiosities; near the former a sanatorium is established. The roads of the colony are in excellent condition, and are kept in a state of thorough repair. About 146 miles of main roads, and a network of bye-ways (275 miles), provide good inland communication. The island is divided into six districts or parishes—St. George, St. David, St. Andrew, St. Patrick, St. Mark, and St. John—while the dependencies of Carriacou, Petit Martinique and other adjacent islets form a separate district, administered by a Commissioner. St. George's, the principal town, is a port of registry for shipping and had on 31st December, 1928, 139 vessels registered, of a total tonnage of 2,478 tons; its fine harbour, owing to its situation, healthiness, and great natural advantages, including a plentiful supply of water of the purest quality, offers exceptional inducements as a port of call and coaling station for steamers. The town had a population of 4,629 by census of 24th April, 1921.

The other towns in the colony are Gouyave (or Charlotte Town), Victoria (or Grand Pauvre), Sauters; Grenville (or La Baye); and Hillsborough, in Carriacou. English is universally spoken, but the peasantry speak among themselves a French *patois*. About two per cent. are

European blood, the remainder being of the Negro race, except the East Indian population, which was 181 in number according to the census of 1921.

#### *Climate.*

The climate in the dry season is delightful. In the wet season, as in all other tropical islands, it is damp and hot. But for six winter months, say from December to May, it is excellent, and is healthy at all times. The average annual rainfall at St. George's for the 30 years, 1889-1928, is 74.17 inches and the highest and lowest readings of the thermometer for the last five years are 90° and 60° respectively, 60° 8th August, 1928, the average mean temperature being 80° in the shade. The rainfall in other parts of the island is much greater; at the Grand Etang, in 1927, it was 140.47 inches.

#### *Industry.*

The prosperity of the island, like that of its neighbours, depends almost entirely upon the planting industry. It has long ceased to be a sugar-producing colony. The chief produce of Grenada is cocoa, of which a total value of 274,461l. was shipped in 1928. Attention has been turned with some success to the cultivation of other economic plants, such, for instance, as rubber, limes, coffee, kola nut, cloves, vanilla, pepper, cardamoms, coconuts, etc. Nutmeg cultivation occupies a prominent position. The value of spices exported in 1928 was 137,225l. In Carriacou cotton is the staple product, its cultivation having never been wholly abandoned there; the value exported in 1928 was with cotton seed, 12,585l. The cultivation of limes has now been successfully established in Carriacou, the exports of lime products in 1928 amounting to 5,710l. Tropical fruits of almost every description and of the finest quality are fairly plentiful, and are shipped to the Barbados and Trinidad markets. The principal food resources are yams, sweet potatoes, tania, kush-kush, pigeon-peas, plantains, bananas, Indian corn, cassava, bread fruit, etc. Fresh meat is always obtainable, and the animals slaughtered for the purpose are reared in the island. An excellent oyster is obtained in Carriacou, and turtles and fresh fish are plentiful. The forests produce valuable timber, such as bullet wood, locust, mahogany, red and white cedar, galba, etc. Rum is manufactured for local consumption, the total number of proof gallons in 1928 being 57,212.

A whaling industry on modern lines was established in 1925, with a factory at Glovers Island off the south-west coast of Grenada. 102 whales were caught in 1925, during the season from January to the end of April, and 112,963 gallons of whale oil valued at £16,870 were exported. Later the factory was equipped for the manufacture of whale guano, and the season of 1926 resulted in 108,055 gallons whale oil valued at 14,371l. and 1,898 bags of manure to the value of 1,726l. Owing to unfavourable results whaling operations were discontinued in 1927.

The main imports are food-stuffs, textiles, timber for building purposes, and hardware.

The principal exports, besides those products already mentioned, are turtles and turtle-shell, hides and skins, fruit and poultry.

Total acreage of land, exclusive of Carriacou, 76,548; acreage of Carriacou, 8,467.

There is a Government savings bank in St. George's, established in 1881, and extended to the out districts in 1889, and on 31st December, 1928, the amount at credit of depositors was 46,396l.

#### *History.*

Grenada was discovered by Columbus on 15th August, 1498, and was named by him Conception. It was at that time inhabited by Caribs. A settlement was attempted in 1609 by a company of London merchants, but the colonists were so harassed by the Caribs that the attempt was abandoned. In 1650 Du Parquet, Governor of Martinique, purchased Grenada from a French Company, and established a settlement at St. George's. Finding the expense of maintaining an armed force to support his authority not compensated by the expectation of future profits, Du Parquet sold the island in 1657 to the Comte de Carrillac for 30,000 crowns. The Governor appointed by the new proprietor ruled with so much tyranny that the most respectable settlers left the island; he was at length seized, tried, and executed by the colonists.

In 1674 the island was annexed to France, and the proprietors received compensation for their claims; and in 1762 it was surrendered to the British under Commodore Swanton, and was formally ceded to Great Britain by the Treaty of Paris on the 10th of February, 1763. In 1779 it was retaken by the French under the Count D'Etaing; and in 1783 it was restored to Great Britain by the Treaty of Versailles. In 1795-6 it was the scene of a rebellion against the British rule, instigated by the French Republic. The Lieut.-Governor and 47 other British subjects were massacred by the rebels, and the colony brought to the verge of ruin. In June, 1796, Sir Ralph Abercrombie suppressed the rising, and the ringleaders were executed.

In 1834 the apprenticeship system was established in regard to the African slaves, and this was followed in 1838 by their unconditional emancipation.

#### *Constitution.*

There was from 1786 a Legislative Council as well as a House of Assembly, the latter consisting of 21 elected members.

Under an Act of 1856, and limited in its duration to a term of three years, an Executive Council was formed, composed of members of both branches of the Legislature. The Act was allowed to expire, and the Legislative Council resumed its executive functions under the style of Her Majesty's Council.

This constitution was remodelled by an Act of the 7th of October, 1875, and a single Legislative Assembly established in lieu of the Council and Assembly. The Assembly consisted of 17 Members, 8 elected by the people, and 9 nominated by the Crown. The Act also appointed an Executive Committee of 5 members, 3 being nominated and the other 2 elected Members of Assembly. These Members received each a salary of 100l. a year, and were charged with the duty of advising the Lieut.-Governor on the conduct of affairs.

This Assembly at its first meeting on the 9th of February, 1876, addressed the Queen, informing Her Majesty that it had passed a Bill providing for its own extinction, and leaving "it entirely to your Majesty's wisdom and discretion to erect such form of Government as your Majesty may deem most desirable for the welfare of the Colony." The Imperial Act (39 and 40 Vict. c. 47) empowered Her Majesty to comply with this address, and Crown Colony Government was established in December, 1877.

On the 17th March, 1885, letters patent were passed constituting anew the office of Governor of the Windward Islands, and on 1st June, 1885,

Grenada became the headquarters of the Government, which includes the colonies of St. Lucia and St. Vincent.

Until the 1st of December, 1924, the Legislative Council consisted of six official members besides the Governor, and seven unofficial members nominated by the Crown.

By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of the Governor, seven *ex officio* members, three nominated unofficial members and five elected members. The Island is divided into five electoral districts, each returning one elected member.

The Government is assisted in the internal administration by six semi-elective District Boards.

#### Education.

There are 59 elementary schools, 10 Government and 49 aided. These schools are of five classes, Senior, Combined, Junior, Infant and Manual Training Centres. Head teachers of senior and combined schools are paid from 80*l.* to 160*l.* per annum, according to their certificates of proficiency, and to the class of school. Bonuses are given them for extra duties. Grants are also given by Government in aid of buildings, furniture and apparatus. The administration is entrusted to a Board of Education nominated by the Governor, half the members being Roman Catholic. In 1930 the average attendance was 8,260 children, the number on the rolls being 13,250. There is a Government secondary school for boys, and three for girls which receive grants-in-aid from the general revenue.

**ST. LUCIA.****Situation and Area.**

The island of St. Lucia was discovered by Columbus, during his fourth voyage, on the 15th June, 1502. It is situated in 13° 54' N. lat., and 60° 59' W. long.; at a distance of 24 miles to the south of Martinique, and 21 to the north-east of St. Vincent. It is 27 miles in length, and 14 at its greatest breadth; its circumference is 150 miles, and its area 233 sq. miles, rather less than Middlesex. Near its northern extremity lies Pigeon Island, formerly a military post of some importance.

Castries, the capital of the island, contains about 1,422 houses, and a population of 5,899 according to the census of 24th April, 1921. Next in importance is the town of Soufrière, containing a population of 2,480.

**History.**

At the period of its discovery St. Lucia was inhabited by the Caribs, and continued in their possession till 1635, when it was granted by the King of France to MM. de L'Olive and Duplessis. In 1639 the English formed their first settlement, but in the following year the colonists were all murdered by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who in 1650 sold it for 1,600*l.* to MM. Honel and Du Parquet. After repeated attempts by the Caribs to expel the French, the latter concluded a Treaty of Peace with them in 1660.

In 1663, Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia. The English continued in possession till the Peace of Breda in 1687, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France, and made a dependency of Martinique.

After the Peace of Utrecht, in 1713, the rival pretensions of England and France to the possession of St. Lucia resulted in open hostility. In 1718 the Regent, d'Orléans, made a grant of the island to Marshal d'Estrees, and in 1722, the King

of England made a grant of it to the Duke of Montague. In the following year, however, a body of troops, despatched to St. Lucia by the Governor of Martinique, compelled the English settlers to evacuate the island, and it was declared neutral.

In 1744, the French took advantage of the declaration of war to resume possession of St. Lucia, which they retained till the Treaty of Aix-la-Chapelle in 1748, when it was again declared neutral. In 1756, on the renewal of hostilities, the French put the island in a state of defence; but in 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton. In the following year, by the Treaty of Paris, it was assigned to France.

St. Lucia continued in the peaceable possession of the French till 1778, when effective measures were taken by the British for its conquest. In the early part of 1782, Rodney took up his station in Gros Islet Bay, in St. Lucia, with a fleet of 36 sail of the line, and it was from thence that he pursued Count de Grasse, when he gained the memorable battle of the 12th of April in that year. This event was followed by the Peace of Versailles, and St. Lucia was once more restored to France.

In 1793, on the declaration of war against revolutionary France, the West Indies became the scene of a series of naval and military operations which resulted in the surrender of St. Lucia to the British arms on the 4th of April, 1794.

In 1796 the British Government despatched to the relief of their West Indian possessions a body of troops, 12,000 strong, under the command of Sir Ralph Abercrombie, supported by a squadron under Admiral Sir Hugh Christian. On the 26th April these forces appeared off St. Lucia, and after an obstinate and sanguinary contest, which lasted till the 26th May, the Republican party, which had been aided by insurgent slaves under Victor Hughes, laid down their arms, and surrendered as prisoners of war.

The British retained possession of St. Lucia till 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since which period it has continued under British rule.

#### *General Description.*

On its final acquisition by the English, the island had become much depopulated, partly by war, but chiefly by intestine struggles, the fruits of the French Revolution. The recovery from this state of things has been slow, having been retarded by the severe epidemics of cholera and small-pox which have at different times visited the West Indies. Each census, however, has shown an advance in this respect, and the population at 31 December, 1930, is estimated at 58,494. Most of the inhabitants speak a French *patois*, but English is gradually becoming more generally used. A very small percentage is of European descent, the remainder being of the negro race, except 2,189 of East Indian origin. The reputation of the island for peculiar unhealthiness is undeserved, the death rate for 1930 being 16·1 per 1,000, and for the year 1929 20·5 per 1,000. Certain spots situated in narrow valleys between high mountains are undoubtedly unhealthy, but are becoming less and less so as the forests fall before a yearly extending cultivation.

The danger from venomous reptiles is also much exaggerated. Owing to the introduction and spread of the mongoose, snakes are now but

rarely met with. Among white inhabitants, consumption and other of the most fatal diseases of temperate climates are almost unknown. The temperature from December to April seldom exceeds 80° Fahr., even at midday, in spots situated a few hundred feet above the sea, and a fresh trade wind blows continuously. The scenery is of peculiar beauty, even as compared with that of other West India Islands, and in the neighbourhood of the Pitons has the less common element of grandeur. These are two cone-shaped rocks rising sheer out of the sea to a height of nearly 3,000 feet, and near them is the crater of a volcano and a *souffrière*, the ordinary characteristics of the Caribbean Cordillera.

Castries, the chief town, has an excellent harbour. Dredging operations have been carried out in the harbour, rendering it more commodious. A substantial concrete wharf, 660 feet in length, with a depth alongside of 27 feet at low water, has been completed, and the western wharf, having a length of 552 feet, has been refaced in wood, and dredged to an average depth alongside of 18 feet to 24 feet. The facilities offered by the port as a port of call and coaling station are widely recognised. It is a port of registry, and had, on 31st December, 1930, 16 vessels registered, of a total tonnage of 474 tons.

A Government savings bank was established in 1871, and has now 706 depositors, with 10,573*l.* to their credit on 31st December, 1930. Branch savings banks were opened at Soufrière and Vieux Fort in March, 1898, at Dennery and Gros Islet in November, 1903, and at Anse-la-Raye in December, 1906.

#### *Constitution and Law.*

Up to the period of the French Revolution, and after the restoration of order in 1800, the island was governed according to the law and ordinances of the French monarchy. The Courts of Justice were an inferior Court called the "*Sénéchaussée*," and a higher Court, called the "*Conseil Supérieur*," or Court of Appeal. The latter Court was composed of a President and twelve Councillors; the Governor often presided, and it was invested with certain executive and administrative functions.

The Government is now conducted by an Administrator (who is subordinate to the Governor of the Windward Islands), aided by an Executive Council. By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of six *ex-officio* members, three nominated unofficial members and three elected members. On the 12th February, 1931, that Order in Council was amended to provide that the Council should consist of three *ex-officio* members, three nominated official members, three nominated unofficial members, and three elected members. The Island is divided into three electoral districts, each returning one elected member. The first election under this constitution was held in March, 1925. Law is administered by a Chief Justice, from whom in civil cases there is an appeal to the West Indian Court of Appeal, and two magistrates, whose decisions are liable to review by the judge. In criminal cases tried in the Superior Court facts are decided upon by a jury of twelve as in England.

A code of civil law, the authors of which were Sir G. W. Des Voeux, G.C.M.G., and Mr. James Armstrong, C.M.G., became law in October, 1879. This code was framed upon the principles of the ancient law of the island, with such modifications as are required by existing circumstances.

The Statute Law of the Colony was consolidated to 1916 by Mr. F. H. Collier, Chief Justice, who also edited the Commercial Code, 1916.

The revising and editing of the Criminal Law and Procedure of the Colony by Mr. J. E. M. Salmon was completed during 1920 and proclaimed as the Criminal Code, 1920. It came into force on the 1st January, 1921.

#### Education.

On the 30th June, 1891, the trustees of the Lady Mico charity closed the eleven schools which they had till then maintained, and withdrew their connection with the Colony. Three of these schools became Government schools, and the others assisted schools under the new Education Ordinance. In 1898 all the Government schools were handed over to the Roman Catholic body, and became assisted schools. There were, on the 31st December, 1930, 50 assisted schools. Of these, four were Anglican, three Wesleyan and 43 Roman Catholic. The number of children on the rolls was 9,615, with an average attendance of 6,589, and the amount spent by the Colony on primary education was 5,097*l*. The Government grants 45*o* a year to a Roman Catholic second-grade school, which has 70 boys on the roll; the Sisters of St. Joseph conduct a similar school for girls. The number of pupils on the roll is 94 and a Government grant of 17*o* is made to the school annually.

#### Industry, Trade and Customs.

Sugar, rum, cocoa, logwood, coconuts, limes, bananas, Bay oil, Bay rum, and spices are produced. There are four sugar "Usines" with the best machinery, and the export of cocoa is increasing. Limes are being extensively planted, and a Government Factory has been erected in Castries, with the object of encouraging the establishment of the industry among small proprietors, at which limes and lime-juice are purchased at market rates. This factory has now been leased to private individuals. Rubber and cotton grow well, and samples of the former prepared at the Botanic Station, from trees growing there, have received favourable reports.

A considerable amount of land is in the possession of the Crown, and may be purchased in lots up to and including 50 acres, at \$1 per acre, and for every acre beyond 50 at 10/- per acre, payable by four equal annual instalments. In the event of a certain area being put into permanent cultivation before the due date of the last instalment, that instalment may be remitted. Under the Crown Lands Regulations, the period over which (in certain cases) the payment of the purchase money may be spread is ten years. The soil will grow any kind of tropical fruit trees or economic plants.

Surveys are made at the cost of the purchaser.

The Customs Import Tariff is mainly on a specific duty basis, with a preference in favour of Empire products which in most cases amounts to one third of the general tariff rate.

The percentage of the Colony's Import Trade with the United Kingdom, other parts of the British Empire, and the principal foreign countries during 1930 was as follows:—

## ST. VINCENT.

### *Situation and Area.*

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10' N. latitude, and 60° 57' W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length, and 11 in breadth, and contains about 96,000 acres of land, about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown.

### *General Description.*

Kingstown, the capital of St. Vincent, is situated at the side of an extensive bay, at the south-western extremity of the island. It consists of three principal streets, each about a mile long, running parallel with the beach, and contained at the census of 1921, a population of 3,836 souls. It is a port of registry, and had, on 31st December, 1930, 21 sailing vessels of a net tonnage of 616 tons and 2 motor vessels of 52 tons net.

There are five other small towns in the island, the most important being Georgetown on the north-east, and Barrouallie on the west.

The most striking natural feature of the island is its "Soufrière," or volcano, situated at the northern extremity of the island, and rising to about 4,048 feet above the level of the sea. After a violent eruption in 1812, it remained dormant for a period of ninety years, and then broke into violent eruption again on May 7th, 1902, when the entire northern half of the island was devastated, and nearly 2,000 lives were lost. The eruption synchronised with that of Mont Pelée in Martinique which destroyed the town of St. Pierre. The "Soufrière" remained intermittently active throughout 1902, and there was a further eruption in March, 1903, since when it has remained quiescent.

The whole island is of volcanic origin. A backbone of densely wooded and almost impassable mountains traverses it from the "Soufrière" at its northern end to Mount St. Andrew (2,500 ft.), dominating the Kingstown valley at its southern extremity. This range sends off spurs on each side, cutting up the island into a series of valleys, trending east and west from the central range to the coast. There is a somewhat level tract called the Carib Country at the north-east of the island, between the "Soufrière" and the sea. This district formerly comprised the most fertile sugar estates. The next highest point after the "Soufrière" in the range is Richmond Peak, 3,539 feet high. The streams are numerous but small, except after heavy rains; the principal is the Richmond River.

In September, 1898, the island was visited by a severe hurricane, which caused widespread destruction, and reduced large numbers of the inhabitants to destitution. In September, 1921, the island was again struck by a hurricane which, although not as violent as its predecessor, did

considerable damage to property and crops, entailing considerable hardship on the populace and necessitating the expenditure by Government of 3,288*l.* on relief measures.

### *Climate.*

In the dry season, January to May, the climate is charming. In the wet season, and especially from August to November, the climate is damp and hot, but not at all unhealthy. The nights are cool all the year round. The rainfall during 1930 was 80·47 inches. The highest reading of the thermometer during the same year was 88° F., the lowest 65° F., the mean monthly temperature being 79·9° F. in the shade. The prevailing wind is N.E.

### *Industry, Trade and Customs.*

Sugar, syrup, rum, cocoa, and excellent arrowroot are produced. The cultivation of coconuts, ground nuts and spices is also attracting attention, and Sea Island cotton, the best in the Empire, is extensively planted, for the ginning of which a Government Ginnery has been erected. Most of the sugar and all the arrowroot mills are worked by water power. A large proportion of the cultivable land is owned by a few individuals; portions of Crown lands, have been alienated to peasant proprietors, and several estates have been purchased by the Government with the aid of an Imperial grant and allotted to the same class of settlers. The forests produce excellent woods. There are 65 miles of highway running round the island, for the most part close to the coast, but on the leeward coast communication is mainly by boat, and nearly all the produce is water borne. There are also some 300 miles of byeway connecting with the highway.

The port of Kingstown is visited weekly by steamers of the Canadian National Steamships and the Ocean Dominion Steamship Corporation and occasionally by steamers of the Harrison Line and the Furness Withy Line.

A telephone system has been established, having 1 central and 3 branch exchanges, with 234 connections and some 241 miles of line.

The import duties are largely *ad valorem*, mostly 15 %; but there are many specific duties. Preferential rates, mostly two-thirds of the general rate, are charged on imports from other British countries.

Export duties are levied on cotton, arrowroot, ground nuts and cocones.

The following table shows the direction of the Trade for the year 1930.

### *History.*

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed pos-

session of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

No steps, however, appear to have been taken to form a settlement on the island, and the English and French came to an agreement to abandon the Islands of Dominica and St. Vincent to the Caribs, on condition of their renouncing all claim to the other islands.

In 1722 George I. made a grant to the Duke of Montague of some of the West India Islands, including St. Vincent.

From statistics of the year 1740 it appears that the white inhabitants then amounted to about 800, and the slaves to 3,000, producing commodities for exportation to the value of 63,625*l*.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed, and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was ceded to Great Britain, when General Melville was appointed Governor.

By a treaty, which was concluded in February, 1773, an extensive district of St. Vincent was allotted to the Caribs (who for some time had been in a state of open rebellion) on condition of their laying down their arms and acknowledging the King of Great Britain as the rightful sovereign of the island.

In 1779 the island surrendered to the French. The following year has been rendered memorable by the occurrence of the greatest hurricane of which there is any record in West Indian annals. By the Treaty of Versailles in 1783, St. Vincent was restored to Great Britain.

From this period to the breaking out of the French Revolution the island appears to have enjoyed comparative prosperity and peace; but in 1796 the Caribs and their allies (the French) again overran the country, burning the cane-fields, plundering the houses, and mercilessly murdering the English colonists. This state of things continued till the arrival of the "Zebra" sloop of war, with succours from Martinique, then the British headquarters.

The contest was carried on, with alternations of good and ill fortune, until the arrival of Sir Ralph Abercrombie with reinforcements in June, 1796. After an obstinate struggle the insurgents surrendered at discretion. The Government, in anticipation of such an event, had resolved that the Caribs should be transported to the Island of Ruatan, in the Bay of Honduras; and accordingly, on the 11th March, 1797, the necessary transports having been provided, the Caribs, to the number of 5,060, were embarked at Bequia, and sailed for their appointed destination.

In 1834 the apprenticeship system was established, and was followed in 1838 by unconditional emancipation of the negro slaves. The year 1846 witnessed the first introduction of Portuguese labourers, a class of immigrants who amounted in a few years to 2,400, and have proved a valuable addition to the general population of the island.

St. Vincent received its first East Indian Coolie labourers in 1861. Most of them returned to India, but some made their home in the Colony.

#### *Constitution.*

The Government of St. Vincent originally consisted of a Governor, Council, and Assembly.

The Council consisted of twelve members, one half of whom were named in the Governor's Commission, and the remainder appointed on his recommendation. The Assembly was composed of nineteen members, including two for the Grenadines. In 1856 an Executive Council was created, consisting of ten members, five from the Legislative Council, and five from the Assembly. In 1859 this Council was re-modelled, with the addition of an Administrative Committee, selected by the Governor and composed of three members—one from the Legislative Council, and two from the Assembly. This Act of 1859 had, however, a duration of only five years.

The constitution, however, was found no longer suited to the altered circumstances of the Colony, and in 1867 the Legislative Council and House of Assembly were abrogated, and a single Legislative Assembly was created instead thereof. This Assembly was composed of 12 members, viz.:—three *ex officio*, three nominated by the Crown, and six elected by the people. (The number of electors registered for the year 1874 was only 388.)

But this constitution also was abrogated by an Act of the Local Legislature (conferred by an Imperial Act, 39 & 40 Vict. c. 47), by which the future modelling of the constitution was left to the Crown. Until 1st December 1924, the Legislative Council consisted of official and unofficial members nominated and appointed by the Crown.

By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of the Governor, four *ex officio* members, one nominated unofficial member and three elected members. The Island is divided into three electoral districts, each returning one elected member.

The several courts of the Colony were, by an Ordinance of the Local Legislature passed in 1880, consolidated into one court, styled the Supreme Court of Judicature. The Chief Justice of the Colony is the sole Judge of this court.

#### *Education.*

There were, on 31st December, 1930, 35 primary schools, with 8,562 children on the rolls. The average attendance during 1930 was 4,613. There is also a government secondary school for boys, and a high school for girls.

An Island Scholarship is awarded biennially tenable for from three to five years at an approved University. Annual value 250*l*. and cost of passage.

The Government expenditure on primary education in 1930 was 4,630*l*.

#### *Savings Bank.*

A savings bank was established in 1866, and had 738 depositors, with 15,001*l*. deposited, on 31st December, 1930. Branches of the bank have been opened at Georgetown, Barrouallie, and Union Island.

## ZANZIBAR.

### *Situation and Area.*

The island of Zanzibar is situated in 6° S. latitude and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is 53 miles long by 24 broad (maximum measurements), and has an area of 640 square miles. To the north-east at a distance of some twenty-five miles lies the island of Pemba in 5° S. latitude. It is smaller than Zanzibar, being 42 miles long by 14 broad (maximum measurements), and having an area of 380 square miles.

### *Climate.*

The annual rainfall amounts approximately in Zanzibar to 59 inches and in Pemba to 82 inches. The rainy seasons are well defined: the heavy rains occur in April and May previous to the setting in of the south-west monsoon, the light rains in November and December before the recurrence of the north-east monsoon. The mean

maximum temperature in Zanzibar is 84·5° and the mean minimum 76·5°. The corresponding figures for Pemba are 86·6° and 76·0° respectively.

### *People.*

The Arabs were the conquerors of the islands. They founded the clove industry and still possess considerable property in plantations. They understand the natives and the natives understand them and accept their control and that of Europeans more readily than that of other races.

The bulk of the native population numbering 186,000 is known by the generic name of Swahili, a term formerly used to denote the Bantu coast tribes from Somaliland to Mozambique, "sawahili" in Arabic meaning "coasts." This general appellation includes the descendants of the early settlers of the island of Zanzibar who intermarried with negro women. They are called Wahadimu and live on the eastern and southern portions of the islands. A quiet shy people, occupied mainly in the cultivation of native crops and fishing, they rarely move from their homes except to pick cloves. The name Swahili also includes the descendants of the early settlers in Pemba who are known as Wapemba. These people engage chiefly in agriculture but raise a smaller variety of native crops than the Wahadimu. Many of them own clove and coconut plantations. They live in less seclusion than the natives on the larger island. Another tribe included in the term are the Watumbatu whose chief stronghold is Tumbatu Island. They are a very exclusive people but by no means shy. They go down to the sea and man most of the craft plying in Zanzibar waters.

There is in addition a considerable influx of various tribes from the mainland, of whom the Wanyamwezi are economically the most important, being now the chief source of supply for the weeding of plantations.

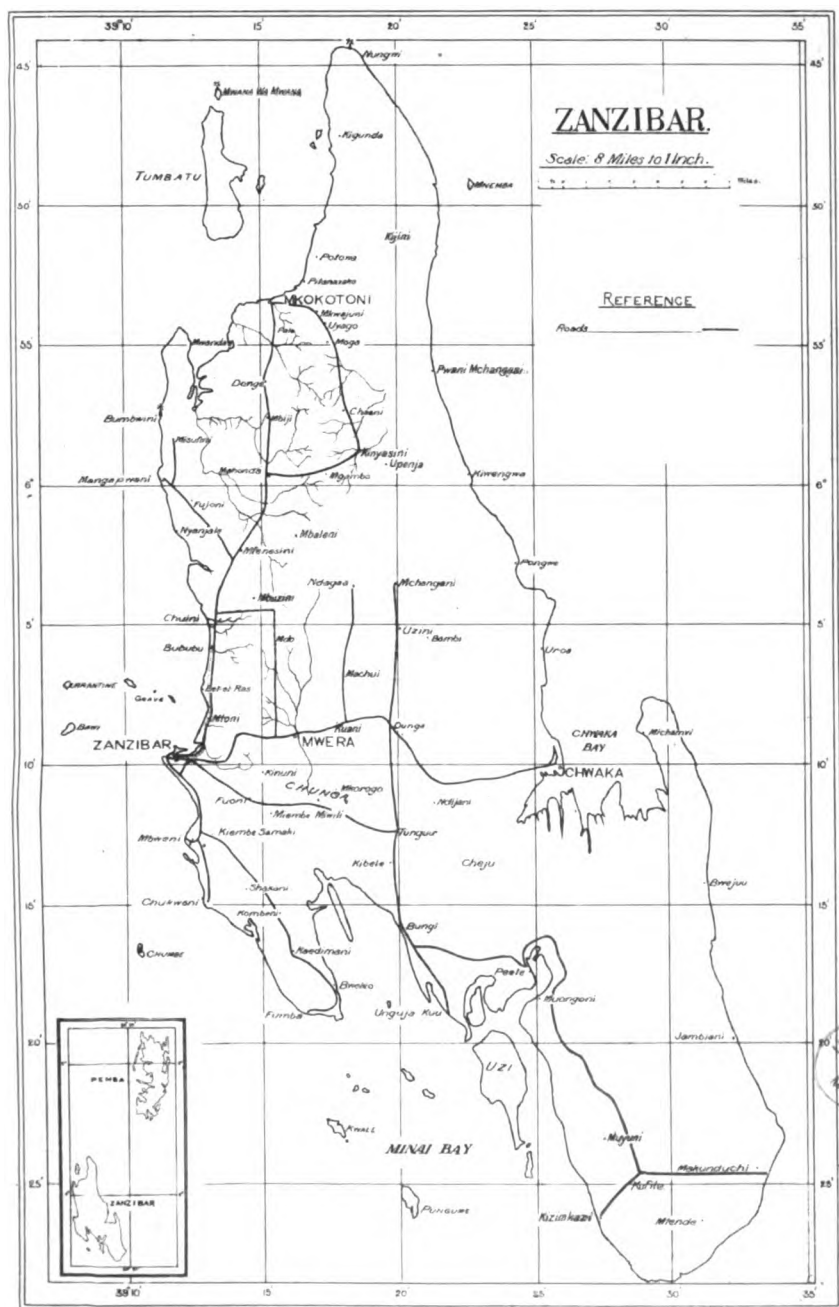

In the 1931 Census the total population of the Protectorate was returned as 235,428. The non-native population numbers 49,000 of whom 33,400 are Arabs. The Khojas, Bohoras, Hindoos, Parsees, and Goans possess most of the trade, either as merchants, shopkeepers, money-lenders, small traders, or skilled mechanics.

### *History.*

The beginnings of Zanzibar history are lost in antiquity. It appears more than probable that the islands of Zanzibar and Pemba were known to the ancient Egyptians, Phoenicians, Assyrians, and Jews, but though the expedition of Necho (C. 600 B.C.) doubtless passed the Islands it is not till the first century that the Periplus gives a description of one of them under the name of Menuthias. The Hindus appear to have settled at a very early date and traces of Greek colonisation are not lacking. From about the 7th Century B.C. the Islands appear to have had a close connection with the South Arabian States. Bantu settlers probably made their appearance during the first five centuries A.D., and thereafter for the next five hundred years or so came also traders from China and Malaya in addition to those from the Persian Gulf. The Coast was probably converted to Islam early in the 10th Century. The Zanj Empire was founded by Ali bin Hassan, a prince of Shiraz, about 975 A.D. but it soon broke up into separate states and, by the time the Portuguese began the conquest of the East African littoral, was already declining. It was during the sixteenth century that the

Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese, and the capture of Mombasa Fort in 1698 may be said to mark the downfall of Portuguese power north of Mozambique. On the ruins of the Portuguese power in the seventeenth century arose that of the Imams of Muscat. The allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said, after having subdued his enemies on the mainland, transferred his capital to Zanzibar in 1832. On his death in 1856 a dispute as to the succession arising between his sons Seyyid Thwain of Muscat and Seyyid Majid of Zanzibar the African possessions were made independent and confirmed under Majid by an arbitration (dated 1861) of Lord Canning, then Governor-General of India.

Seyyid Said laid the foundations of Zanzibar's importance by transferring his capital from Muscat and making the island his permanent residence in the year 1832. Under his direction Zanzibar soon became both politically and commercially the principal native city in East Africa. "If you play on the flute at Zanzibar," says an Arab proverb of the period, "all Africa as far as the lakes dances." Said's son Majid was succeeded in 1870 by Barghash, the first of his race to be commonly known as Sultan of Zanzibar.

In the year 1890 the supremacy of British interests in the islands themselves was recognized by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions which extended over the coast of East Africa, from Warsheikh in 3° N. latitude to Tunghii Bay in 10°42' S. latitude were ceded to Italy, Great Britain, and Germany respectively, Great Britain and Italy paying rent for the territories under their protection while Germany acquired the Sultan's rights by the payment of a sum of 200,000*l.* At a later date Italy also acquired these rights by payment of a sum of 144,000*l.*

In 1891 a regular government was constituted with a British representative as first minister. On the death of the Sultan in 1896 the palace was seized by a member of his family, Seyyid Khaled, and to compel the latter's submission the palace was bombarded by British warships. In 1906, the British Government assumed more direct control over the Protectorate and reorganized the Government. In 1911 Seyyid Ali abdicated the throne and was succeeded by the present ruler, Seyyid Khalifa bin Harub. On 1st July, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change of administration in the following year.

The Government was vested in a High Commissioner, who was also Governor of the British East Africa Protectorate, and a British Resident.

A Protectorate Council, with His Highness as President, was established at the same time. It was of an advisory and consultative nature and ceased to exist in 1926 when Executive and Legislative Councils were constituted.

During the Great War a European Defence Force and a Native Carrier Corps were raised and many natives enlisted in the King's African Rifles. Zanzibar contributed £70,000 to the Imperial Government and £245,000 was invested in War Loan. £19,000 was raised by public subscription for the British Red Cross Society.

Since the War the principal event has been the abolition of the High Commissionership in 1925. During the last few years great progress has been made in Education and the provision of improved means of transport. Much attention has been directed to the regeneration of the clove industry.

### *Industries and Trade.*

Zanzibar is now the dominant partner in the clove industry, holding as it does about 88 % of the shares. The other partners are Penang, Amboyna and some other islands in the East Indian Archipelago, and Madagascar.

Authorities differ as to the date when and country from which the clove tree was first introduced into Zanzibar. Some say that it was brought from Réunion by an Arab at the end of the 18th century. Colonel Rigby, Her Majesty's Consul and British Agent, in his report on the Zanzibar dominions written in the year 1860, states "the first clove trees were introduced about 30 years ago from Mauritius; being found to thrive they were extensively planted and they have now become the most valuable production of these Islands."

To Seyyid Said belongs the credit of establishing and promoting the clove industry. Burton records that he threatened confiscation to those who did not plant three clove trees for every coconut and that the country was almost denuded of the latter to make room for cloves. In 1839-40 the output amounted to about 9,000 frasilas. (The Frasila, equivalent to 35 lbs., is the local measure of weight for cloves). In 1849 it had risen to frasilas 120,000. In 1859 frasilas 139,000, valued at 55,666*l.* were exported, and the average output during the next decade was frasilas 200,000, valued at about 85,000*l.* Owing to the increase in production the price had, however, fallen from \$5-6 to \$1-2.

In 1872, a hurricane of great violence swept over the Island of Zanzibar and destroyed two-thirds of the clove and coconut trees. Pemba, though touched by the hurricane, sustained little damage. The years following this disaster were years of short supply, high prices, and intensive cultivation. The Pemba owners, actuated by motives of gain, hastened to cut down coconut trees on a wholesale scale throughout the island and to plant clove trees in their place. The Zanzibar owners, though temporarily ruined, set to work with commendable fortitude to replace the trees which the hurricane had destroyed, and ten years after the hurricane the normal output of cloves had not only been restored but increased.

Another event of great economic importance to the industry was the abolition of slavery. The industry was built up and for many years sustained on slave labour imported from the interior of Africa. In 1873 Seyyid Burgash entered into a treaty to suppress the sea-borne traffic in slaves and to close all public markets in his dominions for the buying or selling of imported slaves. Various treaties and legislative measures followed until the year 1897, when by a decree of Seyyid Hamud the legal status of slavery was abolished. It may be noted parenthetically that in the year 1890 Great Britain assumed a protectorate over Zanzibar.

The history of labour subsequent to 1897 is a tale of shortage, disinclination on the part of the labour available to engage in any form of settled work, inability or disinclination on the part of the Arabs to pay money wages, and administrative

effort to organise the available supply. The introduction of Indian labour was at one time or another canvassed but never materialized. In 1904 and 1906 and at other subsequent times recourse was had to recruitment of labour on the mainland. Mainlanders have also come voluntarily, settled in appreciable numbers, and are now the chief source of supply for cultivation of plantations. The situation has also doubtless been eased by the gradual passing of much property in plantations from Arabs to natives.

Since abolition of slavery no event of major economic consequence has occurred. There have been the usual ups and downs, but production has steadily increased, 145,831 cwts. of cloves valued at Rs. 97,66,600 were exported in 1930.

The growers were organised into a Clove Growers' Association in 1927, with the primary object of reducing the cost of production of cloves. Later in the year the activities of this body were extended to include co-operative transport and marketing of produce. The first annual conference of the association was held in Zanzibar in July, 1928, and was attended by delegates from both islands.

The coconut industry ranks next in importance after cloves, the conditions in both Islands being favourable to the growth of the tree and its nut-bearing properties. It is estimated that there are about 55,000 acres under cultivation and 3½ million trees in both Islands. The export of domestic copra, amounted to 12,600 tons in 1930. Much is produced by the small grower or trader, neither of whom possesses proper drying facilities, with the result that the quality of the product compares unfavourably with that of Ceylon and Ceylon.

The principal re-exports are rice and other grains, copra, ivory, and cotton piece goods.

The chief imports are cotton piece goods, ghee, rice, flour and other grains, groceries, sugar, tobacco, copra, ivory, bags, sesame, petroleum, and silk and artificial silk goods.

#### *Currency and Banking.*

The silver rupee of British India of the standard weight and fineness enacted in the Indian Coinage Act, 1906, is the standard coin of Zanzibar. All other silver coins of British India of the standard weight and fineness enacted in the Indian Coinage Act, 1906, are legal tender for the payment of an amount not exceeding 5 rupees. These coins are ½, ¼, and ⅛ of a rupee. Seyyidiyah copper piece are legal tender at the rate of 64 pice to 1 rupee for the payment of an amount not exceeding 1 rupee. There is a Government note issue of the denominations Rupees 1, 5, 10, 20, 50, 100, and 500.

The National Bank of India, Ltd., and the Standard Bank of South Africa, Ltd., have branches in Zanzibar.

#### *Shipping and Communications.*

The port of Zanzibar is one of the finest in Africa, and was for long a main centre of commerce between India, Arabia, and the mainland. Of late years, however, the importance of Zanzibar as a port of trans-shipment and distributing centre has largely decreased owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, nevertheless, tend to indicate that the Island will continue, by

reason of its geographical position, to retain control of the local traffic.

The British India Steam Navigation Company maintain a monthly service between London—Zanzibar—Beira, the Union Castle Mail Steamship Company a monthly service London—Zanzibar—London round Africa in alternate directions, the Clan—Ellerman—Harrison Line between Glasgow—Liverpool—Zanzibar—Beira (cargo only), the Compagnie des Messageries Maritimes a fortnightly service Marseilles—Zanzibar—Madagascar, the German East Africa Line a monthly service Hamburg—Zanzibar—Hamburg round Africa in alternate directions, the Holland Africa Line a fortnightly service Rotterdam—Zanzibar—Rotterdam round Africa in alternate directions, the Compagnia Italiana Transatlantica a monthly service between Genoa and Zanzibar and an irregular coastal service between Zanzibar and Italian Somaliland, the Navigazione Littora Triestina a monthly service Venice—Zanzibar—Venice in alternate directions. The British India Steam Navigation Company also maintain a fortnightly service Bombay—Zanzibar—Durban, also a coastal service Lamu—Zanzibar—Mikindani, the Osaka Shosen Kaisha a monthly service Kobe—Zanzibar—Durban and South America. Messrs. Cowasjee Dinshaw & Bros., maintain a fortnightly service between Zanzibar and Kismayu. Government steamers maintain regular weekly connection with Pemba and Dar-es-Salaam. Zanzibar has become a port of call in the itinerary of a number of large tourist steamers.

There is cable communication with Europe either via Aden or via Durban.

There are 165·46 miles of roads throughout the Island of Zanzibar and 73·22 miles in Pemba suitable for motor traffic. The Government maintains wireless stations in Zanzibar and Pemba and a telephone system in the town of Zanzibar which is connected with the District and Agricultural Stations in the country. There are 7 post offices in the two Islands.

#### *Constitution and Government.*

The Government is administered by a British Resident, who is appointed by commission under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Orders in Council, 1924 and 1925.

Legislation consists of the Decrees of the Sultan, and certain Imperial Statutes of general application. Many Indian Acts, such as Penal Code, Civil and Criminal Procedure, etc., have been adapted to local requirements and enacted in the form of Decrees. His Highness's decrees when countersigned by the British Resident under Article 42 of the Zanzibar Order-in-Council, 1924, are binding upon all persons. The Muhammadan Law, declared in civil matters to be the fundamental law of His Highness's Dominions, controls in some measure personal relationship and land tenure among the Islamic population.

There are Executive and Legislative Councils, established by the Sultan's Decree No. 1 of 1926. The former is presided over by H.H. the Sultan, and the latter by the British Resident. There are three other ex-officio official members and five nominated. There are six unofficial members representing the various communities.

Justice, in cases in which persons subject to the Zanzibar Orders-in-Council, 1924 and 1925, are concerned, is administered

by H.B.M.'s High Court and the Courts subordinate to it, and in other cases by H.H. the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers, and Arab Kathis. In addition, District Courts, composed of benches of local headmen, exercise a limited criminal jurisdiction. An Appeal lies from the British Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

## APPENDIX.

This Appendix gives some account of Iraq (Mesopotamia), North Borneo, Sarawak, Trans-Jordan and certain miscellaneous British Possessions and Protectorates which are not included in the main portion of the Historical and Statistical Account above.

## IRAQ.

The Kingdom of Iraq is comprised approximately of the Basrah, Baghdad and Mosul vilayets of the former Ottoman Empire. Its territory stretches from Fao on the Persian Gulf in the south-east to the junction of the rivers Tigris and Khabur in the north-west. The area of Iraq is 116,511 square miles. It is bounded on the north by the Turkish frontier, which was defined in a treaty between the United Kingdom, Iraq and Turkey, signed at Angora on June 5th, 1926. On the east, it is bounded by Persia. The frontier, the delimitation of which was completed by a Turko-Persian Commission in 1914, runs in the north through, and in the southern portion skirts, the Kurdish mountains which form the western edge of the Persian plateau, and descends 10 miles above Mohammerah to the Shatt-al-Arab, the river formed by the union of the Euphrates and the Tigris. On the south, Iraq is bounded by the Persian Gulf, the territory of Kuwait and the Nejd frontier as defined in a protocol to the Mohammerah Treaty between Iraq and Nejd, signed at Uqair in December, 1922; and on the south-west and west by the deserts of northern Arabia and Syria. On the north-west, the boundary between Iraq and Syria was provisionally settled by the Franco-British Convention of 23rd December, 1920. It runs from the Tigris at Faishkhabur to Albu Kamal on the Euphrates, and thence across the desert to Imtar, south of Jabal Druz. Apart from the hill country in the north-east, Iraq mainly consists of great plains traversed by the Euphrates and the Tigris. The country between these rivers is divided into two parts. The southern portion,

stretching from Baghdad to Basra is a great alluvial plain about 35,000 square miles in area with a fertile soil wherever the land can be irrigated without being drowned. A considerable extent of it is, however, covered by marshes formed by the uncontrolled action of the rivers and canals. The northern portion known as Jazirah or "the Island," is more undulating, and is in places broken by ranges of hills. It is fertile under irrigation in the north, but further south the plains become more arid until it passes into a hard desert tract.

The climate of Iraq is of the continental sub-tropical type, with very high temperatures in summer in the plains. In July and August the mean daily maximum temperature is 104° F. at Basra, and 110° F. at Baghdad, while in December and January the mean daily minimum temperature is 47° F. at Basra and 40° F. at Baghdad. The rainy season is from November to March. There is a rainless summer of six months lasting from about April to September. The Mosul area has a rainfall of about 13 inches a year and relies on the rain to grow its crops. The rest of the country, however, has an annual rainfall of only about seven inches, and the crops are grown, with very little help from the rain, on irrigated land.

The chief towns are Baghdad, Basra, Mosul, Karbala, and Najaf. The two last, situated on the edge of the Arabian desert, are pilgrim centres which attract Shi'ahs from all parts of the Mohammedan world, but especially from Persia and India.

*Population.*

According to a census taken in 1920 the population numbers 2,849,282, made up as follows:—

	Sunni.	Shi'ah.	Jewish.	Christian.	Other Religions.	Total.
Basra Vilayet ...	42,558	721,414	10,088	2,551	8,989	785,600
Baghdad Vilayet ...	524,414	750,421	62,565	20,771	2,133	1,360,304
*Mosul Vilayet ...	579,713	22,180	14,835	55,470	31,180	703,378
Total ...	1,146,685	1,494,015	87,488	78,792	42,302	2,849,282

\* The figures for Mosul include the population of the Kurdish area of Sulaimaniya, viz., 155,000, of whom all but 1,100 are Sunnis.

*Natural Products.*

As was the case before the war, the chief articles of export from Iraq are dates, wool and barley. In normal years of average yield and average foreign demand the volume of this export may be estimated as dates 120,000 tons, wool 7,000 tons, and barley 100,000 tons. Wheat is also widely grown and exported. Rice, in most cases "red" rice of inferior quality, is grown on the swampy lands on the Middle Euphrates, in the Amara area on the Tigris, and to a small extent, on the Diyala canals near

Baghdad. Rice of better quality but in very small quantities is grown in the Kurdish hills.

In the Kurdish regions round Sulaimaniya and Ruwandiz and to the north of Mosul tobacco is an important crop. The crop supplies native pipe and cigarette tobacco for the whole of Iraq but none is as yet exported. The sale of the native form of cigarette made from it has been decreasing for some years owing to the competition of imported manufactured cigarettes in European form. Factories to produce the latter are, however, being gradually established.

Cotton is grown in Central and Southern Iraq. Experiments carried out since the occupation of Baghdad in 1917 tend to show that Iraq cotton compares favourably with cotton grown in other parts of the world. Production slowly but steadily increased after the war; and according to figures given from the ginnery at Baghdad of the British Cotton Growing Association of Manchester, the 1928 crop exceeded 3,500 bales, but this dropped to 1,800 bales in 1927. The crop increased to 5,200 bales in 1928, but dropped to 4,700 bales in 1929 and to 3,200 bales in 1930.

As regards the wool export, the principal sheep rearing districts are the Mosul area and the Kurdish hills.

Concessions for the exploitation of the oil resources of Iraq have been granted to the Turkish Petroleum Co. (now Iraq Petroleum Co.), and the Anglo-Persian Oil Company. The former concession covers the whole of that part of the Mosul and Baghdad Wilayats which lies to the east of the River Tigris, excepting the area on the N.E. frontier transferred from Persia to Turkey in 1913-14 which is known as the Transferred Territories. The Turkish Petroleum Company began comprehensive prospecting in the Autumn of 1925 and during 1927 inaugurated eight drills in seven different areas. In October of that year the first "gusher" was struck and capped at Baba Gurgur near Kirkuk. The Company have since been engaged in further testing and during 1930 were concentrating on bringing the Kirkuk structure to production. This involves a pipe line to the Mediterranean some 550 miles long. The Anglo-Persian Oil Company's concession is confined to the Transferred Territories and is an adaption of the D'Arcy Concession held by the company from the Persian Government, which the Turkish Government and later the Iraq Government agreed should continue in the Transferred Territories where the company has been prospecting for many years. Since the war oil has been struck near Khanaqin and the field is considered a promising one. The Anglo-Persian Subsidiary, the Khanaqin Oil Company, have opened a refinery near to Khanaqin town which produces sufficient petrol, kerosene and crude oil for the needs of Iraq.

Minor products are millet, licorice root, gall-nuts, gum and dye-roots.

#### *Railways.*

The railways open to traffic are—

#### *Metre Gauge.*

1. Basra-Baghdad with branches to Nasiriya and Karbala.
2. Baghdad-Khanaqin (approximately 7 miles from the Persian frontier) with a branch line to Kirkuk.

In all, 624 miles of open line and 796 miles track mileage.

#### *Standard Gauge (4ft. 8½in.).*

3. Baghdad-Samarra-Baiji 132 miles of open line and 211 miles track mileage.

There is a gap of 125 miles approximately between the Iraq railroads either at Baiji or at Kirkuk, and Mosul: and the old Baghdad Railway runs to Nisibin about 125 miles from Mosul. Thus railway communication between Constantinople and Basra, *via* Aleppo, Mosul and Baghdad is complete except for a gap of less than 250 miles. The Iraq Railways

now link this gap for passengers by a motor service. An extension of the Aleppo-Nisibin line for about ten miles into Syria was completed in 1930 but not opened to general traffic.

About 75 miles of the Baghdad-Samarra-Baiji line, were built by the Baghdad Railway Company before the war. The remainder of the system was made by the British authorities during and since the war, with the exception of the following lines which have been constructed under the administration of the Iraq Government:—

Karbala branch	...	...	22.50 miles.
Kirkuk branch	...	...	77.30 "
Basra City extension	...	...	2.72 "

#### *Government.*

The war left Iraq in British occupation; and on March 2nd, 1921, the supervision of the affairs of Iraq was transferred to the Colonial Office.

At the Conference of April, 1920, at San Remo, the principal Allied Powers decided that Iraq should be assigned under mandate to the United Kingdom.

On October 3rd, 1921, the President of the Council of the League of Nations wrote to the Prime Minister of the United Kingdom expressing on behalf of the Council the hope that the Mandatory Powers (England and France) would continue to carry on the administration of the territories detached from Turkey in the spirit of the draft mandates until such time as the position should have been definitely regularized.

By the Treaty of Peace with Turkey signed at Lausanne on July 24th, 1923, Turkey renounced all rights over Iraq.

The conception of a mandate proved to be inappropriate in the case of Iraq, where an independent sovereign government has been recognized by His Majesty's Government. The relations between Great Britain and Iraq were accordingly placed upon a treaty basis in 1922, and the Treaty of Alliance with Protocol and Subsidiary Agreements were ratified and came into force on 19th December, 1924.

The Council of the League of Nations by their decision of 27th of September, 1924, accepted these instruments as giving effect to the provisions of Article 22 of the Covenant as far as Iraq was concerned.

In Turkish times each of the three Vilayets was governed by a Vali, who received orders directly from Constantinople. The official hierarchy, in descending order of importance, was:—

Vali	..	in charge of Vilayet.
Mutasarrif	"	" Liwa
Qaimmaqam	"	" Qadha
Mudir	"	" Nahiyah

As Iraq came under British control, as a result of the military operations of 1914-18, British Political Officers took over the administration of liwas and qadhas, working under the orders of the Chief Political Officer (later the Civil Commissioner). This system was modified when Sir Percy Cox was appointed High Commissioner. When he took up his post in the autumn of 1920, he organized a provisional native Government composed of a Council of Arab Ministers which was presided over by the Naqib of Baghdad. On August 23rd, 1921, the Sharif Faisal, third son of the King of the Hejaz was

proclaimed King of Iraq, by virtue of a referendum to the people, which resulted in his election by 96%. The government of the country was thus vested in an Iraq Government, the King was advised by the British High Commissioner, while each Ministry had a British Adviser attached to it. Every Liwa was administered by a native Mutasarrif, who was assisted by a British Inspector. British officials were also employed in other departments of the Government in advisory or executive capacities. As time went on the functions of the British officials, excepting technical experts, became almost solely advisory, and the Iraq officials assumed an increasing degree of responsibility for the direction of affairs.

On October 10th, 1922, the High Commissioner and the Naqib signed a treaty to regulate the relations between His Majesty's Government and the Government of Iraq. This treaty was for a term of 20 years. The Naqib resigned office in November, and a new cabinet, mainly composed of ministers who had previously served under him was formed under the Presidency of 'Abdul Muhain Beg al Sa'dun. On April 30th, 1923, a Protocol, reducing the period of the Treaty to a maximum of 4 years from the date of ratification of peace with Turkey, was signed at Baghdad. In November, 1923, this Cabinet fell and was succeeded by one under the Presidency of Ja'far Pasha el' Askari.

Under this Cabinet general elections were held and the Constituent Assembly met at the end of March, 1924, and sat until August 2, when it had completed the duties for which it was summoned, namely, to approve the Treaty and pass Organic and Electoral Laws. Ja'far Pasha then resigned and a new Cabinet was formed under Yasin Pasha al Hashimi. On the 27th September, 1924, the Council of the League of Nations accepted the Treaty, Protocol and certain agreements subsidiary thereto as giving effect to Art. 22 of the Covenant. These instruments entered into force on the 19th December, 1924.

Yasin Pasha was succeeded as Prime Minister by 'Abdul Muhain Beg al Sa'dun who took office with a new cabinet on June 26th, 1925. The first Iraq Parliament was opened by King Faisal on July 16th. Parliament consists of the King, a Senate of 20 members appointed by the King and a Chamber of Deputies of 88 members elected by manhood suffrage.

The subsequent ministries will be found below.

A new treaty, providing for the continuance in force of the 1922 treaty until the admission of Iraq to membership of the League, subject to a maximum period of 25 years, was signed on the 13th of

January, 1926, at Baghdad. It was subsequently accepted by the Iraq Parliament, and was approved by the British House of Commons on 18th February, 1926.

On 14th December, 1927, a new treaty was signed in London by Mr. W. Ormsby Gore, M.P., and the Prime Minister of Iraq to regulate the future relations of the Government of Great Britain and the Government of Iraq. It was intended to replace the treaties of 10th October, 1922, and 13th January, 1926. This treaty was never ratified, however, and in September, 1929, His Majesty's Government gave an assurance to the 'Iraq Government that they would, in 1932, support 'Iraq's candidature for admission into the League of Nations, and in the meantime would negotiate a new treaty to regulate the relations between the two countries after 'Iraq's entry into the League. At the same time it was agreed that the Treaty of 1927 should be dropped and the Council of the League was subsequently informed of the intentions of His Majesty's Government.

On 30th June, 1930, a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister. This Treaty, which if ratified will come into force on the entry of Iraq into the League of Nations, is of 25 years' duration and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States.

#### Garrison.

The British garrison in Iraq has been steadily reduced during the last nine years and consisted at the end of 1930 of four squadrons of the Royal Air Force and two battalions of Assyrian Levies (recruited in the country).

The Iraq Army in 1931 had a strength of 9,000 and included units of all arms.

In April 1931 the first squadron of an 'Iraqi Air Force was organised under the command of 'Iraqi officers trained in England.

## NORTH BORNEO.

*Situation and Area.*

The territory under the jurisdiction of the British North Borneo Company (incorporated by Royal Charter under date of 1st Nov., 1881), now known as "The State of North Borneo," comprises the whole of the northern portion of the island of Borneo from the Sipitang River on the west to lat. 4° 10' N. on the east coast, together with adjacent islands; it is held under grants from the Sultans of Brunei and Sulu, and contains an area of about 31,000 square miles (equal to Sootland), with a coast line of about 900 miles. It extends from 115° 20' to 119° 20' E. long., and from 4° 10' to 7° 25' N. lat. The southern frontier was delimited in 1912-1913 by an Anglo-Dutch boundary commission, whose report was confirmed by a treaty at London on the 28th September, 1915.

The principal stations of the Company are at Sandakan, Lahad Datu, and Tawau, on the east, Kudat on the north, and Jesselton on the west. At each of these there are excellent harbours, especially at the first-named, which is situated in a magnificent bay some fifteen miles in length, with an average breadth of five miles. It is 1,000 miles from Singapore, 1,200 from Hong Kong, and 1,600 from Port Darwin. The headquarters of administration are at present at Sandakan. Other stations are at Semporna, Lamag, Beluran, Kudat, Langkon, Kotabulud, Tuaran, Jesselton, Penampang, Papar, Beaufort, Mempakul, Sipitang, Tenom, Keningau, Tambunan, Ranau, and Pensiangan.

*General Description.*

The greater part of the country is at present covered with jungle, but the soil is well adapted for the growth of almost all tropical products, more particularly rubber, tobacco, coconuts, sugar, coffee, sago, tapioca, and pepper.

The country is mountainous. The highest point is Kinabalu, over 13,000 feet.

The inhabitants, who at the Census taken in 1921 numbered about 257,804, are mainly Brunei, Bajaus, and Sulus on the coast, who subsist by fishing and trade. Further back, the Dusuns, the most numerous native race in North Borneo, cultivate yearly well-irrigated rice fields, and in the uplands they plant tobacco and hill padi (rice), and hunt. The Muruts, another interior tribe, are numerous; formerly they varied more peaceful pursuits by head-hunting but are now peaceable. The Chinese population is steadily increasing and is now estimated to be not far short of 60,000; they form the trading, gardening and artisan section of the community.

There is a State-aided scheme of Chinese immigration. Europeans number about 500. Sandakan, the chief town, with suburbs, has a population of 12,000. There are several missions, including the Church of England, with stations at Sandakan, Kudat, and Jesselton, and the Roman Catholic with a church and school at Sandakan and four stations on the West Coast and eighteen schools in various parts of the country. The Church of England, which is supported by the Society for the Propagation of the Gospel in Foreign Parts and the Church of England Community, has a stone church and two schools at Sandakan and six schools elsewhere. The Basel Mission has fourteen schools, the principal ones being at Jesselton, Sandakan, Kudat, and Papar. Government maintains ten vernacular schools at various places in the territory.

#### *History.*

The State and town of Brunei appear to have been prosperous from a very early age. They were visited by Europeans in 1322, 1603, and 1620, but the first settlement in Borneo was made by the Dutch at Landak and Sukadana in 1608, and soon abandoned. Two English settlements were made about 1609, and abandoned in 1623. The Dutch factories were re-established in 1747 and 1776, but finally given up in 1790.

A British settlement was formed under the East India Company in 1762, at the island of Balam-bangan, which had been ceded by the Sultan of Sulu. This was attacked by pirates in 1775, and the staff was removed to Labuan, a small factory being at the same time established at Brunei. A second attempt in 1803 was made to establish a settlement on the former island, and in Marudu Bay, and on its failure the East India Company gave up its connection with Northern Borneo.

Sir James Brooke, in 1842, established the independent State of Sarawak, which, as well as Brunei, is under the exclusive influence of Great Britain; and Labuan became a British Colony in 1846. Some Americans obtained extensive cessions in North Borneo in 1865 from the Sultan of Brunei, but they were never utilised. In 1872 a Company, called the Labuan Trading Company, established itself in Sandakan, the business of which was later carried on by its manager, Mr. W. C. Cowie. Finally, in 1877 and 1878, the Sultans of Brunei and Sulu ceded to a syndicate formed by Baron Overbeck and Mr. (afterwards Sir Alfred) Dent the greater portion of the territory now known as the State of North Borneo. This syndicate's rights were acquired in 1881 by the British North Borneo Provisional Association, and transferred by that body in 1882 to the British North Borneo Company. Some further cessions have since been added to the Company's territory. The British Government assumed a formal protectorate over the territory by agreement with "The State of North Borneo," dated the 12th May, 1888. By this agreement the State is to continue to be administered by the Company as an independent State, under the protection of Her Majesty's Government, who may appoint consular officers, and shall conduct all foreign relations, but does not interfere in internal administration.

#### *Climate.*

The climate, though tropical, is equable; the temperature varies from 71° to 90°, but there is usually a light breeze. The annual rainfall is from 80 to 150 inches, according to situation.

Annual Mean Temperature... 81 degrees

Recorded extremes maximum 96 "

" " minimum 60 "

#### *Constitution.*

The territory is administered by a Court of Directors in London, and a Governor and Civil Service appointed by them. There are four Residencies, viz., the Sandakan and Kudat, West Coast, Tawau, and Interior Residencies.

The appointment of the Governor is subject to the approval of the Secretary of State.

The law of the country is based upon Indian law and the principal Indian Codes have been adopted in the State. Many enactments of the Straits Settlements also have been incorporated in local Ordinances. Courts of law are correlative to the Indian Courts under the Indian Criminal and Civil Procedure Codes, while there are Imams' Courts for the administration of Moslem matrimonial law, and Native Courts to deal with matters of native custom.

#### *Industry.*

The principal products of the country are estate rubber, timber, tobacco, coal, copra, and cutch. The last decade has witnessed a rapid expansion of the rubber industry; exports of rubber increased from 4,105 tons in 1920 to 7,114 tons in 1930. The vast timber resources of the country form one of its principal assets, but until recently only the fringe of the forests was being worked. A Company was however formed in 1920 for more adequate timber exploitation with modern lumbering apparatus. Timber is being exported in increasing quantities to China, Japan, and England; the exports in 1930 were valued at 287,784*l*. At Sandakan two large steam driven sawmills have been working for some years and a modern band sawmill has been installed. An electrically driven sawmill was recently installed in Sandakan. Tobacco is grown in the Darvel Bay district, the variety cultivated being wrapper leaf tobacco for cigars; exports in 1930 were valued at 71,475*l*. Coal exports 1930, 41,813*l*. The number of coconut plantations has rapidly increased, and exports of copra have risen considerably in value; exports of copra in 1930 were valued at 72,055*l*. The fishing industry gives employment to a large number of natives; exports of dried and salt fish in 1930 were valued at 44,500*l*. Cutch, a tanning material obtained from the bark of certain mangrove trees, is manufactured at Sandakan; exports in 1930, 22,015*l*. Agriculture is now beyond the primitive state and certain of the more advanced tribes use the plough and harrow. There is a large trade in the collection of jungle produce. The hill lands are well adapted for the cultivation of tapioca, gambier, pepper, and tea. Shipbuilding is increasing in Sandakan Bay.

The exports comprise also, sago, coffee, pepper, gutta-percha, rotan, firewood, beeswax, edible birds' nests, camphor, resin (called damar), cattle, etc., sent almost entirely to Singapore and China; from Singapore part of these find their way to Europe.

The Chartered Company does not itself directly engage in trade.

The revenue is derived from import and export duties, excise, quit rents, licences, royalties, poll tax, and other usual sources of revenue.

Sandakan on the East and Jesselton on the West are the principal ports. Both towns have developed rapidly, and are now supplied with electric light and cold storage. Considerable sums have been spent by Government on reclamation, improvement of water supplies, etc., at both ports.

Large resources of coal exist in the country behind Cowie Harbour in the south east and seams occur elsewhere in the territory. Gold in alluvial form is found in certain of the rivers on the East Coast.

Large deposits of iron ore have been discovered. Indications of the presence of petroleum occur in many parts of the State, but so far it has not been found to exist in commercial quantity; prospecting work is still proceeding.

#### *Currency and Banking.*

The Company has a copper coinage of  $\frac{1}{2}$  and 1 cent. pieces, a nickel coinage of 1 cent.,  $2\frac{1}{2}$  cent. and 5 cent. pieces, and it issues notes. There is also a silver coin of 25 cents. The State Bank of North Borneo has its head office at Sandakan and a branch office at Jesselton. There are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Bank of Taiwan.

Money orders on North Borneo are issued in England, India, the Straits Settlements, Ceylon, Hong Kong, and elsewhere, and *vice versa*, and British postal orders came into use in the State during 1908.

#### *Means of Communication.*

The Straits Steamship Company run steamers every week between Singapore and local ports. There is additional communication by steamer with Hong Kong, Japan, and the Dutch East Indies, and a local company maintains a service along the coast and to the Philippine Islands. The State Railway on the West Coast, which is a metre gauge line, connects Jesselton with Beaufort, 57 miles distant. At Beaufort the line divides, one section proceeding to the port of Weston (20 miles), the other to Melalap in the interior (40 miles). In all, the length of railway (including branches) completed is 124 miles. At Jesselton there is a steel jetty where vessels up to 1,000 tons can load and discharge cargo. There is a first class metalled road 21 miles long, from Jesselton to Tuaran; another proceeds from Sandakan in a north-westerly direction, 15 miles of metalling have been completed and earth-works to mile 19. Road construction is being pushed forward in other localities of the State. There is a system of bridle-paths covering a total distance of 640 miles. Wireless stations exist at Jesselton, Kudat, Sandakan, Tawau, Sebatik, Lahad Datu, and Lamag. The State has joined the Postal Union. Course of post from London, about thirty days. Postage to all British possessions for letters 6 cents per oz.; foreign countries, 12 cents for the first oz., 6 cents each succeeding oz.

On the completion of the Singapore-Labuan-Hong Kong cable in 1894, the mainland of Borneo was joined to Labuan by a cable covering a distance of about 10 miles to Mempakul.

There is a telegraph line from Mempakul where the cable reaches land to Jesselton, whence messages are transmitted by radiotelegraphy to Kudat, Sandakan, Tawau, Sebatik, Lahad Datu, and Lamag. Branch telegraph lines establish communication with Beaufort and Tenom from Jesselton. The majority of the smaller Government stations are in telephonic communication with one another and with the local centres of administration. Telephone exchanges are in operation at Jesselton, Sandakan, and Kudat.

## SARAWAK.

#### General.

In 1864 Great Britain recognized Sarawak as an independent State. An agreement was entered into with the Rajah of Sarawak, on the north-west coast of Borneo, on the 14th of June, 1888, under which that State has been placed under British protection. Her Majesty's Government undertake not to interfere with the internal administration of the State, but they are to determine any questions that arise as to the succession, to control the foreign relations, and to have the right to establish consular officers in the territory. British subjects are to have most-favoured-nation treatment, and no part of the territory is to be alienated without the consent of H.M.'s Government.

The territory of Sarawak comprises an area of about 50,000 square miles (more than equal to Ireland and Wales together), with a population of about 475,000 composed of various races. It is intersected by many rivers, navigable for a considerable distance inland, and commands about 450 miles of coast line. The government of the district from Tanjong Datu to the entrance of the Samarahan River was obtained from the Sultan of Brunei in the year 1842 by Sir James Brooke, who became well known as Rajah Brooke of Sarawak. In 1861 a second cession was obtained from the Sultan of Brunei of all the rivers and lands from the Samarahan River to Kedurong Point. In 1882 a third cession was obtained of 100 miles of coast line and all the country and rivers that lie between Kedurong Point and the Baram River, including about three miles of coast on the north-east side of the latter; and in 1884 another cession was obtained of the Trusan River, situated on the north of the mouth of the Brunei River. The Limbang River was also obtained in 1890, the transfer being approved and confirmed by H.M.'s Government in 1891. The Lawas River was added in 1906. The present Rajah, H.H. Sir Charles Vyner Brooke, G.C.M.G. (born 26th September 1874, married, 1911, Hon. Sylvia Brett), succeeded his father, H.H. Sir Charles Johnson Brooke, G.C.M.G., in 1917.

Coal is mined by the State at Sadong. There is a considerable export of timber to Hong Kong.

Pepper and rubber grow well throughout the Territory. The cultivation of sago is one of the most important industries. All these articles figure in the list of exports, which also includes gutta-

percha, indiarubber, canes, rattans, camphor, beeswax, birds' nests, gambier, jelutong, illipe nuts, copra, cutch, betel nuts, damar, and tuba. The value of the principal exports was:—

\* *Note*.—Jelutong gutta is the sap of a fairly common jungle tree. It is said to be shipped mostly to America, and used in the manufacture of paint, chewing gum, and insulating material.  
—The bulk of the trade is with Singapore.

### Chief Towns.

Kuching, the capital, population about 25,000, on the Sarawak River, about 23 miles inland (N. lat. 1° 33' 10", E. long. 110° 20' 13"), besides excellent Government offices and Court House, possesses hospitals and a museum with a complete collection of exhibits relating to Borneo. The Bishop of Labuan and Sarawak has his headquarters there, and has a mission school with 588 scholars, and also a girls' school. The Roman Catholics also have a mission there, with a boys' school under four resident priests, and a girls' school under the sisters. The S.P.G., and Roman Catholic Mission have stations at various other places all over the Country.

Sibu, on the Rejang River, has a large population of Chinese traders, who exchange European goods for jungle produce. The river has a native population estimated at 90,000. The Chinese here trade direct with Singapore, as well as with Kuching. Muka, a large town on the Muka River, near its mouth, is devoted to the production of sago, the stems of the sago palm being cut in the upper reaches of the river and floated down to the town, where the pith is extracted and beaten, to be carried in native schooners to Kuching, to be cleaned.

Other towns are Bintulu, Oya, Kapit, Baram, Simanggang, Sadong, Trusan, Limbang, Lawas, Matu, Saribas, Kalaka, Lundu, Miri, Sarikei.

### Communications.

Vessels of the Sarawak Steamship Company Limited provide a service every week between Kuching and Singapore; and Sibu and Singapore, and a coasting service is maintained by that Company and by the Government.

There are roads around the capital and thence to Upper Sarawak (about 25 miles). To open up country in the vicinity of the capital where communication by water is not available about 10 miles of railway is open for traffic, and a further 10 miles is in course of construction to be increased gradually hereafter; otherwise, internal communication is almost entirely by means of the numerous rivers, which form

natural highways and byways, by which any point in the country can be reached in steam launches or boats.

### Posts and Telegraphs.

Sarawak joined the Postal Union in 1897.

### TRANS-JORDAN.

A strip of country fringing the Syrian desert and extending from Syria in the north to the Gulf of Akaba in the south forms the territory known as Trans-Jordan. It is divided from Palestine by the Rivers Yarmuk and Jordan and the Dead Sea.

The frontier between Nejd and Trans-Jordan starts in the north-east from the point of intersection of meridian 39°E. and parallel 32°N., which marks the termination of the frontier between Nejd and Iraq, and proceeds in a straight line to the point of intersection of meridian 37°E. and parallel 31°30'N. and thence along meridian 37°E. to the point of its intersection with parallel 31°25'N. From this point, it proceeds in a straight line to the point of intersection of meridian 38°E. and parallel 30°N. leaving all projecting edges of the Wadi Sirhan in Nejd Territory, and thence proceeds along meridian 38°E. to the point of its intersection with parallel 29°35'N.

The southern boundary of Trans-Jordan is yet to be defined.

The northern portion of Trans-Jordan consists of elevated country, rising to 3,500 to 4,000 feet above sea level, which on the western margin falls abruptly to the narrow fertile plain of the Jordan valley, and on the eastern falls more gradually to grass lands through which runs the Hejaz Railway line and which gradually merged into the desert.

The grass land strip forms the summer pastures of Bedouin tribes who in the winter move further east for pasturing. West of the railway are the wheat and barley lands of the Kerak, Balqa and Ajlun tribes as well as of the Circassian colonies in the Balqa and the numerous Arab villages in the north. Perennial water is found in the deep lateral valleys which is used for the irrigation of cultivable land in the valleys themselves, and subsequently waters relatively large areas of the fertile land of the Jordan depression which are cultivated by semi-nomad tribes. The remainder of this depression is used by these tribes as winter grazing grounds. In the north there are a number of large villages, but the only towns of any size are Amman, Salt and Kerak.

No census has been taken but the population is believed to be between 250,000 and 300,000.

His Britannic Majesty is the Mandatory for Trans-Jordan, to which the terms of the Mandate for Palestine, with the exception of the provisions dealing with the establishment of a national home for the Jewish people, are applicable. The declaration of His Majesty's Government with regard to its Mandatory obligations in Trans-Jordan made to the Council of the League of Nations in September, 1922 (Cmd. 1785) was in the following terms:—

"In the application of the Mandate to Trans-Jordan, the action which in Palestine is taken by the Administration of the latter country, will be taken by the Administration of Trans-Jordan under the general supervision of the Mandatory.

His Majesty's Government accept full responsibility as Mandatory for Trans-Jordan and undertake that such provision as may be made for the administration of that country in accordance with Article 25 of the Mandate shall be in no way inconsistent with those provisions of the Mandate which are not by this resolution declared inapplicable."

On the 20th February, 1928, an Agreement between His Britannic Majesty and his Highness the Amir for the purposes of setting up an independent and constitutional Government and placing His Britannic Majesty in a position to fulfil his international obligations in respect of Trans-Jordan, was signed by the representatives of the High Contracting Parties and an Organic Law thereupon came into force provisionally, pending the ratification of the Agreement after its acceptance by the Legislative Council provided for in the Law.

The Legislative Council, consisting of six official and sixteen elected members, met for the first time on the 2nd April, 1929, and accepted the Agreement during its first session.

The Mandatory is represented in Trans-Jordan by the British Resident, assisted by a few British officers and a small clerical staff. The British Resident acts under the instructions of the High Commissioner for Trans-Jordan, who is also the High Commissioner for Palestine.

A local Arab Administration has been formed under His Highness the Emir Abdullah ibn Hussain, G.B.E., K.C.M.G. (son of ex-King Hussain of the Hejaz and brother of King Faisal of Iraq).

Amman is the capital, while Salt, Kerak, Irbid and Ma'an are headquarters of District Governors.

The Ottoman Code is in operation with but few changes. The official language is Arabic.

The system of taxation is unchanged from the Turkish, although additional contributions have been levied for special educational or religious purposes. In its incidence, however, taxation has been most uneven, for it is only in the Balqa that the tithe is collected, while Kerak and Irbid pay a specific sum in commutation.

The Customs Tariff is mainly on a specific basis. The following are the principal articles subject to specific duties:—Cigarettes, Tobacco, Benzine and Kerosene, Flour, Rice, Sugar, Coffee, Cotton, woollen and silk materials, Timber, Rubber Tyres and Tubes, and Matches.

Palestine pays Trans-Jordan an annual sum of £P.25,500 on account of the Customs Duties collected on goods of foreign origin which are re-exported to Trans-Jordan. The Trans-Jordan Government refunds, however, the duties collected at Amman on goods imported through Palestine

in transit, under a special convention. The Syrian Government also refunds the duty collected on articles of foreign origin when re-exported to Trans-Jordan; and Trans-Jordan in addition collects a further small percentage of the value of the goods as assessed at Damascus. Until May, 1924, the import duty into Syria was 11 per cent., but was then raised to 15 per cent. on goods exported from States members of the League of Nations, and to 30 per cent. on others. Trans-Jordan collects a specific additional excise duty on imported alcohol and tobacco.

Until 1926, public security in Trans-Jordan was maintained by a locally-recruited force known as the Arab Legion and a number of civil police in the larger towns. In 1926 these forces were reorganised. A military force called the Trans-Jordan Frontier Force was raised in Palestine and Trans-Jordan for the defence of the two territories, and police duties in Trans-Jordan were entrusted to a civil police force, to which the old name of the Arab Legion was given.

opposite a gap in the crater walls. On the west side of the peninsula, some five miles from the town, is Steamer Point, off which the large steamers lie. The highest point of the peninsula is 1,725 feet above sea level. The average annual rainfall is about 3 inches, and the maximum is about 8 inches. The climate is very hot and damp, especially during the summer months. The Aden Protectorate, to the north and north-east of Aden, has an area of about 9,000 square miles and a population of over 100,000. Aden is an important bunkering station, and also an *entrepôt* for the trade with Arabia. The exports consist of coffee, gums, skins and hides, cotton goods, dyes, feathers, spices, etc. The Settlement forms part of British India, and is subject to the Government of Bombay, and administered by a Resident, and Commander-in-Chief who is assisted by two officers of the Government of India, Political Department, one Protectorate Secretary, selected by the Secretary of State for the Colonies, a Judicial officer from the Indian Civil Service, and an officer of the Public Works Department as Chairman of the Aden Settlement and Port Trust. The Police are under the control of an officer of the Indian Police Service.

Aden, after being a trade centre under its native kings, became subject in succession to the Abyssinians, the Persians and the early Caliphs. In 1538 it was captured by the Turks, who lost it some years later, but captured it again in 1551 and held it until they evacuated the Yemen in 1630. The Aden peninsula was occupied by the British in 1839, and in 1868 Little Aden was obtained by purchase. The coastal strip between the two peninsulas was secured by purchases in 1882 and 1888.

As from 1st April, 1927, the responsibility for military affairs in Aden and for the affairs of the Protectorate was transferred to the Colonial Office, the settlement itself remaining part of British India.

PERIM, a bare rocky island, five square miles in area, with a population of 1,700, lies in the Straits of Bab-el-Mandeb, about 1½ miles from the south-west corner of Arabia. It possesses a good harbour on the south-west side, with an entrance 860 yards in breadth. It was occupied by the British in 1799, but subsequently abandoned, and was only re-occupied in 1857, when the overland route to India made the position important. It is

## MISCELLANEOUS POSSESSIONS.

### ADEN.

The peninsula of Aden is situated in lat. 12° 47' N. and long. 45° 10' E., about 100 miles east of the Straits of Bab-el-Mandeb, on the Arabian coast. The Settlement (the total area of which, exclusive of Perim, is 75 square miles) consists of two old craters forming rocky peninsulas:—Aden proper (area 21 square miles; population 34,471), on the south, and Little Aden (area 15 square miles) on the west—and a flat strip of coast, about three miles broad and known as Shaik Othman (area 39 square miles; population (including Imad and Hiswa) 12,167. The peninsulas form the horns of a bay called Aden Back Bay, which is about eight miles broad from east to west and about four miles deep. Its entrance is about three miles across. The native town of Aden is situated on the east of the Aden peninsula,

a coaling and cable station, and forms part of the Settlement of Aden.

**SOOTRA**, an island situated about 150 miles E.N.E. of Cape Guardafui, in  $12^{\circ} 19' - 12^{\circ} 42' \text{ N. lat.}$ , and  $53^{\circ} 21' - 53^{\circ} 30' \text{ E. long.}$  and lying in the direct route to India, has been since 1876 under the Government of Aden, which pays a small subsidy to the Sultan of Keshin, to whom it belonged. It is famous for its aloes. The population of the island is about 12,000. It is rather less than 100 miles from east to west and about 30 miles broad. Its interior is mountainous. It was formally placed under British protection by agreement with the Sultan in October, 1886, together with the neighbouring Abdal Kute and Bromers Islands.

#### TRISTAN DA CUNHA.

Tristan da Cunha is the principal of a group of islands lying in lat.  $37^{\circ} 6' \text{ S. long.}$ ,  $12^{\circ} 2' \text{ W.}$ , about midway between South Africa and South America. It is an extinct volcano rising to 7,640 feet above sea level, with a crater-lake near its summit. It was taken possession of by a military force during the residence of Napoleon at St. Helena. When the garrison was withdrawn in 1817, William Glass, a corporal of artillery, and his wife elected to remain, and they were joined by two ex-Navy men, Alexander Cotton and John Mooney, and these, with certain ship-wrecked sailors, became the founders of the present settlement, which is on the north-west of the island, where there is a comparatively level area about 9 miles long and  $1\frac{1}{2}$  miles broad and about 100 feet above the sea. After some years, the five unmarried settlers contracted with a sea captain to bring them wives from St. Helena. The population numbers about 130.

The inhabitants are spoken of as long-lived, healthy, moral, religious, and hospitable to strangers. A supply of stores and provisions was provided out of a grant voted by Parliament, and sent out by a man-of-war in 1886, nearly all the able-bodied men having been drowned while attempting to board a vessel in December, 1885.

In the way of live stock, the inhabitants have between them about 220 head of cattle, about 700 sheep, about 50 pigs, and an abundance of poultry. Potatoes do well, and a good crop is got annually. Apple trees are in fair number, and bear well; there are also a few fig trees, but they do not fruit. The tree of the island, which apparently is a juniper, and upon which the islanders are dependent for their wood for fuel, is getting scarce in the neighbourhood of the settlement, but is abundant further off, and there is no fear of supply failing.

The Society for the Propagation of the Gospel has from time to time maintained a clergyman in the island.

In January, 1904, the island was visited by H.M.S. "Odin" in order to ascertain whether the islanders would accept the offer of the Cape Government to settle them in the Cape Colony,

but out of eleven families only three families elected to go. The islanders are liable from time to time to privations. In March, 1907, owing to information indicating probability of failure of supplies, relief was sent by His Majesty's Government by the "Greyhound," chartered at Cape Town. On this occasion also the inhabitants were unwilling to leave the island, and the Rev. J. G. Barrow, a clergyman who had gone to the island in April, 1906, reported that though there is sure to be privation from time to time, it does not cause absolute distress. (See correspondence presented to Parliament in Cd. 3098 and Cd. 2764.)

Arrangements are usually made for the island to be visited by a ship at least once a year.

January, February, and March are the best months for visiting the island. It is in these months that weather at times becomes so settled that the islanders are able to make visits to Inaccessible and Nightingale Islands, which are some 20 miles off. They also are often able to visit these islands in November.

#### MISCELLANEOUS ISLANDS.

A number of islands and rocks throughout the world are British territory, or under British protection, but are not included in any Colony or separate Protectorate. Many of these have no permanent inhabitants, but are, or have been, leased by the Lords Commissioners of the Treasury for guano collection, or for coconut planting. The rents are paid into the Exchequer. Among such may be mentioned the Ashmore Group (Indian Ocean), Bird Island and Cato Island (in the Norfolk Island Group), Sombrero (West Indies, with a Board of Trade Lighthouse costing 520*l.* annually) Raine Island, Bell Cay and Bramble Cay (near British New Guinea), Caroline Island, Flint Island and Vostoc Island (Pacific Ocean,  $9^{\circ} 56' \text{ S. lat.}$ ,  $150^{\circ} 6' \text{ W. long.}$ , and  $11^{\circ} 26' \text{ S. lat.}$ , and  $151^{\circ} 48' \text{ W. long.}$ ), Malden Island ( $4^{\circ} 1' \text{ S. lat.}$ ,  $155^{\circ} 57' \text{ W. long.}$ ), leased to Messrs. Grice, Sumner, and Co., and Starbuck Island; also Gough, Nightingale and Inaccessible Islands (in the S. Atlantic), and there are many others.

The Great and Little Basses and Minicoy are small islets in the Indian Ocean, with lighthouses maintained by the Board of Trade out of shipping dues levied on vessels passing, and collected at Ceylon, Mauritius, Straits, and Indian ports.

The Kuria-Muria Islands, five in number, off the south-east coast of Arabia, were ceded by the Imam of Muskat for the purpose of landing the Red Sea telegraph cable.

Amboyna Cay and Sprattley Island (lat.  $8^{\circ} 38' \text{ N.}$ ,  $111^{\circ} 54' \text{ E. long.}$ ; lat.  $7^{\circ} 52' \text{ N.}$ ,  $112^{\circ} 55' \text{ E. long.}$ ), two uninhabited sandbanks in the middle of the China Sea, lying about 240 miles N.W. of Borneo and 100 miles N. of Labuan, were annexed in 1877, and leased for guano collection. They are annually visited by Chinese junks for the purpose of collecting turtle.

# INFORMATION AS TO COLONIAL APPOINTMENTS.

## THE COLONIAL SERVICE.

Below will be found a summary of the principal classes of appointment in the Colonial Service which are dealt with respectively :—

- (I) By the Director of Recruitment (Colonial Service);
- (II) By the Crown Agents for the Colonies; or
- (III) Which are filled by open competitive examination.

### (I) APPOINTMENTS WITH WHICH THE DIRECTOR OF RECRUITMENT (COLONIAL SERVICE) DEALS.\*

Applications for the following appointments should be addressed in writing to the *Director of Recruitment (Colonial Service)*, 2 Richmond Terrace, Whitehall, S.W.1., from whom memoranda giving full details of these appointments may be obtained on written request.

In tropical Africa, and elsewhere in some cases, free quarters are provided, or an allowance in lieu is given.

Free passages are provided on first appointment in almost all cases. In Tropical Africa, and elsewhere in many cases, free or assisted passages are also provided on leave.

Where information is given in the following paragraphs as to the number of vacancies available annually it is based upon the average requirements of years of normal prosperity. Owing to the prevailing financial depression the number of vacancies to be filled in 1931 was considerably reduced, and it is feared that this reduction in the number of vacancies must be expected to continue for the present.

It will be seen that there is only one group of appointments open to boys of school leaving age but that there is a wide range of administrative, scientific and professional posts open to candidates who obtain appropriate qualifications. Specialised training is required in some cases but not in others. In all cases special importance is attached to personal qualifications and general record.

### ADMINISTRATIVE APPOINTMENTS.

The following paragraphs contain information regarding Administrative Appointments in Tropical Africa, where most vacancies occur, Cadetships in Malaya and Hong Kong, and Fiji and Western Pacific Cadetships. As regards Cadetships in Ceylon see page 589.

#### (a) QUALIFICATIONS.

A high standard of general education is essential for these appointments. Whilst a University Degree is not an absolutely indispensable qualification, the candidates selected for Administrative appointments in the last few years have nearly all been in possession of a University Degree, usually with Honours. The few exceptions have been in cases where a candidate has had some special qualifications (e.g. legal qualifications), or where the higher maximum age limit for appointments in Tropical Africa permits of consideration being given to candidates who have acquired some special experience likely to prove of value (e.g. such experience as that of an officer of H.M.'s Forces, especially one who has commanded native African troops with success, and has been recommended for civil employment), and there is no reason to anticipate that at future selections the standard in this respect will be any less high.

#### (b) EAST AND WEST AFRICA.

The average number of Administrative Officers recruited for Tropical Africa from the end of the war until 1930 was 95 per annum.

During this period very considerable enlargements of staff have contributed to maintain the average recruitment at this high rate despite the small number of 18 vacancies filled in 1922 as a result of the financial depression prevailing at that time, and a continuation of recruitment at so high a rate is not to be expected. In recent years, however, an average of between 50 and 60 cadets would have been required to replace annual wastage through retirement, etc., without allowing for any increase of staff. As regards vacancies in the present year, see the opening paragraphs of this section.

One annual selection takes place in the summer. Completed applications must reach the Director of Recruitment between the 1st of January and the 31st of May, in the year of the selection.

Candidates must be between the ages of 21½ and 35 when they take up their duties in Africa, but there is a definite preference for candidates of under 30. Selected candidates are, however, required to undergo a course of training in this country before embarkation (as explained below) and candidates who are under 21½ years of age may therefore apply, but must be not less than 20½ years of age on the 1st of August in the year of application.

The course of training undergone by selected candidates takes place at Oxford or Cambridge, and lasts one academic year, during which allowances are paid at the rate of £75 a term.

\*The Secretary of State for the Colonies set up a Colonial Service Appointments Board in 1931 to make selections on his behalf for all the first appointments to the Colonial Service which are at his disposal. Selections so made are submitted to the Secretary of State for his final approval and ensuing appointments are made on his authority.

An Administrative Officer may be employed either in the Secretariat of a Colony or in a District. His duties may be very varied. If employed in a district his functions are of a magisterial and political nature, and he is the immediate agent of the Government in his District, and his responsibilities extend to all departments of the Administration which have no local representative. His duties involve a considerable amount of travelling.

In the West African Colonies salaries start at £450 and rise on a long scale to £960. In the East African Colonies they start at £400 and rise on a long scale to £920. There are higher posts above these scales. Free quarters are provided in each case.

### (c) CADETSHIPS IN MALAYA AND HONG KONG.

The average number of cadets appointed to Malaya and Hong Kong since 1919 has been between 9 and 10 annually.

Prior to 1932 these appointments were filled through the competitive examination for Eastern Cadetships, but the method of appointment is now assimilated to that already in force for Administrative appointments in the Colonial Service generally.

One annual selection will take place in the summer, concurrently with the selection for Administrative appointments elsewhere in the Colonial Service, and completed applications must reach the Director of Recruitment between the 1st of January and the 31st of May in the year of the selection.

Cadets selected for Malaya may be required to undergo a course of instruction in London in the Malay language, lasting about three months, during which an allowance is paid from public funds.

Candidates must be over 21 and under 24 years of age on the 1st of August in the year of application.

The Cadet Services provide the Administrative staff for all the various Government activities including the Secretariats, the Courts, the Treasuries, District and Land Offices, and in Malaya the Residencies in the Malay States.

In Malaya the Cadet starts at \$350 per mensem (£490 per annum) and has the prospect of rising eventually to appointments in Class I, with salaries between \$1,050 per mensem (£1,470 per annum) and \$1,350 per mensem (£1,890 per annum).

In Hong Kong the initial salary is £450 per annum and the appointments in Class I are on a scale of from £1,500 to £1,800 per annum.

In both Malaya and Hong Kong there are special appointments (not necessarily reserved for Cadets) above these scales.

### (d) FIJI AND WESTERN PACIFIC CADETSHIPS.

Up to three or four vacancies may occur annually for Cadets in the Fiji and Western Pacific Services. Selection to fill any such vacancies is made as circumstances require.

The age limits are 22 to 25.

There is no course of training in this country, but a Cadet is required, within the probationary period of three years from the date of his appointment, to pass certain examinations.

The duties correspond to those of an Administrative Officer in Tropical Africa.

The initial salary is £350 per annum for Cadets serving in Fiji and an additional £25 per annum is paid to Officers serving in the Gilbert and Ellice Islands Colony or the British Solomon Islands Protectorate.

### (e) OTHER ADMINISTRATIVE APPOINTMENTS.

In many Dependencies, including those in the West Indies, vacancies for junior officers in the Administration and Secretariat are usually filled by the selection of local candidates or by promotion or transfer within the Service.

Vacancies may, however, occasionally occur for Assistant Secretaries in Cyprus. They are filled as and when they occur, but are very infrequent. The age limits are 21½ to 35, with a definite preference for candidates of under 30. The initial salary is £400, rising by annual increments of £20 to £600.

## EDUCATIONAL APPOINTMENTS.

A considerable number of vacancies for junior Educational officers may normally be expected annually. The big majority of these occur in either East and West Africa, or Malaya and Hong Kong, and are filled during the summer months; though a few vacancies may occur to be filled during the winter. Applications to be considered for vacancies in the summer should reach the Director of Recruitment as soon as possible after the end of February.

Candidates must have a Degree, usually a Degree in Honours, of a British University. For a proportion of vacancies they must normally have also a recognised Diploma in Education, or equivalent professional qualifications though candidates who have had sufficient proved experience of school teaching may sometimes be considered. For other vacancies candidates having no professional qualification, and little or no teaching experience, are considered who, if selected, will be required to undergo a special course of training in educational method, practice, etc., at the London Day Training College (leading to the Diploma in Education of London University) before proceeding overseas. Fees for this course are paid from Public funds and Probationers attending it receive an allowance of £20 a month.

Candidates must be between the ages of 21½ and 35 at the time of taking up their duties overseas: definite preference is given to men under the age of 30. Those who would be required to take the London training course may apply when they are under 21 years of age, provided that they will be not less than 20½ on the 1st of August in the year of application. Such candidates will often be men who, like the majority of applicants for Administrative appointments in Tropical Africa, expect to graduate at a University in the current summer.

In Tropical Africa, while there is one common Educational policy which aims at providing a sufficient and wisely adapted system of education for the Native populations, there are naturally variations of organisation and method in the different Dependencies, and the duties of a junior Educational officer will vary accordingly. In general it may be said that his work demands both skill as a teacher and ability, born of

enthusiasm, to participate in and supervise all forms of school activities, *e.g.* organised games, Boy Scout work, etc., which experience has shown to be of particular value in creating *esprit de corps* and a sense of service and leadership amongst African native boys. Sooner or later an officer may be called upon to undertake the duties of an Inspector of Schools, though the work of administration is generally confined to the higher appointments in the Education Department.

The normal scale of salary in East Africa is £400 (for 2 years on probation) rising by annual increments to £920 per annum. In West Africa the normal scale is £480 (for 3 years on probation) rising to £920 per annum.

In the Far East a junior officer is usually appointed as a "European Master" in Malaya, or as an "Assistant Master" in Hong Kong, for duty on the staff of a secondary school organised on lines somewhat similar to those of a Public School in this country. He will be required to teach either English subjects, or Mathematics or Science up to London Matriculation or equivalent standard. The "English" schools in Malaya are attended by Malay, Chinese and Indian boys. In Hong Kong there are both English and Chinese schools, and also some "Anglo-Chinese" schools, where the study of English and Chinese is carried on side by side. In all cases games, Boy Scout work or Cadet Corps, etc., play an important part. Above the time scale there are a number of senior administrative offices, promotion to which is by merit; and opportunities may occur for appointment to an Assistant Inspectorship, or other post connected with vernacular education, at an earlier stage in an officer's career.

The scale of salary for European Masters in Malaya is \$400 per mensem rising by annual increments to \$800 per mensem (£560-£1120 per annum). In Hong Kong Assistant Masters receive £500 per annum rising to £950. In both cases appointments are in the first instance on a three years' agreement.

#### EAST AND WEST AFRICAN POLICE (COMMISSIONED RANKS).

The average annual number of vacancies for Commissioned Police Officers in East and West Africa in recent years has been eight. They are filled as and when they occur.

The age limits are 21½ to 35, but candidates of over 30 years of age are now seldom selected.

A high standard of general education is essential and as the organisation of the majority of Police Forces is on military or quasi-military lines experience either in the Regular or Territorial Army or in an Officers Training Corps is desirable and in some cases essential.

As a rule there is no period of training in this country, but officers selected for Civil Police duties may be required to attend a course of training at the Depot of the Royal Ulster Constabulary, Newtownards, Northern Ireland, either before proceeding overseas or during a period of leave.

Salaries usually commence at £360 or £400 and rise to between £800 and £920, with higher posts above these scales.

#### POLICE PROBATIONERSHIPS IN CEYLON, MALAYA, HONG KONG AND PALESTINE; PROBATIONERSHIPS IN THE MALAYAN CUSTOMS AND MONOPOLIES DEPARTMENTS; AND SUB-INSPECTORSHIPS OF CONSTABULARY IN BRITISH GUIANA, TRINIDAD AND JAMAICA (COMMISSIONED OR EQUIVALENT RANKS).

Between twelve and twenty vacancies may be expected to occur annually in this group of Services.

The selection takes place in June, July and August and completed applications should be submitted between the 1st of January and the 15th of March. Applications will, however, be accepted up to the 15th of May, except in the case of candidates for Ceylon Police.

Candidates for the Far Eastern and Palestine Services must be over 19 and under 22 years of age on the 1st of August in the year of selection. For the West Indian Services they must be over 19 and under 26 on the same date.

Candidates should be in possession of the School Certificate, or of certain equivalent or higher educational qualifications, except in the case of Ceylon for which a special qualifying examination is held. The part taken by a boy in the general and athletic life of his school is also taken into consideration.

Police Probationers selected for Malaya may be required to take a three months course in the Malay language at the School of Oriental Studies in London, during which they receive an allowance of £20 a month. Candidates selected for the West Indian Constabulary and the Palestine Police usually undergo preliminary training at the Depot of the Royal Ulster Constabulary, Newtownards, during which allowances at the rate of 10/- per diem are paid.

Commencing salaries are as follows:—Hong Kong, £400; Ceylon, £360; Malaya, £350; Palestine £300 with pensionable expatriation allowance of £50; Trinidad, £300; British Guiana, £250; Jamaica, £200; with other allowances which vary. Salaries in the Far Eastern Services are on a long scale. To take the Malayan Police as an instance. A Probationer who is appointed at £350 receives, if he has passed the necessary examinations, £420 after two years, and after three years £490 rising by £35 per annum to £1,120. Above this scale there are a number of appointments on the scale £1,120 to £1,330. The Inspector General, Straits Settlements Police, and the Commissioner of the Federated Malay States Police receive £1,680 each.

The duties of a Police or Customs Officer in a Tropical Dependency are extremely varied and should appeal particularly to the young man with a taste for an out of door life who would appreciate doing far more responsible work than would normally fall to a man of similar age in this country.

#### OTHER COMMISSIONED POLICE APPOINTMENTS.

Vacancies in other Colonial Police Forces are so seldom filled by the selection of candidates from this country and the qualifications required are so diverse that no general statement can be given, but in almost all cases unmarried candidates with considerable experience in Civil Police duties are required.

### TREASURY APPOINTMENTS IN EAST AND WEST AFRICA.

Vacancies in these departments are not frequent and the Secretary of State has seldom been asked to fill more than three or four annually in recent years, mainly in West Africa.

They are filled as and when they occur.

Candidates must be between the ages of 21½ and 35, but there is a definite preference for candidates of under 30, and in certain cases for candidates of not more than about 24.

Candidates must have had a good general education. A University degree is not regarded as an essential qualification for these appointments but would weigh considerably in a candidate's favour. Candidates must have a natural inclination for figures and accounts although qualifications or experience in accountancy are not always essential.

In East Africa the commencing salary is usually £360 per annum, rising to £720, and in West Africa £400 rising to £840, with higher posts above these scales.

### CUSTOMS APPOINTMENTS IN EAST AND WEST AFRICA.

Vacancies in these departments are very infrequent. They are filled as and when they occur.

Candidates must be between the ages of 21½ and 35, but there is a definite preference for candidates of under 30, and in certain cases for candidates of not more than about 24.

A Candidate must show satisfactory evidence of a high standard of general education and should also have a natural inclination for figures and accounts, though definite experience of accounts is not always essential. Previous experience of Customs work is not normally required for Supervisorships of Customs in West Africa. Where candidates with such experience are required, as for certain East African Customs appointments, or for a particular vacancy, the Home Customs Service is usually asked to recommend suitable candidates.

In East Africa the commencing salary is usually £360 per annum rising to £720, and in West Africa £400 rising to £840, with higher posts above these scales.

### APPOINTMENTS IN THE COLONIAL AUDIT DEPARTMENT.

Normally, four or five vacancies may be expected annually and they are filled as they occur.

Candidates must be over 21½ years of age and under 26.

The essential qualifications for these appointments are: a good general education, preferably at a University, a natural inclination for figures and accounts; character and ability such as would qualify a candidate in due course for the higher branches of the Service.

Selected candidates undergo a short period of training in the Home Establishment of the Colonial Audit Department, during which an allowance at the rate of £20 a month is paid.

Usual commencing salaries are between £360 and £450 per annum, rising to between £600 and £920, with higher posts above these scales.

### LEGAL.

Up to ten or twelve vacancies may be expected annually. The majority of these are open only to Barristers, but vacancies occasionally occur for which Solicitors can be considered.

Vacancies are filled as and when they occur. Candidates should normally be under 40 years of age and should have had at least four years practical experience in their profession. A vacancy occasionally occurs, however, for which recently qualified Solicitors can be considered.

The appointments which are most frequently filled from outside the Service are those for Magistrates and Crown Counsel, for which as a rule Barristers only are eligible. It is for the vacancies which occasionally occur in the Departments of Administrators General and in Land Departments that Solicitors can usually be considered.

Commencing salaries vary from £400 and do not usually exceed £700 or £750.

### MEDICAL.

Some 50 vacancies for Medical Officers may normally be expected annually; there are also usually about 6 vacancies annually for Lady Medical Officers.

Vacancies may occur at any time of the year and they are dealt with as circumstances require.

Candidates should be under 35 years of age, must be fully qualified and must be on the Medical Register. Preference is given to candidates who have held hospital or public health appointments or who have special knowledge of anaesthetics, radiology, surgery, medicine, ophthalmology, gynaecology and midwifery, diseases of the ear, nose and throat, venereal diseases, etc.

In the case of Lady Medical Officers, experience in child welfare work is almost invariably essential.

Selected candidates are normally required to undergo a course of instruction in Tropical Medicine and Hygiene before proceeding overseas.

The majority of vacancies for Medical Officers occur in West Africa, East Africa and Malaya. The vacancies for Lady Medical Officers are usually confined to West Africa and Malaya.

Commencing salaries in West Africa, East Africa and Malaya are normally £680, £600, and £700 per annum respectively.

Vacancies occasionally occur for Medical Entomologists.

## DENTAL SURGEONS.

It is very rarely that a vacancy for a Dental Surgeon occurs. The conditions of these posts vary too much for general information to be given.

## AGRICULTURE.

From 15 to 20 vacancies for agricultural officers for general investigational, advisory and similar duties, and from 8 to 12 vacancies for agricultural specialists, such as botanists, mycologists, entomologists and agricultural chemists, may be expected to occur annually in the Colonial Agricultural Departments. In existing circumstances these are filled mainly by the selection of Colonial Agricultural Scholars on completion of their training (see below). For any further vacancies candidates with University degrees in agriculture or natural science who have had opportunities for post-graduate study or research similar to those of Colonial Agricultural Scholars are most likely to be selected. In addition to the above a certain number of vacancies are usually available in connection with the inspection of crops and of produce for export. For these appointments candidates are usually required to be in possession of a degree or diploma in agriculture or horticulture. The Secretary of State is also occasionally asked to fill vacancies of a definitely horticultural nature in connection with the care of botanic gardens or fruit cultivation. For these a horticultural qualification such as that obtainable at the Royal Botanic Gardens, Kew, or the horticultural diploma of an Agricultural College, is required.

The majority of appointments are filled in July and August, but vacancies may be filled at other times. Candidates should usually be over 21½ and under 30 years of age. Commencing salaries usually vary from £400 to £500.

The Secretary of State offers annually in the summer up to 20 Colonial Agricultural Scholarships. These are post-graduate scholarships, tenable in most cases for two years, one of which is spent in this country and the other at the Imperial College of Tropical Agriculture in Trinidad or some other institution abroad. The scholarships are intended to provide a pool of men trained in agriculture and agricultural science from which vacancies in the Colonial Agricultural Service can be filled. Candidates should possess, or be about to qualify for, a degree in agriculture or natural science. A scholarship is worth £250 a year—additional provision being made for travelling, for the purchase of approved books and for training fees in any year spent abroad.

## VETERINARY.

From 8 to 10 vacancies for veterinary officers and about two vacancies for veterinary research officers may be expected to occur annually in Colonial Veterinary Departments. The majority, if not all, of these vacancies will in future be filled by the selection of Colonial Veterinary Scholars on completion of their training (see below), though urgent vacancies may be filled, as and when they occur, by the appointment of officers possessing the Diploma of Membership of the Royal College of Veterinary Surgeons or a veterinary qualification obtained in one of the self-governing Dominions. Candidates should be over 21½ and under 30 years of age on assuming their duties overseas. The commencing salary in the larger Veterinary departments is normally £800 per annum.

The Secretary of State offers annually in the summer up to 10 Colonial Veterinary Scholarships. These post-graduate scholarships, which are tenable for from one to three years, are intended to provide a pool of qualified candidates from which vacancies in Colonial Veterinary Departments can be filled. Candidates should possess, or be about to qualify for, either (a) the Diploma of Membership of the Royal College of Veterinary Surgeons or a veterinary qualification obtained in one of the self-governing Dominions or (b) a science degree of a British University or some equivalent qualification. A scholarship is worth £250 a year, with an allowance during the first year not exceeding £12 for the purchase of approved books.

## FORESTRY.

From 12 to 16 vacancies for Assistant Conservators of Forests may be expected to occur in each year. For the present candidates must possess a Degree or Diploma in Forestry involving not less than three years' study at a University, including two years at Forestry subjects. They are also required to pass a test in regard to their technical knowledge which is applied by a Board of forest experts. This Board usually meets in London early in July, so that candidates should apply in May or early in June. Selected candidates usually undergo a year's post-graduate training at the Imperial Forestry Institute at Oxford, during which they receive an allowance of £75 a term and approved expenses up to £50 in respect of practical forestry work. The commencing salaries of Assistant Conservators vary between £400 and £500.

## ZOOLOGICAL.

There are usually one or two vacancies a year, in connection with mosquito, tsetse-fly, and similar investigations, which are open to graduates in zoology or natural science who have specialised in medical Entomology. Vacancies for entomologists occur, however, rather more frequently in the Agricultural Departments. (See above). There are also occasional openings for trained Zoologists in Colonial Fisheries, Game Preservation and Museum Departments.

## ANALYTICAL.

Some three or four vacancies are usually available in each year for officers for general analytical work (i.e. as Government Analysts or Assistant Government Analysts). A candidate should usually be under 35 years of age, should be an associate of the Institute of Chemistry, and should possess a good University Degree in Chemistry. The certificate of the Institute of Chemistry in Branch E. (Foods, Drugs, etc.) is a valuable additional qualification. The duties usually include any analytical work required by Government, which falls outside the scope of the Agricultural Chemist (e.g. the examination of stores, foods, drugs, water, ores, etc., and bacteriological and medico-legal work). There are also occasional vacancies for specialists in bio-chemistry for medical and other Departments as well as for geological chemists. Initial salaries vary between £400 and £600.

### GEOLOGICAL.

Vacancies are not of very frequent occurrence, and are filled when they occur.

Candidates should be between the ages of 21½ and 35. They should possess a University Degree, preferably with Honours, ensuring a good general knowledge of geology, and also have carried out independent field investigations.

Commencing salaries vary from £480 to £600.

### MINING.

Vacancies are not of very frequent occurrence, and are filled when they occur.

The age limits are 21½ to 35.

Candidates should usually hold a Degree or Diploma in Mining of a British University or School of Mines. Practical experience of metalliferous mining may be required, though candidates are sometimes appointed immediately after graduation.

Commencing salaries vary from £480 to £560.

### SURVEY.

The annual number of vacancies for Survey Probationers varies considerably but between 6 and 12 may normally be expected.

Selections are usually made during May and June.

Candidates must normally be not less than 21 and under 28. They should either be in possession of an Honours Degree in mathematics, physical sciences, or engineering, or certain other equivalent qualifications, or may in certain cases, qualify at a special examination which is held annually in March.

Completed application forms must be submitted before January 1st by candidates who would be required to take this examination and before April 1st by other candidates.

Selected candidates usually undergo a 6 to 8 months' course of training under the Ordnance Survey Office, Southampton, followed in some cases by a year's training at Cambridge. During these courses allowances are paid at the rate of £50 a quarter at Southampton and £75 a term at Cambridge. Commencing salaries vary from £400 to £480.

### METEOROLOGICAL.

Vacancies occasionally arise in Colonial Meteorological Services and Observatories. Candidates should usually be under 30 years of age and hold a good Honours degree in Mathematics or Physics. Before taking up their duties selected candidates may be required to undergo a course of training in meteorological work of about six months duration in this country during which an allowance is paid to them.

### ARCHAEOLOGICAL AND ETHNOGRAPHICAL.

Vacancies of this nature are rare, but the Secretary of State may occasionally be asked to select a trained Archaeologist or Anthropologist for Museum appointment.

### ECCLIASTICAL.

The Secretary of State is rarely called upon to fill an Ecclesiastical appointment. If a post falls vacant a candidate is selected in some special manner with particular reference to the requirements and circumstances of the Office.

No list of candidates is kept at the Colonial Office.

### HARBOURMASTERSHIPS.

Vacancies occur very infrequently for Port Officers or Harbourmasters.

Candidates for such appointments must either—(1) have held a commission in the Royal Navy, or (2) have held a Master's or extra Master's certificate, and be an officer of the Royal Naval Reserve.

The conditions of these posts vary too much for general information to be given. The better paid posts are, however, usually filled by promotion from within the Colonial Service.

### IMMIGRATION.

Very rarely a vacancy may occur in the Immigration Department of a Colony which provides facilities for the immigration of natives of India.

Persons possessing a competent knowledge of one or more Indian languages are at liberty to apply to the Director of Recruitment, if they wish their names to be noted for consideration in case such a vacancy should occur.

### AVIATION.

The openings in connection with aviation in the Colonial Service are at present limited. Should any vacancy occur the Air Ministry would probably be asked to advise as to the selection of a suitable candidate. No list of candidates is kept in the Colonial Office.

## PERSONAL STAFF.

Appointments, such as those of Private Secretary and Aide-de-Camp, on the personal staff of the Governor of a Colony are made by the Governor concerned. It occasionally happens, however, that a Governor asks the Secretary of State to recommend a suitable officer to act in such a capacity. A candidate who wishes his name to be noted for consideration, in the event of such a request being made, should apply in writing to the Director of Recruitment (Colonial Service). As a rule only candidates who are single are selected for such appointments. Previous experience in a similar position is valuable, but not as a rule essential. For appointment as Aide-de-Camp an officer, or sometimes an ex-officer, of H.M. Forces is usually selected.

## OTHER APPOINTMENTS.

Vacancies in Departments, other than those already mentioned, may occasionally occur. Owing to their diversity, however, it is not possible to give any general account of the qualifications which might be required.

## (II) APPOINTMENTS IN THE COLONIAL SERVICE WHICH ARE FILLED BY THE CROWN AGENTS FOR THE COLONIES.

The appointments mentioned in the paragraphs which follow are filled, as and when vacancies occur, by the *Crown Agents for the Colonies*, 4, *Milbank, S.W.1.*, from whom further details may be obtained on request. Where information is given as to the number of vacancies available annually it is based upon the average requirements of years of normal prosperity. Owing to the prevailing financial depression the number of vacancies to be filled in 1931 was considerably reduced, and it is feared that this reduction in the number of vacancies must be expected to continue for the present.

## CIVIL, MECHANICAL &amp; ELECTRICAL ENGINEERING.

Up to 100 vacancies for Engineers may be expected annually. All vacancies are filled as and when they occur. The majority of vacancies occur in West Africa, East Africa and Malaya.

The commencing salaries vary from approximately £480 to £600 per annum.

Candidates should be between 23 and 35 years of age except for Probationary Assistant Telegraph Engineers, who are required to be between 22 and 26.

The qualifications required are as follows:—

## CIVIL ENGINEERS.

*Assistant Engineers on Government Railways* must be Corporate Members of the Institution of Civil Engineers or hold an Engineering degree or diploma recognised as granting exemption from Sections A and B of the A.M.I.C.E. examination, and possess experience on Railway Survey, Construction or Maintenance.

*Assistant Engineers in Public Works Departments* must be Corporate Members of the Institution of Civil Engineers or hold an Engineering degree or diploma recognised as granting exemption from Sections A and B of the A.M.I.C.E. examination, and possess experience on Public Works. It is preferred that all candidates should have had at least 2 years practical experience of good Engineering work after taking their degree or completing their Articles, but consideration will be given to the applications of candidates with less than two years practical experience provided they are in possession of one of the qualifications above mentioned.

## MECHANICAL ENGINEERS.

*Assistant Locomotive Superintendents (Railways)*.—Engineering degree or A.M.I.M.E. and apprenticeship in locomotive works, including running shed and footplate work, and subsequent experience in a railway running department, or in railway works management.

*Assistant Mechanical Engineers (Public Works Department)*.—Engineering degree or A.M.I.M.E. and apprenticeship with subsequent experience of steam, oil and gas engines, motor cars, etc.

## ELECTRICAL ENGINEERS.

Electrical engineering degree or A.M.I.E.E. and apprenticeship, with subsequent power station and mains experience.

*Shift Engineers*.—Apprenticeship to mechanical engineering and subsequent experience in power station running. In addition marine and electrical experience is desirable.

## TELEGRAPH ENGINEERS.

Thorough training in telegraph and telephone engineering and experience in a Home or Colonial Post Office Engineering Department or a British Railway. In addition, an electrical engineering degree or A.M.I.E.E. is usually required.

*Probationary Assistant Telegraph Engineers*.—Age 22 to 26 only. Degree in electrical engineering.

## DRAUGHTSMEN.

A few vacancies for Draughtsmen with the following experience may be expected annually. Candidates should be between 23 and 35 years of age.

*Engineering*.—Experience in Civil Engineer's Office, Plotting Surveys, Levels, etc. Quantities Estimating and Design of buildings, bridges, etc.

*Locomotive*.—Apprenticeship in Locomotive works and subsequent experience in a Locomotive drawing office.

The commencing salaries vary from approximately £400 to £480 per annum.

ARTISANS.

Vacancies for artisans etc., in the following trades also occur from time to time.

Foremen of Works (Buildings)  
Saw Mill Foremen

Telegraph Foremen  
" Mechanicians  
General Fitters

Candidates are required to possess previous experience and to be between 25 and 35 years of age. The commencing salaries vary from £370 to £400 a year.

ARCHITECTURAL.

A few vacancies for Architects may be expected annually.

Candidates should be between 23 and 35 years of age.

The qualification of A.R.I.B.A. is generally required, with experience in design, supervision of building operations, specifications, and the general work of an architects office. A knowledge of quantity surveying is desirable.

The commencing salaries vary from approximately £450 to £700 per annum.

MARINE.

Up to 20 vacancies for Officers and 10 vacancies for Engineers, may be expected annually.

All vacancies are filled as and when they occur.

The majority of vacancies occur in Nigeria, Tanganyika and Kenya (Lake Steamer Service)

Sub-lieutenants of the R.N.R. who are not qualified for promotion to the rank of Lieutenant are not required to resign their commissions as a condition of appointment to the Nigeria and Lake Steamer Services, but they must definitely understand that they are liable to removal from the active list for failure to qualify for promotion to rank of Lieutenant and that, if so removed, they cannot be placed on the retired list.

The qualifications for appointment to the Nigeria Marine Department are as follows:—

**Executive Officers.**—Retired officers of the Royal Navy or officers on the Active List of the Royal Naval Reserve are given preference, though these qualifications may be waived in the case of otherwise suitable candidates. Officers not possessing a Master's Certificate on joining will be subject to the conditions mentioned below. Age should be not less than 22 years or more than 28 years. Preference will be given to ex-cadets from the "Conway," "Worcester" or The Nautical College, Pangbourne.

**Engineer Officers.**—Retired Engineer Officers of the Royal Navy or Officers on the Active List of the Royal Naval Reserve or Special Reserve of or above the rank of Lieutenant, and Mercantile Marine Engineers, possessing First Class Extra or First Class Engineers' Certificates will be given preference, though as in the case of Executive Officers these qualifications may be waived subject to the conditions mentioned below. Age should be between 24 and 30 years.

**Note.**—Officers joining with First Mate's or Second Engineer's Certificate should understand that they are not eligible for promotion till they have obtained Master's or Chief Engineer's Certificates, nor will they be confirmed in their appointments unless they obtain the higher certificates within three years. Facilities for getting in their sea time so that they can sit for the higher examination will of course be given them.

Officers joining with Mate's or Second Engineer's certificate start at £400 per annum; with Master's or Chief Engineer's certificate £440 per annum rising to £720 per annum, with higher posts above this scale.

For vacancies in the Tanganyika Territory the following qualifications are required:—

**Marine Officers.**—Master's Certificate and preferably a commission in the Royal Naval Reserve. Age 22-36. Salary £480 to £600 a year.

**Chief Officers for Relief.**—Master's Certificate. Age, not under 22 years. Salary £372 rising to £480 a year.

**Second Engineers.**—At least a Second Class Engineer's Certificate. Age, not under 22 years. Salary £372 rising to £480 a year.

For vacancies in the Lake Steamer Service of the Kenya and Uganda Railway and Harbours Department the following qualifications are required:—

**Second Officers.**—Master's Certificate. **Engineers.**—Chief Engineer's Certificate. Age 25-30. Salary £390 rising to £600 per annum.

Vacancies for Artisans in the following trades also occur from time to time in Nigeria:—

Shipwrights  
Boilermakers  
Fitters.

Platers.  
Turners.  
Coppersmiths.

Candidates are required to possess previous experience and be between 25 and 35 years of age. Salary £400 to £500 a year.

## ACCOUNTING, STOREKEEPING &amp; CLERICAL.

Candidates for all the above police appointments must be of good education.

### (III) APPOINTMENTS WHICH ARE FILLED BY OPEN COMPETITIVE EXAMINATION.

#### CEYLON CADETSHIPS.

Administrative officers for Ceylon have hitherto been recruited annually on the results of the open competitive examination held annually by the Civil Service Commissioners for appointments in the Home, Northern Ireland and Indian Civil Services and for Eastern Cadetships (including Cadetships in Malaya and Hong Kong prior to 1932 (see page 0 above). The future method of recruitment for the Civil Service of Ceylon is under consideration, and the recruitment of European officers for that Service is at present suspended.

European candidates for Ceylon were required to be natural-born British subjects of pure European descent. The age limits are from 22-24. The examination is held in July and August and full information about it can be obtained from the *Civil Service Commissioners*, 2, Burlington Gardens, W.1. An examination is held simultaneously in Ceylon for the convenience of Ceylonese candidates for the Ceylon Civil Service, who may also, however, sit for the examination in the United Kingdom.

Cadets receive a salary of £400 a year increasing to £450 on passing the prescribed examination locally. Thereafter the salary scheme is:—Class IV, £500-£40-£700; Class III, £760-£40-£1,000; Class II, £1,050-£50-£1,300; Class I, the salaries of officers range between £1,400 and £1,700 a year; above that there are special appointments (not necessarily reserved for Cadets) with salaries ranging between £1,800 and £2,400.

Information about the method of appointment hitherto in force and the terms of service and conditions of life in Ceylon are contained in the memorandum Eastern No. 68—Ceylon Cadetships which can be obtained on written request to the *Director of Recruitment (Colonial Service)*, Colonial Office, 2, Richmond Terrace, Whitehall, S.W.1., but applications for Ceylon Cadetships should not be addressed to the Director of Recruitment, but to the *Civil Service Commissioners*.

## PART IV.

## RECORD of the Public Services of Officers of the several Dominion or Colonial Governments and other persons connected with the Dominions or Colonies.

The titles of "His Excellency," "His Honour," are to save space, not inserted in the following records of services.

A Governor General is styled "His Excellency" and his wife "Her Excellency." A Governor is styled "His Excellency" while actually administering a Government and an Officer Administering a Government in the absence of a Governor General or Governor is entitled to be similarly styled.

The designation of a Lieutenant Governor in a Canadian Province is "His Honour," and this is the customary designation of a Lieutenant Governor or Administrator. But the Administrators of the several Provinces of the Union of South Africa are styled "The Honourable."

Judges of Supreme Courts in His Majesty's Self-Governing Dominions are styled "The Honourable." In Colonies, etc., they usually bear the local designation of "His Honour."

The title of "Honourable" is given for life to all Members of the King's Privy Council for Canada.

In His Majesty's Self-Governing Dominions the title of "Honourable" is borne during tenure of office by all members of Executive Councils, by all members of Legislative Councils (other than Legislative Councils of Provinces of Canada) and by the Speaker of the Lower House of the Legislatures; also by Senators of the Dominion of Canada and the Union of South Africa. It is also used locally by Members of the Executive and Legislative Councils of all Crown Colonies, etc., but not by Members of the Legislative Councils of the Presidencies of the Leeward Islands.

The following in His Majesty's Self-Governing Dominions are eligible to be recommended to retain the title of "Honourable":—Retiring Executive Councillors who have served for at least three years as Minister or one year as Prime Minister. Presidents of the Senates and Legislative Councils and Speakers of the Legislative Assemblies on quitting office after having served three years in their respective offices. Senators and Members of the Legislative Councils on retirement or resignation after a continuous service therein for not less than 10 years. Judges of Supreme Courts on retirement.

Owing to the increasing pressure on their space, the Editors have been compelled to abbreviate the records of service as much as possible, and for the same reason it is impossible to continue to publish the record of an officer's services after his retirement unless he has received the honour of Knighthood.

Officers are requested to furnish prompt information of any errors or deficiencies in the record.

Insertion or correction of records in next year's list cannot be guaranteed unless particulars are forwarded in time to reach the Editors not later than 31st December.

\* Records of officers of whose death the Editors have been informed while the sheets have been going through the Press are marked with an asterisk.
